To The People of Bailey County, Precinct 2:

In regard to my candidacy for commissioner of precinct two of Bailey County I would like to say these things to the voters of this precinct. Vegetable Processing In Full Swing As Onion and Spud Harvests Begin

The beginning of Muleshoe's first full season of vegetable harvesting got into full operation this week, with at least three vegetable processing sheds in the area starting work, and one vegetable producer already through with his onion crop. Barrett Produce, Gregory Produce and W. T. Millen are all grading and processing onions and early potatoes.

Barrett has been in operation for about two weeks handling onions first, and presently processing the Irish potato crops from their own acreage as well as some spuds from the Seminole area. Barrett sells under the Plainsman label.

Bill Millen got his shed into operation Tuesday, and began processing and grading onions. Millen said the crop was fair to good, but prices are so variable he did not quote what the vegetable was bringing on opening day.

Millen expects to begin harvesting and processing his spuds next week.

Gregory Produce, with sheds in Lariat and offices in Texico, began last week on the process-

ing of onions and red potatoes, with a new sales manager in the person of D. E. Hughes.

Meanwhile, the foundation has been completed for the steel processing shed of Muleshoe Cooperative Growers on the Clovis highway.

When completed, about August 1 to 15, the new shed will measure 90x140 feet, and offer both truckage and truck access. It will contain a 10 car capacity modern refrigeration area, and machinery to process all kinds of mixed vegetables. The building and equipment is expected to cost about \$64,000.

Buddy Meyers, president of the vegetable growers cooperative, said he expects the building to be completed about the time the

first tomato crop is ready for harvest.

Travis Jennings of Brownsville, has been employed by the cooperative to manage the shed for the tomato crop and possibly to handle some of the mixed vegetables later in the season.

Bailey county farmers planted more than 2600 acres of various kinds of vegetables this spring, with the majority of the acreage put to potatoes and tomatoes.

However, insects and hail have reduced some of the vegetable acreage in the western part of the county. Some of this land may be planted to carrots later on, while part of it was put into grain sorghum.

The ten-and-a-half satellite took about five minutes to go end over end on a southwest to northeast course at an altitude estimated at 350 miles.

Reflections from the sun rays made the object appear about the size of a small football, rolling lazily through the dusk.

Blakley Story Is Typically Texan

The typical American story is of the poor boy who made good through his own efforts. This is the story of Bill Blakley, born in a covered wagon while his parents were on their way to homestead in Oklahoma territory. He has come a long way in 59 years. Said the Austin American-Statesman, when William A. Blakley announced for the Senate: "He was a top-hand cowboy; he was a crackerjack bank clerk; he was an exceptionally good accountant and lawyer. We have an idea that he is going to be a refreshing, able political candidate. He would make a great United States Senator."

Vote for Bill Blakley on July 26 — an able man whose only ambition is to serve all of Texas.

Sure-footed Man Serves Texas

The colorful language of the ranch and trail seems to fit Bill Blakley, who made his start in life as a working cowboy. He still rides and ropes with the hands on his ranch at roundup time.

Speaking of Blakley's service as U. S. Senator in 1957, the Dallas News said: "... If he was as unassuming as an old boot, it was nevertheless a well polished boot that never wobbled or wavered from its purposeful path. For this man Blakley is a sure-footed man who knows exactly where he stands and what he believes."

Texas will vote to return William A. Blakley to the Senate on July 26 because he truly represents the spirit, traditions and views of all Texas.

Miss Linda Lancaster To Study At University of Mexico For Six Weeks

IT'S OFF TO MEXICO CITY for Linda Lancaster. Linda left this morning for six weeks at the University of Mexico in Mexico City.

Miss Linda Lancaster, daughter of Mr. and Mrs. D. B. Lancaster, left this morning for six weeks in Mexico City.

Miss Lancaster is going with a group of students from Texas Tech. Dr. T. Earle Hamilton, Spanish professor at Tech, is the sponsor of the group. Dr. Hamilton takes a group of twenty Spanish students to study at the University of Mexico every summer.

Miss Lancaster and about fifteen other students are going in private cars and are planning to make the trip in about three days. They will make their headquarters in the Virreyes Hotel in Mexico City during the six weeks.

Mornings in Mexico will be spent sightseeing. The Texans will take hikes and visit such places as the volcanoes at Amecameca, the Aztec pyramids at Teotihuacan, Taxco, Cuernavaca, Puebla, Acapulco, Cholula and Huejotzingo. They are planning to climb to the top of a volcano on their visit there.

Classes in Spanish civilization will be held in the afternoon at the University. Dr. Hamilton will instruct the course which is geared for prospective teachers and government workers. It is primarily a conversational course.

Prerequisites for the course are that the student complete his junior level work in Spanish prior to registration for the course in Mexico. Six hours credit is given for the six weeks work which may be used for graduate or undergraduate credit.

Linda is a Spanish major and a member of Sigma Delta Pi, honorary Spanish Fraternity. She will be a senior next fall.

Dr. Hamilton, who has been sponsoring similar groups for many years, is the sponsor of the Tech chapter of Sigma Delta Pi and a Spanish professor there.

Report of Highway Patrol District Shows Traffic Fatalities Decreased

Highway Patrolmen investigated a total of 164 accidents during the first six months of 1958 in the Littlefield substation area comprised of Bailey, Cochran,

Floyd, Hale, Lamb, Terry and Yoakum counties, Sergeant D. S. Lawson announced today.

Sergeant Lawson reported a total property damage of \$142,769 with 99 persons injured and seven killed. This is a decrease of 13 accidents and decrease of five deaths for the same period last year.

Lawson said the Patrolmen in his area contacted 8,654 drivers during this period for the following violations: DWI, 41; speeding, 2,250; improper passing, 251; wrong side of road, 312; defective stop or warning sign, 1,105, and all other violations, 1,946.

"During the vacation months, thousands of motorists are on the highways, and too many of them are intent on cramming as much activity as they can into one brief vacation", Sergeant Lawson said. "The result is often a tragedy".

He cautioned vacationers to be on their guard against speeders, drinking drivers and drivers who disregard traffic laws. Traffic accidents take no vacation, so to stay safe, step up your vigilance on the roads, and slow down and live.

Sergeant Lawson also urged all motorists to check the expiration date on their driver's license to see that it has not expired. Patrolmen in this area are going to increase their activity in regard to drivers' license checks.

Citizens from a broad area of the High Plains produced what many termed an unprecedented show in Tulia, March 31st. The area -- the fifteen county Thirtieth Senatorial District of Texas. The "Show" -- an Appreciation Dinner-Program honoring State Senator Andy J. Rogers of Childress. 30 to 100 persons from each of the 15 agricultural coun-

ties turned out for the evening-long program in the cafeteria and auditorium of Tulia High School. 75 business and farm leaders from outside the district joined in the "Chorus Of Thank You's" to the Senator. A majority of the Panhandle-South Plains Representatives and Senators, also two major daily newspaper representatives were present.

INDEXING

By MORRIS HIGLEY
Andy Rogers may be defeated some day. He may not run for re-election. At least he has not announced. But win, lose or draw, Andy Rogers has something to remember that is fine and wonderful. His most memorable moment must be the Appreciation Dinner and program given Monday night at Tulia.

I have never seen anything like it in my life. I do not think anyone who attended has ever seen anything like it.

—Mr. and Mrs. N. D. Rogers, along with Georgia Ann and, of course, Andy must have felt wonderful Monday night. And still do.

The idea for the Appreciation Dinner did not originate in Childress. In fact, as far as I know, Childress residents did not have anything to do with it.

And when Andy heard about the proposal, he said that it could not be done. Andy was wrong. And I imagine right now he is happy that he was wrong. I would be.

WHAT THEY ARE SAYING:

A dozen leaders in the district were programmed to speak. They, typically, represented a cross-section of Plains life.

One was the Senator's pastor. He lauded the honoree for his fight against liquor, narcotics, and lewd literature. "Senator Rogers is always on the right side of every moral issue," said the churchman. "He wants and works for a high moral atmosphere to prevail."

A county teachers' association president called attention to Senator Rogers' work in behalf of public education. A Memphis druggist related that Rogers has always had an "open ear" for the small businessman.

A district judge praised the quality of legislation introduced and supported by the Senator. A mayor and insurance man emphasized the value of Andy Rogers' fight against corruption in Austin, particularly in connection with the insurance investigations.

Said an official of one of the veterans' organizations: "Andy told us for a long time there was serious trouble in the veteran's land program. He was right. And when this was cleaned up, Andy worked hard to see that this good program was not scrapped."

A newspaper editor and publisher, a former president of the Panhandle Press Association, observed: "This is the first time I've ever heard of people traveling so far just for a state senator. But it's fitting," he added, "for Andy Rogers for a job well done."

Spokesmen for the major farm organizations expressed approval of the Senator's record on farm-to-market roads, local ownership of underground water, rural electrification, and other legislation of concern to agriculture. Said the farm spokesman who rounded out the program:

"In view of all Andy Rogers has done for agriculture, I'm amazed to hear from the other speakers here this evening that he's had time for such effective work for so many others, too." The farmer concluded:

"Andy Rogers must use a six-row political tractor!" The Senator acknowledged the praise-filled evening with obvious humility. He spoke humbly, too, of his "close personal friend"—Lewis B. Taylor of Austin and Waco—who had been stricken with a fatal heart attack there a few minutes earlier.

To the series of "thank you's" which had been expressed during the evening, Rogers responded: "What's been accomplished, you've done. The credit belongs to you, to my parents, and to my wife who have all supported me so strongly. I really feel like I owe you all an appreciation dinner."

Your VOTE For Andy Rogers Will Be Appreciated

BABSON DISCUSSES . . .

BABIES AND BUSINESS

Babson Park, Mass., July 17—For the first time since 1950, our birth rate is declining. Perhaps this is due to the current recession, or perhaps it is because of a small downturn in the number of women in the 18-to-34 age group. I look for a further near-term drop in the birth rate and do not visualize a new baby boom for several years.

PAY HEED TO THE ECONOMIC FACTOR

Some population experts anticipate a new wave of births in the early 1960's. They base their forecasts chiefly on the fact that the number of women in the 18-to-34 age group (which breeds the most children) will soon increase rapidly as the war and early postwar babies reach maturity. But the fact that there will be more women of child-bearing age does not necessarily mean they will bear more children.

Years ago, the demographers, or population experts, were consistently on the low side in their forecasts. Many of my readers remember that we were told in the thirties that the U. S. population had just about reached its peak. Then came World War II and an economic boom which encouraged a record increase in the birth rate. This was at a time when we were making great strides in prolonging the life span. Again the demographers missed the boat, with forecasts too low. Now their predictions appear too high! They are too eager to take simple projections of recent trends without taking into account the economic, social

and psychological factors which determine fertility response.

TREND TOWARD LATER MARRIAGES

During the first quarter of 1958, marriages were down about 10% below the number a year earlier. To me this indicates a trend toward later marriages. Assuming the present recession extends into 1960 and possibly beyond, barring war—then this trend toward later marriages will continue and could mean further cutbacks in our birth rate.

For this reason, I predict that the next baby boom will not really get going until the late 1960's and that it will extend well into the 1970's. I assume, of course, that today's depressed economy will have rebounded to new heights in the mid or late 1960's. My forecast is that twenty years from now our annual birth rate will be in the neighborhood of 7,000,000—up some 60% from this year's estimate of 4,250,000.

LONG-TERM EFFECT ON BUSINESS

There is no doubt, in my mind, about the impact on business of a new heavy wave of births. It could be tremendous! But before any such baby boom gets rolling, American business faces some hard years of greatly intensified competition and continued high costs. Business should pay more attention to the fathers and mothers of tomorrow—will expand rapidly over the next ten years.

However, population growth by itself cannot provide the environ-

ment that will assure our meeting the needs of a bigger population. We have ample proof of this in the examples of China and India. A larger population has greater needs, but it takes favorable economic conditions to stimulate the demand which guarantees a broadened market. If business confidence should be weakened by further sniping at the incentives which have made our free enterprise system excel, it will take more than another baby boom to set things right again.

POPULATION SHIFTS

Even though the great population shifts of the early postwar period have largely subsided, there are still many more people moving each year than was the case before World War II. I look for continued good growth in Florida, California, and other Far Western and Southwestern states. In addition, I forecast gradual, though steady, growth in that area which is the very heartland of the nation—the "Magic Circle". With its center at Eureka, Kans., the Magic Circle extends in a radius of 400 miles to include six Midwestern states—Iowa, Missouri, Arkansas, Nebraska, Kansas, and Oklahoma—as well as smaller portions of eight others. The Magic Circle has already produced some of the nation's greatest leaders, including Presidents Hoover, Truman, and Eisenhower, and Generals Pershing and MacArthur. Its growing forests, valuable minerals, virgin prairies, and vast hydro-electric energy would easily support a tenfold increase in population.

THIS WEEK

—In Washington
With Clinton Davidson

ARE FOOD PRICES TOO HIGH?

The housewife who complains that she is paying for government subsidies to farmers twice—once in higher food costs and again in higher taxes—sincerely believes that she is getting gypped.

She hears and reads about high farm price supports, about the government buying billions of dollars of food to be stored or given away abroad, about paying farmers not to produce, and she reasons that this is the cause of high food prices.

Newspapers and the radio report that Congress has just appropriated another \$5 billion to finance farm programs for another year, and that adds to the tax bill. It all looks as simple as two plus two equaling four, but it isn't.

It is true that food costs are at an all-time record high, when measured in dollars and cents. There are two principal reasons for that. First, more and more foods are sold precooked or pre-mixed. Second, labor costs connected with processing and selling foods are higher.

Farmers Sell For Less

Although retail food costs have gone up 15% since 1952, prices paid to farmers have gone down by about the same percentage. Processing and distribution—both costs after the product leaves the farm—have gone up rapidly and are responsible for all of the increase in food prices.

Food producers get only 39 cents out of each dollar spent by the housewife for the average family food. The cost of distribution increased from 47 cents in 1950 to 61 cents last year.

In 1947 the average family of four spent \$911 for food, of which farmers received \$467 and \$444 was marketing costs. Last year the same amount of food cost \$1,079, of which farmers received only \$400 and marketing costs amounted to \$679.

The average factory worker last year could feed his family on one-third fewer hours of work than he could in 1947. The Labor Department reports that average hourly earnings of factory workers increased by 67% during the 10-year period.

Food Purchasing Power Up

Figures supplied by the Labor and Agriculture departments show that the average factory employee worked 30 minutes in 1947 to earn enough to buy one pound of choice steak; but only 18 minutes in 1957.

It took 10 minutes work in 1947 to buy a quart of milk, but only 6½ minutes in 1957; 32 minutes to buy a dozen eggs in 1947 and 19 minutes in 1957; 27 minutes to buy a 10-lb. bag of potatoes in 1947, but only 15 minutes in 1957.

Foods that come from pre-processed commodities have increased less than those for which there are no supports. Beef, pork and egg prices are not supported.

Farmers' costs of operation have increased by approximately 20% in the past six years, at a time when their net income was going down by about 30%. The per capita income of farmers last year was \$993, but the non-farm per capita income was \$2,045.

New Senate Hand Aided Democrats

When William A. Blakley was appointed to the U. S. Senate in 1957, he was a political unknown in Texas. But Washington awaited his arrival with great interest. So close was the party balance in the Senate that Blakley's vote was the difference between Democratic and Republican control.

True to his Democratic tradition, Bill Blakley voted with his fellow Democrats. They have been in control ever since. Now Bill Blakley seeks his first elective term in the U. S. Senate. A vote for Blakley is a vote for sound, Democratic government.

go they forth all of them by hands." Let us have a sense of community. The isolated Christian life is poverty-stricken indeed. Only by sharing and mingling and serving with those around us do we grow.

"The spider taketh hold with her hands, and is in kings' palaces." Life has no limitations in Jesus Christ. Through Him we can do all things.

PRAYER

Lord, help us this day to hear Thy voice in the wonder and beauty of Thy world. Open our eyes to consider the beauty of Thy handiwork, our minds to be discovered in the wisdom of Thy creatures. Through Christ our Lord. Amen.

THOUGHT FOR THE DAY

I will today consider the beauty of God's handiwork and the wisdom of His creatures. —Margaret Donaldson (Calif.)

Today's Meditation

Read Proverbs 30:24-28 or Psalm 19.

There be four things which are little upon the earth, but they are exceeding wise: the ants . . . ; the conies . . . ; the locusts . . . ; the spider. (Proverbs 30:24-28.)

God's wisdom is often conveyed to us in simple ways. "The ants are a people not strong, yet they prepare their meat in the summer." Here God points to the necessity of provision. Surely He has supplied our needs, but also in His grace He has given to us the blessed opportunity to work.

"The conies are but a feeble folk, yet make they their houses in the rocks." Another portion of Scripture speaks of the wisdom necessary endeavors of a state? On the other hand, I don't see any reason for assuming those Alaskans are any better than the rest of us, and I for one say, come on in. Help tote the load. Taking in more states may be the only answer to our problems, and if anybody else, say Hawaii or any unhappy portions of Canada, Old Mexico, or any place else wants in, get in line. The way I see it, every new state we get, that's just another endorser on our note.

Yours faithfully,
J. A.

Sandhills Philosopher Wonders . . .

If Alaska Knows What She's Doing In Wanting To Become 49th

Editor's note: The Sand Hills Philosopher on his Johnson grass farm has a new slant on the Alaskan problem, his letter this week reveals.

Dear editor: As I understand it from reading the newspapers the last few weeks, Alaska finally has won the right to become a state. Congress has passed the necessary bill, and President Eisenhower has signed it. Now all that's left is for the people of Alaska to vote to come in, and they'll be the 49th state.

However, I've been thinking about this matter pretty thor-

oughly and I'd like to ask you reckon those Alaskans know what they're doing?

Understand, it's mighty nice to be a part of the United States, it's nice to be a state, to get Federal grants, to get to send Senators and Congressmen to Washington and to vote on presidents, but has Alaska gone into the other aspects of this proposition?

For example, take debts. The United States is reputed to be a rich country, but you've got to remember in some places they measure a rich man by the amount of money he owes. I

don't want to discourage those Alaskans, but one 49th of what the United States owes may put a different light on the benefits of statehood.

Moreover, have they considered taxes? States rights is a fine theory, but have those Alaskans figured how many acres of snow and ice it'll take to produce enough tax money to build some roads, some schools, court houses, a state capitol, a governor's house? Have they figured how much it costs to run a legislature, with a state supreme court, welfare office, assorted bureaus and departments, and other ne-

"Actual Experience"

WITH MY ELECTRIC HOME FREEZER PROVES WHAT I USED TO HEAR THE HOME SERVICE ADVISORS SAY!"

says MRS. ROBERT J. ELSEY, 4213 ONG • AMARILLO, TEXAS

"I was a secretary at the Public Service Company and I used to overhear the Home Service Advisors tell about electric home freezers—how they saved money—how you could get better meals—how you could preserve the garden-freshness of vegetables—how a freezer could save a housewife lots of time. What they said made sense to me but the words just didn't equal the actual experiences of owning your own home freezer. I find that everything those girls say is true—especially do I find the freezer ideal for entertaining," says Mrs. Elsey.

In the picture at upper left, Mrs. Elsey entertains, with the help of her freezer, three other young homemakers, Mrs. Robert Crump, Mrs. Charles Cooke, Jr., and Mrs. Bill Rutter.

OPTOMETRY: The Art and Science of Visual Care

Sun glasses—GOOD or BAD?

Many people ask optometrists every day "is it all right if I wear sunglasses?" The answer isn't exactly simple. Certain conditions of vision require sun lenses while others definitely do not.

Light-sensitive vision (photophobia) often is a sign of infections in or near the eye or in other parts of the body. If sun lenses are used in these cases, the real trouble might merely be covered up and the cause not discovered.

Sun glare problems should be carried to your optometrist. Only by a thorough visual examination can he answer the question: "Are Sun Glasses Good or Bad for Me?"

Parmer County Farm Bureau News

by Raymond Euler

President Gilbert Kaltwasser is in Waco this week, attending a Texas Farm Bureau commodity advisory committee meeting. He is serving on the water committee. This is a state wide meeting, with committees composed of farmers from all counties over the state. Their job is to make studies of subjects related to all farm commodities and services, to be presented to counties for consideration in annual conventions, preceding the State Convention in November.

Parmer County Farm Bureau directors instructed the president to write letters to all county ginners, urging their participation in support of the National Cotton Council. Cotton sales promotion is of vital importance to the future of the cotton industry, and Farm Bureau believes that the Cotton Council is performing an invaluable service in this field.

Farm Bureau Queen committee members met in the Bovina Restaurant dining room Monday night to organize the sixth annual contest to be held August 22. We think there will be a news story on this in Parmer county newspapers, this week.

J. H. West, TFB president, has written letters to all County Farm Bureau presidents, urging them to make every effort to get every eligible voter out to the polls on July 26. Your directors pass this important request on to every one of you. Our right to vote is one that has not yet been infringed upon. If we can keep it that way, we have an excellent chance to remove some of the infringements that have progressively come upon us, by knowing who the men are, and what they believe, when we cast our ballot. VOTE!

The man on the left builds and plows the soil of a family-size Texas farm to provide food and fiber with which to feed and clothe the people of this nation and the world. To do this, he must fight the weather, flood and drought, erosion and insects, high prices for what he buys and low prices for what he sells. To live and farm and provide for his family and the nation, he must also fight an antagonistic administration in Washington, which wants to drive him off the farm to the city—where the same administration has provided an army of unemployed for him to join. The man on the right cannot do anything about the weather; but he helps his friend fight that antagonistic administration in Washington—as hard and as effective as any living man. The farmer's friend is Ralph Yarborough, United States Senator from Texas.

Social Security Representative Here On July 24

A person doesn't have to quit working completely or sell his business to become eligible for Old-Age Insurance benefits under the Social Security Act, according to John G. Hutton, manager of the Lubbock Social Security district office.

The law requires that deductions be made from benefits of eligible persons if their earnings from work or a business are over \$1200 in a year. However, even

though earnings are over \$1200, the worker or self-employed person would be eligible for one or more monthly payments if the earnings were not more than \$2080 per year.

Hutton explained further that it is also possible for a beneficiary to receive payments when earnings exceed \$2080; no deductions are made for any month in which earnings are \$90 or less, or the beneficiary is 72 years of age or older.

Persons who meet the age and work requirements should inquire about benefits even though they are still employed, or are in business for themselves. Hutton stressed that the difference between being eligible for benefits and actually receiving benefits is only too often the mere filing of a claim. No benefits can be paid unless a claim is filed.

A representative of the Lubbock Social Security office will be in Muleshoe on July 24, 9:30 a.m., at the courthouse and will be glad to assist in all matters pertaining to Social Security.

REMEMBER WHEN?

by JOHN CROW

"NYLONS ON SALE". That's not a headline you'll remember, because when it first happened it wasn't front page news. But the year when nylon hose first went on sale was a significant event in modern history, as any woman—or man!—can tell you. The production of this new kind of stocking material was a noteworthy example of applied science. The first sale of nylons was an experimental one held in a department store in Wilmington, Delaware. The stockings had come from a single pilot plant of the Nylon Division of the DuPont Company.

The response of American women was overwhelming. By Christmas of that year women everywhere were clamoring for nylons. Full scale production of the sensational new stockings followed immediately after the first sale . . . but production couldn't keep up with the demand. Something new had been added to feminine beauty.

Remember the year? Women liked the looks of the new nylons that year . . . and liked the wear they gave. Men looked for similar things that year in an automobile . . . good looks and the promise of dependable service.

The year was 1939. Good looks . . . with years-ahead features that mean lasting value . . . plus engineering that means dependable service . . . you get all this in a new CHEVROLET. And our deal makes it easier than ever to drive a new CHEVROLET. Stop in and check our higher trade—our low-er terms—at—

I THANK YOU
For being permitted to serve as your County Judge and Ex-officio School Superintendent, I appreciate the splendid cooperation I have had during the time I have served you and am deeply grateful to you for allowing me to run unopposed for re-election.

I look upon a public office as a public trust and believe that those who exercise therein should, as near as is humanly possible, hold that trust inviolate. The ones you choose as your officials are the ones that represent you, they handle your business they spend YOUR money.

If I should be returned to office I would continue to be mindful of these great truths, and would strive constantly to render unto you efficient, courteous and unselfish service.

Presuming my nomination in the primary this summer, and election at the General Election this November, I Promise that I will continue trying to make you an official that you can justly be proud of.
