## Miss Nelda Jane Redwine Weds Mr. Hunt In Ceremony January 29

MR. AND MRS. ROBERT LEE HUNT

Miss Nelda Jane Redwine became the bride of Robert Lee Hunt in an impressive double ring ceremony read in the Progress Baptist Church at 6:00 p.m. on Friday, Jan. 29. The Rev. Earl D. Hord read the vows. Parents of the couple are Mr. and Mrs. J. L. Redwine, Sr. and Mr. and Mrs. Buford Hunt all of Muleshoe.

The bride, escorted by her father, was wearing a floor length dress of white taffeta, with a circular skirt enhanced by embroidered chiffon jacket featuring a queen-anne neckline and tapered sleeves topped the dress. Her fingertip veiling, of tulle fell from a rhinestone tiara and the bride carried a bouquet of a single white orchid surrounded by royal blue stephanotis.

The traditional something old, something new phrase was carried out by the bride. Something old was the locket worn with her dress, which belonged to the groom's great grandmother, Mrs. J. C. Hunt, something new was her tiara, something borrowed was the Bible, belonging to the bride's sister-in-law, Mrs. J. L. Red-

wine, Jr. and something blue was her garter. The sixpences were pennies, the one in the right shoe was the groom's birthyear and the one in the left was the bride's birthyear.

After a short trip to New Mexico, the couple is now at home southwest of Muleshoe. Both Mr. and Mrs. Hunt are senior students at Muleshoe High School and after graduation in May he will be farming south of Muleshoe.

Miss Phyllis Milligan, of Muleshoe, was maid of honor. She was attired in a royal blue sheath, with imitation fur cuffs. Her head piece was a matching imitation fur headband. She carried a nosegay of white carnations.

Don Ethridge served the groom as best man. Ushers were James Ethridge and Ronnie (Tub) Angeley, all of Muleshoe. Connie Sue Redwine, cousin of the bride was ring bearer. She was attired in a royal blue jumper with white blouse. Her head piece was a headband of blue carnations. Carol Snead, cousin of the bride, sang "I Love You Truly" and the "Wedding Prayer" accompanied by Coralyn Hicks at the piano.

The Progress Methodist Fellowship hall was the setting for the reception. Mrs. Ronnie Ethridge and Miss Rita Lewis, both of Muleshoe, assisted in the hospitalities.

The bride's traveling ensemble was a white velveteen sheath and red accessories and a white hat complimented the attire. A white orchid was her corsage.

After a short trip to New Mexico, the couple is now at home southwest of Muleshoe. Both Mr. and Mrs. Hunt are senior students at Muleshoe High School and after graduation in May he will be farming south of Muleshoe.

## HD Club Plan Shoes Workshop

The Bailey County Home Demonstration Council met Feb. at 9:30 a.m. in the club room. Eleven members and the agent, Mrs. Harriette Jackson were present. Three clubs were represented.

There will be an all day meeting Feb. 8 beginning at 9:30 a.m. for the Council Committees. This is a covered dish affair and Mrs. Russell, the extension agent will be present. All are urged to attend.

On Feb. 10 at 2:00 a training meeting on "oven meals" will be given by the agent, Mrs. Harriette Jackson in her home at 1512 Ave. B. Each club is asked to send two ladies to this meeting.

A workshop on "Covering Shoes with Fabric" will be taught in the club room Feb. 16 at 9:30 a.m. by Mrs. Jackson.

Everyone interested is invited and asked to bring a covered dish.

Materials needed for this workshop are: shoes in good shape, one fourth yard of material (pliable), masking tape (one fourth inch wide or less), cement, narrow ribbon (one fourth inch wide) grosgrain or satin, scissors, brown paper, and nail file.

## Cancer Society Is Making Funds Plan

Charles Preston, district representative, of the Bailey County Unit of the American Cancer Society, presided in the absence of the president when the unit met Tuesday night at the Muleshoe High School.

Mr. Preston instructed the group concerning the fund raising drive for the month of April. The next regular meeting is scheduled for Tuesday March 1.

Washington, D. C., on April 28, at the Statler Hilton hotel where the All-American Homemaker of Tomorrow will be announced. The runner-up in each state will receive a \$500 scholarship; the school of each state winner will be given a set of the Encyclopaedia Britannica.

The scholarship of the All-American Homemaker of Tomorrow will be increased to \$5,000. The second, third and fourth ranking Homemakers of Tomorrow in the nation will receive \$4,000, \$3,000 and \$2,000 scholarships, respectively.

FROM SAN ANTONIO  
Mr. and Mrs. Otto Workman of San Antonio visited in Muleshoe recently. They visited Mrs. Workman's sister and her family, Mr. and Mrs. Beryl Wingo, and their daughter, and her family, Mr. and Mrs. Don Moore and baby.

## Three Way Student Named Betty Crocker Homemaker of Tomorrow

ANONIE HIGHTOWER

The 1960 Betty Crocker Homemaker of Tomorrow in Three Way School is senior Anonie Hightower, daughter of Mr. and Mrs. C. B. Hightower, Goodland, Texas.

She received the highest score in a 50-minute written examination on homemaking knowledge and attitudes ta-

ken by graduating senior girls. She will receive an award pin manufactured by Jostens and representing the slogan, "Home is where the heart is". Her examination paper will be submitted for competition with other high school winners to name the state Betty Crocker Homemaker of Tomorrow.

The test, which was prepared and judged by Science Research Associates of Chicago, was taken by a record number of 379,018 girls in 12,597 schools, an increase of 29,868 girls and 337 schools over last year.

Total enrollment in the six-year-old \$110,000 scholarship program sponsored by General Mills has neared the two million mark (1,800,152 girls). Alaska and Hawaii are participating for the first time this year.

Each state Homemaker of Tomorrow will receive a \$1,500 scholarship and an educational trip April 23-29 with her school advisor. The tour will include New York City and Colonial Williamsburg and will culminate with the American Table Banquet in

**Letters TO THE EDITOR**

**Editor, The Journal**  
Recently someone entered our home and took a small bank containing approximately \$6 in change, consisting of old Indian head pennies and buffalo nickels, on some of which the date cannot be distinguished.  
These coins were a collection of luck money, the same

had been found over a period of twenty years. We had planned to use this money for the purchase of a souvenir.

If anyone gets money through unfair methods, they not only betray the confidence of their fellow-man, they also transgress the divine law of God.

# South Plains Boy Scouts Set Up Golden Jubilee Exposition Plans

Boy Scouts throughout the 20-county South Plains Council are preparing for scouting's biggest event of the year—the Golden Jubilee Exposition, which will be held in Lubbock, March 18-19.

Participating in the exposition will be more than 12,000 Boy Scouts and leaders, said J. W. Smith, chairman of the exposition.

"Scouts of the area will devote special attention to the exposition during this week, Boy Scout Week, to plan booth demonstrations highlighting every scouting skill," Smith added.

The exposition is the alternate year counterpart of the Boy Scout Circus, which last year attracted capacity crowds to Municipal Coliseum.

The exposition is designed to show the public how Scouts operate their advancement program and special skills training. In special demonstration booths, thousands of Scouts will stage live demonstrations

and present special stage shows.

Instruction kits showing plans and policies of this year's exposition have been mailed out to all Scout units, Smith said. "We are urging all scouting groups to select subjects and sign up for exposition booth space as soon as possible."

Each Scout unit to sign up will then appoint a booth advisor, get help and advice from other community groups in preparation of material and training, and complete plans for participation in the exposition.

Theme this year is "golden jubilee" to help celebrate "50 years of service to the country by Boy Scouts", Smith said.

Booths provided by the exposition committee will be about 8 by 12 feet in size. Each booth must be the result of "boy action" and "boy made" things, Smith emphasized.

Attendance will be encouraged through special sale of admission tickets by all units in the South Plains Council. A meeting of the ticket sales committee has been set for Feb. 18.

The exposition will be presented in two performances, at 2 p.m. and 7 p.m., March 12.

Other committee leaders engaged in the exposition, besides Smith, are Bob Hilliard, arrangements chairman; Dr. H. E. Cone and Mike Simpson, in charge of health and safety; J. T. Jones, Jr., ticket sales chairman; Don Austin, participation chairman; Ben Low, public relations chairman; and Otice Green, in charge of publicity.

Counties participating in the South Plains Council of Boy Scouts are: Lubbock, Castro, Swisher, Briscoe, Bailey, Lamb, Hale, Floyd, Motley, Cochran, Hockley, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, Kent, and Dawson.

**SUNBURN AND SKIN CANCER**  
This may hardly be the time of year to be discussing the effects of too much sun, but an American Medical Association spokesman has again pointed out the extremely high rate of skin cancer among Texas farmers and ranchers.

Dr. Stephen Rothman of Chicago, chairman of the AMA's committee on cosmetics, told a clinical session in Dallas that Texas has six times as high a rate of skin cancer as the northern and eastern states. He attributed the situation to the direct rays of the sun in Texas and the fact that many people in the state pursue outdoor livelihoods.

This extremely high rate, he said, could be reduced to a fraction by the daily use of simple sun-protective creams. A number of products are now available, Dr. Rothman reported, which have been found to be absolutely effective in preventing skin cancer if the individual who works in the sun would apply a thin layer on his hands and face each morning.

But his suggestion to the U. S. Public Health Service for such a preventive program, the Chicago specialist said, met with a response something like this: "If you think you can get a Texas farmer to smear cream on his face every morning, then you just don't know Texas farmers."

Consensus of the clinical session in Dallas was that the sun has been highly overrated as a source of health, and that its bad effects for most individuals may considerably outweigh the good.

For the normal skin, said Dr. Rothman, "I am not sure there's anything good to be said about the sun."

Ironically, he pointed out, the confirmed sun bather, seeking a tan which as be-

come symbolic of youth, is hastening the aging process for himself an unattractive, old-looking, wrinkled skin. The full effects of sun bathing have not yet been completely assessed, because the fad has not been prevalent for a sufficient length of time to provide the required study.

But Dr. Rothman holds to the theory that modern man, provided with plenty of nourishment and vitamins, could live in perfect health for many years in a cellar without ever seeing the sun.

TO CONSIDER THE MANY ADVANTAGES OUR ASSOCIATION HAS TO OFFER THE FARMERS AND RANCHERS IN THIS AREA IN DEPENDABLE CREDIT FOR TODAY'S MODERN AGRICULTURE.

HERE ARE JUST A FEW OF THE MANY ADVANTAGES WE ENJOY:

1. We have the privilege of owning all the stock. The purchase of stock in the association is not an expense, but a capital investment in a sound dependable credit home.
2. Our ownership of stock entitles us to vote and elect our board of directors who operate the association for us to fit our needs.
3. Loans are tailor-made to fit the needs of each borrower.
4. We have an unlimited supply of money available at a reasonable cost. Our money comes from the investing public through the Intermediate Credit Bank at Houston. We do not have to depend on local conditions for our supply of money.
5. Interest is charged only for the days the money is used.
6. Term loans are available. Up to three years on Machinery Purchases and up to 5 years where real estate is involved.
7. With Capital and Reserves of almost \$3,000,000, the Association is in a position to handle large loans as well as small ones.
8. Our loan committee is composed of farmers and ranchers who know farming in our community and the secretary-treasurer who has had years of experience and training in agricultural credit.
9. Credit Life Insurance is available but optional.
10. We like the friendly courteous manner in which our business is handled.

We Are Proud That Our Association Pays Taxes Just Like Any Other Corporation or Lending Agency In This Area, Which Includes State, County, School, City, and Federal Income Taxes.

## SAND HILLS PHILOSOPHER BELIEVES

### Russia Has Finally Hit On Right Idea For Improving Its Farming

Editor's note: The Sand Hills Philosopher on his Johnson grass farm on views the Russian agriculture situation this week. Anything to get the spotlight on his farming.

Dear editor:  
Not being a General in the army or an atomic scientist, I'm in no position to say anything important about the missile lag and how far Russia is ahead of us in this matter, although that she's ahead of us is pretty obvious, but when it comes to ideas on farming, I'm ready with an answer, and as everybody knows, if America's missile men were as productive as America's farmers, Russia would be the one worrying about the missile lag. You haven't heard of anyone in Washington worrying about where we're going to store guided missiles, have you?

But what brings me to this is an article I read yesterday on an agriculture conference being held in Moscow. As I understand it, Communist leaders from all the provinces throughout Russia are gathering to review the situation and find out why Russian farming is so far behind. Somebody in Russia has woke up to the fact that you can't eat guided missiles.

And what interests me about the conference is an idea suggested by Mr. Krushev, who toured the United

States last year and visited some farms. He's arguing that what's needed is a "cash incentive to make reluctant peasants better collective farmers."

Mr. Krushev has put his finger on the source of the trouble. Regardless of how thrilling it is to see your country's satellites chasing each other around through space, regardless of how exciting it is to see a picture of the backside of the moon taken by your own brilliant scientists, there's nothing that's ever been found yet that's a complete substitute for cash in hand.

A cash incentive is one of the most effective tools of agriculture ever invented by the mind of man, and that goes I suspect too for teachers, lawyers, doctors, grocerymen, editors, blacksmiths, and occasionally a Congressman.

Yours faithfully  
J. A.

## BABSON DISCUSSES

### America's Most Wonderful Machines

Babson Park, Mass., Feb. 11. When I was in Moscow getting statistics relating to its public school system, I was asked what we are doing to teach science to our teenagers. By "science" the Moscow school authorities mean mathematics, physics, and chemistry.

#### WHAT ARE SCIENCE FAIRS?

For definite information I could think only of the work of William Guild of St. Petersburg, Fla. in developing Science Fairs, Science Clubs, and Previews-for-Teachers. This work especially interests me as it discloses young people with exceptional natural talents. Any of these might easily become an Edison or a Steinmetz or some other great inventor if given individual attention when young.

Since my return, I have mailed back o Moscow clippings from newspapers describing this work. I have also mentioned the work of the Osborn Creative Educational Foundation of Buffalo, N. Y., which is endeavoring to awaken the creative possibilities in all people. Both of these are non-profit institutions supported by gifts from interested donors.

#### WHAT MAKES GRASS GREEN?

Guild's theory is that the true scientist is the one whose curiosity has led him to inquire into everything that 99 percent of the people take for granted. At an exhibit given by youngsters at Tampa, Fla., I noticed a boy with four saucers on his desk. One had green peas, another yellow carrots, a third red beans, and a fourth white corn. When I asked him why they were on his desk, he replied: "To make me curious as to why the different colors from the same soil, same water, and same sunshine." He is much unlike a U. S. Secretary of Defense who is reported to have said: "I'm am not interested in why the grass is green."

The primary intent of these Science Fairs is to stimulate a youngster's native curiosity into a lively desire to find out the reason for things. If he "catches fire" and his imagination is stirred, he is on the way to becoming a great scientist. Russia makes her selections in a rough and heartless manner; but Mr. Guild does it on a voluntary basis — lets the youth, instead of Mr. K, decide his future.

#### UNITED STATES AND RUSSIA COMPARED

Yet I am happy to say that this voluntary American program is already being used in fifty one cities of Florida alone, and I do not know how many are starting in other states; while the Moscow system is hunting for prospects in over 1,000 Russian cities. This is something that our Defense Department should take seriously. I would like to see the Guild Science Center given each year for this work the cost of one missile experiment. It would save our country a billion dollars a year as well as perhaps prevent World War III.

I hope this story will cause the superintendents of schools in wide-awake cities to send

## THE WELL DRESSED YOUNG MAN OF 1910

WHEN... Derisive cries of "get a horse" and a popular song called "Get out and get under," had just ushered in the horseless carriage age.

WHEN... "The Great White Fleet" had returned from its round the world tour—a demonstration of American Naval Strength as "Heralds of Peace."

WHEN... Halley's comet paid its periodic 75 year visit and gave a wealth of data to the fast growing technical observatories....

THEN... This young man was the first of the boys to don the honored Scout uniform. Since then, 33,000,000 boys and adults have served in Scouting and now, in 1960, we stop to observe the fiftieth year of Scouting and its impact on America.

## RESEARCH STATION SAYS

### Agriculture On Plains Facing Problem Declining Water Table

The following review of the Plains water situation is by the Research Station at Halfway.

Agriculture in the High Plains of Texas is faced with the problem of a declining water table. In the twenty (20) year period of 1938 to 1958, the water table has been lowered as much as 20 feet in some areas, and as much as 80 feet in others. Many wells have decreased in production and others have been completely lost due to this declining water table.

At the present consumption rate of approximately 5 million acre-feet per year, the 200 million to 400 million acre-feet of underground water, as reported by the U. S. Geological Survey, will be depleted in 40 to 80 years.

Their studies also indicate that natural recharge, in most cases, is insignificant. Of approximately 1.4 million acre-feet of water caught in an average year in the 37,000 playa lakes, it is indicated that no more than 10 per cent and in many lakes less than 1/2 of 1 per cent is recharged naturally.

If the future agriculture economy of the High Plains is to be assured, all possible measures must be undertaken

immediately to conserve this underground water. Such measures include the use of recharge wells to drain lakes, more efficient irrigation and farming practices to make the water go farther, and land management to prevent runoff of rainfall and irrigation water on slopes.

An experimental recharge well has been installed at the High Plains Research Foundation to study the various problems connected with recharging. The effect of silt, the movement of water underground, and the effect of chemicals on the water are being studied. The effects of the recharge on the immediate area water level will be included in the studies.

To eliminate surface run-off level benches have been constructed on 25 acres having a slope of 1% to 3%. Comparison studies are underway to determine yields, production cost, and water efficiency on this bench area with a similar area having rows running down the slopes.

Studies on the recharge well and soil and water management will be conducted on a long-time basis, and results and data will be published periodically.

## LOOK AT THE LOWER PRICES

List prices as much as \$76.05 lower on popular models with popular equipment

The '60 Chevrolet models most people buy, equipped the way most people want them, are actually priced lower than last year's models. This two-tone Bel Air V8 sedan, for example—with Turboglide, push-button radio and de luxe heater—lists for a whole \$76.05 less! Prices are lower for all comparable V8 models throughout the line. Also for all comparable 6-cylinder models with Powerglide. Yet Chevy's loaded with more of the things that put pleasure into owning a car. (Just look at the list!) It's the greatest year yet to get into a Chevy!

Big brakes for quicker, surer stops. Rivetless bonded linings mean they last longer, too.

More room to relax in. Chevy sedans offer roomier seating than any car in their class. Lower, narrower transmission tunnel means more foot room.

Only full wraparound windshield among the leading low-priced cars.

Electric windshield wipers keep sweeping even when you speed up to pass. Vent windows crank open and closed. So much simpler than fighting those tricky little catches.

Keyless locking of all doors. Quick and easy. The same key opens door, glovebox, trunk and starts the car.

Economy Turbo-Fire V8. Or how to get up to 10% more miles per gallon of regular and still have lots of "git."

Thriftest 6 in any full-size car. It's the '60 version of the engine that got 22.38 miles per gallon in the 1959 Mobilgas Economy Run.

Widest choice of power teams. 24 engine-transmission teams in all, with output up to 335 h.p.

A trunk that's made for long trips with up to 22.5% more actual luggage space. Sill's lower for easier loading.

Fisher Body craftsmanship. Look at the finish, the fabrics, the detail work. You'll see the difference.

Softer, more silent ride with coil springs at all four wheels and new butyl rubber-cushioned body mounts.

Drive it—it's fun-tastic! See your local authorized Chevrolet dealer for fast delivery, favorable deals.

## Area High School Students Take Part In National Project Talent

High school students from the West Texas area are among teenagers throughout the nation who have been chosen "by machine" to take part in Project Talent, a national survey of the talents of American youth.

Dr. Robert Anderson of Texas Tech's psychology department is directing the survey in this region.

The project, which will survey 25 areas of knowledge and aptitude including English and arithmetic comprehension, mechanical and clerical abilities and creativity, includes public parochial, and other private schools — large and small — urban and rural in each of the 48 states of the continental United States.

West Texas high schools participating in Project Talent include Anton High School, Canadian High School, Farwell High School, Fluvanna High School, Ira High School, Littlefield High School, Montevideo, Lubbock, and Dumas High Schools in Lubbock, Lydia Patterson Institute in El Paso, McCamey High School, Stinnett High School, and Three Way High School in Maple.

About one out of every 20 high schools will receive the intensive two-day battery of tests sometime in March. It is one of the largest studies ever made in this field and will be carried out by local teachers and arranged to fit the schedule of the school.

Dr. John C. Flanagan of the University of Pittsburg and administrative head of the program explained the mathematical methods by which more than 800 high schools were nominated.

"In order to sample American high school education as a whole," he said, "No school

nor group of schools is chosen as typical of a city or a state."

Program Director of the survey, Dr. John T. Dalley, who planned the statistical design of Project Talent said, "We simply took the names of all the schools in the United States, as supplied by the office of Education and divided them into various categories -- by size and by large geographical areas and by the number of students enrolled year after year.

"Then we worked out a mathematical system to be sure that the sample we drew would add up to a fair cross section of American high school education. Finally an electronic computer was assigned to the task of picking the specific names of the schools which would provide a fair sample."

Test results of individual students will not be released by Project Talent, nor will comparison between one city and another, one school and another, or even one student with another.

Results will be released to the schools to help in their planning, and to report to the students participating in the study. After graduation the students will receive questionnaires on their occupations, and the aptitudes and backgrounds which led to these occupations.

Aside from taking an inventory of talents in America, information gained in Project Talent, it is hoped, will give educators an insight into the patterns of aptitude and ability which are predictive of success in various careers. Follow-ups to the national examinations will be sent to students in order to find out educational and vocational experiences.

We had an interesting business meeting with Alma Turner presiding, Delores Duncan is a nominee of our club to run for delegate. There will be three chosen from seven nominees to attend District meeting to be held in Littlefield this year. Ruth Landers was welcomed into our club. Glynna Buhrman served refreshments to Glenda Haley, De-

lores Duncan, Mildred Stewart Bertha Daniels, Gladys Moore, Ruth Landers and Alma Turner.

## LOCAL UNITS JOIN IN 13 Million Americans Observe 63rd Birthday of P-TA February 17

Some 12 million Americans at home and abroad will observe the 63rd birthday of the National Congress of Parents and Teachers, February 17.

Parent-Teacher associations dedicated to the welfare of children and youth, will observe Founders Day in a variety of ways. The aim will be to recall the spirit of two forward-looking women who recognized the need for special attention to the nation's youth, Alice McLellan Birney of Georgia, wife of a Washington, D. C., attorney, and Phoebe Apperson Hearst of California, widow of a California senator and a leader in Washington philanthropic and educational circles.

These founders, concerned about the plight of children growing up in ignorance and neglect, on February 17, 1897, called a meeting of all mothers who shared their interests. The 2,000 who came formed the nucleus which has grown into some 45,500 PTA's in the nation's communities. The organization has also followed Americans thousands of miles from home to military bases, where they first established a school, then a PTA.

During the month of February local units make use of the opportunity to extend special invitations to citizens who are not members, as well as to those who are, to honor and give recognition to local people, who are dedicated to the welfare of children and youth and to inform the changing membership of the organiza-

tion's traditions and achievements.

The Texas branch alone, which has just observed its golden anniversary, has 2,650 local units, with some 687,000 members.

Said Mrs. T. W. Whaley of

Kosse, president of the Texas Congress, "Our State Congress has just observed its 50th birthday in a blaze of glory. We cannot rest, however, upon our former successes. We must gird up our loins to meet the challenges of the present and the future."

## Raise a college education in a sorghum field?

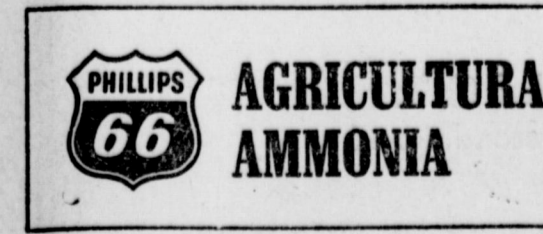

## It's not fantastic! And here is why:

One leading farmer with 250 acres of maize reported a yield increase of 1625 pounds per acre after application of Phillips 66 Ammonia. He cut a total of 7250 extra bushels of grain and netted \$4050 in increased profits after deducting the cost of ammonia. This extra income for only two years—a total of \$8100—will more than send a boy or girl through college.

|  | Using Phillips Ammonia | Without Ammonia |

### YOUNG FARMERS MET

Thursday, Feb. 4 at 7:30 p. m. a group of Bula and Enochs young farmers met in the school agriculture building for the purpose of organizing a Young Farmers Association (Y. F. A.).

Motion was made and carried to elect Eddie Wallace as president. He immediately taking charge. Dewitt Tiller was elected vice-president, D. J. Cox as secretary and treasurer, Benny Hall and Robert Claunch program committee.

Freddie Durkson, vocational agriculture teacher, spoke to the group concerning YFA and its advantage to the farmers. Plans were made and discussed to affiliate with the state YFA. Meetings will be

held on the first Thursday of each month in the agriculture building at 7:30 p.m.

Plans were made by the program committee for the next four months and at each meeting a competent teacher will be present to discuss the problems. February, a study of fertilizer; March, finding new money crops; April, weed control; May, study on insect control.

All new in the Bula and Enochs communities are urged to attend these meetings. This is not only for the young farmers but for the older farmers with young or new problems.

Attending were D. J. Cox, Eddie Walker, Dewitt Tiller, Jimmy Cannon, Benny Hall, Robert Claunch, J. C. Sniker and visitors Freddie Durkson and Jo Turner.

Word was received early Monday morning of the death of Mrs. T. A. Thomas's mother, Mrs. C. E. Tucker of Slaton.

Saturday night company at the T. L. Harper home were Mr. and Mrs. Sam May of Abilene and Mr. and Mrs. L. L. Walde of Bula.
