

The new home of "Lubri-tection"

AN INVITATION to visit America's newest and most modern motor oil plant

There are going to be "big doings" at Kansas City, Kansas, June 21st and 22nd, when Phillips' great new motor oil plant holds "open house" for American motorists.

You and your family and friends are invited, if you can possibly be there.

There'll be guided tours and refreshments, and you'll get an exciting "eyeful" of what Phillips has done to make possible finer lubricants for today's cars.

You'll see motor oil scientifically packaged by new precision methods. You'll be thrilled by

new high speed conveyors and miraculous new machines that turn out up to 250 cans of oil a minute. You'll see special automatic blenders that maintain exact standards of uniformity and purity.

Come and see this new home of "Lubri-tection", where Phillips blends finer motor oil to give your car lubrication plus engine protection. Remember the dates . . . June 21st and 22nd . . . at Kansas City, Kansas. Any Kansas City Phillips 66 Dealer can give you directions for reaching the plant.

P. S. If you can't be in Kansas City June 21st or 22nd, why not pay us a visit the next time you're in our part of the country? You'll always be welcome!

Lubricate for safety every 1,000 miles

Rodeos Hold Top Interest as West Texas Vacation Lures

Ten years ago this summer, in pre-war days, West Texans had a slogan, "Stay and Play in West Texas." This summer's vacation program in West Texas is being geared to greater heights than even those post-Centennial days.

Truly, thousands will "Stay and Play in West Texas" this summer. With a whirl of entertainment that preserves the most picturesque of the early West's traditions and adds new ones for good measure, West Texas is inviting the world to join her for a vacation.

The rodeo is one of the most colorful and typical expressions of West Texas. Topping the calendar in that field is the Texas Cowboy Reunion at Stamford, but Coleman, Snyder, Winters, and Brady will have shows which will stop many tourists as they trek through the West Texas playground.

There are rodeos, fairs, encampments for church groups, family reunions, folk festivals, and golf tournaments. Parks in the area will attract thousands this season. There is fishing at some of the state's most inviting lakes, especially since most of the lakes have been filled with water from numerous spring rains.

In fact, there is no end to the vacation facilities offered by West Texas. Take a look at the calendar.

June 1-29 — Girl Scout Encampment at Camp Tonkawa, near Buffalo Gap.

June 6-8 — Synod of Westminster Fellowship (Presbyterian Church) at Buffalo Gap.

June 6-11 — Youth Assembly at McMurry College.

June 9-12 — Men's West Texas Golf Tournament, Brownwood.

June 6-11 — Youth Assembly at McMurry College.

June 9-12 — Men's West Texas Golf Tournament, Brownwood.

June 10-12 — Methodist Young Adult Conference, Canyon Camp, near Amarillo.

June 11-15 — Methodist Youth Camp at Ceta Canyon, near Amarillo.

June 14-19 — Women's West Texas Golf Tournament, Lubbock.

June 18-19 — Cisco Invitational Golf Tournament.

June 20-25 — Baptist Encampment at Lueders.

June 23-25 — Fort Griffin Fandangle at Albany.

June 23-25 — Winter's Annual Rodeo.

June 24-26 — Breckenridge Invitational Golf Tournament.

June 2-7 — Presbyterian Church Worker's Institute for Training in All Phases of Church Work at Buffalo Gap.

June 29-30 — West Texas Hereford Breeder's Association annual Hereford Tour.

July 1-4 — Abilene Invitational Golf tournament.

July 1, 2 & 3 — Texas Cowboy Reunion at Stamford.

July 2 — West Texas - New Mexico League All-Star game at cities leading league on June 22.

July 2-4 — Brady July Jubilee.

July 4 — Brady Invitational Golf tournament.

July 3-23 — Chisholm Trail Council Boy Scout Camp at Camp Tonkawa near Buffalo Gap.

July 11-17 — Junior High Young People's Conference (Presbyterian) Buffalo Gap.

July 14-17 — Mineral Wells Invitational Golf Tournament.

July 18 — Longhorn League All-Star game at San Angelo.

July 18-25 — Senior Young People's Conference (Presbyterian) Buffalo Gap.

July 20-23 — Scurry County Rodeo at Snyder.

July 21-23 — Annual Cross Plains Picnic.

August 1-5 — Methodist Intermediate Youth Camp (Ages 12-14) Buffalo Gap.

August 15 — Methodist Intermediate Camp, Ceta Canyon, near Amarillo.

August 5 — Taylor County Sheep and Goat Raisers Feild Day at Sayles Ranch.

August 5 — Methodist Layman's Retreat at Ceta Canyon, near Amarillo.

August 11-14 — Odessa Four-Ball Golf Tournament.

August 16-20 — Sweetwater "Salpingo."

August 15-19 — Methodist Children's Workers Camp at Buffalo Gap.

August 17-21 — Lubbock Invitational Golf Tournament.

August 22-26 — Methodist Junior Camp (for Abilene, Stamford and Sweetwater Districts) at Buffalo Gap.

August 22-26 — Methodist Junior Camp at Ceta Canyon, near Amarillo.

August 20-Sept. 2 — Methodist Youth Recreation Camp at Buffalo Gap.

Sept. 5 — Big Spring Invitational Golf Tournament.

Sept. 12-15 — Texas Tech Presbyterian Ministerial Students, Buffalo Gap.

Sept. 26-Oct. 1 — West Texas Fair at Abilene.

Cotton Classing Office Beginning Fifth Year

This week marks the beginning of the 5th season of operation of the Abilene cotton classing office, according to H. J. Matejowsky, who is in charge of the work of the Cotton Branch, Production and Marketing Administration, U. S. Department of Agriculture.

The Abilene office serves cotton farmers in 27 counties in this Baylor, Brown, Callahan, Coke, Comal, Coleman, Concho, Dickens, Fisher, Haskell, Howard, Jones, Kent, Knox, Glasscock, Martin, Midland, Mitchell, Nolan, Runnels, Schleicher, Scurry, Shackelford, Stonewall, Taylor, Throckmorton, and Tom Green.

Mr. Matejowsky said. This amounted to 191,563 bales.

Farmers belonging to organized cotton improvement groups under the Smith-Doxey Act can get their cotton classed without cost. Also, they can get free market news service.

Applications for these Smith-Doxey Act benefits should be filed immediately after the group members have planted their cotton with the U. S. Department of Agriculture, PMA, Cotton Branch, P. O. Box 2991, Abilene, Texas. Applications can be secured from the Abilene cotton office, county FIA office, county agent or ginmer.

To make sure farmers secure all the benefits due them under this program, their group applications will be accepted until August 1.

Applications Being Taken For Public Health Positions

Competitive examination for positions in the public health hospital construction program of the Texas State Department of Health has just been announced by the Merit System Council for the Texas State Department of Health. Examinations are for public health positions in the Hospital Survey & Construction Division of the State Department of Health, and will consist of an evaluation of training and experience and an oral examination. Veterans preference will be allowed applicants who have been honorably discharged from the United States armed forces, and who make a passing score on the examination.

Applications will be received continuously until further notice. Positions for which examination will be conducted are: Director, Hospital Survey & Construction Division; Architect; and Field Consultant. Qualifications required include graduation from an accredited college or university with major emphasis in appropriate sciences and experience in public health specialties. Preference will be given those candidates who have college training in advanced sciences of medicine, engineering, etc., and public health experience. Entrance salaries range from \$3000 to \$6000 according to classification.

Application blanks may be obtained from Russell E. Shrader, Merit System Supervisor, Littlefield Building, Austin, Texas.

Half Of Annual Drownings Occur In Summer

Most of the people in the United States do not know how to swim, and that, the basic reason why drowning becomes one of the most important causes of accidental death in the summer. National Safety Council figures show that about half the drownings each year take place in only three months—June, July and August. Drownings show the greatest seasonal increase of any summer hazards.

So if you are planning to swim this summer—and its fine exercise as well as pleasant recreation—pay attention to these suggestions from the Council: Learn to swim well. Self-taught "dog paddlers" to often think they are swimmers and overestimate their abilities. Know your limits as a swimmer and stay within them. And don't think all water is the same.

Never swim alone. Always have help at hand, preferably a life-guard with the knowledge and equipment for rescue. Don't swim after dark for the same reason. It is too hard for even an expert to assist you in the dark.

It is dangerous to dive into water of undetermined depth. Submerged rocks or logs may knock you out. Sudden plunges into cold water should be avoided. Go in gradually, and remember that you tire faster in cold water. Don't plunge into water when you are overheated, and wait at least an hour after eating to swim.

Never jokingly call for help, and don't splash or annoy others who are timid in the water. Horseplay and pranks cause many water accidents each year.

Even strong swimmers are subject to cramps and bad guesses on their endurance. If you want to swim for any distance, have someone follow you in a boat. Don't let children take beach balls, inflated animals or light rubber rafts in the water. A gust of wind often blows them beyond reach, and in trying to retrieve them, a child may get beyond his depth. This is a point adults should keep in mind, too.

KING RE-ELECTED HEAD ROCHESTER SCHOOLS

The Rochester School Board has voted a new three-year contract to Robert R. King as superintendent of the Rochester Schools.

King has been head of the Rochester Schools for the past two or three years. He is a graduate of McMurry College.

Erosion is taking its toll. One hundred million acres (three times the area of Iowa) have been lost in less than 150 years.

To Live Longer, 'Be Your Age' Doctor Says

There is an old slang expression that would make a good slogan for living a longer and more comfortable life, and that is "Be your age." According to the State Health Officer, Dr. Geo. W. Cox, many persons injure their health and endanger their life through indulgence in exercises and vigorous sports unsuited for their age and physical condition.

"While a young man in prime physical condition may benefit from a fast game of tennis, older men and women have been known to collapse and suffer serious heart attacks following such a game. The same thing applies to golfing, swimming and other vigorous sports," Dr. Cox said.

During the hot summer months, it is of especial importance that you know your physical limitations, and indulge in only such activities as will benefit, and not harm your physical condition.

"Persons of middle age should never participate in activities requiring violent physical exertion, and should confine their physical exercise to such bounds as their doctor prescribes," Cox asserted.

The State Health Officer suggested that all persons of middle age be examined by their physician, before planning their summer vacation activities. A vacation can easily be more exhausting than refreshing, and in such an event, more harm than benefit results from the time thus spent. Fishing, boating, hiking in moderation, and many other light recreations can be engaged in by the older people who must avoid heart strain, and it is a wise precaution to have your doctor advise you as to what sort of vacation you should plan.

R. L. BURTON

Local Chamber Secretary Attends Water Rights Committee Meeting In Albany

Steps for surface water rights and a development program were taken Friday when the Central West Texas Water Development Committee was organized in a meeting at Albany.

The committee will receive a report on water surveys and on recommendations of the West Texas Chamber of Commerce from D. A. Banded, general manager, within ten days. The report will be studied by members of the committee for a week, decide on its adoption, and hold a general meeting a week later at Coleman to take official action.

The new organization is a culmination of meetings held recently at Baird and Throckmorton. Representatives of the committee held two sessions Friday—morning and afternoon. At noon they were guests of the Albany Chamber of Commerce at the weekly luncheon meeting of that organization.

R. G. Hollingsworth of Coleman was named temporary chairman of the committee, with Fred Ward Breckenridge chamber of commerce manager, serving as secretary.

Prominent water committee members and exponents of municipal water rights attending included Banded and L. A. Wilkie, public relations department head of the West Texas Chamber of Commerce; Sam Cooper, Coleman; Roy Matthews, Albany utilities superintendent; Mayor R. C. Daniel of Albany; Ralph Duncan, Haskell; secretary of the Bob Baskin Dam Association, who represented B. B. Campbell, executive board member of the Brazos River C&R District, of Knox City; Mayor Betah Freeland and Marvin Hunter, a city council member of Baird; and Miss Ollie E. Clark, Albany chamber of commerce manager.

Business of the meeting included a general discussion of the water needs of West Texas. Banded reviewed activities of the WTCC in making surface water surveys of towns in West Texas on the Brazos watershed and read the recommendation of the organization based upon the Hoover Commission report to Congress.

He said the program would

Arm Placement Representative Goes To Dimmitt

John T. Knight, farm placement representative of the Texas Employment Commission who has been stationed in Haskell for the past several weeks left Thursday for Dimmitt where he will be stationed temporarily during the current harvest season.

While in Haskell, Knight had office quarters in the chamber of commerce building, and was stationed here to direct the placement of harvest equipment and labor during the wheat harvest. This service of the TEC is extended, without charge, to the farmers of the area, and Knight handled many calls while here.

Free Press Want Ads always get results.

give municipalities prior rights to water. Federal appropriation of state water rights and construction of power dams were condemned. He asserted creation of numerous smaller dams in West Texas federally subsidized meant more returns than the large power and multi-purpose dams. By erecting small dams for municipal water use, three times as much revenue could be returned to the government than is provided by the larger power dams it was pointed out.

Banded said later: "The Hoover recommendation is the best piece of potential water legislation in the past 50 years for West Texas. In Texas 30 times more water is being used from our streams for power than for municipal uses." Banded said the surface water problem is a 1500 square mile Panhandle-Plains area. That section has reached the bottom of the wells for irrigation. Either the farmer or the municipality must sell out. The only solution is surface water.

Ward said the need of West Texas towns is more water, cheap water, and good water. "It's a common problem in all our communities, and we must work it out on a common basis."

Duncan told the committee the need for surface water storage for the Haskell area was imperative with the growth of Haskell and other communities in that section.

The criteria in Washington must be changed if we in West Texas are to get what we want and need, Wilkie told the group. We should develop all possible support for the Hoover Commission recommendation, he added—then we can get things done.

The keynote of the meeting was action, and plans to develop the program outlined in the Friday meeting are to be handled as rapidly as possible.

MAINS, HYDRANTS INSTALLED DURING MONTH OF MAY

Marked progress was made in the water, sewer and street departments of the Haskell city government during the month of May, according to J. R. Gilstrap, superintendent of the municipal water department.

During the month approximately 2,000 feet of water mains were installed. These mains were laid from a point on N. Ave. D to N. 14th Street on Ave. A; from N. Ave. A to N. 15th street on Ave. A; to Ave. B, North 15th to N. 14th south.

In addition to this water main extension, two fire hydrants are to be set. One a 6" three-way stream hydrant on N. 14th Street 1000' east of Ave. D, on N. 14th Street.

This hydrant will give fire protection to the colored section of North Haskell which is known as Sunset Addition.

A 2" fire hydrant is to be installed on the corner of N. Ave. B, and 15th Street to be used principally for a refill station for the city's fire fighting equipment.

Installation of this new fire equipment calls for the use of 1020' of 6" cast iron pipe on which the 6" fire hydrant is set, 300' of 4" cast iron pipe with the remaining 680' run in 2" galvanized pipe, completing a circle which eliminates any dead-ends.

This new water extension was a much-needed project to this section, sponsors pointed out. One loss of life has been attributed to a fatal fire due to the lack of water for fire fighting purposes in this area. This increased water service will provide water for household use to this section that had formerly depended on small and inadequate water supplies from wells. No water in the past had been available for use on lawns or gardens.

This project has been under consideration for the past two years, and was completed under the sponsorship of the present City Council.

In addition to the extension of the water services, employees of the water, street and sewer departments have been pressed into service in the city park. Activities of the park program call for the mowing of weeds and cleaning of the park proper that it might be made available to the people of this area.

W. H. Cox, parks commissioner, is making a special effort that the park be maintained to the extent that it will be usable at all times.

The municipal swimming pool, under lease to Jack Roten, high school coach, is in operation. The pool is to be operated through the summer months, and no shortage of water for use in the pool is anticipated. Renovated thoroughly, the pool is in sanitary condition and is to be maintained on that basis as long as it is in use. Recently employees of the water and sewer departments have constructed two life guard stands at the pool that will assure adequate life guard protection.

An adequate water supply is anticipated in Haskell this summer, according to Oton Dotson, water commissioner. However, water patrons are advised against the willful waste of water. One hundred additional new water meters are to be installed in the very near future, and water patrons are urged to watch for leaks that waste water.

Periodical reports are issued on the activities of various departments of the city government, and next in this series of the articles will be a survey of sewer construction and street improvement.

The Moth Menu Most folks figure when they protect their woolen winter garments from moths, the job is done. But wool isn't the only item on the moth menu. It also includes animal hair, fur, feathers and any articles made from these materials.
Now comes the time of year to store the winter woolsens so the moths won't make a feast of them while you're in cottons and rayons. Mary Routh, extension clothing specialist of Texas A&M College, suggests checking the out-of-the-way floor cracks and baseboards where woolen lint and hair may have collected. Such places are often fertile breeding places for moths. So you might get them all out at one time while you're busy putting the woolsens in storage.
Clean out the clothes closets and spray the walls, woodwork baseboards and shelves with D.T. About a half pint will be needed for the average sized closet. Miss Routh suggests using a residual oil spray, since the water spray leaves a white deposit where it's applied.
The residual sprays are effective over a period of months in killing insects that come in contact with the closet surface. Spray sprays last only a short time.
DDT solutions may be sprayed lightly on woolen clothing without injury to the fabric. It's a good for protecting clothes hanging in closets. Moth balls, flakes or crystals are advised for clothes stored in tight bags, trunks or other containers where a fumigant Routh concludes.
An electric pump is the heart of the farm water system. It must work for your family under all conditions, so select it to fit the special needs of your farm and home.

Warning Signals of Tornadoes Discussed By Weatherman
What are the warning signals of a tornado? What should a person do who is in the path of an approaching twister?
Advice on these subjects was supplied in Lubbock recently by Eric L. Hardy, who has been watching weather professionally in the Southwest during the greater part of the past 37 years. He has been regional director of the U. S. Weather Bureau at Ft. Worth since 1941.
Tornadoes are most frequent in April, May and June but they might occur any time of the year. They usually happen in the late afternoon or early evening—but they might strike any hour of the day or night.
Tornado weather is likely to be sticky, sultry and oppressive, with southerly winds. An hour or two before the storm, topsy-turvy clouds are likely to appear which bulge downward instead of upward. Thunderstorms in the west of northwest are usual. The thunderclouds as a rule are "sickly greenish-black" in color with the lower clouds in rapid and confused motion.
Then, from the base of the cloud a rope-like funnel may reach toward earth, spinning counter-clockwise at a furious rate, and varying widely in thickness. The noise it causes may be compared to the "roar" of hundreds of airplanes or freight trains going through a tunnel."
When these things happen, it is time to seek safety—in a storm cellar, if one is available.
Persons who have a few minutes of advance warning might be able to run out of the path of an approaching tornado if it appeared to be a small one and was moving in one straight line. Those who flee in this manner should run at right angles to the approach of the storm. However, running from a storm could prove dangerous if an approaching tornado covered a wide area and was moving in a zig-zag fashion.
Those who can get to automobiles usually can outrun the tornado.
Persons caught in the open should lie flat in the nearest depression.
Frame houses afford more protection than those built of brick or stone. If a basement is available, the southwest corner usually affords the most protection.
In office buildings, an inside wall on the lowest floor which can be reached is safest.
Stay away from windows and don't stand in open streets. The air is likely to be filled with debris traveling at machine gun bullet velocity.
Schools in city areas should follow the same procedures as in office buildings. In rural schools more protection usually can be obtained in a ravine or ditch than in the building.

Let's all go down to the seashore! The scenery is gay and colorful on the beach these sunny days, proves this bathing beauty. She is wearing a brightly striped cotton swim suit designed by Cole of California.
Cooking bananas may be boiled in the skin and served as a vegetable. Or they may be peeled, cut in lengthwise halves and sauteed in a little melted fat in a frying pan. Lemon or orange juice is added to prevent darkening of the bananas and to add flavor to the dish.
able, the southwest corner usually affords the most protection.

Cancer Center In Every Texas Town Goal of ACS

A cancer information center in each of the 254 counties of Texas is the ultimate goal of the Field Organization of the American Cancer Society, Texas Division. Mrs. Joseph M. Perkins, of Houston, commander of the Texas Field Army of women volunteer cancer control workers, said: "Our workers have established full-time cancer information centers in eight cities—El Paso, Houston, Galveston, Texarkana, San Antonio, San Angelo, Fort Worth, and Amarillo. Mrs. Perkins said: "In addition we have part-time centers at Baytown and Kerrville. "We are proud of these centers and their work," she added, "but we still have a long way to go in getting facts about cancer to the people of Texas. Information centers are a vital element in our cancer control program. Such centers, at definite locations, suitably publicized, open at definite hours of the day where people can come for information or assistance, may very well prove to be the first step in a chain of events which result in the cure of a cancer patient who

Slight Increase Seen In Farm Building

The old story of "six of one and a half dozen of the other" works pretty well in the outlook for agricultural buildings. According to this outlook, building estimates indicate a six per cent increase in dollars worth of construction for 1949, say extension agricultural engineers of Texas A. & M. College. While a light increase in farm construction is in sight, the six per cent national increase will tend to hold material prices right where they are now. The price index on lumber has dropped about six per cent since last August, but the price jumps in other building products have cancelled this advantage for the prospective builder. Right now there are more than twice the number of farm implements—not including tractors—on rubber tires than there were in 1932. The rubber industry is pretty important to the mechanized farmer. One of the national rubber companies figure they'll produce two million more tires this year than they did last. Farm tires are in on this increase, too. Statistics show that 55 per cent more rubber has been used in the farm industry since V-J Day than in any three peak years up to that time. From the production angle, this year's picture is an encouraging one, say the agricultural engineers. From all indications there will be plenty of farm tires to replace the used ones and ones for new equipment.

Soil Building Is Bonus From Feeding Stock

Feeders who use livestock as their most valuable piece of soil conservation "equipment," as well as their best method of marketing feeds, get a bonus value that will be of increasing importance in the future, livestock authorities say. "The amount of profits made by livestock producers in the years just ahead will have more to do with the success of soil conservation than any other factor," Dr. A. D. Weber of Kansas State College recently predicted. Records show that when cattle are fed home-grown feeds, a farm loses only one-seventh as much nitrogen, one-fourth as much phosphorus, and one-twentieth as much potash as when the grain is sold off the farm. When a purchased high-protein concentrate, such as cottonseed meal, is added to the home-grown grain and roughage, there may even be a net gain in soil fertility, Professor F. B. Morrison points out: "When such protein-rich feeds as cottonseed meal, linseed meal and tankage are purchased and fed to stock and proper care is taken of the manure produced," he comments in "Feeds and Feeding," "a double return is secured. The first return comes from the high feeding value of these protein supplements, and the second from the fertility added to the soil." Because of its higher nitrogen and phosphorus content, a ton of cottonseed meal has approximately \$10 more manurial value than a ton of carbohydrate feed, such as corn. Properly handled, a ton of manure is about equal to 100 pounds of fertilizer of 10-5-10 analysis. Since a steer or dairy cow usually will produce 1,000 pounds of manure, or more, monthly, this means that the animal is contributing \$10 to \$20 yearly toward improvement of the soil on the farm where it is fed. In addition to its plant food value, manure provides humus,

or organic matter, to increase the water holding capacity of soil, improve soil texture and reduce wind erosion. Acid, and bacteria in manure also help to release plant food from insoluble compounds in the soil. Feeding of a protein concentrate, such as cottonseed cake or pellets, on the range also is an important conservation practice. Supplemental feeding and moving feeding grounds regularly aids better distribution of grazing, and helps to prevent over-

grazing. Manure has a higher value if promptly spread on fields or pastures. If stored, it should not be allowed to become dry, overheated or leached by rains. Adding 100 pounds of superphosphate to each ton of manure increases fertilizing value and helps to prevent loss of nitrogen. Other factors influencing manure's value include the age and kind of animal, and the kind of feeds used. Try a Want Ad in the Free Press!

SPENDS VACATION IN RESERVE OFFICER TRAINING

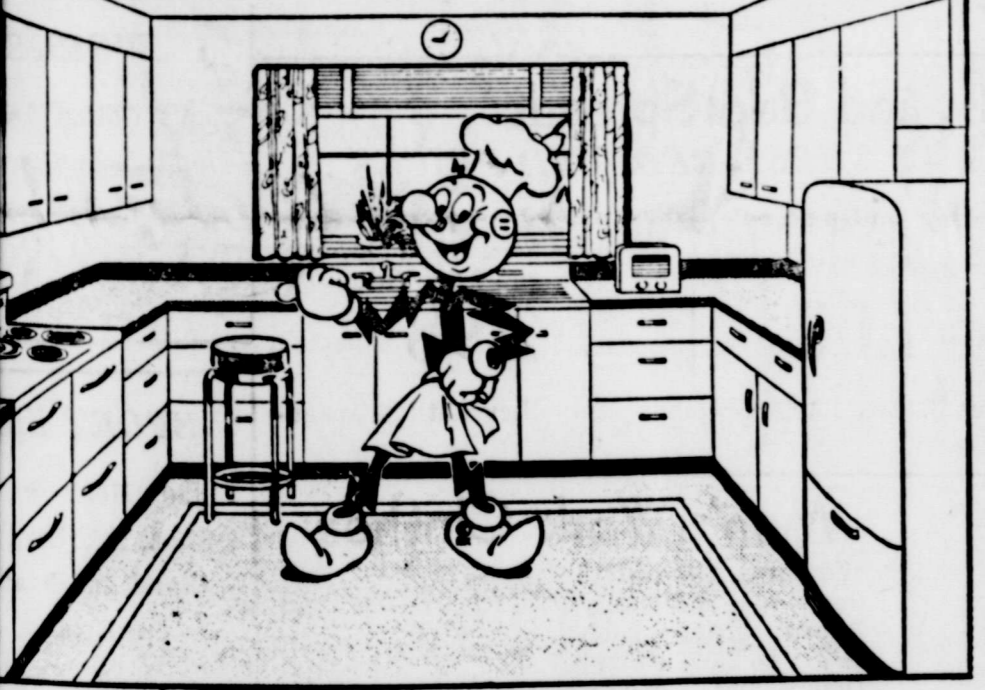

Tom Patterson, local bank employee, and a First Lieutenant in the U. S. Army, Reserve, left earlier this month to attend the two week's annual training camp of the U. S. Army Reserve at Camp Chaffee, near Little Rock, Arkansas. This annual summer camp is a part of the training program for U. S. Army officers in Reserve, and Patterson takes advantage of his annual vacation to attend.

Kill Profit-Stealing Insect Pests with JOHN DEERE No. 77 Duster
How much tribute do you pay to profit-stealing insects in terms of pounds of cotton... in actual dollars stolen from you? Add those dollars to your bank account by dusting your cotton fields regularly with a John Deere No. 77 Duster. The big-capacity John Deere dusts eight rows at a time... its "mile-a-minute" blast clothes the growing plants in a bug-killing cloud in any quantity from 2 to 30 pounds per acre. Compact and sturdy, the John Deere is easy to attach, detach, and adjust to row spacing... forms an integral part of your John Deere tricycle-type General-Purpose Tractor. See us soon about the John Deere No. 77 Duster.

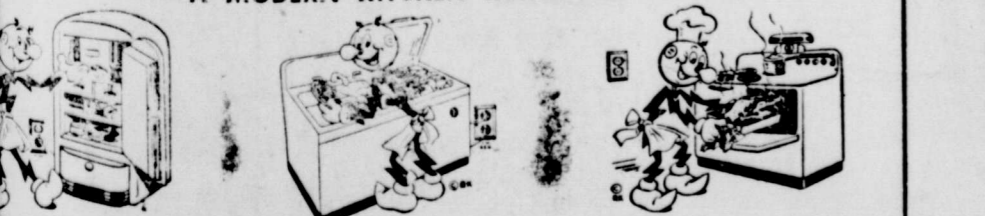

Gilmore Implement Co. JOHN DEERE... The Quality Name in Farm Equipment

A KITCHEN IS PRACTICAL and PRETTY

... OF COURSE—IT'S Electric!
There was a time when you had to choose between a pretty kitchen and a practical one, but not nowadays. An All-Electric Kitchen is both practical and pretty. It is practical because you base your plans on an Electric Range, Electric Refrigerator, Electric Dishwasher, and plenty of electric outlets for the use of electric mixers, waffle irons, toasters and many, many other electrical appliances. Around these appliances you build "Electric Time-Saving Centers." This equipment does so much of your work for you automatically that you'll have more time for leisure. And it's pretty, because there's really no limit to what you can do decoration-wise with an All-Electric kitchen. If you plan to build or remodel, our Home Service Department will help with your kitchen plans. When a kitchen is both practical and pretty...

OF COURSE—IT'S Electric!

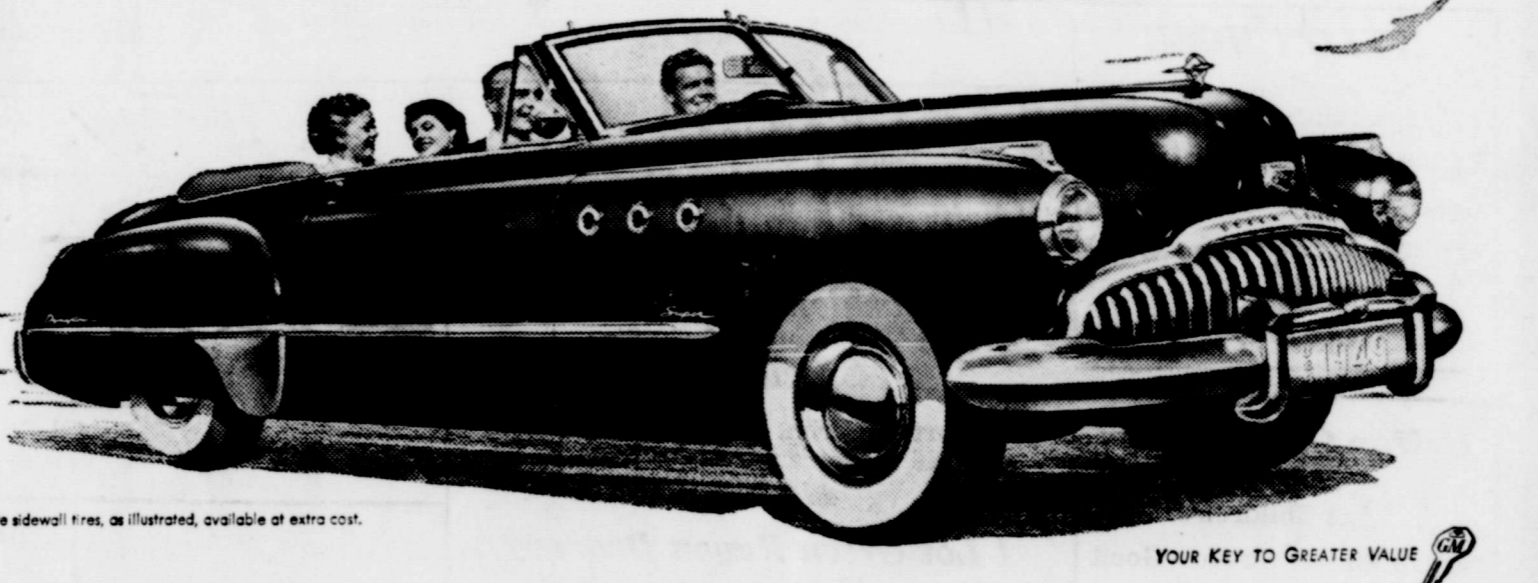

A MODERN KITCHEN INCLUDES
Refrigeration Center, built around your electric refrigerator provides ample food storage, large freezing capacity, and work surfaces provide for food preparation.
Dishwashing Center, featuring electric sink with automatic dishwasher and garbage disposal unit. The Electric Dishwasher handles not only dishes and silver, but pots and pans as well—washes them shining clean, and dries them without wiping.
Cooking Center, with electric range as central unit. The Electric Range provides safety, better meal—due to controlled heat—coolness, easier cleaning, durable, reliable simplicity, and beauty plus economy of operation.

ADEQUATE WIRING: This simply means: 1. Large enough electric wires. 2. Enough circuits. 3. Plenty of outlets and switches.
West Texas Utilities Company

otherwise would die. We are asking all of our county units to consider the possibility of sustaining an information center in their county. Each of the eight full-time centers is staffed by an executive secretary, whose salary comes from the budget of the county unit of the American Cancer Society, and as many volunteer workers as are needed to carry on a year-round program of education and service about cancer. Persons seeking advice about personal cancer problems can go to these centers with their inquiries. These inquiries usually range all the way from "Where can I get a thorough examination so I can know whether I have cancer?" and up to the more intimate problems of "How can I get treatment for which I cannot afford to pay?" or "I can no longer take care of my mother without help. Where can I find a nurse, a housekeeper, someone to sit with her while I go marketing?" "The most important consideration in establishing an information center is the need for medical supervision and assistance," Mrs. Perkins said. "Our county units are encouraged to work closely with the county medical society in all of their endeavors. It is not sufficient for the local medical society to approve the project. They must appoint a small committee to participate in and supervise its activities." Part-time cancer information centers as described by Mrs. Perkins might, perhaps, be the corner of a public library or a table in the lobby of the county courthouse—some spot where volunteer workers can set up a temporary information desk for the distribution of literature on cancer and to answer questions on this vital health program. "The information center program of the Texas Division is aimed directly at lowering the Texas cancer mortality rate," she said. "Last year nearly 7,000 Texans died of cancer. From our experience we know that at least one-third of these could have been saved if their condition had been discovered in time, and if these Texans had known the seven danger signals of the disease. The Texas Division of the American Cancer Society is urging county units to establish centers in every county of the state. At present the cancer center closest to Haskell is at 109 East 9th Street, Fort Worth.

The silo is the best way to store abundant supplies of nutrients found in pasture and hay crops. In silage form, feed is available summer or winter.

What's so fair on a day in June

The day is bright and the company good. Long ribbons of road, smooth and inviting, spread their challenge. Giant power purrs under a long bonnet. Your wheels—coil springing mounted all around—step lightly over dips and bumps. Your foot on the throttle controls the silken luxury of Dynaflow Drive—surging, slowing, even halting completely with never a need for clutch work or lever shifting. Is the breeze a bit strong? A finger-touch runs up the door windows. Is the seat just right? Another control corrects it as easily.
Does a cloud show? In seconds you can swing up a snug top if it's needed. So you're free. Free to make the most of fair days and pleasant companions. Free to take it easy, find adventure in thrilling pace or the solid content in loaf-along gait. Free to have fun! So what's keeping you out of a Buick Convertible? Is it price? Is it delivery? Or is it just not looking into such things? Correct the last—by seeing your Buick dealer—and you'll find demonstration yours for the asking, the price easier to manage than you thought and deliveries so prompt you'll quickly get an order in.

BUICK alone has all these features

Creek SC Ability Is
ors Job

Soil Conservation Service for it, landowners who are elected in the district to represent the people in the district. They are only to the people in the district.

In addition to the district responsibilities these supervisors carry, they also have the responsibility of doing a good conservation job on the land which they own and operate. Most soil conservation district supervisors are conservation farmers and ranchers who try to set a good example for their neighbors. The supervisors of the California Creek Soil Conservation District are no exception. In addition to carrying on sound soil and water conservation programs on their own holdings.

E. W. Carlson, chairman of the board of supervisors, who farms 586 acres north of Leuders in the Shafter County portion of the district, has served on the board since the district was organized. He took office in July, 1941.

Mr. Carlson has experienced outstanding results by increasing crop yields through the use of a combination of conservation practices. In 1947 he grew over 3,200 pounds of combine maize per acre on a fifty acre field which he had terraced with level closed end terraces. He also used deep tillage with a chisel type plow and practiced good crop residue management by mulching into the surface of the soil a heavy tonage of wheat straw the previous year. By using the same practice on two other fields, Mr. Carlson grew over 3,000 pounds of combine maize per acre in 1948. Both years were below average in rainfall, but the land was in condition to best utilize the rain which did fall. Mr. Carlson estimates that good residue management accounted for at least forty per cent of his increased yields. The neighborhood averaged producing approximately 2,000 pounds of maize per acre.

In carrying out his conservation plan, Mr. Carlson planned and has applied 414 acres of contour farming. He has planted a considerable acreage to Madrid sweet clover and vetch. The clover also furnished excellent grazing. Four hundred and fifteen acres have had good residue management. Mr. Carlson mulches the sorghum and small grain residue into the surface soil where it acts as a cushion against raindrops. Nine acres have been seeded to native perennial grasses. Fourteen miles of terraces out of sixteen miles planned have been constructed. A farm pond has also been built. Mr. Carlson is planning on giving season long deferment to 166 acres of grassland this year to improve it. He has leased another place in order to do this.

Although he had a big job ahead of him when he started a few years ago, through persistent effort Mr. Carlson has almost completed his planned program, which he made with the assistance of the District.

The vice chairman of the District is John R. Watson, Sr. of the Paint Creek community in the Haskell County portion of the District. Mr. Watson took office in October 1944. He owns 410 acres in two farms and has completed his planned conservation program on both of them. Contour farming is being practiced on 258 acres. Mr. Watson uses

deferred and rotation grazing on 143 acres of grassland and has recently cleared mesquite on 40 acres. He plans on reseeded this cleared acreage with native grasses and K. R. bluestem which is a vigorous growing introduced grass. He has reseeded 3 acres of native pasture to sideoats grama and blue grama grasses. A one-way plow was used to "rough up" the soil ahead of seeding and a good stand of grass came up and has been maintained. Mr. Watson has planted a 4 acre field to K. R. bluestem, hoping to produce his own seed for reseeding his cleared pasture.

Almost thirteen miles of terraces have been constructed on his two farms and he has also built a pond for water supply. Mr. Watson "Practices what he preaches" and has served his zone of the district extremely well.

M. D. Crow of Sagerton is the Secretary of the Board and the latest member of the board. He took office in October 1948. He replaced J. F. McCulloch of Stamford in representing the zone of the district composed of the south west part of Haskell County. Mr. Crow farms 403 acres in two farms in his zone and developed a district conservation plan on his land in May of 1942. He has built 8 miles of terraces on 259 acres of cropland which he also farms on the contour. He uses stubble mulching as a crop rotation on a total of 321 acres of cropland. Mr. Crow has made trial plantings of legume crops including alfalfa and this year has 6 acres of blue panic grass planted and up to a stand. Through a system of deferred and rotation grazing he has many of the best mid-grasses in his bottomland pasture. A check this year revealed Canada wildrye, Texas bluegrass, Western wheatgrass, and Texas wintergrass knee high and in abundance. A farm pond which was constructed several years ago, completes his planned conservation work. There has been a great amount of conservation work planned and accomplished in Mr. Crow's zone of the district and the example he has played its part in getting it done.

The two remaining board members of the California Creek District are C. E. Lantrip of Anson, and M. S. Reynolds of Swedonia Community in Fisher County portion of the district.

Mr. Lantrip has served as supervisor since October 1943, taking the place of W. M. Wright who resigned. Mr. Lantrip was re-elected in October 1948. He developed a conservation plan with the district on his original place of 222 acres in March 1942. Another 100 acres were purchased in 1946 and added to the original acreage, making a total of 322 acres. Good crop residue management is being used on 268 acres of his cropland. A farm

pond has been constructed in his pasture and improvement is underway on his 48 acres of grassland. Good progress is being made on his terrace system. Mr. Lantrip has been active in encouraging the landowners in his zone to understand and use the district facilities in getting conservation problems solved.

Mr. Reynolds took office as supervisor in the western zone of the district in October 1947, replacing T. A. Willingham who had served the district from that zone from the time it was organized. District conservation plans were developed on 201 acres in 1944 and on 83 acres in 1947, making a total of 284 acres. Mr. Reynolds has taken an active part in creating interest among groups of landowners in his zone, and is helping to show what can be accomplished by applying a good conservation program on his own farms. He has been successful in making trial plantings of legumes, including vetch and Madrid clover. He uses these for soil improvement and as grazing crops as well, so that he can rest his pasture. Other practices in his coordinated conservation program are contour farming on 145 acres, crop residue management on 138 acres which includes re-seeding on 12 acres. One farm pond has been built and 4.8 miles of terraces have been built and are being maintained.

Since all of the authority in the district rests in the hands of the land owners, the supervisors, as the elected representatives of these owners, encourage all farmers and ranchers to take an active part in district work. Technical assistance as rendered by the Soil Conservation Service, can be received where neighborhood groups request it as a group. The supervisors are unanimous in expressing the belief that if all groups and agencies will work together under the district program, the most soil and water conservation will be the result.

DAVIS MOUNTAINS STATE PARK OFFERS RUGGED FRONTIER SCENERY

The Davis Mountains State Park represents some of the most rugged scenery in Texas, with mountains ranging in height from 4,500 to more than 8,000 feet above sea level.

The park is located five miles from historic Fort Davis on Texas Highway 118.

In this lofty setting stands a unique and picturesque park building called Indian Lodge and sometimes referred to as "mile high hotel." The lodge itself, the Davis Mountain peaks and the wild game make Indian Lodge a favorite of photographers, artists and nature lovers.

Antelope, deer, coyotes, bear and other wild game range the hills.

At the lodge a spacious lounge is available for parties and evenings and opens to an outside dining terrace. Meals are served in a brightly decorated dining room on the lower level.

Hiking, mountain climbing and horseback riding are popular sports.

A nearby attraction is McDonald Observatory, atop Mount Locke. Also nearby are the ruins of Old Fort Davis, established in 1854 by Secretary of War Jefferson Davis to protect pioneers from savage Apaches.

VISIT RELATIVES IN CLYDE

Mr. and Mrs. Hugh Watson and son Lynn, and Mrs. Lena Sadler, were week-end visitors in the home of Mr. and Mrs. I. N. Furrh, Jr., in Clyde.

RULE SCHOOL HEAD IS HASKELL VISITOR

J. B. Lawson, superintendent of public schools of Rule was a business visitor in Haskell earlier this week.

RETURNS FROM BRECKENRIDGE VISIT

Mrs. Hugh Watson, Jr., has returned from a week's visit in the home of her daughter, Mr. and Mrs. Cecil Blakely and family of Breckenridge.

Can Black-Draught Help an Upset Stomach?

Black-Draught may help an upset stomach if the only reason you have an upset stomach is because of constipation. Black-Draught, the friendly laxative, is usually prompt and thorough when taken as directed. It costs only a penny or less a dose. That's why it has been a best seller with four generations. If you are troubled with such symptoms as loss of appetite, headache, upset stomach, flatulence, physical fatigue, sleeplessness, mental haziness, bad breath—and if these symptoms are due only to constipation—then see what Black-Draught may do for you. Get a package today.

HEADIN' FOR THE HIGHWAY

It won't be long now before the highways and byways will be buzzing with a stream of vacation traffic. This glamorous blonde vacationer is setting off to an early start on her summer journey. She is wearing a versatile cotton redingote travel costume by designer Tina Leser, while her other vacation togs are carefully packed away for the trip in a cotton canvas Vala-Pak.

Rochester News

Robert King and family left Tuesday night for a 3-week vacation. He is a delegate to the National Rotary convention at New York. They plan to visit in Washington, D. C., Philadelphia and Canada, while on their trip.

Boyd Decker and family moved to Rochester last week. He has purchased the Elton Corley Cafe.

Bob Speck and family attended the graduating exercises at Baylor university, Waco, last week where Mrs. Speck's sister, Miss Marilyn Frazier, was a member of the class.

Alberta Canada visited her father, J. S. Walton, and family this week.

Pete Huntsman and family visited his father in Lubbock Sunday, who is critically ill.

Gayle Pope left for his new location at Brownfield last week after spending a 10-day vacation with his parents, Mr. and Mrs. Luther Pope.

Lee Holden and family of Tahoma, spent a few days here last week with friends and relatives.

Joe Ash and family of Tucuman, New Mexico, were guests in the home of Joe Ed Parson last week.

Mr. and Mrs. Ed Watkins spent a few days in Haskell last week with their children, Mr. and Mrs. S. A. Norris.

Mr. and Mrs. Dale Graham moved from Knox City to Rochester last week. They have purchased the Rochester Reporter from Mr. and Mrs. James A. Greer and will take charge about the 15th of June.

Mrs. Walter Herring and brother W. B. Greenwood, spent last week end in Eastland with relatives.

J. B. Wadzeck of Plainview was a guest in the home of his parents, Mr. and Mrs. C. W. Wadzeck, last week.

Mrs. John Lee left for her home in Brownfield Tuesday after a visit here with her husband's parents, Mr. and Mrs. J. W. Lee, and other relatives.

D. A. Corley and family of Pampa, spent last week end here with relatives.

Mr. and Mrs. Homer Bittick and Mrs. Thornton of Lubbock, were guests of his mother, Mrs. W. H. Bittick, the past week end.

Miss Adelaide Hicks and John Edwin of Dallas, were week end guests of their mother, Mrs. J. M. Hicks.

Mr. and Mrs. Robert Henry of Rule spent Sunday in the home of his sister, Mrs. H. L. Mathany.

Mrs. Will Mitchell of Munday, visited her parents, Mr. and Mrs. A. Hall, Sunday.

Mr. and Mrs. Mancel Bragg and family of Spout, spent last Sunday with his parents, Mr. and Mrs. J. W. Bragg.

Miss Nannie Wagner is visiting her sister in Dallas and purchasing merchandise for Moors Variety Store.

Black Indians Scalp Moguls 11 To 9

The Haskell Black Indians won a slugfest from the Munday Moguls Sunday afternoon. The Indians were leading the Moguls by five runs going into the 6th inning and the Moguls came from behind and had the Indians trailing by one run in the first of the 6th, but the Indians kept fighting back and went on to beat the Moguls by a score of 11 to 9.

The Indians will tangle with the Anson Tigers Sunday afternoon in that city. The Tigers nosed out the Indians here in a night game three weeks ago by a very close score of two and one. It was the only game the Indians lost this season.

Mr. and Mrs. H. L. McKibben and baby, Danny, of Shreveport, La., are visiting in the home of her parents, Mr. and Mrs. Calvin Henson. Mrs. McKibben is the former Elise Henson.

Mrs. Gaylon Head and Mrs. Roy Bond and children, Danny and Bobette, of Abilene, spent Thursday in Haskell with Mrs. Head's mother, Mrs. Geo. Moeller and sister, Mrs. Charley Redwine.

Retires From Army Air Force After 20 Years Of Service

BARKSDALE AIR FORCE BASE, La.—Chief Warrant Officer Hugh C. Ratliff, Personnel Officer and Assistant Adjutant of Headquarters Squadron, Air Training Command, has retired from active duty, finishing up his 20 years Air Force career under the command of the same officer who was his first "boss"—a Second Lieutenant—in the service two decades ago.

The "boss" is now Major General Robert W. Harper, Commanding General of Air Training Command. He was Assistant Adjutant of Brooks Air Force Base, San Antonio, when Private Ratliff was assigned to duty in his office in 1929.

In October of 1932, the 20th was transferred to Barksdale Air Force Base. Major Millard F. Harmon, later Lieutenant General Harmon, selected Mr. Ratliff as Post and Group Sergeant Major, beginning for him more than 10 years of total service at Barksdale. In 1935, with only six years of service to his credit, he became First Sergeant of the 79th Pursuit Squadron, the youngest First Sergeant in the Air Force at that time.

In 1939, he was transferred to the Panama Canal Zone, becoming Sergeant-Major of the 6th Bomber Command under Major General Edward B. Lyon. In May, 1942, he became a Warrant Officer, Junior Grade, serving at Sheppard Air Force Base, Texas.

As a Chief Warrant Officer, in 1945, he became National Administrative Officer for the Civil Air Patrol, with Air Training Command Headquarters and returned to Barksdale in February of 1946, when the Headquarters was transferred to this base from Fort Worth.

Mr. Ratliff entered the Air Force from Haskell. His wife, is the only daughter of Mrs. W. A. Kimbrough also from Haskell.

Mr. Ratliff and his family will make their home in Haskell.

Wallace Cox Jr., son of Mr. and Mrs. Wallace Cox, and a 1945 graduate of Haskell High School, was among the more than twelve hundred Cadets of Texas Agricultural and Mechanical College who received degrees at the Spring graduation exercises there on Friday.

Commissioned a Second Lieutenant in the United States Army Reserve Corps on Friday afternoon, he was awarded his B.S. degree in Business Administration at the Commencement exercises on Friday evening. Dr. D. M. Wiggins, president of Texas Tech College of Lubbock, delivered the Baccalaureate sermon with the final review of the Cadet Corps held on Saturday afternoon.

A lieutenant-colonel in the Cadet Corps, Cox was Bn. Commander of the 2nd Field Arty., a distinguished military student, and a member of the Ross Volunteers, a crack drill unit of the school.

Attending the graduation from Haskell were Mr. and Mrs. Cox, Ann Katherine Rike, Catherine Davis, and Mrs. S. A. Chambers of Abilene.

Clean Up—

(Continued from First Page)

W. A. Holt; Pct. 3, A. T. Ballard and Mrs. C. C. Middleton; and Pct. 4, R. R. Lusk and Mrs. Francis Blake.

Vigilance committees will inspect the progress of the drive during and after the week of June 20-25, with any unfavorable conditions being reported. The program will be given impetus with announcements in all Haskell churches on Sunday, June 20.

Service clubs of the city are cooperating, and all Haskell business establishments are being asked to close on Thursday afternoon, June 23, at 2 o'clock for the purpose of thoroughly cleaning the business section. Each store owner will be expected to thoroughly clean the alley of his business and the street in front. City trucks will begin their operations in the business section for the removal of trash early Friday morning. Local merchants have pledged their support to the program.

Friday evening at 6 o'clock the citizens of the community will gather at the City Park for a basket picnic. Each is to bring a basket lunch for the gathering which will be the first such meeting in Haskell for several years. It is expected to be a victorious community enterprise in Haskell's history.

In making the plans for the drive for a cleaner and more healthy community, city officials point out that the success of the campaign will depend upon the individual, and urge that everyone have their part.

Following the campaign, the city will be completely sprayed with DDT, and rigid sanitation ordinances are expected to be enforced. The entire community was fogged with DDT about ten days ago.

Other sanitation measures of the city include the draining of several small creeks and branches throughout the city.

Receives Degree From A&M College

Wallace Cox Jr., son of Mr. and Mrs. Wallace Cox, and a 1945 graduate of Haskell High School, was among the more than twelve hundred Cadets of Texas Agricultural and Mechanical College who received degrees at the Spring graduation exercises there on Friday.

Commissioned a Second Lieutenant in the United States Army Reserve Corps on Friday afternoon, he was awarded his B.S. degree in Business Administration at the Commencement exercises on Friday evening. Dr. D. M. Wiggins, president of Texas Tech College of Lubbock, delivered the Baccalaureate sermon with the final review of the Cadet Corps held on Saturday afternoon.

A lieutenant-colonel in the Cadet Corps, Cox was Bn. Commander of the 2nd Field Arty., a distinguished military student, and a member of the Ross Volunteers, a crack drill unit of the school.

Attending the graduation from Haskell were Mr. and Mrs. Cox, Ann Katherine Rike, Catherine Davis, and Mrs. S. A. Chambers of Abilene.

E. A. HOWARD, JR.

E. A. Howard, Jr., son of Mr. and Mrs. E. A. Howard, has been elected agriculture teacher of the Paint Creek Rural High School for the 1949-50 school term. E. A. the youngest of four sons, was a 1944 graduate of Haskell High School, and received his B. S. degree in Agriculture in May this year from Texas Tech College of Lubbock. Prior to entering Tech in 1945 he was engaged in farming with his father.

A good legume crop will return approximately 8,000 pounds of organic matter per acre.
