**BURNED-OUT CHURCH**—This remarkable photo was taken by Lamesa Press-Reporter photographer Russell Skiles after fire destroyed the O'Donnell First Methodist Aug. 23, 1982. A concert at 3 p.m. Sunday at Tahoka Methodist Church will be a benefit performance to raise funds to rebuild the church at O'Donnell. There will be no admission charge to the concert by the Joy Ringers, women's handbell choir, but an offering will be taken.

## WOODWORK

BY DALTON

I'VE BEEN CONSIDERING turning in the Better Business Bureau office to the Better Business Bureau because the office in Lubbock is doing something that costs me money unnecessarily.

They haven't been doing anything really wrong, I guess, but for those of us who live outside of the Lubbock area, it's not too good.

We have a policy of checking with the Lubbock BBB whenever we get an insertion order on advertising from some company we never heard of. Before we will run the advertising, we like to know two things: does this company pay its advertising bills, and is what they are offering to the public a legitimate operation? Too often, companies or individuals are trying to defraud the public by getting them to send in money for something worthless, or by misleading them. We try to protect our readers from such things, because we don't want our friends to get cheated (unless we do it ourselves).

We had an order for some advertising the other day that we needed to check on, so we tried to call the BBB in Lubbock. We got a recording saying everybody was busy, please call back. A couple of hours later we tried again, and got the same recording. Both times, of course, we had to pay for the calls (probably about 15 cents each time). We don't really mind paying for the calls when we reach the party we're calling, but it always irks me to get a recorded message when I call someone. I don't like recorded messages.

Come to think of it, 30 cents is not such a big deal to get worked up about. And the BBB has been very good to help us out, on those occasions we could reach them.

QUEEN ELIZABETH had better hurry up and get through stomping around in the mud in California and get on back to the palace or she may miss our visit to England this summer. Of course, that's still nearly three months off, so she probably will be there when our little group of area

travelers gets off the plane in London.

For those who may not know what I'm talking about, I am taking a group of people to England, Ireland, Scotland and Wales May 28-June 12. Anyone who is interested in going along with us can get a brochure just by letting me know. Call this newspaper office and leave a message, or call me at home, or write, or just run down the middle of the street screaming, "I wanta go to England!" or whatever it takes to get our attention.

One youngster who saw the queen told the TV people she didn't exactly look like a queen because she wasn't wearing a crown. I really don't know if she ever wears a crown. What she wore in California the first day or so was a rather odd-looking hat. But she's a real gracious lady and I'm sure the hats we wear around here would look plenty strange to her.

## Parents Get Chance To Sub For Their Students In Class

Next week, March 7-11, has been designated as Texas Public Schools Week and all three schools in Tahoka have planned special activities as parents and other interested persons have been invited to attend the schools any time next week.

Parents in grades 7-12 may participate in a "Back To School Day" for one whole day or one half day on Wednesday, March 9. The student may stay at home and not be counted absent for the classes that the parent attends. Registration of parents who will substitute for their youngsters will be at 8 a.m. in the foyer of the high school.

The traditional Open House has been scheduled for Tuesday night, March 8, from 7 to 8:30 p.m. where visitors may examine the students' school work and extra projects they have worked on this year.

Other activities scheduled during Open House night are a band concert for the 5, 6, and 7th grade band in the North Elementary gym from 7 to 7:20 p.m. and a special demonstration of a parachute routine by North Elementary P.E. students in the same gym at 7:20 p.m.

All Migrant and Title I parents are invited to attend school Tuesday, March 8, to observe their children and there will also be a Title I-Migrant meeting in the school cafeteria at 3 p.m.

Visitors are also encouraged to eat in the school cafeteria on the following dates: Tuesday, Tubb Elementary parents; Wednesday, Grandparents Day; Thursday, North Elementary parents. The cost of lunch for adults is \$2.50 and patrons are asked to contact the school office at 998-4538 the day before they plan to attend.

## Concert To Benefit O'Donnell Church

The Joy Ringers, a women's handbell choir of the Tahoka First United Methodist Church, will present a benefit concert at 3 p.m. Sunday, in the Tahoka Methodist Church.

A program of praise songs, old hymns and secular tunes will be presented by the 13-member choir under the direction of Bettye Green. The concert is a benefit for the First United Methodist Church of O'Donnell which was destroyed by fire last fall.

There will be no admission charge, but an offering will be taken. All proceeds will go to the O'Donnell Church to help with the construction of a new building.

The Joy Ringers were organized in 1977. Two octaves of English handbells were purchased with memorials given to the church and nine members began ringing for worship services and community activities. Since that time more octaves have been added, making a total of 48 bells, and the

group expanded to 13 members.

In previous years two benefit concerts have been given for the Lynn County Hospital Auxiliary. Organizations such as Lions, Rotary, Senior Citizens, Garden Clubs and Federated Women's Clubs have enjoyed their programs. They have played in churches in Slaton, Idalou, Quanah, Littlefield, Wilson, O'Donnell and often for morning worship in Tahoka. Each year the Joy Ringers participate in the Communi-

ty Christmas Cantata.

Also performing at the benefit concert will be a newly formed youth handbell choir. The Faith Ringers, directed by Margaret Carter. They were organized in September and are sixth, seventh and eighth grade students.

Anyone who cannot attend, but wishes to be a part of the project to help the O'Donnell church may mail a check to the Tahoka Methodist Church, Box 500, Tahoka, 79373, and mark it for O'Donnell Church.

## Highway Job Given Boost

Progress is being made slowly on paving an 8-mile stretch of road west of Tahoka, a program in the works for more than a year, with the State Hwy. Dept. planning to improve the road designated FM 1328.

Lynn County Commissioners this week certified that all right-of-way for the project had been obtained, and accepted the low bid of Sahara Irrigation Inc. of Shallowater to move 1060 feet of underground pipeline along the right-of-way, at a cost of \$1100. Commissioner E.R. Blakney, in whose precinct the road is located, said that a total of about 1,500 feet of underground pipeline would need to be moved, and that a proportionate amount would be paid for moving the rest of the pipeline off the right-of-way to private property.

The 8-mile paving project runs south from Petty to U.S. 380 at a

point about 10 miles west of Tahoka.

The highway department has begun staking out the paving project, but no schedule has been announced as to when a contract will be awarded and when the project is to be completed.

Commissioners also voted to advertise for bids on insurance due in April.

Judge J.F. Brandon read to the commissioners a letter from the Tahoka School board and superintendent thanking Sheriff Stanley Krause for support of officers during the home basketball games.

Also present were commissioners Bart Anderson, Boyd Barnes and Eldon Gattis.

## Burglars Take Gun Collection

Burglars Tuesday again struck a Lynn County rural home in daylight, this time prying open a door and taking items valued at \$3450 from the home of Lynn County Sheriff's Deputy Joe Bryan.

The Bryans were both working during the day when the break-in occurred at the residence, the former home of Buel Draper, who moved to Tahoka after being hit by burglars a couple of years ago, losing several thousand dollars worth of goods.

Lynn County Crime Line, 998-5145, is offering a \$500 reward for information on the burglary.

Time of the break-in has been established as around noon, Bryan said. Among the items stolen were a large, 25-inch Magnavox console color TV set, valued at \$1,295, and 13 guns, some of them rare collector's items. Most valuable of this group is a Winchester Model 1890 .22 WRF, with a hexagon-shaped barrel. The rifle, about 75-80 years old, is in mint condition, Bryan said.

"I've investigated a lot of burglaries of homes," he commented, "and I always have felt sympathy for the victims, but now we really know how sick and angry it makes you to have something like this happen."

One person was jailed during the week for public intoxication.

Johnny Raindl of Tahoka reported to Tahoka police that his 4 H.P. tiller had been stolen from S. 6th and Ave. B. It was believed to have been taken sometime between Friday and Sunday. Value was set at \$150.

Maxine Paris of 1919 N. Main reported seven towels were missing from her clothes line on Sunday night.

On Saturday night, a Tahoka resident in the 2400 block of N. 4th reported to police that a prowler was walking around in her back yard at 11:50 p.m.

Police also answered a couple of minor family disturbance calls during the past week.

**SAN ANTONIO WINNER**—Tadd Knight received much attention this past week at the San Antonio Stock Show. He won the Crossbred Market Barrow Breed Championship and then took overall Grand Champion Barrow title with his sister's seven-month-old, 240 pound crossbred hog, Lone Ranger. Lone Ranger is cross bred Chester and Hampshire. He won the championship in a class of 144 hogs. Tadd is the son of Taylor and Patricia Knight of Tahoka.

## Lynn County Crime Line Offers \$500 Reward For ...

Information leading to the clearing of the burglary March 1 of the home of Joe Bryan, six miles northwest of Tahoka. The burglary occurred about noon on Tuesday. Among items stolen were a Magnavox console color TV set and 13 guns, including some collector's items. Anyone with any information is asked to call Crime Line, 998-5145, day or night. It is not necessary to give your name; arrangements will be made to pay the reward.

## \$300 Reward For ...

Information on several other recent home burglaries in the county remain in effect. These include burglaries at the homes of Robert Harvick, Edmund Maeker, Noe Castillo and W.G. Mathis.

### Carl Fluitts To Be Honored

The children of Mr. and Mrs. Carl Fluit will honor their parents on their 50th wedding anniversary with a reception on Saturday, March 12, from 2:30 to 4 p.m. in the Community Center at Post.

Friends and relatives of the couple are invited to attend. They request no gifts, please.

marily by neatness, ornamentation or jewelry, and the design, cut and color of clothing," says Brown. Both employers and employees emphasize that appearance is only one factor in the hiring decision. But clothing and appearance is one thing that the job applicant has control over in the hiring situation, notes Brown.

### Emergency Operations Simulation

An emergency operations simulation will be conducted April 14 in Disaster District 5A. The exercise will focus on severe winter storm preparedness.

District 5A consists of Lubbock, Hockley, Lynn Crosby, Floyd, Hale, Lamb, Bailey, Cochran, Yoakum, Terry, Garza, Kent, Stonewall, Haskell, Trockmorton, Young, Baylor, Knox, King and Dickens Counties. Headquarters for the exercise will be the Department of Public Safety's Emergency Operating Center (EOC) at 1302 Sixth St. in Lubbock. Each of the county EOCs is requested to "activate" and communicate with the Lubbock EOC.

Training consultant Jerry Daniel will conduct the exercise, which will involve problems caused by a severe ice storm; closed roads, the interruption of electrical power, and obtaining food, shelter and medical services for stranded persons.

Planning for the simulation will begin April 5, with the actual exercise taking place from 10 a.m. to 3 p.m. on the 14.

### There's Something Fishy About Heart Disease

Cardiovascular disease is the number one killer of Americans. More than 40 million Americans suffer from heart disease and roughly one million die of heart disorders every year.

And this high incidence of cardiovascular morbidity and mortality is not exclusively an American problem, but is evidenced in industrialized countries around the world.

So it is for this reason that scientists, researchers and physicians in the United States and abroad have been waging a war against heart disease. But these researchers may be going about it in the wrong way, says noted biochemist Dr. Richard Paswater in his new book *In the Battle Against Heart Disease—An Answer Comes From the Sea*.

"For many decades," writes Dr. Paswater, "researchers have been trying to solve the mystery of heart disease in terms of cholesterol and fats." "It has been animal fats against vegetable fats," he adds, "even though animal fats contain some polyunsaturated fats and vegetable fats contain some saturated fats."

Dr. Paswater advises that trying to balance polyunsaturated fat to saturated fat may turn out to be not only the wrong approach, but possibly a harmful approach.

"Two examples," writes Dr. Paswater, "are the North American Eskimo and the Japanese whose diets are rich in animal fat, yet who are virtually free of the heart disease that is the major killer of Americans and Europeans."

According to Dr. Paswater, the one common factor to both the Eskimo and the Japanese that is lacking in the Westerner involves the amount of cold-water fatty fish in the diet.

Dr. Paswater cites stud-

ies revealing that the Eskimo and the Japanese, who eat large quantities of fish and animals that feed on fish, have high levels of particular fatty acids, namely eicosapentaenoic acid or EPA for short, and docosahexaenoic acid or DHA in their blood.

"The American diet lacks EPA and DHA which cannot be obtained from vegetable oils, land animals or dairy products," said Dr. Paswater. "However, it seems unlikely that many Americans will want to adopt the eating habits of the Eskimo."

Another alternative, according to Dr. Paswater, would be to consume large quantities of cod liver oil. "But even the use of oils such as cod liver oil has a drawback—many people strongly dislike the taste," he said. Also, Dr. Paswater adds that cod liver oil is high in vitamins A and D, which limits the amounts that can be taken safely.

In his book, Dr. Paswater makes reference to MaxEPA™ marine lipid concentrate, a dietary supplement rich in EPA and DHA, which, after being proven successful in numerous studies is now available in capsule form. "At this writing," he says, "MaxEPA is the only form of fish oil that is both high in EPA and DHA and low in vitamins A and D."

Dr. Paswater adds that other formulations containing rich amounts of EPA and DHA will undoubtedly appear on the market. "But until the appropriate studies or those specific formulations are completed, they cannot be assessed," he warns.

Dr. Paswater also cautions that this book, which is available in health food stores, is intended as an informational and educational tool, and is not to be interpreted as medical advice.

### Fifth Grade News

Monthly class meeting of the fifth grade classes were held Friday, Feb. 25. The programs in the various classes consisted of original skits on good manners presented by the students. Refreshments were served by Audrey Gutierrez, Jackie Stephens, Adam Chavarria, Ray Sanchez, Pauline Torres, Michelle Colon, Lola Duran, Eloise Rodriguez, James Garcia and Joe Torres.

Vice presidents of the three classes, Corey McCleskey, Stephanie Isbell and Jesse Torres introduced the guest speaker, Harriet Pierce, on Feb. 18.

Continuing the study of etiquette, the fifth graders were invited to a reception this week. Formal invitations were received by each student and a formal acceptance was written.

## COTTON TODAY

**Cotton Use Improves:** To begin the new calendar year, cotton consumption by U.S. mills increased 7.6 percent, rising from a 5-million-bale annual rate in December to a seasonally adjusted 5.4 million-bale rate in January, according to the National Cotton Council.

Cotton's share improved appreciably, climbing from 23.3 percent in December to 25.8 percent in January. Total mill fiber consumption dropped to a seasonally adjusted annual rate of 20.8 million bale-equivalents, 2.8 percent lower than December but 7.6 percent ahead of the year-ago rate.

Use of cotton during calendar 1982 totaled 5.2 million 480-pound bales, down 8.6 percent from the 5.7 million consumed in 1981. However, cotton's

share of total fiber use rose from 23.9 percent in 1981 to 24.9 percent in 1982.

The severe economic recession and a large cotton textile trade deficit were primary causes of the decline in consumption.

Mill use of all fibers fell to 20.8 million bale-equivalents last year, 12.2 percent below the 1981 level.

**Cotton In Loan Increases**  
Cotton producers had placed a total of 4,696,101 running bales of 1982-83 upland cotton under the CCC loan program by Feb. 16, according to the U.S. Dept. of Agriculture. Repayments had been made on 457,179, leaving loans outstanding on 4,238,922 bales.

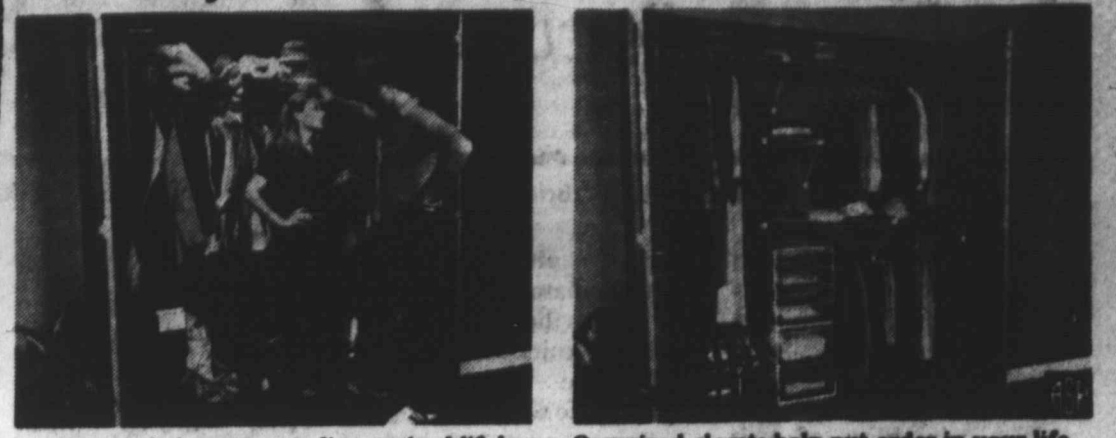

### Lynn County Hydrologic Atlas Is Available

The most detailed and complete ground-water maps ever prepared for Lynn County residents within the District's service are available in a Hydrologic Atlas published by the High Plains Underground Water Conservation District No. 1.

The Hydrologic Atlas for Lynn County consists of a packet containing a set of four maps and an explanatory text. The maps are contoured at 20 foot intervals. They illustrate (1) the elevation of the land surface; (2) the elevation of the water table in the Ogallala Formation in 1980; (3) the elevation of the base of the Ogallala Formation and

(4) the saturated thickness of the Ogallala in 1980. Individual copies of the atlases for any of the counties served by the Water District may be obtained by contacting the High Plains Underground Water Conservation District No. 1 at 2930 Ave. Q, Lubbock, Tex. 79405 or phone 806-762-0181.

## It's Easy To Personalize Your Storage Areas

Disorganized closets mean disorganized life!

Organized closets help put order in your life.

It's a strange thing about storage space. Often an otherwise immaculate house will possess storage areas that suffer from the "closet clutter." It's hard to imagine the homes of yesterday that were designed without a single closet! With today's busy lifestyles, organized storage space is more important than ever.

Having great closets doesn't require a major investment of time or money. One easy way of maximizing shrinking storage space is to utilize vinyl-coated steel rod shelving. This type of shelving is easy to install and it allows you to organize your storage areas.

Here are four easy steps to help you get organized:

#### 1. Evaluate Your Needs

Take a long, hard look at the storage area you plan to organize. Who is going to use this area? Children need shelves and racks that are lower to the floor so everything is reachable. Another concern is the items stored in this area. Will they be used daily or are they used once-a-year such as the Christmas decorations? Shelves and other storage fixtures can and should reach to the ceiling to help give maximum storage

space. Multilevel shelves, to provide "double-hanging", can also help you organize clothes. Most closets have a single rod for hanging clothes high enough to accommodate long articles like dresses and robes. That means a lot of valuable space is wasted when shorter items like slacks and shirts are hung. The solution is to double hang clothes. This makes your closet space work twice as hard for you. Take into consideration any hard to store items such as sports equipment or large items such as luggage.

#### 2. Plan of Attack

After you have evaluated your needs, the second step is to plan your attack! Remove everything from the storage area. Weed out items that are not needed. (Clothing that has not been worn in the past year should be discarded.)

#### 3. Determine Additional Storage Space Needs

Creating the space you need and the look you want can be accomplished easily by installing a system that offers multilevel rods, shelves or sliding baskets. Installing your system with an upper level above the normal shelf will

provide extra space to allow you to keep your storage space neat and in order. The advantage of using vinyl-coated steel shelving by Closet Maid is the ease in installation and its maintenance. No painting, rust or mildew problems. And the ventilated system allows you to see everything in your storage area.

#### 4. Installing Closet Maid System

Loading hardware chains and home centers handle Closet Maid brand storage products. The only tools needed for installation are a hole punch, screwdriver and a ruler. And Closet Maid products, with its unique patented hardware can be easily installed on any normal wall surface, including dry wall. Many builders and remodelers can install a Closet Maid system for you.

To get more information about Closet Maid's complete line of products write to Clairson International, Department A, 720 SW 17th Street, Ocala, Florida 32674.

Say good-bye to your "closet clutter" and personalize your storage area with Closet Maid. You'll enjoy the benefits for years!

The Bell X-1 was the first plane to officially exceed the speed of sound. It was flown on October 14, 1947 by Major Charles E. Yeager. The plane was nicknamed "Glamorous Glenn."

### STATEMENT OF INTENT TO CHANGE RATES

General Telephone Company of the Southwest, in accordance with the Rules of the Public Utility Commission of Texas, hereby gives notice of the Company's intent to implement a new schedule of rates in Texas effective March 18, 1983.

The proposed changes in rates will affect all customer classes and are designed to increase the Company's gross intrastate revenues by approximately 15 percent annually.

A complete set of revised rate schedules has been filed with the Public Utility Commission at Austin, Texas, and is available for public inspection in each of the Company's Business Offices in the State of Texas. A summary of the Company's rate filing has also been sent to the Mayor's Office of each affected Municipality.

### Choosing a Knit Fabric and Pattern

Knits made by looping yarns together are in the forefront of fashion this season and can be a valuable asset to every wardrobe.

The versatility of knit fabrics insures a suitable choice for any garment or occasion.

Knitted fabrics vary from the stretchy, stable kind to light or heavy weight, and can be adapted to fashion changes.

Explore current fashions in department stores, fashion catalogues and magazines before buying a knit. When choosing

knitted fabrics, remember that:

--bulky knits are excellent insulators and hold air next to the body.

--bulky knits usually provide little protection against the wind

--knits cling to the body for added comfort

--they also mold to fit various body shapes easily

--knits recover readily from wrinkling, making them ideal for travel and prolonged wear

The two advantages woven fabrics have over knits are their ability to protect against the wind and crease sharply.

When selecting a pattern, remember those "recommended for knits" are most suitable for stable, heavier knits, most double knits and dress weight knits.

Patterns "designed for knits only" require a knitted fabric with moderate stretch and those "designed for stretchable knits" require knitted fabrics with maximum stretch.

Avoid patterns with crisp, pressed pleats and large bias sections.

Some common flaws to be aware of in knitted fabrics are:

--flimsy fabric caused by the wrong size stitches, yarn or finishes

--broken or dropped stitches

--differences in yarn size, color, lustre or shrinkage

Try to avoid fabrics with crosswise yarns or designs that aren't at a right angle to the selvage and any obvious lengthwise lines resulting from too tight or too loose construction.

When selecting notions, choose thread similar to your fabric and of similar size to the appropriate needle size.

### Use Test Seam On Knit Fabrics

Before sewing on a knit fabric, a test seam should be made to determine the pressure, tension and proper pressing techniques needed.

Use similar stitches and layers of fabric to test for the right pressure and tension.

Pressure is usually adjusted for light to normal settings, depending on the weight of the fabric, and the right amount of pressure is important.

Too much pressure can stretch or ripple the fabric and too little can cause skipped stitches. When checking pressure, two lengths of fabric cut the same length should come out identical when stitched without thread.

Loose tension should be used on knits.

To check tension, the top and bottom will look the same with stitches interlocked between fabric layers. However, for top stitching the top thread may be looser than the bottom one.

Fabric curling can be prevented by placing pins close together and perpendicular to the fabric edges. Starching edges also helps.

When cutting fabrics that tend to curl, consider using a wider-than-called for seam allowance and trimming the seam allowance after stitching.

You can also use double stick tape along the seam line and seam allowance of fabrics that curl considerably.

Pressing helps obtain the desired look on most knitted fabrics, though some are resistant to pressing. The resistant fabrics can be flattened with the manner determined through seaming.

These hints will help when pressing knitted fabrics:

--check for correct iron

temperature (determined by fabric content and thickness)

--use a press cloth to avoid shine

--press with lowering lifting motion rather than sliding one

--place brown paper strips under seams, hem allowances and darts to prevent impressions.

--press in the same direction as the lengthwise rib to avoid stretching

Some knitted fabrics made of acrylic, cotton or acetate fibers, sweater-type or poor quality knits can stretch when warm and moist, so let them cool and dry before picking them up.

### Stitches To Use On Knitted Fabric

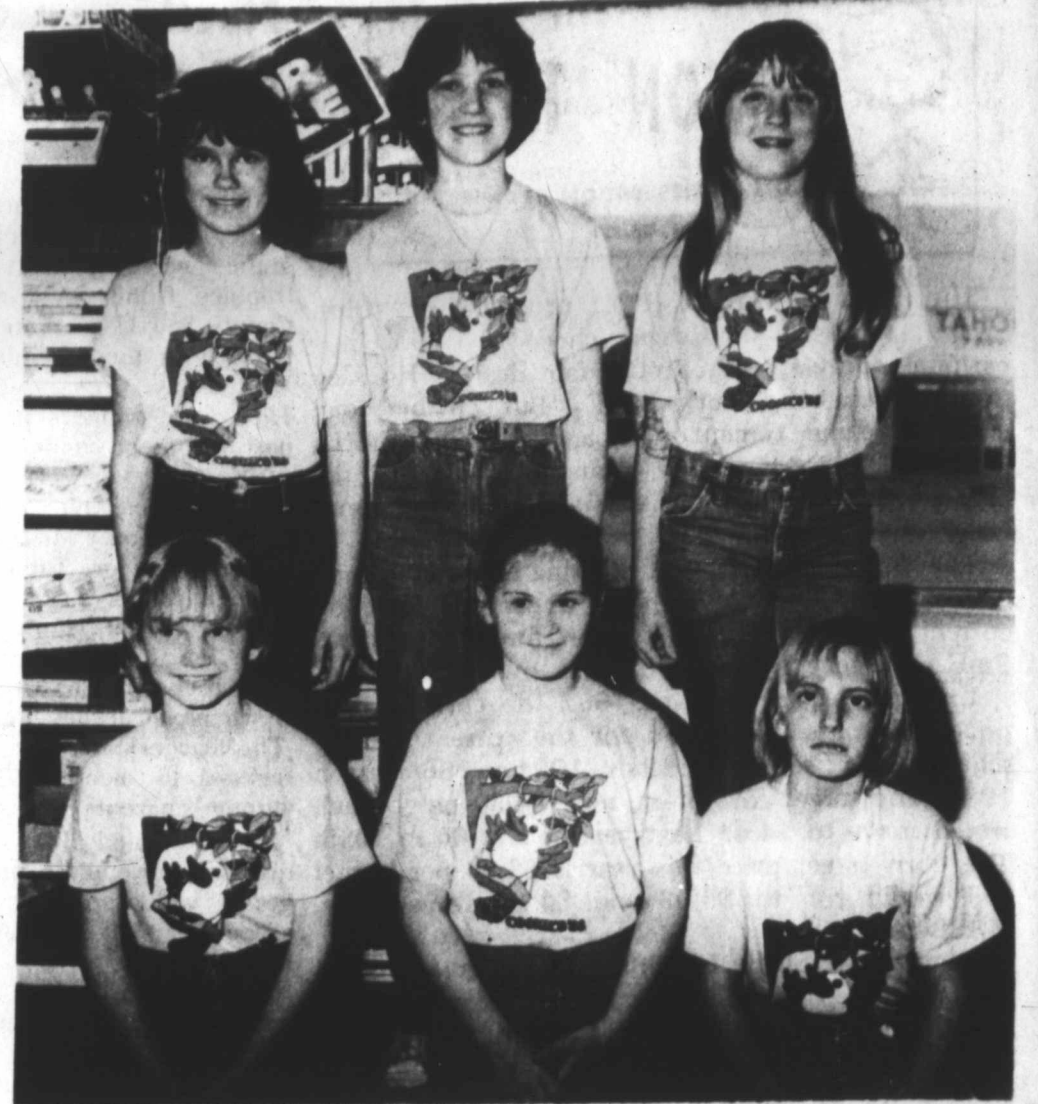

When sewing knits, a straight or zigzag stitch is effective.

Stretch the fabric gently as you sew when using a straight stitch to slightly loosen the stitches and help the seam stretch without breaking the thread. The amount of stretching depends on the fabric.

Be careful not to stretch the fabric out of shape.

A narrow zigzag stitch with appropriate length along the seam line can also be used, and with this stitch it's not necessary to stretch the fabric.

If seams appear cored or the fabric doesn't lie flat against the stitching, then the zigzag stitch is probably too wide for the weight of the fabric or the tension is wrong. Or, it could be a combination of the two.

**OFF TO CAMP**--These girls, members of Girl Scout Troop 256 will all be spending part of their summer at Camp Rio Blanco this summer as a result of their efforts in the Girl Scout cookie sale. Kneeling from left are Mary Roberts, Jay Jay Wiseman and Cheryl Stancell. Standing from left are Dena Eagle, Shannon Roberts and Robin Parker. (LYNN COUNTY NEWS PHOTO)

To find out what the problem is, do a test seam, stitching over tissue paper if necessary.

When using a sewing machine that automatically stretch stitches, make sure the seam is in the right place before stitching since the stitches are hard to rip out. The fabric won't need to be stretched when sewing on this kind of machine.

Consider techniques that may save time when sewing while still producing an attractive garment.

Some examples of time-

saving techniques are using machine instead of bound buttonholes, an exposed zipper instead of one needing special application, matching or contrasting ribbing at closures, top-stitched edge finishes or maybe a self-banded elastic waist band.

For more information on sewing knitted fabrics, contact the local county Extension agent for the free Extension publication "Knit". It has additional tips on fabric, pattern selection, notions and tools, sewing and pressing tips.

## Credit Card Fee Ban Would Hurt Consumer

For a time, some oil companies have elected to collect a processing fee from retailers and wholesalers selling goods and services paid for on a company's credit card. Some other companies have chosen not to collect a fee but to recover credit costs through wholesale gasoline prices, while others have chosen not to offer credit at all.

The processing fee, generally three-percent, is deducted from each credit ticket submitted to the company for reimbursement. The retailer already has received a lower wholesale price from the supplier since the cost of credit has been added to the cost of the product.

The retailer has an option. He may pass along credit costs to all customers equally or eliminate them to cash customers through lower prices. Most motorists prefer this option, with 70-percent of gasoline purchased for cash.

In recent years, inflation and higher interest rates have caused all costs associated with credit cards to escalate. Nevertheless, two bills (HB 206 and SB 342) have been introduced in the 68th Texas Legislature to outlaw levying the processing fee.

This forces certain companies to give up a marketing option. In order to cover the rising expenses of credit cards, companies deprived of the right to charge a processing fee would be compelled to increase the wholesale price of gasoline. Eliminating the processing fee eliminates the discount for cash option.

The net effect would be to require cash customers to continue to subsidize purchases made by credit card customers. If this ban becomes law, consumers who cannot or choose not to use credit could be forced to pay higher prices, which include indirect credit card costs.

This proposal is decidedly anti-consumer. It would be unfair to the consumers who buy gasoline with cash and save money.

This legislation is unnecessary. Companies should be free to compete in the marketplace as they think best, with the consumer benefiting from the competition in a highly competitive marketplace.

Since the end of federal controls on petroleum product prices, the industry has introduced many new retail marketing techniques designed to meet the needs of the motoring public. As a result of heightened competition and innovative programs, prices to consumers have fallen to their lowest level in years. This demonstrates that the market system is working and suggests that it will elicit additional programs to benefit the consumer.

# Pay Less Taxes!

## Contribute to your IRA.

Make sure you contribute to your IRA, before you fill out your Federal Income Tax return! If you contribute before April 15th, you can enter it on your 1982 tax form.

With an Individual Retirement Account from First National Bank of Tahoka, you can deduct up to \$2,000 from your return (on an individual account) and up to \$2,250 with a spousal account. That is a straight deduction: you do not have to itemize! All the allowable money you put in plus the high interest it earns are tax deferred until you reach retirement age. And do not forget: each First National Bank of Tahoka IRA depositor is FDIC insured up to \$100,000. How is that for security!

You can not beat a First National Bank of Tahoka IRA. It lets you earn interest at Money Market rates. It is convenient... and it is one of the best ways for you to provide future security, for yourself and your family.

To find out more, call or come by First National Bank of Tahoka, and take advantage of one of the best tax breaks you can get! (Any IRA contributions you make before April 15th can be reported on your 1982 tax return.)

Federal regulations require a substantial penalty for early withdrawal.

**Social Security...  
OUT WEST**

By Bill West

Myths and rumors about Social Security multiply like rabbits. Some of the current most popular myths follow:

**Myth:** Social Security is supposed to provide all or most of my retirement income.

**Fact:** Social Security is designed as a base of retirement income—one leg of a three legged stool that includes savings and investments and various private insurance. In fact, benefits generally constitute about 40 percent of pre-retirement income to a person with average lifetime wages.

**Myth:** Private and public pension plans are much better than Social Security.

**Fact:** Social Security has features that are not matched by any current private or public plan. These include a comprehensive package of protection, a wide range of dependents' benefits, protection against inflation, and protection that is earned quickly and moves with you from job to job.

**Myth:** Social Security is in trouble because payroll taxes have been used for welfare and other government programs.

**Fact:** Social Security taxes are used only to pay for old-age, survivors and disability insurance, for hospital insurance under Medicare and for the administrative expenses of these programs. Administrative costs account for only one and one-quarter cents for each dollar paid in benefits.

**Myth:** The payment of disability benefits and Medicare costs have drained the basic retirement and survivors benefit fund.

**Fact:** When the Social Security disability program began in 1957 and Medicare was started in 1966 additional payroll tax allotments were added at the same time to pay for those programs. These distinct tax allotments have been enough to pay all benefits due under these programs. Presently the 6.7% FICA tax rate includes 4.575% for retirement and survivors benefits, .825% for disability insurance, and 1.3% for Medicare hospital insurance. Recently it has been necessary for the original retirement-survivors fund to borrow money from the other two funds as a temporary, emergency measure, pending the expected legislative action which will shore up the retirement-survivors fund.

**Stiffer Penalties  
Imposed On Food  
Stamp Abuses**

Beginning April 1, people who abuse the food stamp program will face stiffer penalties, according to Assistant Secretary of Agriculture Mary C. Jarratt.

"Under this new policy, individuals found guilty of a third food stamp offense will be permanently barred from the program," Jarratt said.

Those found guilty of two offenses will be barred from the program for one year and those who abuse the program a first time will not receive food stamps for six months.

The penalties will apply to all individuals regardless of whether they are determined guilty of food stamp abuse at state or local administrative disqualification hearings or in courts of law. They also apply to individuals who make false or misleading statements, conceal or withhold facts, make other misrepresentations or commit any act that violates a state food stamp law.

**Farmers Are Asked  
To Complete Census**

Major farm and commodity groups are asking farm and ranch operators to complete and return their 1982 Census of Agriculture forms by Feb. 15.

Questionnaires were mailed late in December to more than 2.5 million farm and ranch operators. The census, conducted periodically since 1840, gathers data from all farm operators in the nation and is the only source of comprehensive data on the county level.

**Myth:** Social Security is going broke and won't be around when I'm ready to retire.

**Fact:** Social Security is based on an ongoing national commitment. There is no danger that any Administration or Congress will allow the program to collapse and thereby renege on its promise to the American people. The long and short range problems the system faces are being addressed by the current leadership, and we can expect that agreement will be reached on the vest will be reached on the best means of assuring a financially sound system.

It is important for concerned citizens to keep these facts in mind as they follow media accounts of pending Social Security reform measures.

**PCG Director  
Election Set**

Lynn County cotton producers and businessmen will elect a Producer Director to Plains Cotton Growers, Inc. at a 7:30 p.m. meeting on Monday, March 7, in the Hospitality Room of the First National Bank, Tahoka.

Announcement of the election comes from Joe D. Unfred of New Home, current Lynn County Producer Director to the 25-county cotton organization and Wayne Huffaker of Tahoka, Businessman Director.

Each of the counties in PCG territory has two directors, one a businessman and the other a cotton producer. They are elected on alternate years for two-year terms. Each is eligible for re-election every second year.

All producers and businessmen are invited to the meeting. However, under PCG By-Laws, only current dues-paying members of PCG will be eligible to be elected a director or to vote in the election.

Dear Editor:

There are several bills pending in the State Legislature which are very important to our children of divorced parents, to the parents and to the grandparents. I would like to use this means of bringing them to the attention of your readers, and to urge people to contact their representatives in Austin regarding the need for passage of these bills.

It would be wise to also contact Lt. Gov. William Hobby and Gov. Mark White, asking for their assistance in getting these bills through the legislature and enacted into law.

Two of the bills are: House Bill No. 367 by Alan Schoolcraft - relating to joint management conservatorship of children; and, Senate Bill No. 79 by Chet Brooks - relating to the rights of grandparents to have access to their grandchildren.

Among others to be considered are: SB No. 45 by Ray Farabee, HB No. 94 by Matt Garcia and HB No. 262 by Rollin Khoury.

If you wish to read the bills before voicing your concern, you may obtain a copy by calling Senate Bill Distribution 475-2520; House Bill Distribution 475-8452 (there will be a small charge for copies) or by contacting the Austin office of the sponsoring legislator.

Address for senators, governor and lieutenant governor; P.O. Box 12068, Capitol Station, Austin, Texas 78711; for representatives: P.O. Box

2910, Austin, Tex. 78769.

For the name of the senator representing your district, call: 475-4271; for representative in House, call: 475-2213.

The time is now--these bills are in committee or probably will be shortly.

**NEWS  
OF NUTRITION**

**Calcium Deficiency  
Robs Bones**

**Myth:** Bone deterioration affects only elderly women.

**Fact:** Bone deterioration, or osteoporosis, begins as early as 25 or 30 years old.

Osteoporosis is a condition that makes bones brittle, weak and subject to sudden fracture. It affects about 50 percent of women 60 years and older.

Maintaining adequate calcium intake is a lifetime necessity.

If your diet doesn't supply enough calcium, your body steals what it needs from your bones. Many doctors are now urging women to maintain adequate calcium intake throughout their lives. Since few women get their recommended daily allowance of calcium through their diet, they're taking calcium supplements.

Consult your physician about calcium needs. Individual requirements may vary due to diet, exercise, physiology, age and other factors.

**FANCY TALK**

If it acts soon, the 1983 Congress has an opportunity to correct what many experts see as a big mistake in last year's tax laws.

The law requires banks, credit unions, S & Ls, mutual funds, and others that pay dividends or interest to deduct ten percent every time the interest is paid to most investors and send the money to the U.S. Treasury. This, points out the United States League of Savings Institutions, discourages savings and can hurt the economy.

In addition to finding their future tax returns much more complicated, many Americans will be making interest-free "loans" to the government. Taxpayers are asking their Congressmen what they are doing about this situation, reaching representatives at the House of Representatives, Washington, D.C. and senators at the U.S. Senate, Washington, D.C. 20510.

## Mauro Brings Veterans Land Program Closer Home

Texas Land Commissioner Garry Mauro has appointed Lorenzo M. Sedeno as Area Representative for the Veterans Outreach program in the Panhandle region of Texas. Veterans Outreach is an extension of the Veterans Land Program of the General Land Office. Sedeno and four other field representatives will be going out to every county in Texas to establish contact with veterans groups and their representatives. The object of the statewide drive is to acquaint Texas veterans with the benefits of the land program and assist them with problems and questions concerning the loan process.

Lorenzo M. Sedeno is a native Texan from San Antonio, who now lives in Lubbock. For three years he was administrative aide to Congressman Kent Hance. In that position he was in charge of Veterans affairs and social programs among his many

other responsibilities.

Authorized by the people of Texas in 1946, nearly 80,000 veterans have participated in the Veterans Land Program. The loan program operates at no cost to the taxpayer and actually returns money from proceeds. Long term, low interest loans of up to \$20,000 can be obtained for a minimum of 10 acres.

Lynn County has 710 veterans.

## Sales Tax Rebate Told

State Comptroller Bob Bullock returned \$114.3 million in local sales tax payments to 974 cities who levy the one-percent city sales tax.

Although the payment is the largest single one returned to cities since the rebates began in 1968, Bullock warned merchants and city officials not to make too much of it.

The City and MTA sales taxes are collected along with the state sales tax by merchants and rebated to the cities in which they are collected by the Comptroller.

Tahoka's net payment this period was \$11,136.74. Comparable payment prior year - \$8,732.46.

O'Donnell's net payment this period - \$3,258.7. Comparable payment prior year - \$3,003.18.

Wilson's net payment this period - \$1,044.10.

# PIK Program Affects Decision By Farmers

Cotton growers who participate in the PIK program face a different situation than in past years when government program participants received cash payments, officials of the Lynn County ASC office said this week.

who remove and additional 10-30 percent of their base acreage from production under PIK provisions will receive an amount of raw cotton equal to 80% of their program yield. How this will affect marketing decisions and alter traditional methods of sale is of concern to many growers across the Cotton Belt.

Marketing options for PIK cotton may not be much different than those normally considered. The decision to sell at harvest or to store in anticipation of future price increases still involve the same basic considerations by each

grower—immediate sale of PIK cotton when obtained, forward crop contracting of PIK bales, futures markets, and cooperative marketing pools all remain viable options. One option, the CCC loan, is not available for the PIK cotton received under entitlement.

But, says the ASC, certain provisions of the PIK program should work to the advantage of program participants and aid in crop marketing activities. For example, PIK cotton will be available on dates which correspond to the normal harvesting patterns in a given area. So, the established flows of new crop cotton into marketing channels should not be disrupted. This will enable producers to better time the disposition of their crop since they will have exact knowledge of when their PIK cotton is available for sale.

Producers who have cotton under CCC loan and not redeemed by March 11 must allow the CCC to use this loan as collateral for their PIK payment. The quantity, quality, and location of the cotton to be received will be known well in advance of normal harvesting dates. This should enhance their flexibility in marketing PIK cotton because the terms of sale can be more strictly specified by producers without the risks of quantity and quality discounts.

Producers with no outstanding CCC loans will receive their PIK cotton from an approved warehouse where stored. Warehouse receipts covering the quantity to satisfy each producer's PIK quantity will be surrendered by CCC and be available to producers at his/her local county ASCS

office on the PIK entitlement date. The producer may keep the commodity at the warehouse location or dispose of it in any manner. Local buyers, FOB merchants, and cotton shippers are active in these areas and are accustomed in buying and selling cotton represented by warehouse receipts.

Producers who are active members of cotton cooperative associations may receive their PIK cotton through the cooperative. The co-op will permit CCC to use loan collateral for PIK purposes. The principles and strengths of cooperative marketing strategies can be maintained, freeing the individual cotton grower from having to make direct marketing decisions.

Finally, two traditional cotton marketing options which may provide increased attractiveness under the PIK program are forward crop contracting and the use of futures contracts. Producers should evaluate these alternatives in light of current program provisions.

A major risk associated with crop contracting or futures market transactions has been the uncertainty surrounding final volumes produced to meet contract specifications, and risks associated with changes in the basis. However, under PIK the quantity of cotton to be received is known at the time of sign-up, enabling cotton producers to more effectively forward contract with shippers or mills, and establish delivery terms and conditions.

Moreover, with the CCC paying the up to 5 months storage after the availability date, cotton producers have additional time to consider marketing options without the risk of storage charges offsetting any increases in cotton prices during the five month period.

For wheat and grain farmers, the PIK program guarantees wheat or feed grain farmers a quality adjusted quantity of grain at harvest time. This grain may come from the farmer's stocks that are now in the farmer-owned reserve or under loan, whether on the farm or in warehouse, or from stocks that CCC owns. Generally this grain can be marketed in the same fashion as grain that has been grown and harvested on the farm.

Farmers do need to remember that PIK grain is not eligible for a CCC loan so that option is not

**COMBING FOR MARKETS**—Blending research and promotion to build markets around the world for U.S. cotton was the theme of Cotton Incorporated's modern fiber processing center, a combing machine that is used to remove short fibers and impurities from cotton in the making of fine combed yarns is viewed by (left to right) Jack and Dorene Dulaney, Shallowater; and Betty and Willie Nieman of New Home.

## Cotton Prices Move Up

Growers of High Plains cotton accepted bids 100 to 150 points higher this week in light to moderate trading. Mixed lots of grades 42 and better, staples 30-32, mike 35-49 brought 200 to 350 points over 1982 Commodity Credit loan rates, reported Mack Bennett, Area Director at USDA's Marketing Services Office in Lubbock.

Interest in PIK's remained high but contracting slowed despite contract offers moving to 46 cents - up from 45 cents per pound, basic grade 42, staple 32, mike 35 - 49 with 1983 loan premiums and discounts. Harvesting of the remaining 1982 High Plains crop slowed last weekend when very light rain and snow visited central and northern counties. Lubbock Marketing Services Office classed 20,500 samples during the week ended Feb. 24, Bennett said. This brought the season's total to 688,000 (184,000-HVI and 504,000-manual). This compares with 2,311,000 classed by the same date last year.

Predominant grades during the week were grade 52 at 42 percent, grade 42 was 16 percent and grade 53 accounted for 20 percent. About 65 percent was reduced one grade because of bark and six percent for grass. Predominant staples were staple 30 at 25 percent, staple 31 amounted to 41 percent and staple 32 was 17 percent for an average of 31.1 thirty-seconds of an inch. Mike 35-49 was 60 percent, 33-34 amounted to

U.S. spot cotton prices moved up sharply, touching the highest level this marketing year. The nine market average price for grade 41, staple 34 cotton reached 64.08 cents per pound on Wednesday - up 236 points from a week earlier and 62 cents higher than one year ago.

## Texas Highways Wearing Out

Texas highways are wearing out, and a major effort will have to be mounted to preserve the highway system, said Lubbock District Engineer Ben Alley.

"We are facing a rapid deterioration of the component roadways in our system," Mr. Alley said. "The average age of Interstate Highways in Texas is over ten years, and the average of Farm to Market roads is nearly 20 years, the nominal design life of a highway facility."

To cope with the problem, Alley said the State Dept. of Highways and Public Transportation is moving from a construction-oriented organization to one which focuses on maintenance and preservation.

Although some \$83,000,000 has been spent on maintaining those highways in recent years, inflation has taken its toll.

"Our first priority of business for the next 20 years will be the maintenance and preservation of the highway system," Alley said.

## Big Tastin' Sloppy Joe Pie Is New Twist On Old Favorite

Satisfy hearty appetites with this quick-to-fix main dish pie made with the popular ingredients of sloppy joes. The thick and chewy crust, easy to make with refrigerated flaky biscuits, is filled with a savory sloppy joe mixture topped with cheese.

### BIG TASTIN' SLOPPY JOE PIE

1 lb. ground beef  
1/2 cup chopped onion  
8-oz. can tomato sauce  
8-oz. can whole kernel corn, drained  
1/4 cup water  
1 envelope (1.31 oz.) sloppy joe or chili seasoning mix  
10-oz. can Hungry Jack refrigerated flaky biscuits  
2 tablespoons milk  
1/3 cup cornmeal  
4 oz. (1 cup) shredded cheddar cheese

Heat oven to 375°F. Brown ground beef and onion; drain. Stir in tomato sauce, corn, water and seasoning mix. Heat meat mixture until hot and bubbly; reduce heat and simmer while preparing crust. Separate biscuit dough into 10 biscuits; flatten slightly. Dip each in milk, then in cornmeal. Arrange 7 biscuits around sides and 3 on bottom of ungreased 9 or 10-inch pie plate; press biscuits to form crust. (Biscuits will form petal-like shape around rim of pan.) Sprinkle crust with 1/2 cup cheese. Spoon hot meat mixture over cheese; sprinkle with remaining cheese. Bake 20 to 25 minutes until crust is deep golden brown. Cool 5 minutes before serving. 4 to 6 servings.

### CHOCOLATE MOUSSE PIE

1 can (17.5 oz.) Thank You Brand Chocolate or Chocolate Fudge Pudding  
1 carton (9 oz.) frozen dairy-blend whipped topping, thawed  
1 ready-made chocolate crumb pie crust

With electric mixer or wire whip, gently combine pudding and whipped topping. Fill pie shell, swirling mousse into a pretty pattern on top. Freeze until firm before serving. (Clear plastic crust liner can be inverted for a protective dome to cover pie during freezing.)

Pie can be served solidly frozen, but for less icy texture—soften pie for a few minutes at room temperature or for one hour in refrigerator. If desired, garnish pie with additional whipped topping and chocolate curls.

"A bad neighbor is a misfortune, as much as a good one is a great blessing." Hesiod

No one has ever discovered two snowflakes with exactly the same crystal pattern.

## Texas' German Heritage Told

German families began settling in Texas, centering around New Braunfels, in the 1945-1947 period and have been an important factor in the history and development of this state.

Robert R. Robinson of Lubbock, whose ancestors were among these German-American settlers, was a speaker at Rotary Thursday and told of his work in researching hundreds of these families, many of whom originated in extreme southeast Germany hundreds of years ago.

He has spent years assembling these family histories, which he has published in two volumes containing about 2,200 pictures along with the family stories. Incidentally, several Wilson area families are included.

In order to get authentic data, Robinson, accompanied by his mother,

spent many months in East Germany researching family histories.

These Germans have become the finest of Texans, and have been of great influence in development of the state.

Calloway Huffaker arranged the program and introduced the speaker.

### SPS To Patrol Against Crime

Employees of Southwestern Public Service Company under a new program being developed at SPS will help local and area law enforcement officers stop crime.

The program, called "Partners on Patrol," will unleash almost 750 "extra pairs of eyes and ears" against prowlers, burglars, vandals, and other criminals, said Larry Milner, SPS vice president, communication and public affairs.

"Southwestern Public Service employees who work outdoors in our communities—such as meter readers, servicemen, line department personnel—will be on the lookout for crime, and be ready to report it," Milner said.

"We're just asking our employees to learn to spot suspicious activity, and to make quick reports to law enforcement agencies," he said. "The law officers will take care of the suspects. We'll help by being alert for problems."

"There may be other emergency conditions,

such as accidents or fires, which our people working in the alleys and on the streets will notice first," he said. "We know we can be of help."

### Free Clinics Are Listed

Healthline clinics continue at Community Hospital of Lubbock, 5301 University Avenue, and are free of charge. Reservations are required. For information, call Volunteer Services, 795-9301, extension 113.

Tuesday, March 8, from 1 to 3 p.m., Dr. L.R. Hsu will conduct a Urology Clinic.

Thursday, March 3 and March 10, from 1 to 3 p.m., Dr. Gary Raymond will conduct a Podiatry Clinic.

Every Wednesday afternoon, from 1 to 3 p.m. a Blood Pressure Screening Clinic is held in the lobby of the hospital. No reservations are required for this clinic.

### Cancer Information Program Set

The American Cancer Society, in cooperation with various Brownfield agencies and individual volunteers, will conduct a cancer information and prevention program tonight, (Thursday) March 3, from 6:30 to 9 p.m. in the Board Room at the Brownfield Regional Medical Center in Brownfield.

The public is invited to attend, free of charge, and the program will be of particular interest to those persons having cancer, as well as to family members and friends of persons having cancer. Further, those persons involved in treating cancer patients will find the program of interest.

## ★ CARD OF THANKS ★

**LEAH FAWN DELEON**

I would like to take this opportunity to thank all of you nice people, who bought Girl Scout cookies from me. My special thanks to Lyntegar employees for buying lots of cookies both times I went there. I sold 185 boxes, and came in second place. I have won an \$85 campership, tee-shirt, patch, and a poster.

Thank you,  
Leah Fawn DeLeon 9-1tp

We want to thank each one who remembered us in the loss of our sister, Mary Lula McAllister. For the prayers, food, flowers and visits. To those who helped with the services. Just being there to offer support has meant so much.

Thanks again,  
Elmer McAllister  
Mabel Tyler & Families 9-1tp

Troop 256 would like to thank everyone for making the recent cookie sale a great success. Because of their efforts, Robin Parker, Jay Jay Wiseman, Shannon Roberts, Mary Roberts and Cheryl Stancell will be able to spend two weeks at the Girl Scout camp, Rio Blanco. Dena Engle will be spending one week at camp this summer.

Each one of these girls will also receive a certificate, a poster, a patch and a t-shirt. Angie Morales and Veronica Tijerina will also receive a certificate and poster for their work.

The troop sold 88 cases and made \$211 for their troop. Leaders are Charlotte Wiseman and Kay Stancell.

I would like to thank each one of you for your prayers, cards, concern and words of comfort at the loss of my sister. May God bless you.

Annabelle Stice 9-1tp

We would like to express our heartfelt thanks to each of you for your prayers, kind words, flowers, memorials, food, cards and visits and for just being there during the loss of our loved one. The Family of Oran Short 9-1tp
