Two Queen Contests Are Planned For This Month

Tahoka Jaycees Plan Miss Grain Sorghum Contest

A "Miss Grain Sorghum of Lynn County" beauty contest will be held Tuesday, July 27, at the Tahoka High School auditorium.

Prizes will be presented to the winner and first runner-up.

Entry blanks may be obtained from Leonard Dunn at the Tahoka Post Office or by writing and asking for one from Tahoka Jaycees, Box 241, Tahoka.

All applications must be post-marked or given to Dunn not later than July 19.

The Jaycees realize that this is a very short notice for interested ones to enter a beauty contest of this type, but felt that it would be an injustice to those of Lynn county not to be given an opportunity to compete in the national contest and the scholarship.

Wendall Patterson of the Jaycees states that with cooperation by turning entry blanks in as soon as possible it is certain that the July 27th event can be a very competitive contest with many Lynn county beauties.

John F. Thomas Is Heart Victim

John F. Thomas, 51, prominent Lynn county farmer, died Saturday noon in Tahoka Hospital from a heart attack he suffered Friday.

Funeral services were held Sunday at 3:00 p. m. in First Methodist Church with the pastor, Rev. Aubrey White, officiating. Graveside rites were conducted by the Masonic Lodge and burial was under direction of White Funeral Home.

Thomas was currently the Lynn County Democratic Chairman, was a former member and president of Tahoka School Board, and for several years was president of the Farmers Cooperative Gin of Tahoka. He was a member of the Methodist Church and the Masonic Lodge. He was an avid fisherman. Because of his varied activities and cheerful disposition, he had a great host of friends not only in Tahoka but over the South Plains.

Born at Eden on December 10, 1913, he lived successively with his parents near Noodle, Jones county, Abilene, and Richland Springs, San Saba county, where he was married on December 28, 1936, to Miss Norma D. Edwards.

The couple came almost immediately to Lynn county and have lived here nearly 30 years. John and wife worked hard to acquire land of their own, and work in the field in an effort to get his crop in shape probably led to his

Maize Is Suffering In Hot Weather

Much of the older feed over Lynn county, especially in the north half, is burning up from the hot, dry weather of the past two weeks farmers report. Much of this older maize will go out very quick without a rain in a day or two.

Cotton is reported to be doing well and growing rapidly, but many farmers say they would also like rain on their cotton soon.

Audrey McKee of Houston arrived Sunday for a four-day visit with his parents, Mr. and Mrs. L. D. McKee, and with a sister, Mr. and Mrs. Clayton Carter. He returned to the city Wednesday night where he is employed by Montgomery Ward. Audrey will attend the University of Houston again in the fall.

The group will be accompanied by County Agent Bill Griffin and Mrs. Billie Carr, home demonstration agent. In addition to other camp activities, the handcraft projects this year will be pin-up lamps.

Foreign Student Is From Greece

Miss Olga Aivazis, 17, from Athens, Greece, will be Tahoka Rotary Club's foreign student guest brought here in cooperation with the Experiment in International Living.

Miss Aivazis is scheduled to arrive here August 4 and begin her return trip September 21. She will also visit New York City and Washington, D. C., but will live six weeks with Rotary families in Tahoka.

She is the daughter of a lawyer, was born in Cairo, Egypt, and lists her nationality as "Hellenic." She is a graduate of Greek Gymnasium. She also hopes to become a lawyer. She is a member of the Greek-Orthodox Church.

In school, she was president of her class and vice president of the school, has written some for newspapers, and enjoys swimming, skating, riding, reading, music and dancing. She has traveled in Austria, Switzerland, Italy, and France.

She has written Harold Green, chairman of the local club's foreign student committee, that she looks forward to the visit to Tahoka and the USA, to gain a "knowledge of the people's mentality and ways of living as well as the advantage of visiting a foreign country."

The local club was one of the first in the Southwest to cooperate in bringing a student from Europe to America. Club members think they profit from the experience and, in addition, help promote a better image of America and democracy to the lands represented by the outstanding young people.

City Building Permits Reach \$301,000 First Half Year

Burglar Caught Sunday Night

Burglary of two local stores Sunday night was quickly solved by quick action of W. R. (Buddy) Aaron, night City policeman. As a result one man is charged with burglary and car theft and the other with receiving and concealing stolen property. Their cases will be referred to the grand jury; states County Attorney Stephen Thompson.

The men are Miguel Cerna, 18, and Eligio Martinez, 27, both of Lamesa, formerly of Corpus Christi. The young man lives with the old one, Martinez, who has served a term in the penitentiary for a similar offense.

Young Cerna is alleged to have broken into Hamilton Furniture and Appliance and stolen a portable TV and six transistor radios, and Stanley's Army Store, where he got four pistols, five wrist watches, seven knives, and other loot.

Martinez is alleged to have brought Cerna to Tahoka earlier in the evening, according to Police Chief Jack Miller. Earlier in the night, he was picked up at a local service station for drunkenness.

Some time later, Billy Riley had parked the 1965 Ford pickup belonging to Dale Gandy near the First National Bank. On finding the pickup gone, Billy notified police and Aaron took off south as the pickup had been reported heading that way, and at O'Donnell he caught Cerna in the pickup, which he found to contain the burglary loot.

Next morning, when police searched Martinez more closely, they found he had concealed on his person some of the watches stolen from the Stanley store.

Mr. McCracken has full detail on the new personalized numbering system.

Citizens Asked Not To Burn Trash

Several complaints have been received by the City concerning the burning of grass, weeds and trash, states J. M. Uzzle.

Some of the complaints have been from people who have asthma and declare the smoke is hard on them. Others complain smoke is sucked into air conditioners and is offensive.

The City asks that citizens refrain from burning any trash, and instead place grass cuttings, weeds, papers, etc., in a container at the alley and the Sanitary Department men will pick it up, if not too heavy to handle.

Denver Floods Get Red Cross Help

(By Dr. Gerald Wood)

I happened to be in Denver, Colorado immediately after the June 18th flood. To many people the flood never existed, but to the ones along Cherry Creek and the South Platt River it was a reality. Damage to public property, roads, bridges, etc. was estimated in the millions of dollars. Untold millions were lost in private property.

The rains came heavy and hard in the mountains to the west and moved on to the plains. A wall of water estimated from 10 to 15 feet high came down the South Platt River. It washed houses, cars, trailer houses and trees down the river with such tremendous force until no sign of anything was left. The wall of water completely destroyed large bridges and highways. Only very few lives were lost, fortunately.

There were scores of homeless families, but these people were immediately cared for by the local Red Cross Chapter. Unfortunately, the destruction was so enormous, the local chapter could not take care of the needs.

Within two days Red Cross workers from all over the country were flown in to help. It was and still is a big operation to take care of the needs of the flood victims. Most of them were staying at the same hotel as me. I talked to several from Seattle, Rochester, New York, Virginia, Florida and all over the United States. The cost of administration is high; of course, because they go all out where they are needed. A woman from Seattle got to be home a few weeks before coming to Denver. She had just returned from the floods in Minnesota, before that in Cincinnati. These people go where Red Cross is needed and because they are needed to carry out the work of Red Cross.

The flood victims go to the center to be interviewed. The information involves their job, income, savings and their loss. From this information the Red Cross can estimate the amount of the grant, in terms of money, not loans, each family can receive. This takes time and patience. Two or three days after the flood these victims may still be in a state of shock—"what happened, where is everything?"

One man came in and they asked where he lived. He could give an address but said he couldn't find the location. He even lost the foundation of his house. For two or three days he had been hunting along the river for something that belonged to him.

Mr. and Mrs. W. C. Huffaker Sr., accompanied by a grandson, Mike Huffaker, went down last Friday to the Stamford Cowboy Reunion. They returned home Sunday.

The term "spot" cotton was first applied to cotton actually on the spot at any market.

The homeless were housed to the best of their ability. Maybe three or four families in a three bedroom house. Over 800 families had been interviewed by the end of one week in Denver. But there were many more in eastern Colorado and the Red Cross will do the same job for them.

Where there is disaster the Red Cross will be there to help; in Denver, Minneapolis, Hale Center or wherever it may be. Let's hope and pray we won't need them in Tahoka. Give to the Red Cross—the United Way.

Mr. and Mrs. Gene (Dorothy) Sparks came by recently for a visit with her parents, Dr. and Mrs. K. R. Durham, and left their son, Steven, while they and the girls went on a vacation trip.

Mission of Ysleta by E. M. Schwetz

THE MISSION OF YSLETA

The Church that changed sides!

When the Indians revolted against Spanish rule in 1681-2 in the upper Rio Grande Valley in New Mexico, refugees sought safety at the mission at El Paso del Norte (now Juarez). One group settled on the Mexican river bank and named its community Ysleta del Sur (South). This settlement was established in 1681 and a mission was completed the following year on a small island in the Rio Grande.

The Rio Grande changed its course and the site is now in Texas. Ysleta and its mission are generally given the distinction of being the oldest permanent settlement in Texas... truly a church that changed sides!

CHOOSE THE SIDE OF FREEDOM...with U. S. Savings Bonds!

Thus, Ysleta del Sur, the refuge of the oppressed, became the earliest of settlements to identify itself with a brave, new land of freedom.

Today, millions of Americans choose the side of freedom and they do something about it—by purchasing U.S. Savings Bonds.

Every dollar you invest in Savings Bonds gives Uncle Sam exactly that much help in the vital task of safeguarding liberty for yourself and your family. Buy Savings Bonds at your bank or on the payroll savings plan where you work.

Turner and Randy Unfred will receive their Lone Star Farmer degrees, the highest degree awarded by the state association of FFA.

Dickie Turner, the son of Mr. and Mrs. Dick Turner, won the Area II crops farming award; and Randy Unfred, son of Mr. and Mrs. L. C. Unfred, won the Area II soil and water conservation award.

Others attending will be Ricky Haley, son of Mr. and Mrs. V. P. Haley; Duane Wyatt, son of Mr. and Mrs. Richard Wyatt; and Wayne Fillingim, son of Mr. and Mrs. A. C. Fillingim Jr. Leonard Wilson, New Home vocational agriculture teacher will accompany the boys.

Randy has been named by chapter members as official delegate from New Home Chapter, and Dickie was elected the alternate.

The three day meeting of representatives of over 900 FFA chapters throughout Texas will include the awarding of advanced degrees, scholarships and awards to outstanding members of the organization.

Business will include election of a state president from the ten state officer nominees, elected by members in ten areas of Texas; voting delegates to the National FFA Convention in Kansas City in October; and election of a sweetheart from ten area nominees, and the top talent team of the state.

HILL COUNTRY IN FINE SHAPE, HAGOODS SAY

Mr. and Mrs. Luke Hagood of Junction and youngest daughter were here last week end visiting his brother and wife, Mr. and Mrs. W. W. Hagood. The daughter, a recent graduate of Junction High School, is attending South Plains Junior College this summer.

Luke says the Hill country is the prettiest he has ever seen it, as rains have made the grass grow luxuriously. In fact, he says, if weather were to turn off extremely dry grass fires might sweep wide areas and do terrific damage.

The Maurice Huffaker and Maurice Bray families spent last week end on a short vacation trip to the Big Bend country.

Crop Research Progress Told

High Plains Research Foundation and the work it is doing to develop new and better crops for this area was told Tahoka Rotary members Thursday by Jack Cloude, public relations representative of the non-profit foundation.

Mr. Cloude showed pictures of the project, located at Halfway, 14 miles west of Plainview on 310 acres of irrigated land. The Foundation has recently acquired 504 acres 10 miles southwest of the present site, where dryland research will be conducted along with other projects.

The Foundation, established in 1956, is supported by memberships and contributions.

Primary object of research being carried on at Halfway is to bring more net dollars to the farmer.

One project seeks a means of better cotton fibre development by raising temperatures at night. He said fibre development drops off when temperatures reach 70 degrees, and 60 degrees is too low. Two more hours of fibre development at night has been secured by planting maize two rows, one row blank, cotton two rows, the next one blank. Grain gives protection to cotton and helps hold heat in longer. This is the sixth year of this experiment, and fibre has definitely been improved. He declared they have little trouble with fodder getting in cotton as maize is combined and fodder immediately turned under. However, this is highly irrigated land.

Another development, not yet ready for release, is production of a hormone to be applied to cotton to shorten the stem, decrease the foliage and improve the fibre. This dwarf cotton they hope to make produce two bales per acre on dryland.

Other new crops being developed are new varieties of soy beans, sunflowers, and sesame. New developments are being made in bench leveling and flame cultivation.

He said these are just a few of the projects being worked on by their scientists. There are 6,000 different research plots on the 310 acres.

The speaker was introduced by Garland Thornton, an old friend of his.

New President Ross Smith was in charge of the meeting for the first time, and the old president, Wilton Payne, sat back and humored his ulcers.

Smith announced directors had voted to participate again in the Attorney General's Youth Conference by sending two delegates from Tahoka High School.

Barbara Whorton, daughter of Cap Whorton, substituted for Marla Bray as club pianist for the day.

WASHINGTON AND "SMALL BUSINESS" BY C. WILSON HARDER

There should be little wonder that Washington bureaucrats have trouble understanding Asia. At times they even have difficulty understanding the problems of the U. S. A.

Several months ago, stampered by labor officials and assorted "do-gooders," the Congress made it illegal to continue the importation of farm workers from Mexico, the so-called "braceros."

C. W. Harder

Labor Secretary Willard Wirtz, who perhaps never saw a farm in operation, stubbornly insists that the American unemployed can do the work. The only problem is that the American unemployed will not do this type of work.

Recently, Phillip Mark, executive head of a big California cooperative cannery operating five plants, announced that they will not attempt to pack tomatoes this year.

In addition, he announced that the directors have authorized a tomato canning plant to be established in Mexico. A large share of the fresh table tomatoes are now being shipped in from south of border.

Thus one California town of about 40,000 population will lose an estimated payroll of some \$400,000 and another million dollars in supplies and service purchased in the area.

This trend will apparently spread, as bankers are showing a reluctance to advance money to develop a crop that may go unharvested.

Tomatoes are the largest canning crop in California. Between 2 and 3 million tons are processed annually.

It is also interesting that this decision was announced by Phil Mark, as he cannot be classified as a dyed-in-the-wool reactionary conservative. Instead, he has long been engaged in what might be termed a liberal school of economics. Before he joined the cooperative canning and built it from three plants to five plants, he was an officer of the federally sponsored Berkeley Bank for Cooperatives.

Yet, he and his board of directors, all active growers, do not want to see their members take a chance on producing a crop of tomatoes that may never get to the canneries.

For tomatoes are a critical crop, and must be "bobbed" by experienced workers from the very moment they are transplanted into the fields from the seedbeds. They are susceptible to many diseases and insects, and when ripe must be handled promptly before mold develops.

If Secretary Wirtz and his supporting labor leaders and "do-gooders" had ever planted a tomato acreage and brought it to maturity, they would have a different opinion. But as it is, being perfectly ignorant of the problems, they are in a perfect position to tell farmers what they must do.

Proper fertilization is one of the most important practices in the proper management of irrigated pastures says Don Reed, SCS Technician. Without it we cannot grow crops for economical production or for protective cover.

Fertilization recommendations should be based on soils analysis, when available, for the particular pasture. When fertilizer recommendations are based on soil analysis some of the more important

things to consider in arriving at amounts needed, include previous cropping and fertilization history, anticipated production, amount of residues present, irrigation water management and the efficiency of fertilizers.

For established waterways or pasture the fertilizer may be broadcast. As the season progresses, plant symptoms should be used as an indication for the need of additional amounts of fertilizer, over and above the recommended amounts, says Reed. As an example nitrogen starvation is usually expressed by a general overall pale green appearance of the plants. Application of fertilizer should be within 80 percent of the recommended rate to be most effective.

Mr. and Mrs. Gus Gatzki of Wilson expect to leave next Monday on a visit with relatives in Indiana and Ohio.

On a visit at The News office one day recently, Mr. Gatzki said they really enjoyed their trip to Germany. They saw five of Mrs. Gatzki's cousins she had not seen in 57 years, and Mr. Gatzki said "That was the happiest bunch of kids I ever saw." However, he was unable to locate any of his relatives.

Mr. Gatzki says he found the German people feel very kindly toward the United States. He says the people realize and appreciate the fact that we saved them from oppressions. At first, many thought Hitler was trying to do something for the people, but as he gained power the people realized too late he was a despot.

After more than thirty years of one administration after another floundering around trying to help the cotton farmer (or to get his vote), messing with every kind of gimmick imaginable but common sense, the position of cotton gets worse and worse and some are even predicting that it's just a matter of time until cotton is a "dead duck."

Most of our troubles can be laid on the government, first for spiking the price of cotton too high to sell on the open market and putting foreign countries in the cotton business; second, on we people in the cotton country who have been so greedy we demanded prices above what our product would sell for on the open market.

Still, after 30 years, we blindly experiment with ideas to beat the law of supply and demand—and more and more nations get in the cotton business while we fiddle around.

In fact, the U. S. Government, we read somewhere recently, has put 26 new nations into the cotton business since World War II. Our Agriculture and State Departments this very day have experts around the world teaching other people how to raise cotton in competition to our own farmers.

try Life of June 17, 1965, head- lines a story, "First Million Cotton Crop in Queensland," and goes on to say cotton growing was started there only six years ago. Wee Waa district of New South Wales is a rapidly expanding irrigated cotton area, financed largely by American capital and helped by U. S. government technical advisors.

Argentina reports cotton exports up substantially to Europe and Japan. Incidentally, Argentina's sales of beef to the U. S. are up 12 percent.

Today, 49 nations of the world produce cotton—a grand total of \$1.6 billion bales in 1964, more than three times the 15.2 million bales produced by the U. S., which was once the major cotton producing country of the world.

You may be surprised to learn Communist countries produced 14 million bales last year, and most of them have now or have had in the past technical and financial help from the U. S. government. The foreign free world last year produced 22.4 million bales of cotton.

For the 49 nations producing cotton, seven are in North America, eleven in South America, five in Europe, 15 in Africa, 15 in Asia.

The above figures are from the U. S. Department of Agriculture, Consumer and Marketing Service, Cotton Division.

All these nations but us sell on a competitive open market. All produce cotton with very cheap to moderately cheap labor. Most of them learned to produce it or developed a competitive staple with your tax dollars. Yet, Congress and the Administration blindly continues to send these countries, even Tito and Nassar, your income tax dollars. With spiked labor costs, increased taxes and corresponding jumps in costs of everything the American farmer has to buy, there is no way the cotton farmer can survive without subsidies—not that he wants them, but that he has to have them for protection.

"Heavy" Nelson jumped us out for not having a story recently about New Home Pony League team beating Tahoka Braves. We beg and plead for kid game results, but we can't run 'em all down, Heavy. We're sorry, we didn't mean to discriminate.

Altham Thomas says Pat wrote her that one day recently up at Lake City, Colorado, five trucks of Army troops, a couple of helicopters and some airplanes blew into town all of a sudden to start a search for a missile which went astray somewhere in the mountains. Fran, our least granddaughter, saw the commotion, rushed in the store screaming, "Mommy, Mommy, the Russians have landed."

President Johnson was over in the hills of West Virginia visiting the "poverty stricken", met an old codger who denied he was poverty stricken and said he had all he needed and wanted. "But," LBJ is reputed to have told him, "You don't even have a bath room, no screens on the doors, and your clothes are ragged. Why do you live like this?" Whereon, the mountaineer replied, "I'll show you. Read Proverbs 26:17." (If you don't have a Bible handy, read paragraph at bottom of this column.)

A little boy came running in the house and told his mother a big black bear was in the back yard. She looked out and saw it was a cow. She told the boy to ask God to forgive him for telling a fib. Pretty soon she asked her son if he had asked God to forgive him, and the boy said he did and God said he thought it was a bear, too.

Paul Miller of Christoval writes: "Frank, to keep the record straight, I was born in Canton, Van Zandt county, Jan. 11, 1881. All of us Millers had one of the best times of our lives at the Old Settlers reunion. Thanks a million to all, Paul."

Proverbs 26:17: "He that passeth by, and meddeth with strife belonging not to him, is like one that taketh a dog by the ears."

Cotton is the top "cash" crop.

CAN DISCRIMINATION HELP COMMUNISM?

I was victim of discrimination a few weeks ago in my home town of Tahoka, where I have lived all my life, or the past 25 years.

The incident took place in a local barber shop. I started patronizing this shop not long ago, and they had cut my hair the past two times. There were several people in there. I had waited in line about 15 minutes and it was my turn to get my hair cut; but the barber told me that he was sorry but he couldn't cut my hair because I was Spanish and they weren't supposed to cut Spanish men's hair. The barber told me that I was as clean as anybody but that if he cut my hair he would have to cut all Spanish men's hair and he didn't want to do that. After he refused to cut my hair, I thanked him anyway and walked out like a gentleman.

On my way home I wondered what led the barber to commit this act of discrimination. I was wearing my usual work clothes, which consist of dress slacks, a white shirt, and a tie. The other gentlemen in the barber shop were also wearing their work clothes and none of them had a white shirt and tie; in fact, a couple of them looked like they had been working in the field and hadn't even been home to clean up, but all of them got their hair cut because they were Anglos.

Now that I have told about my little episode, I will tell you how and why I believe that discrimination can help communism.

Perhaps I have a strong mind and the guts to take this kind of discrimination, but not all people can take this and hate an act of discrimination such as this. Communists just adore a person who hates Anglos or any kind of authority. It has been established that Communists have infiltrated Civil Rights groups which consist of people who have been victims of discrimination.

Perhaps one of these people who is working in these groups as a "hater." "Haters" are welcome prey for communists, and usually a person who is a "hater" has no love for God, his country, or his fellowman. A "hater" has no code of ethics and usually has a warped mind. Perhaps the latest example of a "hater" with a warped mind is Lee Harvey Oswald, who assassinated our late and beloved President John F. Kennedy.

Perhaps right now a young man with a warped mind is being taught to be a "hater" by a Communist. This young mind could be trained to hate all authority and to help destroy the democracy which our forefathers built and fought so hard to preserve over the years.

Communism is spreading all over the world and in the U.S.A. If all the people of different nationalities can not get along together as fellow Americans, I believe that Communism will continue to spread and perhaps at a

great rate of speed. In order to stop communism, we Americans must try to get along together and not look down our noses at anyone, whether he be white, black, brown, yellow, or red skin. If Anglos continue to sneer or look down their noses at our non-Anglo American citizens, they're just inviting communism.

I can never hate my fellowman even for committing an act of discrimination against me, but perhaps the very next act of discrimination in Tahoka or any other place in the USA could be the spark a young, warped mind needs to be a "hater" of humanity and democracy.

I blame not just the barbers of Tahoka for discrimination but the people who would sneer or hesitate to go back and get their hair cut because a barber might be cutting my hair while they were waiting. Most of our barbers have families to support and they say they would hate to lose some of their Anglo trade because they were cutting Spanish men's hair.

I sincerely believe that in Tahoka there are more people against discrimination than for it, and this is why I wrote this article. If you are against discrimination of this kind, please tell the News so your opinion can be printed also.

Thank you for reading my article.

New Caparol controls weeds in cotton at layby without residue problems in crops planted next spring.

You can spray new Caparol* at layby for control of most annual broadleaf weeds and grasses, without fear of a soil residue carryover to harm crops planted in the spring of 1966. Just apply Caparol after your cotton is up six inches or more and before weeds are two inches high.

Spraying Caparol at layby will give you control until your cotton is up high enough to shade out any weeds that may germinate late in the summer. You can even apply Caparol where other herbicides have already been used and you find weeds breaking through.

Caparol is easy to handle and apply. Just direct the spray at the base of the cotton plants. You'll get quick knockdown of the young weeds and grasses. Then the action of Caparol continues to control weeds and grasses through the roots as they germinate for the next several weeks.

With Caparol on the job, you won't have weeds to compete for moisture and plant food. And you won't have rank weeds to foul up harvesting... to stain and downgrade lint.

So plan now to use Caparol at layby. It's available through your local supplier.

Braves Champs Of Pony League

For the fourth consecutive year, the Lyntegar Braves of Tahoka have won the championship of the Lynn County Pony League. The Braves have been managed each year by Thomas Jolly, who this year was assisted by ex-Brave John Tyler. In winning the league title this year, the Tahoka team swept a record of 11 wins and 1 defeat. Strangely enough, the lone defeat came at the hands of the New Home Eagles, who finished in last place. Jolly scratched a good defensive team with superlative pitching from veterans Charlie Brown and Ray Chapa.

The O'Donnell Dodgers lost a chance for the championship by losing three close games to the Braves, and finished with a record of 8 wins and 4 losses. The Dodgers were perhaps the best-balanced team in the league, with good pitching, a good defense, and a strong hitting attack. Third place went to the Tahoka White Sox with 5 wins and 7 defeats, and New Home and Wilson Red Sox tied for last place with 3 victories against 9 losses.

The Braves lose the nucleus of the championship club because of the age limit, and they are not expected to be as strong next year. Favored to win in 1966 are the Dodgers, who returned most of their second place team.

Mr. and Mrs. Clint Sikes and Patricia and Mrs. Billy Tomlinson, Gordon and Sherri spent the week end at Lake Brownwood. They returned home Monday.

White Sox Hitters Feature In Play

The Tahoka White Sox proved the old baseball law that a team does not win without strong pitching no matter how good their hitting may be as they won only five and lost seven despite fielding one of the strongest hitting teams seen in the Lynn County Pony League in several years. The Sox had five players to bat over 300 and compiled the near spectacular team average of .293.

The White Sox, however, started the season without an experienced Pony League pitcher and although they received gritty efforts from Larry Durham, Billy Curry, James Sayles, Mike Glenn, and Greg Thomas, they were no match for the more experienced pitchers that some of the other teams possessed.

The Sox, who were co-sponsored this year by the Farmers Co-op and the Union Compress, are expected to be stronger next year as they return Durham, Sayles, Joe Cavillo, Jim McCord, Fred Pendleton, John Rodriguez, Martin Warren, and Willie White.

Braves Win Last Game Tuesday

Tahoka Braves ended the season Tuesday night of last week with a 9-0 victory over the Wilson Red Sox in a game that was 0-0 until the Braves exploded for all of their nine runs in the sixth inning.

Ray Chapá went the distance to record the win. He closed the season with a 4-0 record. Charlie Brown recorded a 6-1 record for the season to help the Braves post a 10-1 season record and win their fourth county championship in a row.

Manager Thomas Jolly said the Lynn County All-Stars would be picked tonight and workouts will be started shortly for the All-Star tournament to be this year in Lubbock.

Detergent Gas Can Be Dangerous

Fire Chief E. W. (Pat) Patterson states that a campaign has been initiated by a firemen's training institute to prevent detergent-gas poisoning.

In an article brought The News recently housewives are told never to mix bleaching agents with any other cleaning components.

Recently two housewives undertaking a household chore in separate locations but under similar circumstances had a peculiar type accident. Both were using an ordinary toilet-bowl cleaner, they were dissatisfied with the way stains were being removed so each added a household bleach and stirred the mixture with a brush. As a result, one died quickly and the other spent a considerable time in a hospital.

The news item stated that a number of people were overcome a short time ago by toxic gases released from a do-it-yourself cleaner (a witch's brew of a cleaner, chlorine bleach and ammonia.) What occurred in these cases was the generation of a poisonous gas when users decided to combine two or more cleaning agents commonly found in almost every household. The addition of the old familiar chlorine bleach to an acid-producing substance, such as a toilet bowl cleaner or just plain vinegar, will suddenly release a quantity of toxic chlorine gas. When it is mixed with other alkaline matter the chemical action liberates a highly irritating gas, and when inhaled the fumes can cause serious injury and possibly death.

Little League Play Ends, All-Stars Play Crosbyton

Thursday night's games wind up the Little League season with the outcome in doubt right up to the final gun. Last week of play has been canceled so All-Stars will have time to practice for Area Tournament at Crosbyton starting July 22.

The Giants were meeting the Cubs and the Cards the Yanks in Thursday night's games.

The Cubs and Giants tied in the first half of the season play, and if the Giants manage to beat the Cubs tonight the same two teams will be tied in the second half. In the second half of play, the Cubs have won five and lost one, while the Giants have won four and lost two games.

The Cards, 2-4 for the second half, will battle the Yanks, 1-5.

In the Area Tournament at Crosbyton on July 22, Tahoka All-Stars meet Crosbyton in the first game.

The All-Star players were to have been selected this Tuesday night and announced following Thursday night's games at Little League park.

JACOBS SAYS FISHING IS GOOD IN COLORADO

Editor, The News:
Several Lynn county people asked me to keep them posted on the fishing and the weather in this area, so thought I would write this for those interested.

First, the floods in Colorado have not affected the resort areas. People can come and go in this region as usual. After a cool and windy June, the weather has calmed down and is real nice now. The temperature is usually in the 60's or 70's in the daytime and gets down to 30's and 40's at night.

Colorado had a great amount of snow last winter, so the streams will run higher than usual this summer. Fishing has been good in the lakes and high streams and the lower streams are getting in better condition. Fishermen and women are catching fish on flies, spinners, and bait.

A Mr. Brown and I made a trip to Big Blue, a 45-minute drive up into the mountains to a height of around 11,000 feet. We drove the car as far as we could and then walked for about an hour. I had not realized the beauty of this area before. We were away off the beaten paths, sort of in a world of our own. People miss the beauty of the mountain scenery and some of the best fishing when they stay too close to town and the highways. I might add that our walk back to the car wasn't very tiresome as we both had our limit of trout for the day.

I will make a telephone report on this area to radio station KCAS in Slaton on Friday morning, July 23. The time will be between 8:00 and 9:30 a. m. I made a report to them last week. By the way, Colorado time is the same as Texas time this summer, so people coming this way shouldn't expect to gain that hour that they usually do. It isn't dark at 9:00 o'clock here.

People can dial direct into Lake City. If someone needs assistance for this area, they can dial 303-994-8238 and we will be glad to help them.

I hope this finds everyone down that way doing fine and that the cotton crops are in good shape. Tell everyone hello.
Jake Jacobs.

Editor of The News:

I have always thought the town of Tahoka was pretty special, but this past week end I received a great disappointment. As Mother, Dad and I drove through the down town area Sunday afternoon, the 4th of July, Our Independence Day, I saw only one United States flag being flown. After the article in last Friday's paper about being "square," well, it looks to me like there's not too many "squares" in Tahoka.

Yours,
Pfc. Wyndell B. Inman, 720th M.P. Bn., Fort Hood, Texas.

Miss Sandy Stone of Evant is here visiting her cousin, Clovis Honeycutt, and wife.
