## Hospitals Discussed In Council Meeting

A called meeting of Muleshoe City Council was held Monday afternoon. Meeting with the Council was Joe W. Smith, manager of the Lubbock branch office of First Southwest Company of Dallas.

Smith is a financial advisor for cities.

Others attending were Mayor W. B. LeVeque, Albert Field, city manager and councilmen, Alex Williams, Irvin St. Clair, Woodrow Lambert, Lindal Murray, City Engineer Ralph Douglas and Derrell Oliver, manager of the Chamber of Commerce.

The major topic of discussion was concerning hospitals. Smith has worked with many other cities, the largest and most complex situation was the recent purchase of Nichols Clinic and Hospital and Plainview Hospital, and the construction beginning on an all-new hospital which is to meet all needed requirements.

To name a few of the many cities with whom Smith has assisted with the hospital districts and authority are Floydada, Memphis, Shamrock, Tahoka and Matador.

During the past four years, Muleshoe has gone from eight doctors to four, with one of those planning to leave in the near future.

The financial advisor explained how other cities had constructed new hospitals, used the good equipment from those being closed and added the needed equipment for a standard hospital for their city.

Medicare and Medicaid are two of the things blamed for the hospitals over the county not being able to 'make ends meet' it was pointed out.

Patients who are hospitalized under medicare must be hospitalized in a hospital which has been approved, meeting certain specifications of the government.

Should a public hospital be constructed, all doctors (M.D.) would have use of the facility.

The financial expert said a small hospital needed 75 to 80 percent occupancy in order to meet financial obligations and any profit.

"A good hospital automatically attracts good doctors," Smith said.

Discussion was also held concerning the comprehensive plan for improvement of the city of Muleshoe and Councilman St. Clair made a motion that the council proceed with the Capital Improvements program for 1968-72 with revisions and amount to be determined at a later date and proceed with the water Capital Improvement plan under the Water Revenue Bond for 1968-72 with revisions and amounts

## History Book of Bailey County to be Published

History has been made. It has been made by those men and women who spearheaded a westward movement many years ago . . . by those who stayed and developed this country by laying the ground work, way back when . . . now a dedicated effort is being made to preserve these golden memories during this year which is the Golden Anniversary of Bailey County.

Plans are underway by Muleshoe Publishing Company to print a special hardback edition to contain as much of the history of this county and its pioneers as possible.

Some 350 letters and questionnaires have been mailed to known pioneers and their descendants requesting information concerning the early-day struggle to eke out a living in this new, raw land which is now known as Bailey County.

This book will insure the remembrance of some important early settlers and treasured memories of life here which would first be forgotten after those first inhabitants were long deceased.

It is designed to serve as a record for generations to come to gain knowledge of how the county in which they live was

established, and who established it.

Full well, we realize that early day pioneers are passing and once they and their descendants are gone . . . gone is the history of the county.

Therefore, in order to combine the picturesque memories of the past, the history of agriculture, ranching, industry, commerce, schools, landmarks and churches among other

## Deputy Buddy Black Resigns: Low Pay Given as Reason

C. A. (Buddy) Black, a Bailey County deputy sheriff for almost three years has resigned.

His resignation was effective May 1 and he has accepted a position with the firm of Wiedebush and Childers.

Black said "Low pay for law enforcement officers in Bailey County forced me to resign for financial betterment. I enjoyed law work and working with the fellow officers in Muleshoe, the County and area and had the pay been substantial, I could and would have remained in this field of work here in this county."

In comparing pay of other deputies in counties adjoining Bailey County, the pay scale runs from \$108.91 and \$155 above the amount paid in Bailey County for Sheriff's departments that have only two deputies as Bailey County does.

Five deputies plus an office deputy are employed in Lamb County, yet the deputy pay scale still remains \$70 above that being paid here.

Office deputy pay in the other counties stands above the Bailey County office deputy pay.

They take examinations for advancement and also receive longevity pay.

Prior to the resignation of Black, Sheriff Dee Clements met with the Commissioner's Council in an effort to obtain a raise for the deputies in two separate sessions.

During the first meeting which Sheriff Clements attended, a pay raise of \$45 was allotted to Deputy Bobby Henderson, which brought his monthly salary within \$25 of the lowest paid deputy in the surrounding area and lacks \$110 equaling that of the highest paid deputy.

State Highway Patrolmen work on a 45-hour week base, unless on emergency duty, while county officers are on duty or on call 24 hours a day.

While in training schools State Patrol trainees receive \$500 per month and starting pay after graduation is \$571.

In addition to keeping these stations going, the storage tanks full, Young kept a daily log of gallons of water used and was

### Veteran's Aid

Efforts of the Veterans Service Officer and the American Legion paid off last week to the tune of \$175 for a needy Enoch's family and another one for the same amount coming next month, according to Joe Vaughn, county Service Officer and acting adjutant for the American Legion.

The Enoch's family was suddenly left, all but destitute, when the father, Juan Sisneros, was hospitalized in Veteran's Hospital in Albuquerque for what doctors say will be a period of constant care ranging from one to two years.

The family consists of 10 children, the eldest is 16 years old, therefore the law forbids school age children working and the father of the family was the sole support.

State Welfare aid would have been at least three months in being approved and the family was living on what neighbors and friends took to them until Vaughn was asked to investigate the case and apply for temporary aid through this method.

The investigation was conducted by Vaughn, then sent in to the State Department for American Legion, then referred to the National office. The check was not long in arriving and clearance as aid was relatively quick in being approved.

The first check was delivered by Vaughn to the family last Friday and the second check, both for \$175, is to arrive at the first of the month of June. By that time, aid should arrive from the State Welfare.

Free lunches for the children at school have also been applied for.

"The \$175 will not be enough for the family to live on, however, it will be of great assistance to them," Vaughn said.

Bo Bryant, a former Muleshoe resident, was elected last Tuesday as president of the Dimmitt Lions Club for the coming year. He is succeeding J. R. Brown as Lion Boss.

Bryant, 30, has lived in Dimmitt for the past four years as manager of the Plainview Production Credit Association. He is also treasurer of the Chamber of Commerce and publicity chairman of the Castro County Recreation Center.

Tuesday night was a busy one for the dwellers in Bailey County jail, that is, until they gave up or gave out and went to bed. The inhabitants set mouse traps and had caught 29 mice when they decided it was a hopeless effort to catch them all. "We just went to bed," one prisoner said.

"We started out here with some small, inadequate lines," Young said. Bonds were voted for improvement in the Muleshoe water system in 1926, 1939, 1946, 1956 and 1960.

"We had trouble in earlier years keeping small lines in order until larger lines could be put in, but we managed," he said.

"There wasn't much here in the way of water works 26 years ago."

In January 1967, Young was cited in Plainview for his years of service with the Caprock Water and Sewage Association.

At a Plainview meeting, Young received a silver bowl from the association of which he had been a member since February, 1945 when the organization which serves a 100-mile radius with memberships composed of water superintendents throughout the area.

Many years ago, residents carried water from a central well located near the present depot . . . a far cry from the system that now serves the city

population. A majority of this network has been put down, either with Young's help or supervision.

In presenting him the watch as a token of appreciation, the mayor and councilmen commended him for "a job well done during his untiring years of service to the city."

Young will receive a monthly check under the city retirement plan.

## Chest X-Ray Unit

The Christmas Seal X-Ray Unit of the West Texas Tuberculosis Association will be in Muleshoe on Wednesday, May 22, under the auspices of the Lions, Rotary and Jaycee groups.

Everyone over the age of twelve years should take advantage of this facility. In the past months, the Unit has been responsible for locating case after case of possible tuberculosis, both active and inactive, as well as many other lung disorders.

Tuberculosis is not a thing of the past. It continues to be the most infectious of infectious diseases, causing more deaths than any other communicable disease.

The Unit helps to locate many other conditions, such as emphysema, a disease which causes the air sacs in the lungs to become greatly enlarged. The incidence of emphysema, along with chronic bronchitis,

has increased over 900 percent since 1960.

The major cause of these diseases is cigarette smoking. The U. S. Public Health Service estimates that cigarette smoking will be responsible for 300,000 deaths this year one every two minutes.

The Mobile X-Ray Unit helps to reveal chest disease in its early stages as well as diseases which are already well underway. When the Unit arrives in Muleshoe, every citizen should plan to have an X-Ray. The Unit will open at 9 a. m. to 1 p. m. and re-open at 1:30 and close at 6 p. m. and will be located at Crow Chevrolet on Main Street.

A token payment of \$1 is asked to pay for the cost of the film and the developing. The WTTA bears the expense of the reading and reporting to each individual, by mail, the results of his X-Ray film.

The serving table was laid with orchid linen covered with white lace cloth. The arrangement of orchid stock-pink and orchid lilacs amid greenery placed in a bow glass, was placed on the table. Silver and china appointments were used.

Coffee, homemade cupcakes and fruit were served by Lorraine Gallman. The fruit was decoratively placed on a stand dish centered with pineapple cubes, melon balls and this circled with fresh strawberries.

The bride's table and the gift table were covered with white linens. Lavena Davis helped with the opening of the gifts. Tish Watson wrote the name of each giver, alongside the items given, for the bride's scrapbook. Many gifts were sent by those unable to attend.

#### FROZEN FOODS

Shop carefully for high quality frozen foods. If you squeeze the packages of frozen vegetables gently and they crunch to your touch, it means there's icy frost. This indicates the package may have been defrosted and refrozen, says Extension foods and nutrition specialist at Texas A&M University. Quality can't survive that kind of treatment. If you open the package and find the vegetables discolored, you'll know that's exactly what happened.

What is Aurora Australis? Aurora Australis is the

brother of Aurora Borealis. And if you are not familiar with Aurora Borealis, it is a solar overcharge, so to speak, from the sun. The sun sends out millions of particles, electricity charged, and they stream into the earth's vicinity. They are deflected toward the poles and the light they create at the North Pole

is known as Aurora Borealis and that seen at the South Pole is Aurora Australis? As a weather omen the sight of Aurora Borealis or Aurora Australis is a good sign. It often means, if it can be seen brightly, that several days of good weather are due. Sailors have long read this sign in the sky.

## From Congressman BOB PRICE

The tax increase that we are now faced with is the direct result of excessive spending by this and the preceding Administration. The result has been a tremendous rise in the cost of living, the highest interest rates in 100 years, a crisis in our balance of payments, a growing threat that we might have to devalue the dollar and a general weakening of the American economy.

The cost of living is rising at an annual rate of almost four percent as wage increases in union settlements during the first quarter of 1968 averaged almost six percent and these increases are sure to be passed on in higher prices.

A leading banker said "a new form of brinkmanship is abroad in the land. Not for generations has the nation's political leadership exhibited so stunning a compulsion to catastrophe. For over two years the political powers that be have mumbled and stumbled into a chaos that has been accumulating steadily."

An Associated Press story on the nation's fiscal crisis was headed, "U. S. 'Pickpocket' Inflation Again Makes Off With Loot." "Inflation is not just an unwelcome guest but is the unofficial tax collector for the nation. It has been called unjust, ruthless, greedy, villainous, irrational -- and all these derogatory descriptions and more apply to it.

"It is also cowardly, for it picks on those who can do little about it, on elderly men and women and others on fixed incomes, for example, on people who can't get out and earn more to replace the money taken from them.

"Inflation is an insidious tax. It is tricky. Often it cannot be seen, for it disguises itself as prosperity. It would have you measure the economic engine, for example, by the heat it gives off rather than by the power it produces.

"To put it another way: you're just spinning your wheels. You're not moving ahead.

"This is not quite the case at the moment. Living costs are increasing, but so is buying power. Wages might be increasing for corporations but so are corporate profits. Still, much of what looks like improvement is just motion.

"People are making more money but their living standards cannot reflect this completely. A steady amount of the dollars they put in their pockets is fingered quickly and silently by the pickpocket.

"It really doesn't make much sense to raise wages only to see the increases wiped out by rising prices and so on. But what is utterly irrational about inflation is that it can be spotted and headed off - but usually isn't.

"There is also an aspect about taxes on the present economy that is sometimes hidden as effectively as the pickpocket's fingers. It involves the transfer of power involved in a tax increase.

"To impose taxes on the private economy would weaken it. At the same time it would make even more powerful the public economy, whose spending already is the cause of inflation."

### CONDITIONS FAVORABLE FOR BITTERWEED CONTROL

The poisonous bitterweed can be controlled by spraying infested areas with one pound per acre of 2,4-D low volatile ester. Application should be made, advises G. O. Hoffman, Extension range, brush and weed control specialist, when the plants are growing vigorously and in the bud stage and when the temperature is above 55 degrees F. Since soil moisture conditions are good over areas of Texas where the weed is most damaging, Hoffman believes spraying this spring will pay good dividends.

## Liquor Control Board Head for Showdown On Subterfuge Clubs

AUSTIN--Texas Liquor Control Board is heading for an early showdown test of its new get-tough policies on subterfuge private clubs.

In a surprise order, the Board outlawed cash sales in all bottle clubs.

Some club operators, who already were complaining mightily about an earlier LCB directive prohibiting manager-members from issuing guest cards to walk-in customers, were hard hit. One promptly filed a lawsuit here to enjoin the board's regulations.

Net result of the cash sale requirement will be to eliminate the casual guests, since operators wouldn't want to run the risk of granting total strangers a month's credit for a highly-perishable commodity.

Hotel-motel clubs who expect to solve the problem by putting club charges on room tabs may find the Board's definition of a cash sale quite restrictive; "It shall be deemed that a cash sale has been made if payment for a service or commodity is made on the same date or within eight hours after the occurrence of such service or the delivery of such commodity."

Clubs also received a long list of new instructions for keeping records and running their affairs according to by-laws and through boards of directors.

More rules are expected to be forthcoming from the LCB. Times may be hard for all but strictly private and proper clubs in the near future.

LCB Attorney Lynwood Elliott said he thinks the cash sale directive will restrict clubs: "I feel, quite frankly, that when you prohibit a club from making a cash sale it will be less inclined to serve the public at large and will start serving properly screened members."

Situation is expected to bring new pressure for liquor-by-

the-drink legalization. Club owners claim they are being made political footballs.

**RIOT CONTROL TRAINING**--All Department of Public Safety officers have undergone an intensive, accelerated riot control training program. Plans are drawn for maximum assistance to local authorities. State also is buying \$200,000 worth of anti-riot equipment for use of National and State Guards.

DPS reports it stands ready to make "major commitment" of personnel and equipment on request from a local law enforcement agency -- although hopes none will be necessary.

**COURTS SPEAK**---Supreme Court held taxable natural gas used as fuel for engines that pump oil.

In a variety of other opinions, High Court ruled as follows:

Lower courts were right in concluding that a Houston fireman was suspended improperly for buying two mink stoles and a color tv set (believed to be stolen) from another fireman. (Suspended fireman denied any knowledge of stolen goods.)

Women should be enjoined from operating an alleged house of prostitution near Brenham.

American Travelers Insur-

ance Company, Ltd., a Bahamas-based corporation, cannot do business in Texas without a state permit.

A Refugio County woman who granted a pipeline easement across her property in 1943 is still stuck with the deal for future extension of parallel lines.

Thirteenth Court of Civil Appeals supported a Nueces County trial court view that voter registration applications cannot be submitted en masse.

Third Court of Civil Appeals held that a firm must pay \$11,556 in sales taxes, plus interest and penalties, on the cost of transporting materials to job sites.

Same court also ordered a new trial in a landowners' suit against the city of Temple for damages due to inadequate drainage of property; found the movie "Blood and Black Lace" doesn't have to be labeled "not suitable for young persons;" and gave Austin's Texas State Bank a go-ahead to move its quarters from the University of Texas area to the downtown district despite objections of neighbor-to-be City National Bank.

**ATTORNEY GENERAL RULES**---Atty. Gen. Crawford C. Martin has held invalid an appropriations bill rider attempting to set up priority for restoring historical sites. This since the Parks and Wildlife Department is otherwise authorized to use its discretion in acquiring and rebuilding such sites.

In other new opinions, Martin held that:

Proceeds received by the Armory Board of the Texas National Guard in exchange for land near Camp Maxey must be deposited in the state treasury, and cannot be spent for purchase of land. However, other Board funds not in the treasury can be spent to buy land.

County clerk of Parker County may accept for filing a city subdivision plat of property in an area overlapped by extraterritorial jurisdiction of two cities in the county if approved by the largest city's planning commission.

Although dedicated for a 120-acre park in Colorado County, Hill Memorial Park Foundation is not exempt from ad valorem taxes.

**APPOINTMENTS**---State Liquor Control Board named Homer M. DeGlandon of Austin as its chief of staff services and Donald R. Fishel of Boerne its director of special investigations. New LCB district supervisors are Haskell H. Hall, transferred from Amarillo to San Antonio; T. L. Baker, transferred from Beaumont to Amarillo; Henry C. Knowles, transferred from Austin to Victoria; and Doyle E. Davis, transferred from Wichita Falls to Beaumont.

Bruce B. Conway of Houston is the new director of manpower and communications for the Texas Department of Mental Health and Mental Retardation.

## Obituary

### Joe Harlin

Funeral services were conducted at 2 p.m. Sunday in the Singleton Chapel of the Chimes in Muleshoe for Joe Kelly Harlin, 75, who died early Saturday in West Plains Hospital after a lengthy illness.

Rev. O. L. Turner, assistant pastor of the First Baptist Church in Sudan officiated and Rev. J. R. Manning, pastor assisted. Burial was in the Sudan Cemetery.

A retired farmer and rancher from Amity, Ore., he had lived in Sudan two years.

He is survived by five sons, a daughter, a sister, 20 grandchildren and four great-grandchildren.

Holders of upland cotton allotments in 940 U. S. counties will vote by mail May 13 through May 17 on whether to permit the transfer of cotton acreage allotments to other counties within their respective states in 1969.

Such transfers, by sale or lease, will be permitted from any county in which two-thirds of the growers voting favor them.

Of the 23 High Plains counties represented by Plains Cotton Growers, Inc. all will be voting except Deaf Smith and Yoakum counties where out-of-county transfers were approved in 1966 and 1967. Gaines county approved transfers in 1965 but the approval expires this year and growers there will be required to bring out a favorable vote again in 1968 if transfers are permitted in 1969.

Of the 1035 cotton producing counties in the U. S. 350 voted approval in 1965 and these too will be casting ballots again this year. In 1966 and 1967 an additional 95 counties approved transfers and these will not hold elections this year.

Texas had 60 counties that voted favorably on the issue in 1965 and an additional 29 in the two succeeding years. So the original 60 counties plus those not approving transfers in later referendums will have the opportunity to vote this year.

Concerning the referendum on the High Plains, Donald Johnson, Executive Vice President of PCG, said "I have not heard of any good reasons why growers in this area should not approve transfers across county lines. The economics of the situation would prevent acres from leaving the area, while having the opportunity to sell or lease across county lines might well be of benefit to a few individuals without hurting anybody."

Ray Joe Riley, prominent farmer and cotton seed breeder, of Hart, will represent Plains Cotton Growers, Inc. May 14 and 15 at the Universal Cotton Standards Conference in

Memphis, Tenn.

More than 200 cotton officials and industry leaders from ten overseas nations and the United States will participate. The standards approved at this conference serve as a basis for trading American upland cotton throughout the world under terms of the Universal Cotton Standards Agreement first affected in 1923.

The Agreement calls for approval of "key" copies of the Universal Cotton Standards every three years. It has 13 signatory cotton associations located in Belgium, France, Germany, India, Italy, Japan, The Netherlands, Poland, Spain and the United Kingdom.

From the United States will be representatives from cotton shipper associations and cotton exchanges, cotton manufacturer associations and cotton producer and ginners associations.

Riley is a director and member of PCG's Executive and Research Committees. He will be representing the 23-county producer organization at the Conference for the third time.

Progress toward enactment of cotton legislation to succeed the current law is moving along satisfactorily, according to Donald A. Johnson, Executive Vice President of Plains Cotton Growers, Inc.

Hearings before the House Agriculture Committee were completed on May 2 and members are now in the process of digesting the testimony heard and hammering out details of a bill to bring before the full House.

Congressman Bob Poage of Waco, Chairman, has expressed the hope that a bill can be brought out of the Committee by the end of May and will work toward getting it onto the floor of the House at the earliest possible date.

Reasons legislation is being pushed this year boil down to two. First, farmers in general and especially wheat farmers who will plant the 1970 crop in 1969 need to know what to expect following this program if

they are to plan future operations with maximum efficiency.

Second, the make-up of the 1969 Administration and Congress is an unknown factor which might make passage of a farm bill even more difficult next year.

Regardless of how favorable the 1969 Congress might be to farm legislation the very earliest a bill could be passed next year would be September or October and it could very well be delayed until December or January of 1970.

That would mean wheat farmers would be planting their crops for 1970 harvest without a farm program. Provisions of the 1970 cotton program should be announced in the Fall of 1969, too, and this will be difficult at best and perhaps impossible unless Congress acts this year.

The big obstacle to enacting a bill this year of course is the preoccupation of legislators with Vietnam, racial unrest and other domestic problems. But farm congressmen and other spokesmen for agriculture are hopeful that a concentrated effort may at least get a bill through the House and

possibly through the Senate this year.

Virtually all testimony heard by both House and Senate Committees has been in favor of extending for at least four years the Agriculture Act of 1965. Some changes are being advocated from various sources but with a few exceptions no one appears willing to push for changes that would hinder passage of legislation this year.

Texas cotton producers, through the newly formed Texas Association of Cotton Producers Associations, will have constant representation in Washington as the situation develops.

J. B. Kirklun, Executive Vice President of Trans-Pecos Cotton Association, was in Washington for the week of April 28 and reported to the other five member-associations on House Committee hearings.

He was also on hand and working for the defeat of another of the repeated attempts to impose a limit on farm program benefits available to any individual farmer.

This most recent try came in the form of a proposed amendment to the appropri-

tions bill considered by the House on April 30. It would have imposed a \$10,000 limitation, but was defeated by a vote of something like 129 to 79.

Donald Johnson will spend the week of May 5 on the Washington scene. Bob Heard, Executive Officer of the South Texas Cotton and Grain Association, will be on duty the week of May 12, and Charles Bragg, Executive Vice President of the Rolling Plains Cotton Growers Association will be "watchdog" the following week.

It is Chairman Poage's intention to report a farm bill out of his Committee by the end of this month, at which time TACPO and member-associations will reappraise the need for Washington activities.

### Outsiders Win Fourth Victory

The Muleshoe Outsiders baseball team racked up their third victory out of four games when they played the previously unbeaten Lubbock Texans here Sunday afternoon.

Winning pitcher was Eugene Shaw in the game played at Babe Ruth League Park, where the score tally was 10 for Muleshoe and 7 for the Texans. The game settled from the first inning to a lagging stage, then broke loose in the fifth inning with both teams continuing to score until it ended.

Present batting averages for Muleshoe players are: Kenny Heathington 3.33; John Agee, 2.50; Sam Gonzales, 6.66; Joe Bara, 4.00; Jose Triana, 2.90; Keith Griffin, 2.00; Bobby Burge, 5.00; Larry Calvert, 7.25; Doyle Meadows, 3.75; Charles Green, 2.50; Robert Gallegos, 5.00; Eugene Shaw, 3.33; Partino Rojas, 2.25; Jerry Mick and Prospect Aguilar, 0 for Mick twice at bat and Aguilar at bat once.

### Teams Place In Competition

South Plains 4-H'ers in 16 of the 20 counties in Extension District 2 May 4 qualified to compete in the State 4-H Round-up by taking top prizes at the district contests held at Texas Tech.

To qualify for the state competition, a team or individual must win either first or second place in the senior division which is for 14-year-olds and older.

Floyd, Lubbock, Lamb, Lynn, Scurry and Swisher Counties each came up with two qualifying wins.

In the Farm and Ranch Management Demonstration Team, John and Lyla Pitts of the Pleasant Valley 4-H Community Club placed second; and in the Rifle Contest Pleasant Valley 4-H Club members Bobby, Fred and Jack Allison and Collin Platt were first place winners.

These Lamb County 4-H'ers will attend State 4-H Roundup at College Station June 5-6.

"You can hear them out there at night," said Private First Class Jimmy Reed, 20, of Chicago. "You can hear them fumbling around and they make this hiccup-like sound. Sometimes you wonder whether it's an ape out there or a North Vietnamese soldier."

"Maybe it's the smell of the food from the C-rations cans that brings them around," added Reed.

"Could be that the area here is their old stomping grounds and they want to kick us out," reasoned Faulkner.

"It's probably curiosity more than anything else," said Corporal John Kennedy, 22, of Detroit, a right guard.

Whatever the reason, the ape that got himself hung up on the barbed wire isn't expected to come back, even though some of his buddies may.

The Masai warrior tribe of equatorial Africa has a new member - a U. S. Marine serving in Vietnam with Force Logistic Support Group - Alpha.

Sergeant L. L. Slot, Grand Rapids, Mich., extended his tour of duty in Vietnam for six months and took advantage of the Marine Corps' free leave policy to visit Africa.

After visits to such places as Dakar, Monrovia, Ghana, and Kenya, Slot highlighted his travels with a two-week stay with a fierce tribe of Masai warriors near Namanga, Kenya.

Wearing only a loose-fitting red cloth and carrying a spear, the sergeant lived in a Masai village and was made a member of the tribe.

"I had a pack of cigarettes that I gave to the chief. This gesture seemed to impress him and he made sure that I was made one of the boys," Slot recalled.

Remembering the many unfamiliar customs, including blood drinking, Slot explained, "The Masai have many seemingly strange traditions, but to really understand the people

## Heathington Hits Homer

Don Heathington became a home-run hero, at least for now in a Babe Ruth League game between the Dusters and Lazbuddie Monday night.

In the third inning of play, with a score of 4-2, and having trailed Lazbuddie in the first and second inning, Heathington hit a long homer over left center field fence for the first home run of the 1968 baseball season.

Final score in the high tally game was Dusters 24, and Lazbuddie 23.

Tuesday night in Babe Ruth, Chuck Clemmons was credited with being the winning pitcher against the Colts when they were able to score only one time, early in the game. In the first inning, Ronnie Meason scored on an error for the only time that the Colts went on the scoreboard with a run.

Ricky Faver did not fare quite so well as he was credited with being losing pitcher when he met up with the Cats, who are showing much power and

coordination in this early part of the baseball season. The Cats made 19 runs to take their second win from the Colts thusfar. On May 3, they defeated the Colts, 3-2.

## Vietnam News

Curiosity killed the cat, they say, and it probably gave a rock ape a few hair-raising moments.

The ape, described as being five-feet tall, broad-shouldered and extremely hairy, ventured down out of the mountains to take a peek at the new Ca Lu combat base east of Khe Sanh. It was late when the ape ventured down - about 2:30 a.m. Illumination flares were going off around the perimeter while mortar and artillery rounds were whistling into the darkness. The whole scene,

quite understandably, was probably a confusing spectacle for a curious rock ape just down from the woods to take a peek at what was going on.

With so many things to see, it's easy to get fouled up - and that's exactly what happened. The unfortunate rock ape became tangled up in the barbed wire fencing around the defense perimeter which the Leathernecks of the 1st Marine Regiment guard.

"He was screaming like a son of a gun," explained Private First Class Lloyd Faulkner, 20, of Charles City, Iowa. "He was hung up there for about 15 minutes, then he untangled himself and high tailed it back into the bushes."

**"Before Your Very Eyes"**

Suing a soap company for damages, a housewife charged that a certain shampoo had caused her hair to fall out. During the trial, the company offered to have a model use the shampoo in front of the jury—to demonstrate, "before your very eyes," that her hair would not fall out. But the court rejected this experiment. The judge pointed out that, since the housewife's hair allegedly fell out over a period of months, it wouldn't help to see whether the model's hair would fall out in a period of minutes. Experiments in the courtroom can be mighty persuasive. But, pre-

cisely for that reason, the law is concerned to keep them within fair limits. An experiment won't be allowed if it is not similar enough to the original situation to justify comparison. The shampoo case illustrates the point. And in another case, a court held that the reaction of a drug on an ailing old woman could not be shown by demonstrating its reaction on a healthy young man. On the other hand, the experiment need not be identical in every detail. For example: A woman shopper, who had slipped on the floor of a market, wanted to demonstrate for the jury the slipperiness of a cleanser that had been used on the floor. The market protested that her test sample came from a different batch of cleanser. But the court decided the experiment should be allowed. The judge said that, since it was the same product, from the same manufacturer, there was enough similarity to justify making the test. Of course there is always the risk that an experiment, even though permitted, may boomerang and prove the wrong thing. In one case a woman sued a railroad for losing her trunk. She sought payment not only for the trunk itself but also for a great many articles of clothing which, she claimed, had been in it. On the day of the trial, the railroad's lawyer brought into court a trunk of exactly the same size—and a duplicate of each and every item the woman had listed. "Now, madam," he said with a bow, "kindly show the jury how you were able to get all these things into your trunk." With perfect aplomb the woman proceeded to fold, tuck and fit the items so neatly that she not only got everything in but had plenty of room left over. Result: she collected in full.
