County Resident Reports Strange Object In Sky

A solid black flying object with no wings or other appendages was reportedly seen at low altitude about five miles west of Tahoka a couple of weeks ago by a longtime county resident who had to consider it awhile before deciding to mention it to anyone.

P.D. McMillan, a resident of the Lakeview community near New Home, told the Lynn County News Monday that he saw "something...I'm not sure just what...west of Tahoka about two weeks ago, at 2 or 3 o'clock in the afternoon, near a caliche pit."

McMillan, who retired about three years ago after working for more than 20 years at Petty Gin and West Point Gin, said he and his wife, Elma, were traveling west on U.S. 380 and had reached a point about a mile east of where FM 3112 goes south to Wells. He said there is a caliche pit off the highway to the north, and it was about there that he saw the object.

"I saw it coming up from the ground, but it had no wings or landing gear or anything. I told Elma, 'that sure looks like a big bird', but she never did see it."

She explained that she didn't see it because she was driving. He said he got a good look at the object just before it passed over the car, by then about half a mile high.

McMillan said he quickly realized it was not a bird.

"It was solid black and looked about as big as the end of a thousand-gallon butane tank and maybe five or six feet tall...I couldn't tell if it was exactly round or not," McMillan said.

He said that when he first saw it, the object was just barely off the ground headed east, then north. "Then it turned around and made a circle behind our car and came back to the side of us. It was solid black, just gliding, then it came down almost to the ground." He said he lost sight of it briefly because of the car roof, but he saw it again "heading out real fast to the northeast, toward the Tahoka airport." He said that from the time he first saw it to his last glimpse of it was about 45 seconds.

McMillan said he has done a lot of hunting and camping out at night in the area, but had never seen anything so unusual as what he saw that day. He wasn't certain what day it was, except that it was during the week and they had been to Tahoka.

DEST OF DESTREE STREET STREET STREET, STREET AT THE COLUMN STREET, STREET

He also said he had not told anybody about it because he thought many folks wouldn't believe the story.

I've read lots of times about people reporting such things and I always figured they were just seeing things," he commented. "But I got to thinking that this is the kind of thing that people write about, so I decided to call the paper."

"Anyway," he added. "I know what I saw, and it was in broad daylight...and I've never seen anything like it."

A check by the News turned up no other witnesses to the event and Lynn County sheriff's office said it had received no reports of such sightings within the last two or three weeks.

BY DALTON THE TEXAS Medical Assn. says about 60 per cent of Texans do not use seat belts for a variety of reasons, among which they cite some are not convinced seat belts work, others fear being

MOODWORK

trapped and some consider seat belts inconvenient. None of these reasons, says the TMA, justifies not using auto restraints. The TMA has put out a pamphlet called "Click--The Sound of Saving a Life," and goes on with a lot of stuff about

how seatbelts can save your life. All responsible publications support use of seat belts, as do all safety organizations, medical people and Ralph Nader.

That's all true and there's no doubt that using seat belts may save your life. But I don't use them. I used to fasten them once in awhile before they added the shoulder-chest restraints, but putting on all that spaghetti gives me a claustrophic feeling of being tied down. So I guess I'm not being responsible in my attitude toward seat belts. Actually, I would like for all my loved ones to use them, and I have no quarrel

with anyone who wants to buckle

A better solution. I am convinced, to protecting me while I am driving would be for everyone else to stay off the highway until I get where I'm going.

The TMA says three-fourths of the people who have died in auto crashes could have been saved had they used seat belts. I expect all of them could have been saved if they had stayed home and never, ever got into a vehicle. But sometimes a person has to take a risk just to have some freedom of activity. You can't live in a safe hidey-hole all your life. And to me, driving down the highway with a bunch of straps tied around me is not comfortable.

Yeah, I know. Dead is not comfortable either, so please use your seat belts. Just don't ask me to use one, unless Ralph Nadar is tied up in the back seat so he can suffer with me.

As soon as he thinks of it, he'll have us putting seat belts on motorcycles and wearing helmets

Mid-Year Crop And Livestock Reports Slated

The Texas Crop and Livestock Reporting Service will begin contacting farmers and ranchers across the state in mid-May for 1984 crop information and mid-year livestock inventories.

State Statistician Dennis Findley emphasized that information from these surveys is very important to the entire agricultural industry.

To reduce survey costs. Findley is urging farmers and ranchers to return the mailed questionnaires as soon as possible. The reported information will be combined for state and county estimates.

How can anyone influence the development of people to make them responsible, selfrespecting members of our democratic society?

The 4-H program can provide valuable learning experiences through family, church and commuity involvement, says Greg Henley, county 4-H program coordinator.

Most of the things we want young people to become are a part of the 4-H program. The whole idea of 4-H is development of young people. Since 4-H is family oriented and coeducational, it is truly

people. 4-H starts in one of our first "groups" -- the family group which influences us so much. The 4-H program goes down to the 'grass roots'' because the people in it--from Extension people to local leaders and even the young people themselves-actually help decide programs and activities. So, besides involving the family group, 4-H also closely involves the community group.

Anyone who works with young people can tell you that most of them want and need to belong, to be recognized, to be respected for what they are, to develop a sense of responsibility and a sense of freedom which disciplines, and to have the good feeling of doing something meaningful by themselves. The 4-H program, a people development program, can provide these things, says
