Victim of Polio Is Back At Home

Miss Linda Hefner, daughter of Police Chief and Mrs. Roy Hefner, was released from a Lubbock hospital Tuesday afternoon where she had been a patient for several days as a victim of polio.

She will undergo therapy for several weeks and doctors believe that she will completely recover the use of her legs.

The polio affected her spine and large joints, but doctors believe that the two Salk vaccine shots she had just received are the only thing that saved her from being a permanent cripple. Without them, doctors declare that she would never have walked again. It is also believed that ballet and acrobat lessons had also been in her favor.

No visitors will be allowed to see Linda for some time, her mother states, and she will be required Meeting Planned to remain in bed for about three
