Expansion Planned By County Library

Plans for improving Lynn County Library were discussed at the monthly meeting of the board of directors Tuesday in City Hall.

Steve Thompson, chairman, has left, and Vice-Chairman Garland Thornton will fill out his unexpired term. Elvin Ray Moore of O'Donnell is secretary, and Mrs. Madeline Hegi is treasurer. Other board members include Mrs. Guy Bradley of O'Donnell, Mrs. N. B. Hancock of New Home, Dan Cook of Wilson, Mrs. G. M. Stewart, Mrs. Gladys M. Stokes, Frank Hill, and Robert Abbe. Mrs. A. J. Kaddatz is librarian.

Among plans discussed was a proposal to form a "Friends of Library" association to help add books and extend time the library is kept open. Mrs. Abbe, Mrs. Hancock and Mr. Moore were named to a committee to make recommendations of the proposal.

Although short on financing, the County has backed the project and has offered much larger space for the growing library in the old ASCS office building at the northwest corner of the square if and when the same is remodeled. The County is now having plans drawn for remodeling the building.

There are now more than 10,000 books on the library shelves, and the latest best sellers are being added all the time. Present quarters in the Scout Hut are far too small for the growing library.

If and when moved, plans are to add more later reference books, have a reading room for benefit of those who need and desire such a place, and more effort will be put forth to make the library more available to all parts of the county.

A great many people check books in and out of the library each Wednesday and Saturday afternoon now, and some even from over at Post and other towns.

Masons Holding Workshop Here

City, Gen-Tel Reach Accord On Franchise, Wilson EAS

After two years of negotiations, City of Tahoka and General Telephone Company have come to an agreement on a new 15-year franchise for the telephone system, EAS (extended area service) with the Wilson exchange, and a small increase in rates.

As a result, within about two years, Tahoka and Wilson subscribers will be able to make calls to each exchange area without toll charges.

General Telephone officials have announced orders are being placed now for equipment for the EAS service.

Wilson has desired the service a long time, but Tahoka could not get what it thought was the right kind of deal with General.

For nearly two years, General has been requesting a 35-year franchise and a rate raise.

Finally, last Wednesday, Tahoka City Council agreed to a 30-cent average rate raise on a 15-year franchise, pending establishment of EAS with Wilson.

An agreement was signed June 7, 1965, on the EAS, but General had balked without the rate raise and the new franchise. The present franchise expires on March, 1968.

General officials estimate 18 to 24 months will be required to have equipment manufactured and installed to join the Wilson and Tahoka exchanges so that a person in one area may dial the other without a long distance charge.

General Telephone has not had a rate raise in Tahoka since 1958, and firm officials claim increasing costs make a rate raise absolutely necessary.

New rates which will go into effect when EAS is completed are:

Business: Individual line, \$12.80, up 30c; two-party, \$10.80, up 30c; extension phone, \$1.75, up 25c.

Residence rates: Individual line, \$5.80, up 30c; two-party, \$5.05, up 30c; and extension, \$1.25, up 50c.

Pre-School Day Will Be April 22

Pre-school day for Tahoka district children who will be entering school for the first time next fall has been set for Friday, April 22, according to J. B. Howell, principal of South Elementary School.

The day is for those children who will enter the first grade, those who will be six years old on or before this coming September 1st.

Each such child should be accompanied to school by a parent or other responsible adult. Registration will be in the hall adjacent to the principal's office from 8:30 to 9:00 a. m.

The parent, or other responsible adult, should pick up the child not later than 11:40 a. m. There will be no bus room available for these children, and they should not come with an older brother or sister expecting to spend the day, Mr. Howell says.

If desired, lunch will be served the children and parents at 30 cents for the child and 31 cents for the parent.

Mrs. L. K. Clark of Canyon served her sister as matron of honor. Miss Sandy Garrett of O'Donnell and Texas Tech was bridesmaid. Their dresses were of blue peau de soie, identical to the bride's, with short sleeved jackets and street-length skirts. Matching bows of blue and circles of tulle adorned their heads. They carried single long-stemmed carnations.

The groom's father served as best man. Fred Womeldorf of Abilene was groomsman.

Following the ceremony, a reception was held in Fellowship Hall of the church. The table was laid with crystal and silver. The three-tiered cake was topped with a miniature bride and groom. The bride's bouquet enhanced its romantic appeal.

Mrs. Gerald Vieregge of Lubbock and Miss Jan Hardberger of O'Donnell and Baylor University, Waco, served.

For going away, the bride wore an aqua tulle ensemble with white accessories and an orchid from her bouquet.

The couple will live in Abilene, where the bride is a senior student at McMurry College, and the groom is stationed in the U. S. Airforce.

Sorghum Midge Studies Revealed

Sorghum midge studies at the High Plains Research Foundation in 1965 support previous results that over-wintering can be reduced by proper residue management. Two years data show that over-wintering of the sorghum midge was decreased when sorghum fields were tilled in the fall with a stubble-mulch plow that severs the roots, but leaves the residue on the soil surface until late fall or early spring.

Specific tests in 1965 show 42% and 93% less adult midge emerged from infested grain sorghum heads left exposed on the soil surface until late fall than from infested heads plowed under or covered with 3 to 6 inches of soil.

Larvae (over-wintering stage) from the buried sorghum residue appeared healthy as to shape and color when observed under the microscope. The appearance in general was much the same as larvae found in the summer before diapause is reached. Midge larvae from florets in the residue above the soil surface appeared dried or dehydrated. The color was a faded orange or yellowish instead of the normal bright orange color. Another abnormality was "off" color spots in the larvae. The cocoon, or tissue surrounding the larvae to aid over-wintering, also appeared dehydrated. These symptoms indicate abnormal larvae based on similar studies in 1963 and 1964. Comparative tests are being conducted in the laboratory at the present time.

Lloyd Langford, an Associate Agronomist at the High Plains Research Foundation has conducted the midge over-wintering tests at the Foundation in 1963, 1964 and 1965. His tests are being continued in 1966. "Don't raise your own midge" Langford warns.

Full details of the sorghum midge research can be read in Report No. 168 in the 1965 Annual Research Report of the High Plains Research Foundation.

Income Tax Deductions Average \$1,590 Here

(Special to The News)
New York—Of particular interest at this time to taxpayers in Lynn County who are at work on their Federal income tax returns is the matter of deductions.
How much may they itemize as tax deductions this year to conform to the average amount listed by other people in their income brackets?
The answer to this question is provided in figures released by the Commerce Clearing House, national authority on business and tax law. It was compiled from data obtained from the Treasury Department.
For people at each income level it details how much money is generally donated to charitable causes and is therefore deductible, how much goes for local taxes, how much for medical and dental bills and how much for interest on outstanding debt.
It reports that deductions per family in Lynn County, based on

average local income, should be no more than \$1,590 if they are not to exceed the usual total at that income level.
It amounts to 20.1 percent of gross income. For those in other income brackets, above and below the local average, the deductions range from 15.2 percent of income to as high as 22.8 percent.
The national figures show that, among families with small income, the major deductions are taxes and interest on debt. Their medical expenses are lower than those incurred by families in higher brackets, but they represent a bigger portion of their funds.
A breakdown of the \$1,590 claimed as deductions by taxpayers in general whose earnings correspond to the average in Lynn County shows that \$275 of it is for contributions, \$505 for interest, \$480 for taxes and \$330 for medical expenditures.
The report also shows just how much is deducted, on the average, by taxpayers in other brackets.
For families at the \$6,000 income level, the deduction is \$1,268, for those at \$8,000 it is \$1,561, at \$10,000 it is \$1,891 and, at \$15,000 it totals \$2,812.
The figures are only averages, it is stressed, and are not necessarily the amounts that the Government will accept automatically. All claims for tax deductions must be properly substantiated.

Letters From News Readers

(The News welcomes letters from its readers on any current subject, not libelous, of course. All communications must be of reasonable length and must be signed. On request, the signature will not be printed. The Editor.)

I always read your Printer's Inkings first, then I read the front page.

I was interested in your story about the Staked Plains Telephone line coming to Tahoka and Post. I was there at that time. I had a good friend with the telephone company by the name of Ira Fullerton. He was a lineman and put in the first telephone exchange in Tahoka. A Miss Cantrell was the first operator.

Now, about that telephone directory. I would like to have two copies of it. Why don't you run off a few copies? I know you could sell lots of them. Let me know how much and I will send a check.

John B. McLoud, 419 E. Fordyce, Kingsville, Texas.
(Editor's Note: A reprint on the book would be pretty expensive even if we could find the spare time to do the work, but we may just do that one of these days. We have the directory packed away in some of our historical material we have accumulated over the years, but expect to hunt it up soon and do a story on it.)

TAHOKA YOUNGSTERS ARE JUNIOR MEMBERS OF THE AMERICAN ANGUS ASS'N.

Charlotte, 18, Weldon, 10, Suzanne, 12, and Martin Clay, 14, Warren and Scott Richburg, 14, all of Tahoka, have been granted junior memberships in the American Angus Association at St. Joseph, Missouri, announces Glen Bratcher, secretary.
Their new junior memberships entitle the members to register purebred Angus at regular membership rates and to the privileges of the Association until the age of 21. At that time junior members are eligible to convert to lifetime memberships in the Association.

There were 176 young people in the United States to receive junior memberships last month.

JACOBS VISIT HERE
Mrs. Jake Jacobs and three girls, Vicki, Becky and Fran of Bovina, spent the Easter week end here with the former's parents, Mr. and Mrs. Frank Hill.

Hanes Visit Here With Old Friends

Supt. and Mrs. W. T. Hanes of Irving were here several hours Saturday visiting old friends. He was superintendent of schools here, leaving in 1945 for Cameron, and she was a teacher here.
Hanes went to Irving 10 years ago to straighten out a school problem which "tore up the whole town." Irving, a suburb of Dallas, has since enjoyed a fabulous growth, now has 20,000 school students, increasing at the rate of more than a thousand a year. The district has two high schools and is building a third.

Their son, Billy, lives in Richardson, has made an outstanding record with a firm which manufactures classified products for the Government.

BUY ANGUS BULL
Mr. and Mrs. Tommy Sterling, Tahoka, recently purchased an Aberdeen-Angus bull from Madalene Markham, Seminole.

The time to plant dryland grasses has reached us, says Don Reed of the local Soil Conservation office. Grasses planted now will have a chance to take advantage of the spring rains when they come. Grasses must be planted very shallow and be in the ground ready for the moisture when it falls. Under irrigation, the grass can be watered to a stand.
After grass is to a stand, the next enemy is weeds. This should be taken into consideration before planting. The plantings can be placed in rows so cultivation can be practiced. Also chemical herbicides and mowing or shredding

are good for weed control. Due to the problem with weeds it is not advisable to fertilize until the grass is well established. In most cases fertilization is started the second year.
Garland Pennington has just completed planting about 40 acres of Green Sprangletop. He plans to plant some more next year. Other members of the district that plan to establish grass this year include Ray Adams and L. C. Unfred.

Ed Eakin, who edits one of the
best weekly newspapers in Texas,
the Quana Tribune-Chief, is a
son of Mrs. Eva Hill Eakin of
Chilton, whom a lot of Tahoka
people will remember. Ed, in our
opinion, talks "horse sense" in his
column "Chief Speaks" as evi-
denced by the following from last
week's paper:

The President was stepping on
dangerous economic grounds last
week when he suggested several
short-cut, quick answers to the
problem of inflation.

In effect the President would
kill the patient to effect the cure.
His first suggestion was for the
buying public to rebel against
"high prices" by simply curbing
their buying. He said that he and
Lady Bird had planned to add a
couple of rooms to their ranch
home on the Perdernales, but to
help in the fight against inflation,
they would not do so at this time.

His second suggestion was a ten
percent across the board increase
in taxes.
Mr. President, if I may be so
brave to ask, what in the world
are you trying to do to this coun-
try?

In the first place you are asking
for a reduction in the pro-
duction of consumer goods. If our
merchants don't sell, labor can't
produce, therefore less jobs, less
taxes, higher operating costs and,
well you know the rest.

A higher burden of taxes can
only feed the inflation monster,
because rather than taking money
out of circulation, tax dollars put
it back in a hurry.

Has it never occurred to you
that the real cause of inflation is
the boondoggling of your vast
federal bureaucracy? The ideal of
your Great Society to be a sort
of father-protector to every citi-
zen would be laudable if it were
not so ridiculous in its concept.

Taking from the "haves" and
giving to the "have-nots" is fine
until the "haves" run out of funds.
You literally rob American re-
sources in a thousand give-away
programs as if the source were
unlimited.

I am no student of economics,
but as a taxpayer I can see signs
that the well is going dry. What
then, Mr. President.

Who will foot the bill in that
day of reckoning. Will it be the
millions of workers on govern-
ment payrolls, or the millions of
others on relief or receiving one
of the multiplicity of checks from
federal aid programs?

Don't kill the goose that laid
the golden egg, sir. If this country
is to prosper and grow, you must
protect its ability to develop new
resources, produce, distribute and
finally sell those goods across the
counter.

There are no free lunches, free
housing, free food. Someone,
somewhere paid the bill. Where-
ver he is, take care of that guy.

Good management of grasses
and livestock is the key to profit
and success with improved pasture
programs, says Blake Lovelace, lo-
cal Soil Conservationist.

Pasture Proper Use is necessary
for continuous high production.
Overgrazing may cut total produc-
tion 50% or more and will gradu-
ally destroy a stand of grass.

Removal of over 50% of the plant
reduces its ability to reproduce
additional top growth and stops
root growth of the plant. The re-
sults are lower production and less
vigorous plants that are unable to
make the best use of water and
fertilizer applied.

Also overgrazed
grass under irrigation has a very
high moisture content. Animals
have to eat more to get their daily
nutrient requirements and make
gains.

Rotation grazing should be used
to allow grass a period of rest to
fully recover, and to allow for
irrigation and fertilization while
livestock are off the grass. Rota-
tion grazing will normally result
in high producing pastures and
better livestock gains.

Fertilization is necessary for
the best results. It is the one who
is keeping you in the White House,
but he's the one who's providing
those dollars. Whatever you do,
Mr. President, for gosh sakes,
don't let him retire.

Peace At Last
An editor knocked at the Pearly
Gates; his face was scarred and
cold; he stood before the man of
fate for admission to the fold.

"What have you done," St. Peter
asked, "to gain admission here?"
"I've been an editor, sir," he said
"for many and many a year." The
Pearly Gates swung open wide,
St. Peter touched the bell. "Come
in," he said, "and choose your
harp; you've had your share of
hell."—Anon.

WASHINGTON AND "SMALL BUSINESS"

BY C. WILSON HARDER

Any objective analysis of Big Labor in the United States must recognize the inherent paradoxes.

There is a school of thought that believes the Big Labor bosses are controlled by communism. Yet, viewing the support voted by the AFL-CIO meetings for the war in Vietnam, and the announced plans to refuse to handle ships of flags trading with North Viet. n. a. m., this C. W. Harder charge does not ring wholly true.

But the leaders of Big Labor create a bad image when they take positions in social and economic matters. It is, of course, possible, to take some of their pronouncements and closely identify them with the Marxist line. However, these utterances are more due to ignorance of a free economy.

For example, at present Big Labor is heaping the tax tons for guns and butter, too. One of the measures they advocate to afford money for both is repeal of the 7% credit against taxes for the purchase of new machinery by business up to \$25,000 in a year.

Yet data secured the past year by the National Federation of Independent Business shows that almost half of the smaller manufacturers expanded to produce 1,463,443 new jobs. What was the incentive to create new jobs?

Nationally 74.1 per cent of National Federation of Independent Business

stated that this 7% credit on new machinery permitted them to expand.

Big Labor is also fighting to boost the minimum wage that can be paid under law. Yet surveys conducted by the Federation show clearly that any further increase will severely curtail the employment of teen agers, the people of no skills and the handicapped. Independent business is willing to hire and train these people, yet cannot afford to pay a high wage while training them.

They are also taking the position that the unemployed, who have worked for twenty weeks, should be able to draw as much as \$30 per week, tax free, for a period of one year, as unemployment compensation. This is quite unrealistic.

In short, Big Labor, takes a position on many different planes, but is strangely silent on the big issue except for the impractical one of cutting the work week. That is how to create more peace time jobs.

In fact, unions have apparently forgotten the basis of their existence. That basis is that before there can be a union, there must be people working. Unions never create jobs, they merely organize the workers of somebody who has created jobs. Yet, Big Labor's positions today are opposed to the creation of new jobs, and in fact, many of labor's policies are furnishing the incentives to cut down on unemployment. Their position with the workers is somewhat tantamount to the one that would exist if medical men prescribed to patients massive doses of strychnine saying "This will probably kill you, but it will solve your problems."

Four-Way Test Rotary Subject

The Rotary "Four-Way Test" was discussed at the local club Thursday noon by Minister Joe R. Barnett, doing the preaching at the local Church of Christ meeting, who is minister of Central Church of Christ in Amarillo and a Rotarian in that city.

The "Four Way Test" plaques hanging in business institutions are supposed to be a sort of watchword for Rotary members in business dealings, and ask the questions: "Is it the truth; is it fair to all concerned; will it bring good will and friendship; and will it be beneficial to all concerned?" The speaker related the phases of the "test" to every day life and Christian living, and declared, "If each person would practice the Four-Way Test we would begin to solve world problems."

He said the "Test" was written by Herbert J. Taylor, a Chicago Rotarian in an effort to save a company from bankruptcy. It was later adopted by Rotary as an objective in its "service above self" program.

Ralph Beistle, who introduced the speaker, said Barnett was reared at Midland, graduated from ACC, served churches in Anton and Levelland before going to Amarillo, and he has been an outstanding leader in youth work. President Ross Smith appointed Dr. Emil Prohl, Harold Green and A. M. Bray to a committee to lend any assistance possible to the O'Donnell club in a membership drive.

Club Sweetheart Marla Bray introduced Kenneth Hart, one of three student guests for the month. The other two were attending the district track meet.
