SAN MARCOS.

SAN MARCOS, June 4, 1853.

News, Brown & Brady.

The prospects of our town are considerably brightened this morning; thirty-four improved town lots have been purchased by gentlemen of means and enterprise who will doubtless have many of them improved soon; and our worthy townsmen, A. Wilson, (who has been a pioneer settler in California, where by honest industry he accumulated a handsome fortune), purchased the whole of Dr. Merriam's interest in our town. It is extremely gratifying to all interested in the prospects of San Marcos to see the town property thus changing from the hands of non-residents into that of enterprising and energetic citizens. Four have been ascertained by some that the choice spots of our county would totally check the progress of improvements and the interchange of real estate; but this morning's purchase conclusively shows that Mr. Wilson, who now owns the most valuable property in and around town, is not to be frightened or defeated in his arrangements and calculations either by the threats or countenances of shuffling and over-reaching speculators. It is invariably the case that town property has to change from the hands of the pioneer settlers into that of more easy and wealthy persons before the town can attain any considerable growth and importance. The first settlers, exhausted their means in preparing and laying out the location; and then successors only build on their foundation. It is now demonstrably clear to the most limited and foreboding minds, that better days are soon to dawn on San Marcos. The idea that such facilities for manufacturing many of the important articles and staples consumed in the State; surrounded by such fertile and productive sections of country can remain long unimproved is utterly incompatible with the progress and spirit of the times.

All that is necessary to insure San Marcos becoming one of the most thriving and business inland towns in Western Texas, is that its unrivaled water-power fall into the hands of an experienced machinist, who will improve them; and judging from the situation which they are eliciting of late, the day is not far distant when Gies, Cotton, Factories, and first class Flouring-mills shall be in successful operation on them. There shall cotton enough raised within the distance of a day's drive of our town, this year, to keep a Gin running; and within a few years, within the same distance, enough to keep a Factory in constant operation. These are not wild and speculative conclusions; but the sober and rational results which will be the natural course of events. San Marcos is daily improving, notwithstanding the drawback of migration which yet to some extent overpowers the energies and embarrasses the calculations of its citizens. There are now three new buildings in course of erection, and the painter's brush is wonderfully renewing the appearance of the old; it entails a reasonable portion of the necessary goods still allotted to fall humbly before Physicians and one Lawyer; who in obedience to the divine injunction to "do unto others as we would have them do unto us," are encouraged and sustained; although the profits arising from their professional services are wholly insufficient to support them. Mrs. Taylor favorably known as a landlady throughout Western Texas, opened a house of entertainment here called the "San Marcos Hotel," about two months ago, which adds much to the interest and variety of our town, and also guarantees to travelers coming to San Marcos a good, pleasant and comfortable resting place. Do I must acknowledge that our spiritual wants are somewhat neglected, and only for our country and accommodating neighbors, Parson T. who presiding in his many other pressing duties, promises for us next month, we might in this respect consider ourselves totally neglected. Who is it that I do not consider my privilege to say. Perhaps the good shepherds to whom one these matters are entrusted are of opinion that the people of San Marcos cannot appreciate "sneep" privileges; & if so, they are mistaken. It is true that we cannot smile on, nor tolerate any thing like profligacy or ridiculous boasting; but we can participate in and appropriate and intelligently as any community in existence. Neither can San Marcos boast of the numerical prowess of its young ladies; but, nevertheless, in this respect it is exceedingly fortunate; the deficiency in number is made up in grace, and in beauty, elegance and good sense all abound, and compare favorably with the flowers of the soil. The young men with commendable discrimination straight seem fully conscious of their inestimable worth, and seem absorbed in the consideration of what are the best and most speedy means for placing themselves in situations which will enable them if possible to secure such compensation as cheer and encourage them through all the disappointments and difficulties, which are to some extent the common inheritance of all men. God speed them I say—what say you? And while in a sentimental mood I will say to the young ladies in general to be ever particular in their selections, though these offers may be many, lest their hearts of a sudden conceive the notion of trying their fortune in San Antonio. I perceive by a correspondence in a late number of the "Lodge" that there are ladies there of sterling sense and liberality who Roman like are not in danger of mistaking expediency for real modesty. If I was not engaged I would certainly move to San Antonio where I would be spared the tedious though pleasant task of consoling a fair one of how much it would add to her happiness to move with me to the State of Illinois.

ARGUS.  
The New York Medical Gazette states that twenty-nine suicides, five murders and two hundred and nine cases of insanity are directly traceable to spiritual manifestations.

At a recent meeting of the N. York Historical Society, Mr. Bartlett, of the Boundary Commission, read the following interesting paper on the "Mesilla Valley."

Some surprise has naturally been expressed by those who feel an interest in the movements of G. W. Lane in not finding the name of Mesilla on the maps of New Mexico, Texas, or the adjoining Mexican States. A brief history of this place may therefore possess an interest at this time.

Mesilla is the diminutive of the Spanish word mesa, table, i. e. table land, or plateau; and is applied to a lesser plateau in the valley of the Rio Grande, beneath that of the great mesa, plateau, or table land which extends for several hundred miles in all directions from the Rio Grande. It means therefore, little plateau, or little table land. It is situated on the western side of the Rio Grande, about fifty miles above El Paso, in latitude about 32 18 north; and until the year 1850 it was without an inhabitant.

Immediately preceding, and after the war with Mexico, the Mexican population occupying the eastern bank of the Rio Grande in Texas and New Mexico were greatly annoyed by the encroachments of the Americans, and by their determined efforts to dispossess them of their landed property. This was done by the latter either settling among them, or in some instances forcibly occupying their dwellings and cultivated spots. In most cases, however, it was done by putting "Texas head-rights" on their property. These head-rights were grants issued by the State of Texas, generally for 640 acres, or a mile square, though they sometimes covered very large tracts. They were issued to persons who had served in her wars, like our military land warrants, and to original settlers, which certificates or "head-rights" are still sought and sold in that State. The owner of them may locate his land where he pleases, either previously occupied, or in lawful possession of another.

With these land certificates or "head-rights," many Americans flocked to the valley of the Rio Grande, and located them in many instances on property, which, for a century, had been in the quiet possession of the descendants of the old Spanish colonists. The latter, to avoid litigation, and sometimes, standing in awe of their lives, abandoned their homes and sought a refuge on the Mexican side of the river. Dona Ana, a modern town on the eastern bank of the Rio Grande, 35 miles above El Paso, and near the "initial point," being a well located and desirable place, and moreover, selected by the United States for one of its military posts, became an attractive point among speculators, and was, in consequence, pounced upon by them and covered with "Texas head-rights" or land-warrants. Whether the Mexican occupants of the town and lands adjacent, were the lawful owners or not, it is needless to state; it is sufficient to say that they had long been in undisputed possession. They how became alarmed. Litigations commenced. Some applied to the United States of New Mexico, Texas or the United States for protection. Failing to obtain which, several hundred abandoned their property and homes, determined to seek an asylum within the territory of Mexico, preferring the very uncertain protection they could obtain there to remaining as citizens of the United States.

Which resolution, a spot was selected on the opposite or western side of the river, eight or ten miles below Dona Ana, which, it was believed, would be within the limits of Mexico. In the month of May, 1850, this persecuted people established themselves there, and named the place "La Mesilla," i. e. the little table. To increase the glory, the Government of Mexico offered to give lands to other actual settlers, who offered induced large numbers of dissatisfied Mexicans living in New Mexico, and in the small settlements along the Rio Grande, in Texas, to remove there. More than half the population of Dona Ana removed to Mesilla within a year.

FURTHER FROM MEXICO.

We have received papers from the city of Mexico to the 18th instant, bringing us news nine days later than we had yet received. The anticipated ministerial crisis has ended satisfactorily, and the ministers remain in office.

The Government has addressed a ministerial circular to the Governors of the different States, recommending the formation of a police to discover the Mexicans who dare pretend that the nation would be benefited by annotation to the United States. They will be tried before a Court Martial, and suffer the penalty inflicted upon traitors, and suffer the penalty inflicted upon traitors.

A decree prohibiting the circulation of foreign coins, was published on the 9th instant. The decree is followed by a notice that for the interest of the poorer class, the American coins will be received for their value, and exchanged for national coins, from and after the 12th inst. from nine till three, in the treasury of the ayuntamiento. This exchange applies only to small sums not exceeding one dollar.

The Government has annulled the contract passed under Lombardi's administration, for the letting out of the mines, the motive is said to be that the contract entered into by Lombardi would be very unfavorable to the nation.

Discord is still raging in Tamaulipas. The new authorities, appointed by General Wolk, began by repudiating the Government of Ciudad Victoria.

GONZALES MALE AND FEMALE ACADEMY.

We are glad to learn that this Institution, established in our town just two months to-day, has been entirely successful. It opened on the 4th day of last April, and with the energetic aid and perseverance of the President and Directors, seconded by the warm co-operation of the friends of Education in this and adjoining counties, has overcome every obstacle in the road to success, and the school is now in a most flourishing condition.

Between one hundred and ten scholars, about sixty of whom are females, are now receiving the benefits of an elegant and substantial education, and were the accommodations for boarding ample, double that number could be received, as it is the intention of the Managers to engage, and keep always on hand, competent teachers for every department.

Totally drawback to the completion of these plans and desires is a want of a Boarding House, which is absolutely necessary, for the comfort and convenience of the scholars, should be attached to the School, and we feel assured this will be but temporary.

Arrangements are now being made to erect a large and commodious Music Room, 18 by 30 feet. The building is to be of brick, and will be connected with the School. Mrs. Coleman, a highly accomplished and intelligent lady, has exclusive charge of the Music department, while Mrs. Hill, formerly of Seagrin, conducts the female department.

It should be borne in mind that this is an incorporated institution, under the general direction of gentlemen in whose intelligence and judgment implicit reliance may be placed. It is thus enabled to escape the fate of schools that dwindle to decay on the demise or absence of the Principal, as the Managers have power to fill vacancies, or make such changes as they may deem conducive to the welfare of the Institution, and the consequent benefit of the pupils confided to its charge.

"THE IMPERIAL MOTHER."—Can it be!

Can you look back into the depths of those clear, blue eyes, that saw yours in such confiding innocent trust, can you deck those dimpled lips, so "fearfully and wonderfully made?" can you watch with him the first faint streak of light, that shers in another happy day! can you point out to him the gold and purple sunset glory! can you look upward with him to the shining host of stars that bend their dawy eyes with grateful thanks, and never name "Our Father!"

When at dead of night you watch beside his sick couch; when you hush your every breath to listen to his pained moans; when every gust of wind makes your cheek grow pale; when you turn with trembling hand the healing drops; when every tick of the clock seems beating against your heart, when the little pallid face looks beseeching into yours, when you turn the suppliant eye, if you see not the "Great Physician?"

When you see the red colors lip and cheek; when the vacant chair is filled; when the little feet are again busy around your neck; come there from that woman's heart of thine no burst of grateful thanks to Him who notes even the sparrow's fall!

Suppose Death comes! You fold away the little useless robes; you turn with a filling eye from the toys and books and paths those little feet have trod; you feel ever the theshadowy clasp of a little hand in yours; you turn heart-sick from the happy mother, who number no missing lamb from their flock; a sunny ricket, a rosy cheek, or a piping voice, gives your heart a death-pang. You walk the busy street and turn your head involuntarily when a little strange voice calls "Mother?" Oh! where can you look for comfort, if you believe not that the "Great Shepherd" folds your lamb to His loving breast!

There is perilly at your household hearth! there are broken vows, which you may not breathe to human ear. There is treachery rapid for trust! Childhood looks on with a sad wonder; you must go backward and cast the mantle of evasion over the moral deformity. Whence shall strength come to your slender shoulders to bear this heavy cross! How silence the ready tempter's voice! Where shall all those warm affections now be gathered up? (if not in Heaven!)

Oh! you have no anchor! no rudder or compass! your little bark is adrift, at the mercy of every pitiless gale; the sea is dark and fearful; the billows mountain high; the sky black with darkness, if you turn from the Great Pilot!

FANNY FERN.  
SOURCES OF THE PACIFIC RAILROAD.—A correspondent of the Baltimore Sun, in a late letter to that journal, states that "the one hundred and fifty thousand dollars appropriated by Congress for the survey of routes for the Pacific Railroad, will be divided among four parties. That of Governor Stevens, of Washington Territory, will be the largest and best appointed. It will send out from St. Paul's, and thence to the mouth of the Columbia. The statement yesterday made, that it would be met by a party from the Pacific, at the South Pass, was an error. Lieut. Whipple, of the Topographical Engineers, will conduct the party, and will start from Vicksburg or Memphis during the present month. This will be met at Walker's Pass, in the Sierra Nevada, by another party under Lieut. Williamson, of the same corps, who will survey the portion of the line lying west of that mountain range. The third, or rather fourth expedition, will set out from Council Bluffs, or some other point intermediate between the routes severally taken by Gov. Stevens and Lieut. Whipple. It will be under command of Capt. Gannison, of the Topographical Engineers, and will explore the route through the mountains which Col. Fremont attempted with such a disastrous result in the year 1840 or '51. If Lieut. G. gets through the Jornada del Muerto, or Death Pass, in which so many of Fremont's men perished, in the Rocky Mountains, he will push on through the great basin and enter California through the gap in the Sierra, made by one of the branches of the Sacramento River. Of course, the small appropriation for this extended service will be insufficient, and at the opening of the next session, Congress will be called upon to foot the bill for incidental and deficiencies which will be necessarily incurred."

OUR TOWN.

A little more than twelve months ago the town of Gonzales numbered about four hundred inhabitants; now she numbers nearly a thousand. There were but few business houses that gave to the passer by even a respectable appearance, but since that time houses have sprung up as by magic spell. On the corner of nearly every square has been erected large and commodious store houses, all of which are filled with fine assortments of fancy and staple dry goods.

Mr. Darst has just completed two large two story houses, each 20 by 40 feet.—Messrs. Monroe have just moved into their new store, 20 by 75 feet. Mr. Collins is now erecting, and will soon have completed, a very handsome two story brick building, which will do honor to our town, and enable him to treat his friends and the traveling community generally, "in a hostile manner." Messrs. Pannel & Lovett have laid the foundation, and will soon have erected, a large two story house, in which they intend keeping a full and large supply of provisions. Many other improvements are going on in different parts of the town, and many beautiful cottages may be seen in every direction, reflecting credit upon their owners, and giving to our village a cheerful appearance. Among other improvements we must not omit to mention our Church and Academy, both of which would do credit to older countries. Our Church is large and spacious, above which is the Masonic Hall, reflecting much credit and honor to that ancient order. Our Academy is built of the best of stone, is 34 by 62 feet, two stories high, with a beautiful portico on either side supported by magnificent pillars. The Academy is furnished, perhaps, with the best set of Chemical and Astronomical apparatus in the State. Mr. Lillynier, the President, has just finished his course of lectures in which he gave general satisfaction to the community, and ample proof of his thorough knowledge of these two beautiful, interesting and useful sciences.—Gonzales Inquirer.

ONE ITEM IN THE GARDNER CASE.—In the trial of the Gardner case at Washington on the 27th ult., quite a sensation was produced by the exhibition of Senor Agrilar's bill at Willard's, amounting to \$2342 for eighteen days' board, including a very liberal allowance of the choicest liquors, all of which were paid by the Government.—This is the witness of whom it was proved that he had been offered \$15,000 to testify for the Government, and who afterwards proposed to sell himself to Gardner for \$20,000 and then for \$8,000. The interest in the case increases.

DEAF SMITH'S REMEDY FOR CONSUMPTION.—Of course every one at all conversant with Texas affairs must have heard of Deaf Smith, the celebrated spy. Smith, though not a doctor, had a remedy for consumption, which he believed almost infallible. This remedy was to live upon the slunk or pole cat, (the Memphis Americans). He learnt its use from the Indians, and strongly recommended it to those afflicted by pulmonary complaints.

THE ARCTIC EXPEDITION.—The second Arctic expedition in search of Sir John Franklin, will sail in a few days. The brig Advance, which belonged to the former expedition, has been selected, and put in thorough condition. She is lying at Burling slip, East River, and looks as well as she did prior to her first voyage to the Polar seas. Her rig has been altered from a brig to a brigantine. Her deck is made of a double thickness of plank, with felt between, and has a cork lining beneath, about seven inches in thickness. Outside she has three thicknesses of plank, and within she is fastened and timbered in the strongest manner. The Advance will be provided with a portable observatory, a very complete set of magnetical instruments, sent out from England by Col. Sabine, and a duplicate apparatus. There will be attached to the expedition an astronomer, an artist and a naturalist. All told, it will probably not comprise more than twenty-four persons. The Advance has five boats, two of which are willow baskets, covered with India rubber. The latter are very light and buoyant, and are intended to be used in connection with sledges, by parties engaged in service on the ice, after the further progress of the vessel shall have become obstructed. Dogs to draw the sledges, also the services of Esquimaux, are to be procured on the coast of Greenland, on the upward passage to Baffin's Bay. The Advance is not expected to be absent more than eighteen months, but will be provisioned for three years. The expedition will be under command of Dr. Kane, who was one of the former expedition.—N. Y. Express 18th.

A merchant of New York offers to bet \$50,000 or \$100,000, that the clipper ship Sovereign of the Seas, under the command of Captain Wilson, a Baltimorean, now master of the ship Andalusia, will out-sail any vessel in the world. The trial is to be made from New York to San Francisco, and the vessel to go in ballast or otherwise, as may be desired, and to sail within thirty days of each other, or together.

It is estimated that two thousand bales of cotton were received in Houston last week. Upwards of five hundred and fifty bales were received in one day. A large portion of this cotton was brought from the west side of the Brazos although the river has been navigable for several months.

LATER FROM THE MINES.

Mr. S. A. J. Haynie, and several other gentlemen of this city returned the early part of week from the exploration of the mining district above us. One of the gentlemen has been a year or two in California, and obtained a thorough knowledge of the mines of that country. These gentlemen report that those engaged in the mines above this city are finding gold, but in small quantities, yet from the discoveries already made, they think it likely that if proper exertions were made, rich mines may be found there. As yet no one has gone prepared to find the mines in a manner calculated to test their real value; they are poorly supplied with implements and the means of extracting the gold; there is no game in the country superior to that of the West. These gentlemen showed us one dollar worth of dust obtained from an operator who was using a hand-rocker, and obtaining about 50 cents worth of gold per day.—We also conversed with one Mr. Wilson, who has returned from the mines. He gives the same account as that given by Mr. Haynie, with this addition, that gold is to be found in minute quantities in any and every part of the country, and that it is not so difficult to find, but that no one has yet been prepared to make such examination as would test anything like certainly the true value of the mines. That there is gold there, he knows to be the fact, but whether it is sufficient to justify the expense of working, he cannot say, though he is of opinion the mines are rich.—Austin Gazette.

THE BIBLE.—The Bible contains three million, five hundred and sixty-six thousand, four hundred and eighty (3,566,480) letters, seven hundred and seventy-three thousand, six hundred and ninety-two (773,692) words, thirty-one thousand, one hundred and seventy-three (31,173) verses, one thousand, one hundred and eighty-nine (1,189) chapters, and sixty-six (66) books.

The word "AND" occurs forty-eight thousand, two hundred and twenty-seven (48,227) times, and the word "LORD" one thousand, eight hundred and fifty-five (1,855) times. The word "GOD" occurs over one million times, which is in the 11th Psalm. The word "MIDNIGHT" occurs in the 8th verse of the 19th Psalm. The 1st verse of the 7th chapter of Acts contains the 36th chapter of Acts.—The 16th chapter of 1st Kings and the 27th chapter of 2nd Kings. The 1st verse of the 6th verse of the 8th chapter of Esther.—The shortest verse is the 35th verse of the 11th chapter of St. John. The 13th 21st and 31st verses of the 10th Psalm are alike.—There are one hundred and thirty-five (135) words that are six syllables.—Wis. Banner.

To Read in the World.—If you would die in the world, you must not stop to kick at every one who harks at you as you pass along.

Kidney.—On the contrary, said Tom Loxton, I feel much obliged to you. It's a powerful medicine, and it's a powerful medicine. I've never seen one so good as this. It's a powerful medicine, and it's a powerful medicine. I've never seen one so good as this.

The following named gentlemen are candidates for the Governor of California at the next election: John Bigler, the present Governor, J. H. Ralston, Samuel Pugh, the present Lieutenant-Governor, Jesse Burdick, Paul K. Hays, Richard Roman, State Treasurer, J. P. Haven, J. W. Coltrath, B. F. Keens, John Walton, J. M. Estill, J. R. Mendenburgh, and A. C. Peasely.

A writer in the Baltimore Sun, who has been afflicted severely in his family by that appalling disease, locusts, or cholera, writes in the following manner: "Take honey in the comb, spread it out, and dilute with a little water, and wet the lips and mouth occasionally with it." It has never been known to fail in cases even when children had drooped so well as to be unable to swallow. It is certainly a simple, and may be a very efficacious cure.

JOHN HENRY BROWN, EDITOR.

INDIANOLA, TEXAS.

TUESDAY, JUNE 14, 1853.

TERMS OF THE BULLETIN.

Subscription of Dollars per annum, if paid in advance...

We are authorized to announce GEORGE T. WOOD as a candidate for Governor.

We are authorized to announce Gen. CHAMBERS as a candidate for Governor.

We are authorized to announce Maj. W. B. CURRY as a candidate to represent the Western District of Texas in the Congress of the United States.

We are authorized to announce Governor P. HANSBROUGH BELL, as a candidate to represent the Western District of Texas in the Congress of the United States.

We are authorized to announce the Hon. E. M. PEASE, late Senator from Brazos, as a candidate for Governor of this State.

We are authorized to announce JAMES T. LITTLE, Esq., as a candidate for the State Senate for the counties of Calhoun, Jackson, Lavaca, De Witt, Victoria and Goliad.

We are authorized to announce WILLIAM M. YARNALL, Esq., as a candidate to represent Calhoun and Jackson counties in the next Legislature.

We are authorized to announce FRANCIS M. WHITE, Esq., as a candidate to represent Calhoun and Jackson counties in the next House of Representatives.

At the invitation of many friends in La Vaca and other counties, Dr. N. CHAMBERS, of La Vaca county, has organized to be put in nomination as a candidate for a seat in the next Senate for the district composed of La Vaca, De Witt, Goliad, Calhoun, Victoria and Jackson.

At the invitation of many friends in La Vaca and other counties, Dr. N. CHAMBERS, of La Vaca county, has organized to be put in nomination as a candidate for a seat in the next Senate for the district composed of La Vaca, De Witt, Goliad, Calhoun, Victoria and Jackson.
