Pfc. Oscar Follis On Way Home From Korea

KOREA. —Private First Class Oscar E. Follis, son of Mr. and Mrs. Edward D. Follis, Route 4, Tahoka, recently left his unit, the 31st Infantry Regiment, on the fighting front in Korea, to be rotated to the United States.

During the most recent action, the men of Follis's unit, the 31st Infantry Regiment, attacked north of Hwachon to break up the eastern corner of the Communist iron triangle. His unit has been fighting in the Korean campaign since the Inchon landing last September.

Follis, an enlisted reservist, was called back to active duty in October, 1950.

Revival Starts At Redwine Next Sunday

Rev. H. T. Ray, pastor of the Redwine Baptist Church, announces that revival services will begin there next Sunday morning, to continue through the following Sunday.

Rev. F. E. Swanner, district missionary, will do the preaching throughout the revival. Local song leaders will conduct the song services.

Meetings will be held twice daily, at 10:30 o'clock in the morning and at 8:00 o'clock at night.

Rev. Swanner is recognized as one of the ablest Ministers of the Baptist denomination to be found in all West Texas and the members of the Redwine church are expecting a series of rich spiritual feasts. The people of all surrounding communities, including Tahoka, are invited to attend as many of the services as possible.

Portales Youth Buried At Wilson

Carolyn Kay Gras, three-year old daughter of Mr. and Mrs. H. F. Gras of Portales, New Mexico, passed away at 6:15 a. m., July 10, after being ill for several days. Mrs. Gras is the former Miss Adeline Storch who lived at Wilson for many years with her family, the E. B. Storch family.

Funeral services were held in the Wheeler Mortuary in Portales on Thursday, 10:00 a. m., and at St. John's Lutheran Church, Wilson at 4:00 p. m. by the Rev. C. C. Ehler, pastor. The Rev. C. N. Roth, president of the Texas District of the American Lutheran Church, assisted at the latter service. Burial was in Wilson Cemetery.

Survivors included her parents; a brother, Herman, Jr., 5; a sister, Mary Erlene, 8; grandparents, Mr. and Mrs. E. B. Storch of Portales and Mr. and Mrs. O. R. Gras of Yorktown; and several uncles and aunts.

Minneapolis invites MacArthur into its club of baldheads, while Herbert Hoover compares him to St. Paul.

Wilson and Southland Are Tied For First Place In Junior Baseball League

Last Sunday afternoon in the Tahoka JayCee Park, Wayside broke Southland's four game winning streak by defeating the league leaders to the tune of 18 to 7 and also by stopping their own two-game losing streak.

James Foster furlied for Wayside to register his first win of the season. He had help from Lynn Halamicek in the last frame. Wayside pounced on starter Leak and reliever Gentry for 21 hits and 18 runs with the loss going to Leak.

The Wayside pitchers were

backed by excellent fielding by their team mates.

Wilson Defeats North Side At the Wilson ball park Sunday afternoon, Wilson moved into a tie with Southland for first place by defeating the lowly Tahoka North Siders 11 to 2.

Leonard Breiger hurled shut-out ball for the last seven innings of the game to pick up his third win against one loss.

The North Siders jumped into an early 2 to 0 lead in the first frame and held the Wilson team

Infant Son of Mr. and Mrs. Smith Dies In Abilene

Johnny Don Smith, one-pound infant son of Mr. and Mrs. Don Smith of 1509 Green Street, Abilene, died at 10:15 a. m. Wednesday, July 11, in Hendrick Memorial Hospital in that city, and grave-side funeral rites were held at 4:00 o'clock that afternoon at Elmwood Memorial Park, with Dr. Albert Lunday of Hardin-Simmons University reading the service. The father is a student in Hardin-Simmons.

In addition to the parents, both sets of grandparents survive, Mr. and Mrs. Marvin Gray of Route 2, Snyder, and Mr. and Mrs. Waymon Smith of New Home in this county.

Work On New Grade School Progressing Nicely

Work on the new Tahoka elementary school building is proceeding in a satisfactory manner, the architects, Butler-Brasher, inform the local school board.

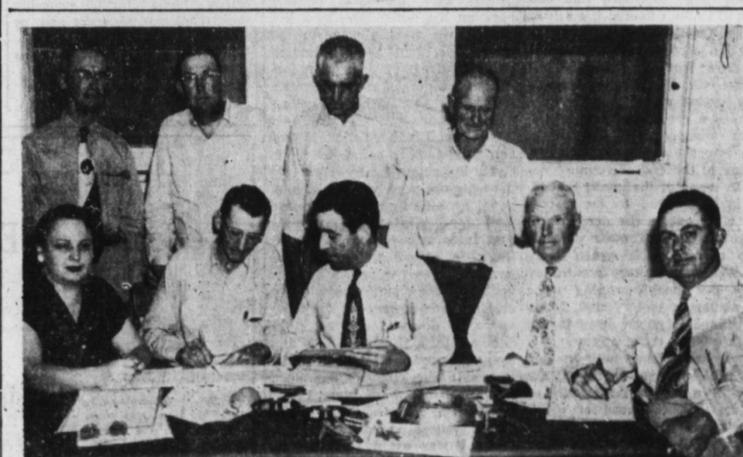

Brick work has been a little slow, but will be completed in a week or two, pending arrival of a few necessary steel beams.

Swain Construction company, the general contractor, states that they have delivery dates on all necessary materials. If these come through on time, the building may be completed on schedule.

The school board has the equipment bought, and delivery is expected on this by the time the building is completed next mid-winter.

Britain has occupied Hong Kong under treaty with China for more than 100 years.

SCHOOL VALUATIONS INCREASED

OFFICIALS SIGN FOR LOAN ON AREA PHONE SYSTEM—Officials of the Poka-Lambro Telephone cooperative are shown as they signed for a \$910,000 federal loan in Tahoka Thursday. Loyd McCormick of Tahoka, second from left, seated, affixes his signature to the loan papers as vice-president of the co-op. Co-ordinator Sam Allen of Lamesa looks on as other officials await their turns at the signing. The money will be used for the stringing of lines and purchase of equipment for the exchange areas of Gail, Lamesa, O'Donnell, Tahoka and Southland—the first towns included in the eventual nine-county system. In the photo from left to right, seated, are: Miss Robbie Milliken, notary public and office manager for the Lyntegar Electric co-operative; McCormick and Allen; Judge Tom Garrard, co-op attorney; and V. H. Wheatley, secretary-treasurer. Standing: V. R. Osburn, director; Garland Pennington, Lyntegar manager; Claude Thomas, director; and George Teague, director.

Poka-Lambro Officials Sign For Phone Loan

The first \$910,000 of an eventual \$1,837,000 loan for construction of telephone lines and buildings and the purchase of equipment for the Poka-Lambro Telephone cooperative was signed here on Thursday of last week.

Sam Allen of Lamesa, co-ordinator for Poka-Lambro, said the initial funds will be used for the construction of a rural telephone system in the exchange areas of Gail, Lamesa, O'Donnell, Tahoka and Southland. The papers signed will be forwarded to Washington, D. C., along with a request for the federal funds.

Contracts will be let soon on central office equipment. Cecil M. Hawk, Lubbock engineer, is preparing plans for the system.

Allen said a mortgage note will be filed in each of the nine counties the system eventually will serve to show the indebtedness entered into here on Thursday. The Poka-Lambro will serve Borden, Garza, Dawson, Lynn, Martin, Gaines, Terry, Hockley, and Yoakum counties.

Coupled with the \$141,000 in membership equities paid into the company by persons living within the five exchange areas to be served by the initial loan, the cooperative has \$1,051,000 available, Allen said.

Among officials attending the meeting on Thursday were Loyd McCormick of Tahoka; Judge Tom Garrard of Tahoka; V. H. Wheatley of Brownfield; V. R. Osburn of Brownfield; Garland Pennington of Tahoka, manager of the Lyntegar Electric cooperative; and George Teague of Lamesa.

Donald Ken Renfro In Soap Box Derby

The only Lynn county boy to enter the Soap Box Derby contest which is scheduled to be held in Lubbock Sunday, is Donald Ken Renfro of Tahoka, son of Mr. and Mrs. Herman Renfro.

Donald's car has passed inspection and is ready for the race in Lubbock Sunday afternoon at 1 p. m.

Derby officials who inspected the racer praised the car which has been named "H. B. Howell Farm."

Congratulations:

Mr. and Mrs. Roy Blevins of Tahoka on birth of a daughter weighing 7 pounds 10 ounces at 8:24 a. m. Wednesday in St. Mary's Hospital, Lubbock.

Build, Buy, Live in Tahoka!

Bert Brown Killed After Robbery In Grand Canyon, Ariz.

Bert Brown of San Angelo, one of a trio who took \$8,700.00 in a hotel robbery in Grand Canyon, Arizona, was shot by a special officer of the Santa Fe rail-

Bert Brown died Wednesday morning in a Flagstaff, Arizona hospital from a gun shot wound he received while trying to elude officers after a hotel robbery at Grand Canyon.

road after the robbery. Two other men, Charles Read and Jack Harris, both of Big Spring were captured a short time later.

Brown and Read had been arrested in Big Spring on June 30 and were brought to Tahoka and charged with thefts from Sham-burger & Gee Lumber company, here in Tahoka and the Shoemaker Service Station in O'Donnell. They were released on bond and are scheduled to appear here July 20 for a hearing.

Brown is reported to be in a critical condition in a Flagstaff, Arizona hospital and Read and Harris are being held in the Flagstaff jail.

Sheriff Clem stated that he had sent a "Hold Order" for the two men involved in the burglaries here, but doubted that they could make bond in Arizona. Clem stated that the chances of returning the two men back here were very slim at least for a long time.

Devonian Reached By Lynn Prospect

Top of the Devonian has been picked at Humble Oil & Refining company No. 1 Launa Thomas, Mississippian prospect in southwest Lynn county, 10 miles northwest of O'Donnell.

The Devonian was encountered at 11,150 feet. Operators were drilling ahead Wednesday below 11,237 feet in lime and chert, with no appreciable shows reported in the deep zone.

Operators planned to drill to 11,250 feet on Thursday, then take a drillstem test, of which no report had been received by The News of the outcome. The prospect is in section 35, block H, EL&RR survey.

It developed production possibilities on a drillstem test at 10,095-920 feet, when it yielded 1,435 feet of free oil, 306 feet of heavily oil and gas cut mud, and 190 feet of salt water after a one-hour test.

C. L. Steele is a patient in the Tahoka Hospital, having entered the institution Wednesday after receiving a painful injury to one of his feet.

Reagan Reed Is Injured In Auto Accident

Through no fault of his own, according to the story given to The News, Reagan Reed of this city suffered a bad fracture of one of his arms at the elbow on a highway near Shamrock in the Panhandle last Friday when his car, a Buick convertible, was struck by a truck which was meeting him on the wrong side of the highway. To prevent a collision, Reed had pulled his car practically off the highway and almost into the ditch, when the truck struck him.

He sustained the injury as stated and his car was badly damaged, but neither his wife nor their little 4-year-old son, Ronnie, who were in the car with him was hurt.

He was taken to a hospital in Shamrock, where his injuries were dressed, but physicians informed him that it would be necessary for him to remain in the hospital at least three weeks.

Reagan, 24, is the son of Mrs. Clay Reed, who is employed at the Ayer Way Cleaners here. He lives on South Sweet Street in Tahoka. His wife is the former Miss Veda Chancy, daughter of Mr. and Mrs. Ted Chancy, long-time residents of Tahoka.

Mr. Reed, according to reports given to The News, was traveling along the highway when he noted a car coming meeting him which was followed by a truck. Presently the truck pulled out onto his side of the highway in order to pass the other car. Naturally, Mr. Reed kept thinking that the truck would move back over on the proper side of the highway either in front of or behind the other car, but it seemed that it took the driver longer to pass the other car than he had calculated and he was unable to check the speed of the truck readily, for the brakes on it had become defective and would not hold. Reed tried to get out of his way but didn't quite make it. The truck is said to have continued to run on down the highway for quite a distance after striking Reed's Buick

Rotary Directors Discuss Plans For Coming Year

Last Monday night, directors, officers, and committee chairmen, of the Tahoka Rotary Club met in the PMA Office to discuss plans for the coming Rotary year.

The meeting was called by the club president, Clint Walker and he reports that a most interesting and informative meeting was held.

Equity Checks Being Mailed To Farmers

Approximately \$30,000.00 in 1950 grain sorghum equity checks have been received by the local PMA office and are being mailed today to farmers of this county. This information was released by Clint Walker, Administrative Officer of the Lynn County Production and Marketing Administration.

These checks represent the equity the farmer had in grain placed in the Government loan under the Price Support program on 1950 grain sorghum. These equity payments were calculated on track market prices as of close of market March 31, 1951 (maturity date of note) at the base of the points of Galveston and Houston, Texas; Memphis, Tennessee, and Kansas City, Missouri. Mr. Walker states that in computing the equity due the producer, the track market value of the grain at the base point most beneficial to the producer has been used.

All checks will be mailed and Mr. Walker urges farmers to carefully examine their mail during the next week. It will not be necessary for farmers to call at the local PMA office for their checks since all of them will be mailed.

Revival Planned At West Point Gin

Sponsored by the local Brotherhood organizations of the Lakeview and the Tahoka Baptist churches, a revival meeting has been announced to begin on Sunday, July 29, and continue through the week, at night, until Sunday, August 5, at the Gin at West Point, 15 miles west of Tahoka.

The services are to be held on the gin yard for the reason that there is no school building or church house at West Point and the manager of the cotton gin there has kindly offered the free use of his premises together with such facilities as are available in order to be of assistance to the neighborhood.

The Brotherhoods will provide seats and a platform and will have the grounds amply lighted. Services will be held each evening at eight o'clock. Cold drinks and eatables will be available at a near-by store.

The pastors of the two churches, Rev. Vance Zinn of Lakeview, and Rev. Lee Ramsour of the First Baptist Church of Tahoka will do the preaching. Capable leaders will conduct the song services and good music is assured.

Everybody within reach of West Point is invited to attend.

Pfc. Clyde Renfro Fighting In Korea

KOREA. —Private First Class Clyde J. Renfro, son of Eva Renfro, Route 4, Tahoka, recently helped stem the Communists spring offensive in Korea.

A member of the 32nd "Queen's Own" Infantry, Renfro's unit blunted the Red attack in their sector, inflicting 4795 casualties in a seven day period.

Major General Claude B. Ferenbaugh, Division Commander, commended the unit for "superior performances of duty, valorous combat and steadfastness of mission" and compared it to the "Bulge" and "Bastogne" of World War II.

Renfro is a member of the most traveled division in the Far East. In eight months of action, the Seventh Division has made two amphibious landings, traveled all the way from Pusan to the Manchurian border, and fought on both coasts of the Korean peninsula.

Tahoka School District property valuations are being raised this year approximately \$1,000,000 to finance operation of the school system, according to Calloway Huffaker, president of the board, and Helen Ellis, secretary-collector.

The increase is made necessary mostly because of the Gilmer-Aiken law and, the increase in students, increase in teacher salary schedules due to experience and degrees, and the general increase in the cost of everything else.

Contrary to the belief of some taxpayers, the \$250,000.00 bond issue for the new grade school cut little ice in the total, in that most of this is assumed by the State under the Kilmer-Aiken law.

School operation costs, however, have risen about \$30,000 a year since the 1948-49 session, when our schools cost the district \$155,000.00 including state aid. The budget for this year will exceed \$180,000.00 including State aid.

An overall raise in valuations has not been made, but adjustments and new assessments have raised the district valuations from \$5,000,000 to \$6,000,000, in round figures. This increase in values is calculated to bring in \$15,000, which the board considered is the minimum on which the schools can get by with this coming year.

Broken down, the raise in valuations, in round figures are as follows:

Farm lands, raised from an average of \$13.50 an acre to an average of \$16.00 per acre, a total raise in valuations of \$400,000. Even at this figure, Tahoka district farm lands are valued lower than most school districts in this area. Values in some are nearly twice this figure.

Residences, raised \$30,000. This is principally new construction. Most residents are already valued

Insects Damaging County Cotton

Careless-weed worms started damaging cotton last week in spots in Lynn county, where Careless-weeds were in the fields and to date have become wide spread in the east and south portions of the county, according to Bill Griffin, County Agent.

Mr. Griffin says in several fields the Careless worm hatched on the cotton and covered the entire fields. The Careless worm is a web worm and eats on the bottom side of the leaf without cutting through the top.

The Careless worm can be controlled with toxaphene or 2-1 spray applied at the rate of two pounds or one-third gallon per acre or ten percent toxaphene dust applied at the rate of twenty to twenty-five pounds per acre, twenty percent toxaphene dust and 3-5-4 dust applied at the rate of twelve to fifteen pounds per acre.

The cotton boll-worm is wide spread over the county, the Agent states. In the east and south portions of the county, the eggs have hatched and in many fields the infestation is heavy enough to warrant control measures. In the north and west sections of the county, the boll-worm is about one week later than in the south and east portions of the county.

On July 17, three to six eggs per one-hundred terminals were found in all fields checked in the north and west part of the county. These eggs will hatch in three to four days. Farmers in these areas should make daily checks for the boll-worm.

Cabbage looper, climbing cut worms are also present in the county but to date have not built up large enough infestation to cause damage.

As of July 10, no cotton leaf worms were in Texas.

It is never a bad day that has a good night. —John Ray.

THE AMERICAN WAY

"The Fool Hath Said In His Heart, There Is No God" Psalms 53:1

ODDS AND ENDS

(By E. I. The Elder)

After I had chopped off in the middle last week the story of my discoveries out at Tahoka Lake and had turned the first half of it in to the Linotype operator to be placed in type, I still felt dissatisfied with my work. I had not followed the stream in the North

Draw more than half way from its origin down to the Lake and did not know what the lower half looked like, nor had I succeeded in taking a single creditable picture of the "big spring" or any portion of the stream. So, on Friday, after I had turned in that first half of the story, I decided that I would go back out there and follow that stream from source to mouth even though I knew that it would involve a long and tiresome walk. I didn't invite any one to go with me, for I didn't think any one would want to take the punishment. So, I took off alone, parked my car in a shallow bar ditch along the highway near the Santa Fe bridge three miles this side of Wilson, struck out afoot armed only with my kodak, and began climbing through fences, a feat at which I have gained considerable skill lately.

fifty yards to a point where I found it possible to get down into the gorge without breaking my neck, leg, camera, or something, and slid and tumbled down. Made my way through tall grasses, salt cedars, and just plain weeds' back up to the pond. Trampled down the tall grasses that almost hid the pond, with my big feet, until I thought the camera would have at least half a chance to snap a picture. So, I snapped, and have sent the film in to see what the photographer can make of it.

Went on down to the boys "swimming pool," possibly not more than 150 yards below the big spring, and made an attempt to snap it also. That left only one un-used film in my kodak. I wanted to use it in getting a picture of the lake, especially the east bank of it. So, I hoofed it on down stream. On the way, I counted at least ten other pools of water, in the draw; but in places the bed of the draw broadened into a grass-covered marsh, and in these marshes a certain amount of the water disappeared — evidently sank into the earth, until finally, I came to the end of running water. In many of the pools, the water had appeared to be reasonably clear out in the deeper portions but the shallower portions were covered with green moss and looked unsanitary not to say filthy. But though running water was no longer to be found, I was determined to go on down to the mouth of the thing any way.

Pretty soon, I met with another delightful surprise. There was another deep dip in the middle of the draw, at the head of which there would have been a beautiful waterfall if there had been any water above the dip to go over the fall. But there was none — very little if any. But that dip was the beginning of another long pool of clear water. I walked on down stream, and as I went the channel deepened and the pools lengthened. Although there were still tall watergrasses in and along the stream and some green scum on the water, yet as a rule the water was clear and limpid — looked as pure as the snows of winter. I climbed a hill, went through another wire fence, and lo! and behold! stretched out before me was the almost snow-white bed of Tahoka Lake.

Yonder to my left were the north walls of the North draw, a great promontory jutting out into the alkali-encrusted lake. Over here to my right was the south bank of this north draw; the two giving one the impression of some

great monster about to close its jaws upon everything lying between. Down in the bed of the now sunken stream but nearer to the north jaw was a veritable wilderness of little salt cedars, green and beautiful in their marvelous setting. I leaned against a boulder at the foot of the south wall and leveled my camera for another picture, but decided that the north wall was a little too far away, so I moved out half-way across the sandy bed of the stream between its very jaws and there again leveled my machine and snapped. I hope that the result will be fine, although I am not confident, for I am not yet an expert photographer.

Thrilled at having encountered this unexpected beauty, I started briskly back upstream, starting back on the north side, as I had gone down all the way on the south side. Just a few hundred yards up-stream I encountered a abundant water again. I also encountered that fence. Looking down into the water several feet below me, I noticed that it was being violently agitated. Upon closer inspection I discovered that the agitators were myriads of minnows. Leaping into the water also as I approached were numerous toad frogs and some bull-frogs, if there is any distinction to be made between the two. Still marveling at the sight, though I had encountered numerous frogs all up and down the stream, I climbed through that fence and made my way up-stream with zest. But here the channel was deep and the banks were high. I just had to take frequent peeps at the limpid waters beneath me. Suddenly I was again surprised to see fish apparently feeding in the crystal-clear water of the stream some fifteen feet below me. I counted eight or ten of them feeding at one time along the rocky north wall of the stream. They must have been perch. I couldn't stop long to admire them, for I had neglected to bring a jug or a pitcher, or a glass of even a tin sup along with me, and although water was plentiful I hadn't had a drop to drink. My tongue was about to cleave to the roof of my mouth; all of which made me sympathize with that hunted, panting stag which in the picture, had come to the water-brook to drink. Well, as soon as I got to running water that was within my reach, I dipped up some of it with my hand like a Gideonite and drank avidly. And

Subscribe to The News now.

then, when I got up to that boys' swimming hole, I discovered a spring that I had not seen before, lying back under a ledge of rock and earth, issuing generous quantities of cool, pure, life-giving waters. The spring apparently was being well kept, and I drank heartily. It was a life-saver.

One more word about this north draw at Tahoka Lake. It looks more like the head of some bold river like the Brazos or the Colorado, especially along the lower half-mile of its course, than do the heads of these rivers themselves.

Another word: since this lake has no outlet, I wonder where those fish and those minnows came from. Have they been propagating there ever since this lake was formed or ever since these springs burst forth, probably many thousands of years ago, or did somebody stock the freshwater stream with fish at some later period of its history?

I only ask the question. I don't

undertake to answer it.

Since the south half of Tahoka Lake has been entirely cut off from the north half by a fence running east and west across the lake, it can not be easily approached even by a footman from the north lake. It can be approached in a car, however, from

another angle, but since the way is rather obscure, my good young friend, Duwayne Townsen, who lives in that vicinity, volunteered a few weeks ago to chaperon me down to it. I didn't realize how great a service he had proposed to render until after we had got to it. (Continued)

Guard Your Earnings Against the Pickpocket Year

Many hands reach into your pocket without you knowing it. When your earnings are good it is easy to get a false sense of security. Later you find out there is nothing left of all your abundance.

Constant watchfulness is needed. Your best safeguard is to save regularly—and the best place to save is at The First National Bank.

See us for automobile and farm machinery loans.

The First National Bank

of Tahoka, Texas
MEMBER OF F. D. I. C.

This one says You've Arrived

HERE pictured is an automobile that may well be the fulfillment of any man's dream of a fine motorcar.

For you've a right to expect, when you pay a fine-car price, that your money will buy more distinction, more comfort, more performance than are to be found in vehicles of lesser worth.

So mark well the things that a ROADMASTER offers.

No other car on the American scene has a prouder bearing.

No other automobile has more spacious dimensions, more luxurious

comfort, or finer appointments.

No other car has a ride more serenely smooth on curve or straightaway, highway or byway.

And no other car, at ROADMASTER'S price or above, has Dynaflo, and the supreme command of every traffic condition which it provides.

So you, at the wheel of Buick's biggest and best, have a right to feel distinguished.

But there's a joy of possession which goes deeper than visible things.

There's the feel of a power plant as brilliantly eager as this great car's valve-in-head Fireball Engine — and the satisfying companionship of a brawny traveler instantly responsive to your every wish.

And there's one thing more, which only ROADMASTER can give you in such generous measure. That is the pride of a wise investment, based on the fact that this car stands alone in price per pound, among fine cars similarly equipped.

So why not take that very important first step — and come in and see us soon?

Equipment, accessories, trim and models are subject to change without notice.

Your Key to Greater Value

**No Smallpox Has
Been Reported In
Texas This Year**

AUSTIN, Tex., July 18. —Not a single case of smallpox has occurred in Texas this year, said Geo. W. Cox, State Health Officer. Unfortunately, the fact that

we have had no smallpox does not mean we are immune for all time.

"Smallpox can strike again. For example, in 1947, an infected individual from Mexico innocently carried the disease to New York City. The result was 13 cases and three deaths, the first deaths in 35 years. Service men returning

from the Orient caused an epidemic of 68 cases and 20 deaths in Seattle in 1946.

"In spite of Texas' apparent freedom from smallpox, vaccination of every child before he is a year old and re-vaccination every three to five years is imperative. This is the only sure way to prevent the disease.

"With the speed of present day travel a person harboring smallpox could alight in our midst at any time. If the public becomes lax concerning vaccination that a single case could spread as happened in New York and Seattle." Dr. Cox asks, "When were you and your family last vaccinated against smallpox? Would you and your children be safe if exposed to this disease?"

**4-H's Keep Tractor
Wheels Turning To
Boost Production**

CHICAGO. —Facing a shortage of farm labor, curtailed supply of equipment and need for greater production of food and fiber, 4-H members in Texas and 46 other states are stressing efficient operation of farm tractors, according to G. L. Noble, director of the National Committee on Boys and Girls Club work.

In Arkansas, New Mexico, Oklahoma and Texas, 10,000 members are receiving training in the 1951 4-H Tractor Maintenance program, in which they learn to service their tractors and operate them safely, Noble said. The program

is being conducted in these states by the Cooperative Extension Service for the seventh consecutive year.

Medals, trips and scholarships are provided in the four states by the Stanolind Oil and Gas Company which also allocates funds for expenses of volunteer local 4-H Club leaders who attend training clinics.

Seven other oil companies provide similar awards in their respective territories throughout the

THE LYNN COUNTY NEWS,

Warm Today? Cook With Cold!

As any housewife knows, people don't stop eating when the temperature soars. "Three squares" still have to go onto the table, no matter what the thermometer says. But people do like food that is different from their normal winter fare. Tempt their appetites . . . and spare the cook. Use your ice-box instead of your stove. You can feed them with true economy, because cooking with cold makes tempting dishes out of the most meager left-overs. You can feed them just as healthfully, maybe more so, because the markets are full of garden-fresh vegetables and fruits. The important meat elements, the vitamins and proteins we need all the year round, can be added easily and deliciously with Bovril, the British beef extract. American women are fast learning the many uses of this high beef concentrate. In England, where meat is still a rarity, Bovril has proved a priceless means of adding both beef nutriment and beef flavor to meatless meals. This cold-cooked vegetable aspic makes good use of those half-portion left-overs that are such a nuisance in meal planning. With the addition of raw vegetables — celery, raw carrots, sliced or cubed tomatoes, a little minced onion — it makes a hearty and appetizing hot weather meal.

Vegetable Round-Up

1 package plain gelatin 1 tablespoon Bovril (or 1 cup cold water 3 Bovril cubes)
1 cup boiling water 1 teaspoon lemon juice
1/2 teaspoon salt 2-3 cups vegetables
Dissolve the gelatin in cold water, add boiling water and Bovril, stir till dissolved. When cool, turn into wet mold, add vegetables and set to chill. To serve, set mold upside down on serving plate, cover with hot cloth. Center of mold may be filled with cole slaw, chicken or fish salad. Serve with mayonnaise or tart boiled dressing. Serves 4 to 6.

A Needle Sewed Up Her Career

This engaging smile belongs to one of New York's most charming—and busiest—residents. She is Elizabeth Bryan, 20-year-old Salt Lake City girl who won a grand prize in the 1949 "Make It Yourself With Wool" Home Sewing Contest sponsored by The Wool Bureau and the Women's Auxiliary of the National Wool Growers Association. Miss Bryan is shown here studying at New York City's Traphagen School of Fashion, to which she won a year's scholarship with an evening ensemble of white virgin wool crepe of her own design which she modeled in the third annual home sewing contest.

"The United Nations has the world by the tail," asserts a columnist. We are reminded of the story of a boy who had a calf by the tail. When he was asked where they were going, he replied, "Ask the calf."

CARD OF THANKS

I take this means of thanking my friends and neighbors for all the visits and for all the help of various kinds which they have rendered during my illness. Also I want to thank the Baptist Men's Bible Class for the beautiful pot plant which they sent to my room. I hope to be back in the class soon. God bless you all.—J. L. Cunningham.

Robert S. Kerr, U. S. Senator from Oklahoma: "I just don't see why every kind of business (monkey or serious) has to be mixed with a drink."

Dove Hunters May Be Restricted To Afternoon Hunting

AUSTIN, —Possibility that Texas hunters may be restricted to afternoon shooting during the coming mourning dove season was indicated Friday at a meeting of the Game, Fish & Oyster Commission.

Word received by the Commission from the Federal Fish & Wildlife Service, which sets the seasons on all migratory fowls, was that afternoon hunting was being considered by the Federal authorities.

This news came after the Commission had recommended the same dates, shooting hours and bag limits for the north zone on mourning doves and had recommended a later season, beginning on November 15 for the south zone.

The Commission acted in accordance with a poll taken of Texas sportsmen on their preferences for the mourning dove season. Preponderance of north zone opinion was to retain the present September 1 opening date, while the bulk of south zone hunters responding to the poll wanted a later date than the present October 20 opener. Many from the south zone asked that the mourning dove dates parallel the quail season beginning on December 1. The Commission recommended the whitewing season in the Rio Grande Valley be on two successive weekends instead of on September 15, 17 and 19 as at present. The hunting dates would be Friday, September 7, and Sunday, September 9, and Friday, September 14, and Sunday September 16, with no shooting on either Saturday in between the Friday and Sunday dates. The shooting hours would be from 4 p. m. to sunset.

The Commission got pessimistic word about prospects for zoning Texas for the 1951 waterfowl season. The Executive Secretary said the Fish and Wildlife Service has not yet indicated possible dates for the fall duck and goose shoot but did indicate disfavoring the zone plan because of the pressure from other states, with New York and California requesting three zones and even little Delaware seeking two zones.

The Commission then voted to recommend that the Texas waterfowl season begin not earlier than November 10. The dates last year were November 3 to December 17. No indication was received to bag limits and length of the season on waterfowl.

The Commission changed the deer season in the nine counties west of the pecos from November 6 to 11 inclusive to November 20 to 25 inclusive, after receiving requests from both sportsmen and landowners. The Commission also reduced the bag limit from one male white-tailed and one male mule deer to one male deer.

The deer season for the state at large is set by law and runs from November 16 to December 31, with two buck deer the limit.

The Commission authorized regulations for the new six county area brought under regulatory control by a recent state law. A 15-day deer season was ordered beginning November 16, with one buck deer allowed. The wild turkey season would run concurrently, with a limit of one gobbler. The state law on wild turkeys permits three gobblers. The quail season in the six county area would be the same as the state at large but the possession limit would be cut from 36 to 24. The new regulatory area comprises Jack, Young, Palo Pinto, Stephens, Hood and Erath counties.

People who have had cataracts removed from their eyes can see ultraviolet light which cannot be seen by those with ordinary vision.

SMALL FRY FASHION

This winsome miss wears the latest thing in sun fashions for the small fry. Her Katie Greenaway playsuit and separate wraparound skirt of cotton pique, printed with a gay juvenile design. National Cotton Council fashionists report that pique is as popular in children's clothes as in feminine fashions this summer.

LOVELY IN LACE!

Swim suits of cotton lace have made quite a splash in the fashion world this season. Shapely Dorothy Hart, pretty new Warner Bros. star, makes a fetching picture in one of the glamorous new cotton lace swim suits. The Hollywood newcomer currently is being featured in "I Was a Communist for the FBI."

More ice cream is manufactured in Pennsylvania than in any other state.

Otto Griebing, circus clown: "Comedy is sadness."

Changes Made On Pink Bollworm Cotton Infestation

AUSTIN, July 18, —During the past week the Texas Commissioner of Agriculture made two changes in the Pink Bollworm regulations for Texas. One of the changes widely expands the designated heavily infested Pink Bollworm Area of the State. The other change greatly eases the movement of cotton seed originating in the heavily infested area.

Formerly, only the counties of Willacy, Cameron, Hidalgo, and part of Starr in the Lower Rio Grande Valley were declared to be heavily infested with Pink Bollworm. Under the new regulation the heavily infested counties are thirty-nine in number, running from the Coastal Bend Area westward along the border to El Paso.

The other change which allows cotton seed to move more freely and still be under appropriate safeguards, provides that such seed may move freely among counties in the heavily infested area with only one gin sterilization treatment instead of having to have two such treatments. Also, if they are not going out of the heavily infested area to be used for planting seed, and are going to a sterilization treatment,

only one such treatment is required before they leave the heavily infested area.

The Commissioner accredits the cotton industry and the federal agencies as being very helpful in assisting with the above revisions which may be obtained from the local gins and the inspectors.

stock pen was one of the objects of my visit, for I had been told that it had been constructed there first as a sheep-cote away back about the year 1852. But I will have to get Frank, the real historian of this newspaper force, to explain to you what use anybody had for a sheep-cote out at Tahoka Lake 99 years ago.

Well, having pulled the trigger that is supposed to have snapped a picture of the old stock-pen, we climbed back into the seat of my faithful little old black buggy—but wished that it had been into the saddle on some faithful little old cow pony—and followed a dim, winding trail through the mesquite bushes a hundred yards or so to another wire gate, went through it and on down to a point where we could go no further, stopped again, dismounted, rolled under another fence and fell off into the south draw. There was the lake to our right as we faced the north and the springs in the south draw to our left. We took the left hand and soon found one nice spring and three boggy places where springs ought to be. The nice spring at some time or another had been dressed up in an oil-barrel coat set around it, upright, back under the back so as to impound the spring water where it would be out of reach of thirsty cows. The water looked fine, but Duwayne and I did not sample it, for there were at least a half-dozen dead bull-frogs either floating at the top of the sparkling water or reposing serenely in the depths of their watery grave. The nice little branch of water emanating from this spring and three little streams of water from the three bogs were being impounded in a surface tank created by the construction of a sizeable dam across the draw a little lower down and just above the alkali water line. The cows presumably were making no protest against the possible contamination of their water supply from the decomposing bodies of these unfortunate and lately deceased amphibians—at least the cows had gone on no water strike—for they all appeared to be fat and sleek. Those three bogs could be dug out, cleaned up, walled up or likewise encased in barrels, and converted into nice, attractive, and refreshing springs themselves, we are sure, if anybody had a mind to do it.

A pretty picture of the eastern shore and the slopes and cliffs above it could have been made if the sun had been at our backs instead of in our faces; but he just would not speed up for our special benefit, and so we came away without a single picture except that of the old stock-pen, which doubtless is an historic structure but not an elegant one by any means.

I am grateful to Duwayne for guiding me down into and helping to get me out of this, south half of the lake, for it too could be made as pretty as a peach by a little attention.

This south draw may have been the place where the Indians us-

COTTON CHUTES DELIVER THE GOODS!

Flying boxcars drop tons of rations and gasoline to embattled UN troops with new cotton muslin square cargo chutes. Made from strips of cotton muslin, the chute can deliver 500 pounds of cargo from a plane traveling 175 miles per hour. The new type of muslin chute replaces the old 24-foot rayon cargo chute that had a capacity of only 300 pounds. The added strength comes from the cotton chute's unique strip design.

ually camped, especially the squaws and the children, for there was plenty of water here for domestic purposes, and the buffaloes doubtless used the north draw as their principal watering place because of the abundance of water there. Furthermore, it is believed that the Indians often visited the great sand hill near by, south of the lake, and possibly buried their dead there. However, we will not speculate further regarding these matters but will leave them for the archaeologists and the historians to settle.

One thing we do know, and that is that Tahoka Lake is the most historic one in all this area because of its abundance of fresh water.

We do not know how many centuries the buffaloes have been roaming these plains—at least I do not—but whenever it was that they first came they had to have water, and Tahoka Lake was probably one of their watering places from the very start.

The Indians doubtless followed close upon the heels of those "thundering herds," for out on these boundless prairies buffalo meat was the chief diet of the Indian, and hence Tahoka Lake early became one of their camping grounds.

Then eventually came the buffalo hunters—white men—slaying buffaloes by the thousands, and many of them most certainly were slain at and near Tahoka Lake.

With the buffaloes at length practically exterminated and the Indians subdued and placed on reservations, came lastly the cow man, and Tahoka Lake became the center of one of the earliest ranches established on the South Plains, for cows too drink water.

So, an abundance of fresh water—not in the bed of the alkali lake itself but in the marginal draws—has made Tahoka Lake popular with man and beast through many generations.

It is still furnishing water and grass for a ranchman's herds, and fat cattle from that ranch are being shipped in large numbers each year to help feed the world.

It was the Comanche Indians mostly who used to homologue at Tahoka Lake and they probably planned out there many a raid on the whites further east. I do not know whether old Chief Nocona and his white squaw, the grown-up Cynthia Ann Parker, and their little son Quanah, ever resided at Tahoka Lake or not, but they probably did at intervals. But this column already is getting too long. I have a lot of stuff yet that I intended to put into this column this week, but it will just have to wait. Maybe it is not important any way, but it directly or incidentally pertains to Tahoka Lake, and so possibly you will enjoy some of it at a later date. Goodbye, folks, but not Farewell.

Willa Faye Akin Engaged To Petersburg Man

Mr. and Mrs. J. F. Akin, of Petersburg, announce engagement of their daughter, Willa Faye, to James Wilson, son of Mr. and Mrs. Bob Wilson of Route 1, Plainview. The bride-elect is a graduate of Muleshoe High School, and attended Eastern New Mexico University in Portales. Mr. Wilson, a graduate of Petersburg High School, attended Texas Technological College and a commercial art school in Dallas. He is a partner in the Mayo and Wilson Agency at Petersburg. The wedding date is set for October 7, in the Petersburg Methodist Church. The bride-elect and her parents formerly lived in Tahoka.

MANY TAHOKA GIRLS ATTEND PLAINS BAPTIST ENCAMPMENT THIS WEEK

Thirty-two junior girls of the First Baptist Church and their eight sponsors attended the annual encampment of the Plains Baptist Assembly in session Monday, Tuesday, and Wednesday of this week on the encampment grounds in Blanco Canyon between Ralls and Floydada.

Seven Intermediate girls and two sponsors left for the camp Wednesday morning to attend the Intermediate girls' meetings to be held from Wednesday until Friday.

This makes a total of 49 women and girls attending this week's meetings, and two or three others drove over in their cars to take girls but these women did not remain for any of the services.

This encampment is owned and operated by the Baptist churches of district Nine, numbering some 130 churches in about twenty Plains counties.

SHERIFF'S POSSE TO RIDE IN O'DONNELL

According to Sheriff "Slick" Clem, the Lynn County Sheriff's Posse will compete at the O'Donnell Rodeo parade all three of the days, July 26, 27, and 28.

The Posse has competed in Rodeos at Santa Fe, N. M., and at Big Spring this past week, but the outcome was not known to The News Thursday.

HICKERSONS OBSERVE WEDDING ANNIVERSARY

On Thursday of this week, Mr. and Mrs. G. W. Hickerson quietly observed the 55th anniversary of their wedding, that happy event having taken place in the home of the bride's parents, Mr. and Mrs. Jim Edwards, at Crawford, Texas, on July 19, 1896. The bride's name up to that time having been Miss Laura Edwards. The marriage rites were read by the couple's pastor, Rev. J. M. B. Gresham.

The couple did not invite in a lot of friends Thursday and have a big dinner in celebration of the event, punctuated with songs about "That silver-haired Daddy of Mine," and "When You and I Were young, Maggie," or "An Old Sweetheart of Mine," "Old Baldy," or any other tuneful selection that was popular back in the "Gay Nineties." No, they didn't have anything like that Thursday, but when Mr. Hickerson called at The News Office Wednesday afternoon and dropped a word or two about the happy event of 1896, one could easily tell that old Wash was still just as proud of Laura as if the wedding had occurred just yesterday. Well, Wash and Laura and the children came out to Lynn county ten years later, 1906, located at Three Lakes, and have resided there and in Tahoka ever since.

If every couple who get married in this old world would be as genuinely in love with each other as were Wash and Laura, and would keep it up as they have done, there would not be one divorce in Texas in a hundred years.

COOPERS RETURN FROM STOVALL HOT WELLS

Mr. and Mrs. E. J. Cooper and her mother, M. S. Myrtle Grisham of Riverside, California, who is visiting here, returned Monday from South Bend in Young county, where they had spent several days taking baths at the Stovall Hot Wells. Mr. Cooper had recently developed some ailment that had been giving him much trouble. Mrs. Grisham also took the bath treatments. Mrs. Cooper says that she was kept busy waiting on Zeke. He came back much improved. The News is informed.

KENTUCKIANS VISIT THE HARPERS HERE

Mrs. Eva Gardner of Dunbar, Kentucky, and son, Rev. and Mrs. Drexel Hankins of Bremen, Ky., and Rev. Hankin's daughter, Mrs. Marjorie White, were the guests of Mr. and Mrs. Claude Harper and family last week. Mrs. Gardner is Mrs. Harper's sister.

This was her first visit to Texas. Sorry they found it so dry and hot out here.

Many Cases Filed In City Court

Eleven cases have been filed in the city court since our report last week.

Seven of these are for speeding; one for driving without a driver's license; one for speeding, with no driver's license, and for running a red light; one for drunkenness; and one for running over two stop signs, and running a red light, and having no driver's license.

All of the speeders except one or two entered pleas of guilty before City Judge Russell McGee and paid fines of \$10.00 and cost. The drunk pleaded guilty and paid a fine of \$15.00.

Mexican Fined In Liquor Violation

Deputy Sheriff Chester Roan and Night Policeman Dwayne Jones picked up two Mexican men and two women in a pickup here at 4:50 a. m. last Saturday and captured quite a large quantity of beer and wine: 240 quarts of Grand Prize Beer, 19 cases of can beer; and 24 45 quarts of wine.

The prisoners and the liquors were turned in to the sheriff's office, and one of the Mexicans, Guadalupe G. Hernandez pleaded guilty in the county court to the offense of transporting intoxicating liquors unlawfully. Judge Mathis assessed a fine of \$250.00 and costs, which were paid.

THE JACK FENTONS ARE TOURING THE MIDDLE WEST

Many Tahoka people are receiving cards mailed from along the trail of the Jack Fentons as they tour the Middle West states, expecting to go on into Canada.

Traveling with Mr. and Mrs. Fenton are their daughter Mary Louise, and Dot Durham, daughter of Dr. and Mrs. K. R. Durham. Cards have been received from Kansas; from Lincoln, Nebraska, where they visited the Capitol; from Iowa; from St. Paul, Minn.; and from Wisconsin, in which state Jack did some fishing at the Fin and Feather Lodge, Moss Lake, Hayward, Wis.

They expect to see parts of Canada and to return home by a different route the latter part of July.

DIXIE H. D. CLUB NEWS

The Dixie Home Demonstration Club met July 18 in the home of Mrs. Bertram Hatchell.

Miss Hard, fourteen members and five visitors were present. Miss Hard made, baked and served delicious quick rolls to those present.

The finance committee is sponsoring a "Grab Box" for the next meeting, August 8, with Mrs. W. C. Muffaker, Sr. All members are urged to be present.

The hostess served punch, cookies, and mints to all present. — Reporter.

Conservation For Production In '52

This summer is a good time to start making plans for the soil and water conservation practices to be carried out in 1952, says R. A. Kahlich, chairman of the Lynn County PMA committee.

As fields are cultivated, crops harvested and pastures used, the farmer can get specific ideas of what is needed to protect the soil and what should be done to build it up to meet the Nation's needs for the years ahead.

In this county this year many farms that need terracing and contouring will be planted in grain sorghums. This will enable the farmer to get his crop harvested early this fall and give him plenty of time to get his terraces constructed and worked into shape for next years crops.

The effectiveness of conservation practices which are being carried out this year can be checked and plans made to build on the foundation of the past and present conservation accomplishments.

By looking ahead and planning for 1952, chairman Kahlich suggests, farmers will be able to make full use of the Agricultural Conservation Program. Practices can be selected and adapted to correct the most urgent deficiencies, and plans can be made to use other services available through the Production and Marketing Administration. Information on conservation practices, price supports, farm storage, construction loans, and other PMA responsibilities can be obtained at the county PMA office in Tahoka.

Conserve Water To Increase Production

When it comes to stepping up production to meet needs, on many farms it is as important to hold the moisture on the land as it is to keep the run-off from taking the soil with it, says R. O. Nettles, Vice-Chairman of the Lynn County PMA Committee.

As the chairman explains, the additional moisture held on the land through conservation practices often makes the difference between a poor crop and a good one—sometimes the difference between no crop at all and a good one, he said.

When increased production is so urgently needed to strengthen the national defense, this factor alone becomes all the more important.

Mr. Nettles said that in most instances the concern is over losing the soil and little attention is given to the water that leaves the land. And yet, he points out, often without the moisture the soil is of little value in producing the food and fiber needed to help build a strong nation.

He points out that the soil and water conserving practices for which assistance is provided under the Agricultural Conservation Program are primarily aimed at saving and improving the land and that moisture conservation is an important by-product. Such practices as establishing a good protective cover with grass and legumes, the construction of terraces, contour farming, and many others fall in this class.

In the chairman's words, "Maintaining and improving the productivity of the land is the purpose of the Agricultural Conservation Program and this means conserving soil and water. Often one is as important as the other."

WILSON LUTHERAN LEAGUE HAS OUTING

The Luther League of St. John's Lutheran Church, Wilson, spent an enjoyable evening at MacKenzie State Park, Lubbock, July 15, as guests of the Slaton Luther League.

Swimming was enjoyed by the group after which home-made ice cream was served in the park. Games and singing concluded the evening.

Luther Leaguers from Wilson attending included: Eileen Maeker, Geraldine Hagens, Maruta Grinbergs, Gilbert Steinhauser, Eunice Bruedigam, Cordell Hagens, Helen Steinhauser, Eugene Bruedigam, and Rev. C. C. Ehler.

BUGOGRAPHY

Just as the traveler was writing his name on the register of the hotel a bed-bug appeared and wound its way across the page. The traveler grimly eyed the bed bug for a few moments and then exclaimed, "I've been bled by Duaneburgh fleas, bit by Maria-ville spiders and chased by Delanson constables, but I'll be darned if I was ever before in a place where the bed-bugs looked over the hotel register to find out where your room was."

THE SERVERS REPORT A GREAT FAMILY REUNION

Judge and Mrs. P. D. Server and their daughter, Mrs. Florine Best, and her two children, Carroll and Gloria, all of Tahoka, and their son Walker Server and his wife and their two children, Kay and David, of Welch, Dawson county, returned Monday from Temple, where on Sunday, in an attractive park, they attended a family reunion of the Walker and Server families. Including a few friends who also attended the reunion, the number of merry-makers counted up to eighty-two. Judge Server reports.

The Servers came to the Plains from Milam county, and they left many Walkers behind them, some of whom are there yet. We guess the kinfolks down there must have kept Grandpa Server up pretty late at night, for we caught him nodding in his office chair Tuesday. He usually wakes up pretty quick, however, when some officer brings in a customer.

THE GEORGE SMALLS TO ATTEND REVIVAL SERVICES NEAR RUIDOSO, N. M.

Mr. and Mrs. George Small left Wednesday to attend an expectedly great revival meeting to be held in Nogal Canyon some 40 miles northwest of Ruidoso, N. M., which was to begin the latter part of this week and to run probably two weeks.

This revival is to be conducted on the same plan as the Bloyse Revival conducted annually out in the Davis Mountains of Texas. Leading Ministers of the various evangelistic denominations are to do the preaching. It is sponsored by the cattle-men of the area, and people go long distances to attend it.

The Smalls expect also to visit friends in Ruidoso before returning to Tahoka.

DURHAMS VISIT DAUGHTER IN PLAINVIEW SUNDAY

Dr. and Mrs. K. R. Durham and son Kenny visited in Plainview Sunday with their daughter Margaret, who is a student in Wayland College and will be a Junior student next year. She is majoring in Journalism.

This summer Margaret is working with the Plainview Herald and Daily News as society editor. She enjoys both her college work and her newspaper work very much.

Robert and Myrtle Smith of Dallas have been here this week visiting her parents, Mr. and Mrs. E. J. Cooper, and other children of the Coopers together with their families. Mrs. Smith, the former Myrtle Cooper, was reared here and for a time operated a beauty-shop here. Her husband is now connected with The Lone Star Truck Packing company, or some such name, and owns an interest in the business.

NEWS FROM THE TAHOKA HOSPITAL—

There is not much very gratifying news coming from the Tahoka Hospital this week.

Mrs. Valerie Wells Harvick's condition remains very serious in spite of numerous blood transfusions which have been given her.

The condition of Mrs. J. F. Rogers of Newmoore, who entered the hospital at 1:00 p. m. Sunday, apparently was not quite so good Wednesday of this week as it was the day before, according to members of the family.

The condition of W. G. (Bill) Clarke, local manager of the Southwestern Public Service Company, who entered the hospital at 7:35 p. m. Friday of last week, suffering from a heart ailment and complications seems to remain about the same. Apparently he has been unconscious most of the time since he was brought to the hospital.

Deanie Edwards, 15, daughter of Mr. and Mrs. E. R. Edwards, who underwent appendectomy about 7:00 o'clock Sunday evening and who had been reported as a doing nicely, was said to be feeling not quite so well Wednesday, but there was nothing alarming whatever about her condition. She will probably be out of the hospital within a few days.

J. L. Reese suffered another heart attack Sunday night as he was about to leave the church for his home, but he has been under treatment at his home most of

Coach and Mrs. "Jake" Jacobs and their little daughter, Vickie Lee, returned Tuesday from a few days vacation spent away out on the upper reaches of the Red River in northern New Mexico. Jake says that the lake water out at Eagle Nest a few miles this side of his camping grounds was getting pretty low. There were plenty fishermen there but they were not catching any fish. They had to hurry back home but he says that Frank and Mae pulled out at the same time for cool and scenic points in the mountains of Colorado. He may have some big fish stories to relate when he gets back.

the time since, having been brought to the hospital for a few hours Wednesday afternoon for observation.

The condition of J. L. Cunningham, who has been under treatment at his home for the past three or four weeks, seems to be slowly improving.

The Lazy J Ranch's 1950 Ford F-3 Express with POWER PILOT was one of more than 5,000 Fords in the nationwide, 50-million-mile Ford Truck Economy Run.

George Stephens of the Lazy J Ranch says: "The low cost my Ford Truck showed in the Economy Run speaks for itself. I got regular service checkups from my Ford Dealer."
*Address furnished on request

"My ranch 'workhorse' runs for only 2 2/3¢ a mile!"

Ranch owner George Stephens proved for himself, in the big Economy Run, just how little it costs to run his Ford Truck!

"The Lazy J's Ford Express did itself proud in the Ford Truck Economy Run," says Stephens. "Daily records kept during the entire six months show that our Ford Truck ran up a total of 5,109 miles. My out-of-pocket expense for gas, oil, maintenance and repairs was exactly \$123.51... about a \$20 bill each month... only 2 2/3 cents a mile!"

The Ford Truck POWER PILOT carburetion-ignition system is one reason why Ford Trucks cost so little to run, in ranch work or any work. The POWER PILOT gives you the most power from the least gas. In the low-price field, only Ford has it!

CITATION BY PUBLICATION The State of Texas To: The unknown stockholders of the Temple Trust Company, a defunct corporation, and their heirs and legal representatives, Defendants, Greeting: You are hereby commanded to appear before the Honorable Dis-

trict Court of Lynn County at the Court House thereof, in Tahoka, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 13th day of August A. D. 1951, then and there to answer Plaintiff's Petition filed in said Court, on the 29th day of June A. D. 1951, in the cause, numbered 1958 on the docket of said court and styled S. R. Schooler, Plaintiff, vs. Unknown stockholders of the Temple Trust Company, a defunct corporation, and their heirs and legal representatives, Defendants. A brief statement of the nature of this suit is as follows, to-wit: The State of Texas County of Lynn, In The District Court of Lynn County, Texas, TO SAID HONORABLE COURT: NOW COMES, S. R. Schooler, hereinafter called plaintiff, who resides in Lynn County, Texas, complaining of the unknown stockholders of the Temple Trust Company, a defunct corporation, and their heirs and legal representatives, whose names and residences are unknown to plaintiff, and for a cause of action plaintiff would respectfully show the court the following:

1. On the first day of January, 1951, Plaintiff was, and still is, the owner in fee simple of the following described premises situated in the County of Lynn, and State of Texas, and known and described as being: Approximately 2.75 acres of land out of Section No. 53, in Block No. 8, E.L.&R.R.R. Co., in Lynn County, Texas, and being described by metes and bounds as follows: BEGINNING at a point in the North line of said Section 53, that is 2278.6 feet West of its

Northeast corner, same being in the West line of U. S. Highway No. 87, and at a point in the South line of a paved county road running East and West along the North boundary line of said Section 53, where such paved county road intersects said U. S. Highway No. 87; THENCE West along the South boundary line of said paved county road, a distance of 430 feet to the Northwest corner of the tract herein conveyed and being a point where said paved county road intersects a paved county road cut-off which latter road runs in a Southeasterly direction; THENCE in a Southeasterly direction along the Northeast side of said paved county road cut-off, a distance of 420 feet to a point where said paved county road cut-off intersects said U. S. Highway No. 87; THENCE in a Northeasterly direction along the Northwest side of said U. S. Highway No. 87, a distance of 454 feet to the place of beginning, and containing approximately 2.75 acres of land.

2. On such day also, Plaintiff was in possession of such premises, and afterwards on the 2nd day of January, 1951, the defendant unlawfully entered upon and dispossessed him of such premises and withholds from him the possession thereof. Defendants have occupied and used such premises under such unlawful possession for a period of six months, and the rental value thereof during such occupancy is \$300.00, in which amount by virtue of such wrongs the defendants are justly indebted to plaintiff, but though repeated demand for the payment thereof has been made of defendants by plaintiff, defendants have failed and refused and still fail and refuse to pay the same to plaintiff's damage in the sum of \$300.00. WHEREFORE, Plaintiff prays that the defendants and their heirs and legal representatives be cited by publication to answer this petition, and that plaintiff have judgment for title and possession of the above described

premises, for his damages, for costs of suit, and for such other and further relief, either in law or in equity, as he may show himself justly entitled to receive, as is more fully shown by Plaintiff's Petition on file in this suit. The officer executing this process shall promptly execute the same according to law, and make due return as the law directs. Issued and given under my hand and the Seal of said Court, at office in Tahoka, Texas, this 29th day of June A. D. 1951. ATTEST: —W. S. Taylor, Clerk, District Court, Lynn County, Texas. 40-4tc (S E A L)

Safe - IT'S AN Electric WATER HEATER!

When you have a child in the cuddly, crawling stage, you have the perfect reason for installing an automatic electric water heater—the safest water heater made. Your child can crawl right up to the water heater, pull itself up by holding on to its spoolless clean sides, wrap its arms around the water heater and be perfectly safe, thanks to the complete insulation and no-flame features of an electric water heater.

These same features make an electric water heater equally safe for you, too. There's no fear of gusty winds blowing out a flame—there's no flame. There's no waste heat, either, because only an electric water heater is completely insulated so that all the heat goes into the job to be done.

Reddy Kilowatt's special water heating rate makes electric water heating economical, too. For plenty of hot water always, safely, economically, see your electric appliance dealer now.

SEE YOUR Electric APPLIANCE DEALER!

SOUTHWESTERN PUBLIC SERVICE COMPANY
35 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

they're ALL yours in a DODGE "Job-Rated" TRUCK!

- Plenty of power
 - Maximum safety
 - Easy handling
 - Bigger payloads
 - Extra comfort
 - gyrol Fluid Drive
- Plenty of power** for your job. Power has been increased up to 20% in eight great engines—94 to 154 hp. You get top economy, too—thanks to high compression ratio, 4-ring pistons with chrome-plated top ring, and many other extra values.
- Maximum safety**—You get the finest truck brakes in the industry! On many models you get new, molded, tapered, Cyclebond brakes lining for smoother, quieter, safer braking. And you'll ride in a welded all-steel cab with an extra-big windshield.
- Easy handling**—You can turn, park, back up and maneuver with the greatest of ease... because of cross-steering, short wheelbase and wide front tread. Other aids to easy handling are the comfortable new steering wheel position and extra cab visibility.
- Bigger payloads**—Balanced weight distribution enables you to haul bigger payloads on a Dodge "Job-Rated" truck without danger of overloading. Because the engine has been moved forward and front axle back, the right proportion of the load is carried on each axle.
- Extra comfort**—Famous "Pilot-House" cab gives you safe, all-around vision with extra-big windshield and rear quarter windows. Roomy, "chair-height" seat is widest of any popular truck. New "Oriflow" Shock Absorbers on 1/2, 3/4, and 1-ton models give smoother ride.
- gyrol Fluid Drive**—Only Dodge offers gyrol Fluid Drive. Available on 1/2, 3/4, and 1-ton models. You start with amazing smoothness. Gearshifting is minimized. Wear is reduced on vital parts. And Fluid Drive protects your load by minimizing damaging jolts.

How Dodge trucks are "Job-Rated" to fit your job

A Dodge "Job-Rated" truck is engineered at the factory to provide the best in low-cost transportation. Every unit from engine to rear axle is "Job-Rated"—factory-engineered to haul a specific load.

Every load-CARRYING unit—frame, axles, springs, wheels, and tires—is engineered to provide extra strength and capacity necessary to support the load.

Every load-MOVING unit—engine, clutch, transmission, propeller shaft, rear axle, and others—is engineered to move the load under most severe operating conditions. A range of over 350 G.V.W. chassis models enables you to select a truck that meets your conditions.

Come in today for a good deal on a DODGE Job-Rated TRUCK... low down payment... low monthly payments

Lynn County Men See Sights In New Mexico Recently

Lit Moore of New Home and C. Aten of O'Donnell returned at mid-week from a visit with

relatives and friends at Lordsburg and Silver City, New Mexico, and Mr. Moore reported that they visited the copper mines at Silver City and the big smelter plant near by.

He says that the copper mine is amazingly large. As we understood it, the mine does not extend deep down into the earth but it extends far back in a hillside. It is so large that the Santa Fe Railway has built seven tracks into it and that seven trains can enter and be loaded with the copper ore at the same time.

The big smelter is no less amazing. He says that it handles and processes 22,000 tons of copper ore every 24 hours, or nearly a thousand tons every hour.

These places are down—or up—in the extreme southwest corner of New Mexico and it seems that Mr. Moore said that they ran over into Arizona and visited friends there also. Any way, they had a wonderful trip.

Half Century Doesn't Change All

The strapless frocks and casual sports shirts of today bear little resemblance to the hoop skirts and starched collars of the gay nineties, but one thing hasn't changed in the past half century. Cotton is still the favorite textile fiber in America, being used more than wool, silk, flax, rayon, and all other fibers combined.

This fact was revealed in a study of trends in fiber consumption for the period 1892-1948 made by the Southern Regional Research Laboratory in New Orleans.

The survey is part of a study made by the laboratory in connection with its research on cotton-utilization. The report was made on the basis of raw fibers consumed or processed in domestic textile mills and also on the basis of fibers used by ultimate consumers.

Alvar Nunez, better known as Cabeza de Vaca, was the first white man definitely known to have set foot on Texas soil.

West Texas C. of C. Trying To Secure Adequate Rural Fire Protection

DASHING DENIMS

Blue denim has come a long way from the farm to this smart outfit. The same old-fashioned blue denim is getting the full fashion treatment these days. Here, the heavy cotton is used by Sidran of Dallas in a dashing sundress, bolero, and jockey cap sports ensemble for vacation wear.

Clay tile, the flood and wall covering most popular in modern bathrooms and kitchens, has been used in buildings for 7,000 years. Ruins of Egyptian buildings built in 5,000 B. C. have clay tile wall decorations.

Power is never stable when it is boundless.—Tacitus.

ABILENE, July 18.—The West Texas Chamber of Commerce is trying to determine whether adequate rural fire protection can be secured on a voluntary basis with out resorting to creation of a new taxing agency.

James F. Melton, manager of the taxation and legislation department of the WTCC, has asked managers of local chambers of commerce of the 132-county region to report creation of any ability to solve rural fire problems.

One of five constitutional amendments to be submitted to Texans in November, 1951, would open the way for creation of rural fire prevention districts and authorize maximum tax levy of 50 cents per \$100 valuation to finance them.

Cotton Picked For Kid's Clothes

The majority of mothers prefer cotton for seven out of ten items of children's clothing, a recent survey by the Bureau of Agricultural Economics reveals.

In the study of fiber preferences for children's clothing, a national sample of 2266 mothers with children under 13 years of age were interviewed. They were asked to express opinions on winter baby shirts, crib blankets, diapers, girls' winter bathrobes and one-piece summer dresses, boys' woven and knitted school shirts, pants, children's summer anklets, and snowsuits.

For most of the items, cotton was the only fiber with which the majority of the mothers reported any experience.

Qualities mentioned most frequently by the mothers as reasons for preferring cotton were laundability and durability.

Cotton can be grown in different colors so that it doesn't have to be dyed.

G. H. NELSON ADDRESSES LOCAL ROTARY CLUB, CHURCH GROUP THURSDAY AND MONDAY

G. H. Nelson of Lubbock and a former resident of Tahoka, former district attorney of the 72nd Judicial District and former state Senator from the 30th Senatorial district, both including Lynn county, addressed the Rotary Club here at its regular luncheon on Thursday of last week and the general public at the First Baptist Church here on Monday night.

There were a number of visitors at the Rotary luncheon, in addition to the Rotarians, who were there for the purpose of hearing him; and his audience at the Baptist Church Monday night consisted mostly of Baptists, Methodists, a number of the Church of Christ, and a few of other denominations.

Interest in these addresses arose chiefly out of the fact that Nelson, together with a party of about twenty other Texans, returned from a visit to Egypt, Palestine, Syria, Turkey, and most of the countries of Europe, where they went to do a little study of the Bible and to investigate conditions—economic, agricultural, social, political, educational, and religious. Their visit covered a period of about seven weeks.

In his address to the Rotary Club, Mr. Nelson spoke briefly of conditions in many of those countries but devoted a major portion of his time to Egypt, ancient and modern. He described Egypt as the Mother of Nations on account of its ancient civilization, its ancient power, and its marvelous achievements. "Egypt is the Nile River," he declared, "and the Nile River in Egypt." He and his party went up the Nile River a distance of 450 miles, which embraces most of the country known as Lower Egypt. As is well known, there is no other stream in the world like the Nile. It is unique in almost every particular, but Mr. Nelson's description of it,

how it annually overflows and enriches the soil, just as it has been doing ever since the dawn of history, made the mental picture of it just a little more vivid and real to those who heard him.

He also had much to say of the city of Cairo in the delta of the Nile, and of the ancient capitals of Memphis and Thebes, which long ago passed out of existence except on the pages of history and in the influence they exerted in the shaping of ancient and even modern civilizations.

In this connection he also described and discussed those marvels of the world, the Pyramids of Egypt, in which the kings of Egypt were buried from time immemorial. Particularly he told about King Tut's tomb, one of the minor kings of Egypt, who died when only 18 or 17 years of age.

It's size, and the wealth of treasures which it contained when first opened during the present century, astonished the world. The contents of this tomb alone, he asserted, would fill and does fill a space in a museum as large as Tahoka's courthouse square. Due to the fact that it had been hidden by another tomb built above it for a more renowned and important King, Ramesses II, we believe, that tomb had remained though the long centuries since King Tut's day, undiscovered and undisturbed by the hands of men. It was the only tomb in the pyramid which had not been robbed when it was discovered in recent years and its contents revealed to the world. Hence the astonishment and excitement that were aroused by this revelation.

Nelson also made frequent mention of Moses and his deliverance of the Israelites from the land of Egypt in times that were modern as compared with the beginnings of Egypt as a nation, which are hidden in the mists of antiquity.

He gave also some luminous glimpses into conditions that prevail in many other countries of the present day, but it would require a volume to record all of them. In this address he spoke hastily, and it is needless to say that he held the listeners spell-bound.

Monday Night Address

On Monday night, at the Church, he spoke more slowly and apparently with more deliberation due to the fact that he had to decide as he went along what facts and references he would skip and what he would mention. He touched briefly on many countries but spoke chiefly of Palestine in the days of Christ and at the present time.

He told about visiting many places that are held sacred by Christians of all nations of the present day. He crossed Jordan River several times, visited the Dead Sea and also the Sea of Galilee, and explored all that remains of the sacred precincts of Jerusalem. He recalled to his auditors that Arabs and Moslems now rule all the east portion of Jerusalem and half of the land of Palestine. But he did visit the site of Solomon's Temple, one of the most magnificent buildings of ancient times, and of Herod's Temple built later on the same spot, not one stone of which now lies upon another. A Mohammedan mosque now occupies the site. He went to the Garden of Gethsemane, where Jesus prayed while his weary disciples waited and slept, and where Roman soldiers, guided by Judas Iscariot, came and took the son of God as a prisoner ostensibly of the Roman Government but really of the Jewish Sanhedrin; and there in that Garden Nelson said that he and his party also knelt and prayed.

He visited Pilate's Judgment Hall, where the mob cried out that Barabbas the robber be released and that Christ be crucified, and where Christ finally was delivered back into the hands of the Roman soldiers at the behest of the mob to be crucified. He went up Golgotha's Hill, or Calvary, the "place of the skull," where Jesus was crucified between two thieves, and where the attendant marvelous events occurred.

He went to Joseph's new tomb, in which the body of Jesus was buried; and he laid his hand on the very stone on which Jesus' head had lain; and he went to the Mohammedan Mosque, where Solomon's Temple had stood and where Herod's Temple stood in the days of Christ, beneath which was the top of Mount Moriah.

where Abraham had offered to sacrifice his son Isaac unto God; and then he went to the top of the Mount of Olives, where the Risen Savior ascended into Heaven. It was indeed touching to hear Nelson relate all these visits.

Yes, and he visited Bethlehem, where the babe Jesus was born, and Nazareth where the boy Jesus grew to Manhood, the shores of the Sea of Galilee, where Jesus called at least five of his disciples. Peter and Andrew, and James and John, and later Matthew the publican into his service. Nelson said that he rested his feet in the waters of the little Sea. He also visited Damascus, to which city Paul was going when he was halted by a voice from Heaven. At Jerusalem, he passed through Stephen's gate, just outside of which Paul had held the clothes of those who stoned Stephen to death; and later he visited the prison in Rome where Paul spent

his last days and from which he wrote his second letter to Timothy shortly before Paul himself was beheaded at the behest of the Roman Emperor Nero.

Nelson also spoke of visiting other historic places, such as Istanbul (Constantinople), Athens, in Greece, and told something of the intolerance of the Greek Orthodox Church, which will not permit a Baptist, a Methodist, a Presbyterian, or any other Protestant preacher to preach the gospel of Christ or to hold religious services in its domain. There is absolute union of Church and State in Greece and 98 percent of the people are members of the Greek Orthodox Church. Aside from their religious intolerance, the Greek people in many respects are a fine people, Nelson declared.

The address was greatly enjoyed and appreciated by the congregation.

Applications For Antelope Hunting Licenses Are Now Being Filed

AUSTIN.—The Chief Clerk of the Game, Fish & Oyster Commission announced that a prong-horned antelope season for the seven-county area West of the Pecos has been authorized.

Myrla Holcomb Is Honor Student

ABILENE, July 11.—Myrla Holcomb, junior student at McMurry College from Tahoka, has recently been named a new member of the Eta Epsilon chapter of Delta Kappa Pi, national honor education society.

Miss Holcomb, the daughter of the Rev. and Mrs. C. A. Holcomb, formerly pastor of Tahoka Methodist Church, is majoring in elementary education. In order to be eligible for Kappa Delta Pi, a student must have a general average of "A" for all college work.

At McMurry, she is also a member of the Christian Foundation, Volunteer Women's religious organization, and Delta Beta Epsilon women's social club.

Egypt this year is expected to put one-sixth of its cotton crop into domestic use.

He suggested that hunters interested in the season write the Commission in Austin for a permit blank to make formal application.

A limited number of permits will be issued and the license distribution be made by drawing since there always are more applications than licenses.

The dates will be October 1, 2 and 3 for the first hunt period; October 4, 5 and 6 for the second, and October 7, 8 and 9 for the last period.

The season is arranged in periods to permit supervision by game wardens.

Each license is entitled to one male antelope. After he has shot his limit he is not permitted to hunt even though other members of his party have not been successful.

Last year 426 permits were issued, with a total kill of 375. In 1948, the last previous shoot before 1950, 702 permits were issued and the total kill was 629.

A survey now is underway in Brewster, Jeff Davis, Pecos, Presidio, Reeves, Hudspeth, and Culberson counties to check the antelope herds as a means of setting the number of permits to be issued.

Ranchers are allotted 20 percent of the permits which cost \$5. Ranchers may charge each hunter not more than \$40 permission to shoot on their land.

Persons awarded the licenses and then finding that they cannot join the hunt may make way for hunters unsuccessful in the drawing by writing the Commission. Last year 1000 hunters applied for the special licenses.

1229 LOCKWOOD

TAHOKA, TEXAS

On October 20, 1950, 168 livestock auctions were operating in Texas. The top number for a single state in the nation. More cattle, sheep and hogs are marketed through livestock auctions in Texas than in any other state.

National Farm Safety Week is scheduled for July 22-28. Safety must be practiced every day in the home and on the farm if the needless deaths and injuries that occur every day in the nation from accidents, are to be reduced.

In tests conducted by the Texas Agricultural Experiment Station, dry forage yields were increased from 350 to 1,330 pounds per acre on renovated K. R. bluestem pasture by applying a combination nitrogen-phosphate fertilizer.

ANGLING

This pretty angler can pull in more than fish! She is charming Coleen Gray, Universal-International actress currently featured in "Apache Drums." For her sports outing, Coleen wears a smart cotton shorts and shirt ensemble.

Defoliation Is Worth Money

COLLEGE STATION. —Chemical defoliation of cotton may be worth the cost and effort regardless of whether the harvest is to be by hand, by picking machines or by mechanical strippers.

Removal of the leaves exposes all bolls to sunlight and air current so they dry rapidly and open quickly. This often allows the cotton to be picked two weeks earlier.

Defoliation may be beneficial in the control of cotton insects—cutting down on leaf worms and aphid infestations, reducing boll weevil populations and permitting early stalk destruction for pink boll-worm control.

"Apply defoliants when the youngest bolls expected to make cotton are 25 days old," advises F. C. Elliott, cotton specialist for the Texas Extension Service. "Defoliants should be applied ten days or two weeks before the intended picking date."

Use of dust defoliants is recommended only when plants are wet with dew or when adequate dew is forecast. Elliott cautions that the dust must remain in moisture on the leaf for at least two hours. Four or more hours of moist exposure in preferred.

Calcium cyanamide and monosodium are two recommended dust defoliants. Calcium cyanamide, sold under the trade name "Aero Cyanamid, Special Grade," should be applied at the rate of 30 to 40 pounds per acre. Twenty-five to 35 pounds per acre is recommended for monosodium cyanamide, which is sold as "Aero Cyanamid Dust (X-10)."

Spray defoliants may be used in the absence of dews and when the air is extremely dry. However, Elliott warns that thorough coverage of the cotton plants is

were the second greatest cause of low quality. And tears in the carcass skin were the third greatest cause. Most tears occurred in the processing operation, but a few of them were started before the birds left the farm.

Both producers and processors reported difficulty with the large number of birds having excessive pinfeathers. Marketing of immature turkeys and improper feeding are two of the chief causes of this defect, broken bones, blue backs and external parasites.

essential for good results.

Good defoliation can be obtained with six to eight pounds per acre of spray defoliants sold under the trade names—"Shed-A-Leaf," "Ortho C-1, Liquid Defoliant," "Aero Cyanate Weed Killer" and "Dow Defoliant." One to four pounds of "Niagrathal DF Spray" per acre or 5 to 15 pounds of "Sodium Cyanamide, Soluable Grade (X-5)" may be used.

For ground spraying Elliott recommends dissolving the above rates in 10 to 25 gallons of water, depending on the type of sprayer used and the size of the cotton plants. Thorough coverage of the plants is essential. This means going to the field with enough water. Under most conditions 25 gallons of water per acre will be necessary.

For airplane spraying, dissolve the recommended pounds of material in an equal number of gallons of water.

Raise Turkeys Market Quality

COLLEGE STATION. —Approximately 20 per cent of the turkeys marketed in Texas during 1950 were Grade B or lower after processing, reported George J. Mounney, research worker in poultry marketing with the Texas Agricultural Experiment Station.

About 10 per cent more turkey carcasses qualified as Grade A, the top grade, than toms. Less than one per cent of the turkeys marketed were "no grade" or rejects.

Last fall Mounney gathered quality information on the marketing of 145,192 turkeys at five processing plants in Texas. He recorded reasons for low quality on all carcasses below Grade A.

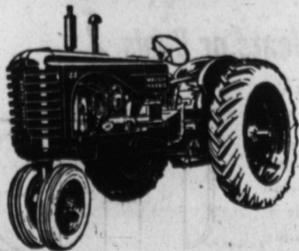

Bruises were the greatest cause for low quality, accounting for 35 per cent of all birds grading B or lower. From the appearance of the affected areas, Mounney said, most bruises occurred within 24 hours prior to slaughter—indicating careless handling.

Who Should Be Concerned About Soil Conservation

"If John Farmer wants to let his farm wash or blow away, that's his business. It's no concern of mine"—Mr. Businessman. Too many business men, professional men or wage earners have this mistaken idea. Regardless of where you live or what business you are in it is some concern of yours—WHY?

Well, first, we are all depending on the products of the land for our food. If all the "John Farmers" that operate the farms of the Nation neglect their soils, production of food drops. The less food that is produced the higher the price. If you think food prices are high now just remember that farmers are producing 50 percent more per acre now than they were 15 years ago. Suppose then that there was 40 percent less food on the market today than there is. Would that concern you?

If all the "John Farmers" on the farms let their soils wash or blow away, farm income is sure to decline because of loss of farm production. As farm income drops, farm taxes also drop. When the farmer pays less taxes some other group must pay more taxes. Would that concern you?

Again when farm income drops the farmer's purchasing power drops also. When the farmer buys less it results in decreased sales for local stores and this in turn results in less sales for the factories, less jobs for labor, less business for the railroads, oil companies, doctors, lawyers, etc. Would that concern you?

The population of this country is increasing at the rate of about two million per year. Practically all the available cropland in the Nation is being used at the pres-

ent time to produce food and fibre. In a very few years it will take full production from these acres to supply ample food and fibre for our increased population. If we let a part of this land waste away there may not be enough left in a very short time. Many other countries have found themselves in this condition. Would that concern you?

You don't go out and buy topsoil. When that which nature put upon the land is gone, you can put it back only by hard work and expensive methods over a long period of years. Many Nations today don't have enough topsoil. That is why their people are starving. The warning is given us today that unless we conserve our soil, one day, not many years away, we're not going to have enough. We have lost large quantities and are still losing it at an alarming rate. Would that concern you?

It has been proved in the last 15 years that a sound, carefully planned conservation program not only controls erosion, it also makes tilling the soil easier and cheaper, increases crop yields, puts idle acres to work and gives the farmer more buying power.

It does more than help the individual farmer practicing it. It helps the entire community and the community extends to include the Nation. The increased production is needed if we are to continue living on our present standards, if we are to produce for the added demands of our defense program, and if we are to retain our greatness in world leadership.

Would that concern you?

CARD OF THANKS

To all who were so thoughtful and kind in our time of sorrow, we wish to express our appreciation. —The S. R. Kemp family.

Grassland Still In First Place

Keeping their standing in the first place position of the Square Deal Softball League, Grassland lost their fifth game of the season to O'Donnell, last place contenders by a 6 to 4 tally on Tuesday night of this week.

On Friday night, July 13, Grassland took a 2 to 1 victory from Post. And a game played at O'Donnell between Tahoka and O'Donnell, a 16 to 15 victory was won by Tahoka.

Tuesday night of this week, Tahoka lost a close game to the Southland team, 6 to 5.

Tonight, Friday, Southland will play at Grassland. O'Donnell will journey to Post for their game.

On Tuesday night of next week, Post goes to Southland and Grassland will be at Tahoka.

League standings:

	W	L	Pct.
Grassland	12	5	.708
Southland	11	5	.693
Tahoka	9	7	.567
Post	5	11	.315
O'Donnell	4	13	.236

League play-off games will be commenced on Tuesday night, July 31. The first place team will contest the fourth place team at the former team's home field. Likewise, the second place team will play the third place team at their home field. The finals will be decided in a best 2 out of 3 games.

The League finals will have some very interesting games, and will prove worth while to the softball fans, who are urged to attend these games and support their favorite team.

OPS Specialist To Be Here July 26

OPS price specialist Melvin D. Lackey, in the Food Branch will stress requirements of the service establishment regulations (CPR 34) and the need for filings by other firms when he visits in Tahoka next Thursday afternoon, July 26.

He will maintain offices while here in the Fire-Station, Chamber of Commerce.

The price specialist, from the Lubbock district office, will assist business men with their filing requirements under the regulations. He emphasized, that despite the fact the deadline has passed, firms which are delinquent should immediately comply. The specialist will visit business men in their offices if appointments are requested and time is available.

The clinics have been held weekly throughout the district during the last several months and they are expected to continue in August, according to C. J. Taylor, district price executive.

Mr. and Mrs. V. L. Clem received a card from Mrs. Clem's parents, Mr. and Mrs. Gus Gatzki of Route 2, Post, sent from White Rock, B. C. Canada. Mr. and Mrs. Gatzki have been gone on a month's vacation, traveling the west coast and in Canada. After visiting relatives in Idaho and Colorado, the Gatzki's will return home.

A power above all human responsibility out to be all human attainment. —C. C. Colton.

DO AS THE ROMAN!

For girls who like to look fresh and trim despite sultry heat, here's some sage advice — "Do as the Roman does!" Glamorous Ruth actress, dons a crisp cotton skirt of red and white checks combined with a white tucked halter. In her cool cotton outfit, complete to cotton string gloves, Miss Roman seems blissfully unaware of summer heat.

Dwight Townsend To Graduate Soon

Dwight Townsend, son of Mr. and Mrs. N. O. Townsend of Tahoka and senior student at McMurry College, will complete graduation requirements next week.

Mr. Townsend, a speech major to receive a Bachelor of Science degree, participated in May graduation exercises as summer commencement ceremonies are not conducted in May.

He was to actually receive his degree, however, at this time, the conclusion of the first six weeks of the summer session.

Park

(Cont'd. From Page 1) bably will be largely used, for it is said that they require less water and are of quicker growth than some other popular varieties.

The JayCees wish to express their thanks to the following citizens who have furnished trucks in which to haul the gravel from Justiceburg: Rollin McCord, H. O. Stone, W. T. Kidwell, Jimmy Applewhite, and Maurice Bray; to a number of farmers, who have loaned tractors, plows, and other equipment and who have contributed labor to the enterprise; and to the City of Tahoka for furnishing maintainers with which to put the streets in order adjacent to and leading to the park. If any have been overlooked who have helped in any way, the JayCees want them to know that their help also has been appreciated.

As long as there is an abundant and available water supply, this park when developed should remain throughout the years to come as one of the real beauty spots and recreation points on the South Plains.

Of course, it is going to require a good deal of money not yet in sight to finish the much needed project. It is up to the people of Tahoka and Lynn county to decide whether they want a park of large proportions and much beauty within the town, and if so to furnish the money from time to time to furnish and adequately equip it.

Baseball

(Cont'd. From Page 1) scoreless until the sixth inning. Morgan Howle, pitching for the North Siders blew up and gave up a total of eleven runs before he was replaced by Bobby Terry, a newly acquired pitcher of the North Siders from Post. Terry pitched one and a third innings without giving up a hit.

Wilson scored 11 runs on 6 hits and made 4 errors.

North Side made only 2 runs on 6 hits and made 5 errors.

Winning pitcher was Leonard Breiger. Losing pitcher was Morgan Howle.

Games Sunday
At the Southland ball park the two top teams of the league will meet at 1:30 for a double-header in a battle for first place.

In case one of these teams were to win both games of the double header that team might prove to be the Junior League Champion for 1935: Leonard Breiger with three wins against one loss for the season will oppose Lefty Tremble who also boasts a three and one standing in the first game of the double-header. In the second game, Thomas Mason will oppose Gentry, both of these pitchers have won one and lost none.

At Tahoka Sunday afternoon, North Side will meet Wayside in a double-header which is scheduled to get underway at 1:30. Bobby Terry or Morgan Howle will be North Sides choice against James Foster in the first game. In the second game Gordon Smith will oppose "Punk" White.

League Standings

	W	L	Pct.
Wilson	4	2	.664
Southland	4	2	.664
Wayside	3	3	.500
N. Side	1	5	.166

E. R. EDWARDS AND FAMILY VISIT IN AUSTIN AND BELL COUNTY

Mr. and Mrs. E. R. Edwards and two children, Jan and Deanie, and Peggy Nowlin, daughter of Mr. and Mrs. P. A. Nowlin, returned home Saturday after a week's visit in Austin and in Bell county. In Austin they visited his sister, Miss Bernice Edwards, who is employed in the State Employment commission there, and in Bell county they visited friends and relatives at Bartlett, where they formerly lived.

Mr. Edwards reports that crops were pretty good but in Bell county it was getting a little dry. Crops were very fine just south of Bartlett around Taylor in Williamson county.

ORDER OF EASTERN STAR TO HAVE INITIATION MONDAY

Tahoka Chapter No. 743, Order Eastern Star, will have initiation at the meeting on Monday night, July 23rd at 8:0 o'clock. All members are urged to attend.
—Lonelle Brown, W. M.,
—Helen Biggerstaff, Sec'y.

School

(Cont'd. From Page 1) high compared to farm lands. Vacant lots were given an overall raise, but the total increase in valuation is only \$11,000. Ranch lands, increased a little over \$100,000.

Business real estate, increased by \$103,000.

Business merchandise, increased by \$140,000.

Personal property, which includes farm machinery, automobiles, furnishings, etc., increased \$114,000.

Oil properties, leases and royalties, increased \$122,000. This was

jumped from \$24,000 to \$146,000. The board is pretty gloomy about prospects for the future in regard to taxes. The members are doing everything reasonable to meet State standards and yet keep the taxes as low as possible, but demands from the State could make necessary another raise next year.

Mary Jane McCord, daughter of Mr. and Mrs. Rollin McCord, fell and broke her arm at the Country Club in Lubbock Sunday afternoon. She was taken to the Lubbock General Hospital, where it was found that both bones in the right arm were broken. She was brought home Monday afternoon.
