Two Days Rain Soaks Ground.

Fall General All Over Southwest Texas—Precipitation at Cotulla 1.36 Inches. September wet month.

A slow rain fell over this section of the state from Wednesday till Friday morning of this week. In some places the fall was heavy but from most points the news comes that the water just came down in a gentle way and soaked the ground. September has been a wet month. This is the third rainy spell since the first of the month and the aggregate rainfall totals 5.61.

All of this has fallen slowly, hence the ground is soaked as it has not been for a long time. Old timers say there has not been such a season in the ground since the winter of 1902-3.

Fall feed crops are whooping it and the range is green everywhere. Stockmen say there will be a great crop of weeds for winter and as the winter weed we have in this country has considerable fattening qualities, it is equivalent to grass.

COVEYS CHAPPEL.

Mrs. Stoken delivered an interesting lecture here Friday night in behalf of the Theological Seminary in Ft. Worth; amount of eighty five dollars was given to the seminary.

Those who attended the Baptist Association in Devine were: Mrs. F. S. Moffett, Misses Laura and Ruby Rumfield and Olivia Elkins.

Ralph Elkins and Chas. Mudd were San Antonio visitors Sunday.

Mr. and Mrs. J. H. Rumfield entertained the young folks with a social party Tuesday night in honor of their guests, Miss Rachel Burger and brother of Luling. Delicious refreshments of ice cream and cake were served at a late hour.

Jim Nicholson made a business trip to Pearsall the first of the week.

S. H. Ellis made a business trip to Navasota last week.

To Onion and Truck Growers.

I have made arrangements to handle onions, lettuce and truck in car loads the coming season. Will have a first class man to handle St. Louis territory with headquarters in St. Louis. We will do a strictly brokerage business; selling f. o. b. tracks when possible.

I will appreciate your business and would be glad to talk with you about handling your crop.

H. B. MILLER.

Those interested in the Mothers Club work are requested to meet at the Auditorium Friday Sept. 26 at 3:30 p. m.

Mrs. S. Cotulla, Pres.

For Sale—White Leghorn hens 50 cents each—E. W. Alderman, Cotulla, Texas.

NOTICE

My stock of groceries for sale, building for rent, also my residence for sale or rent, suitable for hotel, good location.—Chas. Harr, Millett, Texas.

Startling Story of Execution.

American Doctor Arrives at Border After Given One Hour to Leave Mexican Town by Constitutionalist General.

MARFA, Texas, September 25.—A startling tale of the execution of 270 Federal prisoners captured in the battle of San Antonio by the rebel leader Pancho Villa, was brought here today by Dr. C. E. Shackelford, an American physician, who has spent the past six years in Santa Rosalia, Chihuahua, Mexico.

Incidentally, Villa has not been captured and executed by Federalists as reported, but is at Santa Rosalia at the head of 2000 troops, Dr. Shackelford said.

Without assigning any reason, the physician said Villa offered him the alternative of leaving Mexico within 24 hours or being stood up and shot, first robbing him of everything but his clothing. The rebels took from him \$300,000 in notes, the property of the Bank of Manero. He was even forced to give up his surgical instruments and \$5000 worth of medicine, he declared even though he had been using it to treat the wounded in Villa's command. He made his way to the border at Presidio, Texas, with great difficulty.

Other refugees arriving here from the State of Chihuahua, without exception, reported conditions there deplorable.

Woodward Notes.

Woodward with prospects of

Echel Gardner, teacher of the Woodward school arrived Sunday, and is at the Woodward hotel.

M. B. Bargas after spending a few days here looking after his business has returned to his home in San Antonio.

Crockett Snyder of San Antonio is out here visiting Mr. and Mrs. J. H. McGehee on the Bonita Farms.

H. B. Smith of San Antonio was here for a few days last week.

R. T. Sawyer Sr. has leased his farm to J. J. Ferguson for the next year, and has gone back to Oklahoma.

D. J. Woodward was here a few days ago looking after his interest here and has made arrangements to put in three thousand acres of cotton next year, and several hundred acres of feed also.

Mat. Bargas, son of Mr. Bargas has left Woodward and has gone to San Antonio to attend college.

Friday Sept. 19, Tom Morley gave a party to a few of his friends in Woodward. Ice cream and cake was served; Music and games were played and all had a good time.

Last Friday evening Mr. and Mrs. A. C. Ferguson gave a farewell party to their friends, nearly all the Woodward folks attended and also did quite a few folks from Millett. An ice cream supper was served.

Mr. and Mrs. Newt Winters gave a party Saturday evening complimentary to Miss Lillie Talk who will leave for Runge in a few days.

Oscar Schellhans of Comfort Texas, has taken charge of the Woodward Mercantile Store.

M. D. Dorse, Ass't. Editor of the Divine News spent Sunday in Woodward.

Whole World is Interested In Great Panama Canal Exposition to be Held 1915

THE whole world is interested in the United States' great Panama Canal Exposition, the Panama-Pacific International Exposition, to be held in San Francisco in 1915. More than a year and a half before its opening the Exposition is assured as the greatest celebration in the history of the American people.

THE OFFICIAL EMBLEM OF THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915.

Thousands of visitors from all parts of the earth will attend the Exposition. Each one of the eight transcontinental railroads terminating upon the Pacific coast will issue low round trip rates. Undoubtedly hundreds of thousands of travelers will see Texas for the first time, and great numbers of them will take advantage of stopover privileges to see Texas either on their way to the Exposition or else upon the return trip.

From foreign lands will come multitudes to America for the first time. Twenty-seven of the world's great nations are preparing to make governmental displays, and from each foreign country delegates will attend to see the part their native land is taking at America's Panama exhibition.

The opening of the Panama canal marks a new epoch in the world's history. The building of trade routes, the opening of new fields of commercial expansion to the nations of the earth are anticipated in every financial center in the world. Many of the greatest manufacturers of the world will bring their wares and display them upon an elaborate scale at San Francisco.

The United States is shortening the sea voyage between the Pacific and Atlantic coasts by 8,000 miles. It is providing markets in South America for the products of hundreds of thousands of farms, ranches, factories and great industrial plants in the United States. It is opening up to the profitable commerce of the European nations the Pacific coasts of North and South America and is rendering possible direct commerce between the orient and the Atlantic coasts of North, South and Central America. Every state, territory and colonial possession of the United States will share in our increased national prosperity. Every country in the world will profit. The nations of the world are preparing to participate in the Exposition upon a vast scale.

The Panama-Pacific International Exposition will be unlike any great world's exposition ever held. In the first place, it will not commemorate a past achievement, but one that is making history today and which holds out almost unlimited possibilities for the future. As the Exposition will be educational, all exhibits will be shown in action wherever practicable. It is planned among other exhibits to present the greatest displays ever made of the processes of cotton manufacture. The most modern cotton gins ever shown will be exhibited. The heaviest exhibits in the world will unload directly on the Exposition grounds from the ferry slips and thence be carried by train into the exhibit palaces.

Of particular interest to the citizens of Texas will be the wonderful live stock displays. These will, it is now known, surpass any ever made at the greatest of world's expositions. They will indeed be comparable to a tremendous state fair at which are shown the most valuable prize winners from half a hundred states as well as from dozens of great foreign countries. Prize live stock from Holland, Belgium, England, the Argentine, China, France and other lands will be shown side by side with the greatest live stock animals of America. Texas, with its vast herds of range cattle and its thousands of head of high grade dairy stock, is in position to make a showing that will rival that of any part of the world.

The sum of \$175,000 has been appropriated by the exposition management for prizes and premiums in live stock, and \$225,000 has been set aside for harness racing. An unusual feature of the live stock exhibit is that the cattle will be on exhibition during the entire course of the Exposition from Feb. 20 to Dec. 4, 1915.

The Panama-Pacific International Exposition will represent an expenditure of many millions. According to a recent statement gathered from the comptroller of the Exposition, the total outlay for the big show on the day of its opening will be \$89,000,000, and this will not represent the enormous amount represented in the exhibits of the world. Some of the exhibits will represent outlays of \$250,000 to \$300,000.

The exhibit buildings will be grouped along San Francisco bay not far from the famous Golden Gate, the entrance to the superb harbor of San Francisco. Indeed, the buildings may be seen to best advantage by any one entering the Golden Gate. Even now a splendid idea of how the complete Exposition will appear at a distance may be gained from a view of some of the palaces now arising.

The tallest structure at Harbor View, the Exposition site, will be 426 feet. Around this will be grouped huge domes, minarets and towers, which from a distance of four or five miles

Copyright, 1913, by the Panama-Pacific International Exposition Co.

ONE OF THE FIGURES, FOURTEEN FEET IN HEIGHT, THAT WILL SURMOUNT THE COLONNADE ENCIRCLING THE COURT OF SUN AND STARS.

will seem like the great domes of Constantinople, only upon a far greater and more impressive scale.

The center of the Exposition grounds will be devoted to the huge exhibit palaces in which exhibits from all parts of the world will be displayed. There will be about fourteen exhibit palaces covering a hundred acres. A single building, Machinery hall, will be 367 feet long, 367 feet wide and 135 feet high. This gives an idea of the huge size of the structures.

To the west of the main exhibit buildings and immediately adjoining them will be the vast space reserved on the picturesque Presidio reservation for the great pavilions to be built by the foreign nations and by the different states. It seems certain that every state will be at the exposition, more than \$2,000,000 having already been set aside for state exhibits.

U. S. TO SUE FOR HUGE SEAL STEAL

GOVERNMENT WILL SEEK TO COLLECT \$10,000,000.

Charges Company Nearly Exterminated Herd on Pribilof Islands. Customs Frauds Alleged.

Washington, D. C., Sept. 23.—The United States government, through the department of justice, is preparing to bring suit to collect more than \$10,000,000 from Liebes & Co., San Francisco, Cal., the estate of D. O. Mills, the estate of former Senator Stephen B. Elkins, and others interested in the North American Commercial Company of San Francisco.

The charge will be illegal killing of seals and fraudulent customs declarations of the number of furs brought into this country for sale under concessions granted by the government to the commercial company to take fur from the seals of the Pribilof Islands, Alaska, under restrictions which sought to preserve the seal herd.

The Pribilof Islands are now under the direct management of the United States government.

Charge Loss of Millions.
It will be charged that during the life of the government concession to the commercial company between \$20,000,000 and \$30,000,000 worth of seals were taken illegally and sold in this country without returns to the government. In the taking of these furs, beside defrauding the government of revenues, the commercial company, it is claimed, nearly exterminated the seal herd on Pribilof Islands. Under present conditions the herds seem to be increasing in number.

Criminal charges against former government officials may follow the department of justice. It is claimed that inaccurate returns of the number of furs prevented the government from learning the number of seals killed as well as withheld the commercial company from the full government tax.

FOLLOW WIDOW FIND CRIME

Man's Body Revealed After Woman Is Seen Climbing Cliff.

New York, Sept. 23.—A woman, expensively dressed and wearing the weeds of a widow, was seen to climb the steep cliff above the Hudson river at Hastings, just north of Yonkers, at sunset, and after she had reached the summit it was found that her trail led directly to a murder.

At the bottom of the cliff those who had been the woman found the battered body of a murdered man, well dressed and hidden in weeds that had grown up about him. He lay on the head. The body had been there at least a month. Through the weeds was a trail indicating that since his death there had been there possibly once or twice a week.

Child Attacked by Mad Chicken.

Macon, Ga., Sept. 23.—A "mad" chicken, the first ever seen or heard of in Macon, was killed by Policeman T. R. Boland, after the fowl had savagely attacked his 10-year-old boy. It developed that the hen was bitten a week before by a rabid dog.

Many an eloquent sermon is wordless.

THE SAN ANTONIO LIGHT

GLEEVER ROGUE TO STAY BEHIND BARS

TRIES OLD GAME ONCE TOO OFTEN; GETS LONG TERM.

"Alibi" That Often Saved Sullivan in Illinois Fails to Help Him in Missouri.

Peoria, Ill., Sept. 23.—John Sullivan, alias O'Brien, who worked Bloomington and Peoria officers with stories of killings, train and store robberies and other lurid tales, there by gaining room and board in county jails while his stories were being investigated, played the game once too often and is now serving a twelve-year penitentiary sentence in Missouri.

Sullivan appeared here several years ago, and told the sheriff's force that he had pulled off a train robbery, and wished to give himself up. He knew every detail of the robbery, having studied the case through the newspapers, and Tazewell county officers were led to considerable trouble and expense before it was discovered that Sullivan was a fraud who merely wished to break into jail for the winter. He had previously worked the same game at Bloomington, claiming to have robbed several stores in the New England States, and incidentally stating that he had killed a man. The McLean county authorities looked up his case, but it was several months before Sullivan was discovered to be nothing but a clever faker, and in the meantime he had been eating at the expense of the county.

Sullivan made another appearance in Bloomington in January, 1913, under a different alias, but a detective recognized him, and before he could pull his familiar hoax he was "vagged" and given ninety days. He was released April 15, 1913.

In the meantime, while he was in the Bloomington jail, a robbery was committed at Hartsville, Mo. Sullivan wandered down to that vicinity some time afterward, and, thinking that he could play the role of the perpetrator of that job, and then prove an alibi by referring to the Bloomington jail records, he posed as having done the job. He was arrested and taken to Hartsville. About the time for the trial he confided to the sheriff that he was "putting one over" and could prove he was in the McLean county jail at the time the Hartsville robbery was committed.

I'LL BE ACQUITTED SAY GOV. SULZER

Silent Rumor That He Would Resign if Given Chance.

Albany, N. Y., Sept. 23.—"I am going to be acquitted," so declares Governor William Sulzer, whose impeachment trial is due to begin today, before the State Senate and the Court of Appeals.

The governor has refused to discuss the assertion of Assembly Leader Levy that an old friend of Sulzer had proposed that the impeachment trial be called off, providing the governor resigned. Levy is directing the Tammany organization's fight on Sulzer. The trial will be on charges of "high crimes and misdemeanors," the chief accusation being that Sulzer spent campaign contributions in Wall street speculation.

VITALIZED MINERAL ORE

A NEW DISCOVERY—THE GIFT OF LIFE—A MONUMENT OF HEALTH—A BOON TO THE SICK—A MINERAL SPRING AT YOUR DOOR.

An old miner digging away, day in and day out, year after year, in a dark, dreary and desolate mine in the bowels of John's Mountain in the State of Georgia accidentally discovered a mineral ore more valuable to him than the most dazzling, sparkling diamonds that ever glittered for it gave him health.

This man was cured of Rheumatism, Stomach, Kidney and Bladder troubles of 19 years' duration by drinking the water which came from the ore bed from which this great mineral is taken.

Here is the analysis of the ore made by the State Chemist of Georgia, Prof. E. F. White:

Carbonate of Iron	68.87
Carbonate of Calcium	43.53
Carbonate of Sodium	1.12
Carbonate of Lithium	1.26
Carbonate of Strontium	2.23
Carbonate of Magnesium	3.92
Sulphate of Magnesium	3.57
Sulphate of Sodium	1.36
Chloride of Sodium	2.29
Sulphate of Potassium	2.54
Sulphate of Aluminum	9.91
Sulphate of Silica	1.46
Sulphate of Iron	Trace
Organic matter	2.54

This wonderful ore has been tested and is now being prescribed by many leading physicians for the treatment of Rheumatism, Kidney and Bladder troubles, Female Weakness, Piles, Inflammation, Sore Eyes and many other diseases caused by impure blood. Write for testimonials.

A package containing one month's treatment by mail for one dollar.

LATTICED LEGS LATEST

Three Women Show Them and Police Disperse Crowds.

Pittsburg, Pa., Sept. 16.—Latticed legs, fashion's latest mandate, appeared on Fifth avenue and the three young women who displayed them caused such a sensation that two policemen had to disperse a crowd and assist the girls aboard a car.

The skirts were of various colors. They were slashed from the bottom to the knee, and the slash was crisscrossed with brilliantly hued ribbons of silk. The observer caught more than a vague hint of flesh-tinted hose of very light material beneath the lattice work of ribbon.

FALLS INTO BARREL OF PITCH.

Child is Pulled Out After an Hour's Work.

HOPKINSVILLE, Ky., Sept. 23.—Several barrels of pitch had been unloaded in a vacant lot, and Inez Moore, 12 years old, was playing on top of them. She did not notice that the head of one barrel was off and stepped into the sticky mass, which had been heated by the sun. She sank to her knees, and all efforts to extricate her failed for over an hour.

Finally she was worked out of the pitch, until her shoe laces could be cut and she could pull her feet out. The shoes were never recovered and a garden fork and ax were used in trying to chop her out; she also still firmly fastened in the pitch.

HID LOOT IN TWIN'S CAVE

Boy Bandits Use Rendezvous of "Tom Sawyer's Gang."

Hannibal, Mo., Sept. 23.—Using the Mark Twain cave, south of Hannibal, where "Tom Sawyer" and his "gang" had headquarters, as their rendezvous, and storing their plunder there, five Hannibal boys, ring-leaders of a gang of youths, confessed to a series of many robberies committed in and near Hannibal.

The youths have been operating in this city for over three years. Virgil Yates, Charles Imhoff, Dick Carroll, Everett Gillis and William Russell, all under 19, are under arrest. About \$4000 in plunder was found in the cave.

Uncover Loot of Thieves.

BOSTON, Mass., Sept. 16.—Jewelry, furs and other valuables to the amount of \$2000, proceeds of wholesale robberies in the various suburbs of Boston, were found buried under a barn in the Brighton district.

U. S. REFUGEES TRAPPED BY REBELS

Fear Many Have Been Seized in Flight from Mexico.

A NINE ENGINEER IS KILLED.

Americans Brought Home Tell of "Narrow Escapes and Many Outrages."

WASHINGTON, D. C., Sept. 23.—New reports of atrocities in Mexico and of increased danger for American refugees, are alarming the State Department.

News of the murder of Morris P. Root, an American mining engineer, was brought on the steamer Peru, which landed at San Francisco, Cal., which landed at San Francisco, Cal. 100 refugees from the Mexican west coast. Root was killed by a band of Mexicans near Tepic, while preparing to defend the El Tigre mines, of which he was superintendent.

Max Lambert, another American engineer, was brought in on the Peru, suffering from a fractured skull. He was beaten while defending his wife and child from the rebels.

Many American refugees have reached San Francisco, Cal., New Orleans, La., Galveston, Texas, and other ports. The auxiliary cruiser Buffalo has brought more than 100 refugees from Mexican ports to San Diego, Cal. The Americans say that conditions in western Mexico are beyond description. The country is overrun with bands of men, drenched with liquor, who commit unspeakable crimes.

American men, women and children are reported to have been seized by rebel bands. The Mexican government has knowledge of several cases in which American men are held prisoners by rebels, but its attitude is indifferent. Early this week it was feared here that as many as 100 Americans had been captured by rebels as they fled from the sea-ridden city of Torreon, but official advices have been received stating that these refugees reached Sattillo safely after an overland journey in carts.

The Americans who fled from Torreon are headed by Deputy Consul General J. C. Allen, of Monterey, who went to notify them of President Wilson's warning to leave the country. As a result of the recent siege of Torreon by rebel forces had fastened itself upon the city. Mexico has broken out in a number of cities in that section.

The United States Senate has unanimously agreed to the House resolution appropriating \$100,000 immediately for the relief and transportation of Americans from Mexico. Consular reports state that the flight from the war and disease ravaged country continues.

DYNAMITE FOR FARM USE

Dynamite can be put to so many uses on the farm. Plowing with dynamite is one of the many ways dynamite can be used. This does not do away with the plow; it simply goes down in the lower strata that a plow can never reach.

Ordinary plowing merely turns over the same old soil, year after year, and constant decrease in crops is only prevented by rotation or expensive fertilizing. Plowing with dynamite 8 inches from the top, but plant food elements in underlying soil are never touched by the plow.

If the subsoil were disturbed occasionally by dynamite blasts, much less fertilizing, year after year, would be required, because the blasting would make the land porous to absorb plenty water in rainy weather and this water, which is the principal plant food, in being drawn to the top by the roots of the plant as needed for its growth, would carry with it the soluble fertilizing elements.

Dynamite is a great help on the farm in getting rid of stumps, blowing up a stump with a little dynamite is such an easy thing to do and the expense involved is so insignificant when compared to the great benefit to the property that a land owner having once tried it is never satisfied until his farm is cleared altogether. The removal of stumps increases the value of the land by making it more workable and actually occupied and used. By exercising ordinary care, no fear need be felt as to the safety in handling or storing of the economy of blasting stumps.

Ditching with dynamite is fast being recognized as the only way to dig ditches. Ditches of the broad and shallow type, especially where the soil is very wet, can be made by blasting at much less cost than by digging and in a fraction of the time. This work can be done in soil so soft that working with ordinary ditching tools is very difficult or impossible. In fact, the wetter the soil the better and cheaper the results.

Blasting with dynamite is the remedy for the pond in the middle of your field that holds water long enough to burn up the crops in the rainy season and then gets so dry that it insures complete failure. A few charges of low grade dynamite, placed just below the hardpan, or well down into it, will so thoroughly break it up that the rains will sink to the porous soil below, saving the crops from burning by keeping the rain water for use during dry weather. In a small pond a single shot in the center will often do the work.

UNCLE SAM WOULD AID FARMERS WIFE

ASKS HER IF HE CAN BE OF ANY SERVICE.

Secretary of Agriculture Houston Sending Out 50,000 Letters.

"Answer Soon," Is Request.

WASHINGTON, D. C., Sept. 23.—If there is anything the farmer's wife wants and the United States department of Agriculture can give it to her, she will get it.

David S. Houston, secretary of Agriculture, is addressing a letter to the women members of 50,000 farm households throughout the United States, requesting them to give him information as to how the department can best serve the needs of farm women.

This letter is directed "To Housewives in Homes of the Official Crop Correspondents" and will be sent to the full list of crop correspondents for transmission to the women members of their families. With each letter is a return envelope in which the women can forward their suggestions.

Advice is "Talk It Over."

The women are invited to give individual answers to the letter or to discuss the matter in their church societies and other organizations and submit answers representing the combined opinions of the women of their communities.

The answers are requested not later than Nov. 15, and this date is set because it will give all women time after harvest to consider the matter and discuss it with their women neighbors.

This letter will go to about twenty leading farms in each of the 2800 counties of the United States. Their answers it is expected, will represent the views and opinions of upward of 500,000 farm women. These answers will be carefully considered by the specialists of the department.

OLD SOLDIERS CAMP IN HEART OF DIXIE

Nearly Twenty Thousand Veterans Meeting for First Time in the South.

Chattanooga, Tenn., Sept. 23.—Nearly twenty thousand old soldiers, veterans of the Union army in the Civil War, are in Chattanooga—this time on a peaceful invasion of the South. They are attending the forty-seventh national encampment of the Grand Army of the Republic, the first reunion of that organization ever held in Dixie.

Many of the survivors of the battle are in wonder at the transformation they see. Fifty years ago few of them would have noticed such a marvelous industrial growth for a section that was so prostrated by the ravages of war as Chattanooga was. In automobiles and electric cars the old soldiers are escorted up Signal Mountain, over which they toiled fifty years ago, and to the other historic spots close to the city, including the Chickamauga battlefield. Their minds are carried back to the thrilling charge on Missionary Ridge, stormed by the Northern troops without orders, and taken. Part of the field of Chickamauga is now occupied by a garrison of United States regular troops. Many thousand acres form a government reservation, the Chickamauga-Chattanooga National Military Park, on which there are 2000 memorials and monuments in memory of the troops who fought on the bloody ground. Beautiful winding roads give access to the points of interest throughout, following in as large degree as possible the roads of war time. Lookout Mountain and Missionary Ridge, in part, are included in the historic ground which now has governmental attention. A great road, on Missionary Ridge, affords one of the finest drives in the country, with a magnificent view of the entire valley, including the city and river.

Silent but eloquent testimony to the military operations around Chattanooga is found in the National Cemetery, where lie buried 13,000 soldiers under the sod of a beautiful rolling tract in the city itself, but within cannon shot of all the battles of the vicinity, and in a well ordered Confederate cemetery, where an attractive entrance and large monument mark the South's devotion to her heroes.

Chattanooga is in her gayest dress and true Southern hospitality is being extended to the army of visitors. The Chattanooga Encampment Association, in conjunction with the local chapters of the Daughters of the Confederacy and similar organizations, have seen to all arrangements for the housing of the veterans and visitors. Because of the limited hotel accommodations, the homes of citizens have been thrown open. Many prominent Confederate veterans are serving on the various committees.

Many special features for the entertainment of the veterans and visitors have been arranged, among them being the "Battle Above the Clouds" reproduced in fireworks on Lookout Mountain. On Signal Point, on Warden's Ridge, north of the city, used as a signal station by the Union Army in 1863, a large signal fire blazes forth every night.

Social and Religious

All social news or these columns should be sent to Mrs. C. B. Jones, Society Editor, Telephone No. 24

The Baptist Ladies were royally entertained Tuesday afternoon by Mrs. M. J. Swisher. There was a splendid showing of renewed interest in the work; there were 16 members in attendance.

Mrs. Coleman read the scripture lesson followed with prayer, by Mrs. Keeling.

The regular Bible Study was well conducted by Miss Dossia Shaw.

During the business session, it was decided to give 4th Tuesday to the study of Missions, and also to meet at the church every other Tuesday, thus having only two social meetings during the month.

During the social hour, Mrs. Swisher served fruit Sherbert, and angel food cake.

The next lesson will begin with the 8th chapter of 2nd Chronicles, and take through 7 chapters.

The Saturday afternoon Card Club were entertained last Saturday afternoon at the home of Miss Adele Wildenthal.

Only one member was absent, and a splendid time was had.

The beautiful selections of music rendered on the Octrola, between games, were much enjoyed.

At the close of the games, the hostess served a dainty and invitingly arranged salad course.

Miss Mae Sullivan was the visitor. The next meeting will be with Miss Binkley.

The Presbyterian Ladies had a very profitable and most enjoyable meeting with Mrs. J. H. Gallman Sr., last Thursday afternoon the 18th, inst.

Though quite a few members were on the sick list there were eleven members and three visitors present. The visitors were Misses Lucile Rogers, Dossia and Ophelia Shaw.

Mrs. J. H. Gallman conducted the devotions, also the business session; in the absence of both the president and Vice President.

The regular bible lesson which was a full review of the Book of Judges was ably conducted by Miss Jessie Copp.

The social hour in this hospitable home was very pleasant indeed.

The guests and hostess enjoying very much the sweet singing of Miss Jessie Copp and Miss Lucile Rogers.

Mesdames Gallman served a delicious luncheon of Jellied chicken, stuffed Olives, Pickles, cheese, crackers, ice tea, nabisco wafers, mints.

SILO DEMONSTRATION PLANT.

These Modern Agencies in Agriculture Will Compete at the Dallas Fair.

There will be assembled at the State Fair of Texas at Dallas, Oct. 18th to Nov. 2nd, some of the most powerful agencies and most able advocates of agriculture in modern times, but none will exceed the silo in importance to the farm. It will present some of the most convincing arguments and most forceful reasons in favor of diversification, livestock, cereals, milo maize, etc., that the farmers of Texas have ever heard.

The silo is the greatest economist of the age and it has made many valuable contributions to the prosperity of the farmer. It teaches thrift, enterprise and economy and is a most competent exponent of progressive agriculture. It has proved an educator of unusual ability and a most competent workman.

Its influence is uplifting and glides like an angel of mercy through fields where drouths and pestilence prevail, delivering products from blight and destruction, and its habitat is the rescue home of the delinquent crops. It is nature's most able assistant in maturing vegetation and is man's best friend. It will multiply the value of the crop after harvest, preserve and unite the food value of the plant and will turn waste into profit.

It will require the assistance of a silo or some kindred agency to make our cereal and forage crops equally as profitable as cotton raising. The soil and climate of Texas are naturally adapted to cotton, and the State as a whole can never hope to lead in cereals unless their value can be increased by artificial means on their journey from the harvest field to the market. The silo is a manufacturing plant built on the farm and enables the farmer to get the profits of both producer and manufacturer.

There will be on exhibition at the Dallas Fair Grounds every make of silo now in use and silo demonstration work will be one of the leading educational features of the Fair. The process is entertaining and the various types of silos will be on competitive trial where their good points can be readily determined by the farmers present. Twelve acres of sorghum raised on the Fair Grounds will be used in the demonstration work.

To What Extent Will Texas Figure in Big Exposition?

STATES ARE HUSTLING---EXHIBIT SPACE FREE.

Exhibit space is absolutely free to all exhibitors at the Panama-Pacific International Exposition in San Francisco in 1915. All the capital that is being put into the great Exposition and all the benefits to be derived from the millions of visitors who will view the exhibits are at the disposal of the exhibitor without any cost whatever to him, except the cost of transportation, installation and maintenance. Every state in the United States will be represented at the Exposition. In most of the states the legislatures have made direct appropriations for participation. In the few that have not done so commercial interests are co-operating to raise large sums in order to have their states represented. This is being done in Iowa, Oklahoma and other commonwealths which feel that as they bore a part of the expense of building the Panama canal their citizens should participate in the Exposition that is to celebrate the canal's completion.

What measure and to how great an extent is the state of Texas to benefit from the opening of the Panama canal?

Figures and statistics will not suffice to tell at this date, because, apart from the inevitable beneficial results which must accrue to all countries blessed with a coast line bordering one of the extremities of the new waterway, the ultimate good that Texas will reap from the canal will be culled from the action taken by Texas herself.

Upon cotton Texas builds her main hope. She is the greatest producer of that necessity in the world. Her exports are largely to the orient and to the west coast of South America, where are the greatest consumers of cotton cloth. The Panama canal will bring these customers of Texas nearer by several days' time and by leagues of distance, thereby creating a quicker and more expeditious supply to a demand that is continually increasing. The rich corn and the full crops of wheat, the multifarious fruits and the ever widening supply of cattle which Texas is producing year by year—these, in addition to its command of the cotton industry, are commodities for which the Lone Star State will find new markets upon the opening of the Panama canal. The demand will be brought into closer touch with the supply. But how is Texas to secure that demand to herself?

She must find the opportunity that

canal and understood the expression of that meaning in the Panama-Pacific International Exposition.

Many of the nations of Europe and China and Japan in the orient already have officially accepted the invitation of the president of the United States to take part in the United States celebration of the nation's grandest achievement. A more complete representation of the Latin-Americans in an Exposition has never before been made. Of the western countries which have realized that they will find markets at the Exposition are Bolivia, Chile, Costa Rica, Ecuador, Guatemala, Mexico, Nicaragua, Panama, Peru and Salvador. All of those countries will be at the Exposition, represented by exhibits of their resources, displayed in a manner that will impress and convince, assuring other countries of the world of their natural and industrial power.

Half the advantage of a good shop window is the manner in which the goods are set out. A well arranged store will always sell more than a store which is a jumble of effects thrown together in unmethodical profusion. America has determined that the universal department store of 1915 shall be the best looking store that has ever been opened to the world.

It is costing \$50,000,000 to complete California, chosen as manager of the store by national approval, has devoted \$17,500,000 in hard cash to the equipment of the Exposition, and her total investment, when the appropriations of the counties are considered, will exceed the magnificent sum of

\$20,000,000. So that the Panama-Pacific International Exposition is not going to be an ordinary exposition. It celebrates an event which is very much above the ordinary. The opening of the canal is an event of supreme significance. The Exposition which celebrates the completion of the canal will be of such an extraordinary kind that it will fittingly express that tremendous significance.

San Francisco is making ready for the reception of the nations of the world which will visit the great bazaar in 1915. She has begun to build. The site of the Exposition at Harbor View, San Francisco, where the waters of the bay of San Francisco narrow down to the channel of the Golden Gate, is now taking shape rapidly. Giant structures of truly massive grandeur are being erected.

In all there are fourteen palaces of exhibits to be erected by the Exposition Company in the middle section of the World's Fair. The other two sections are to be occupied on the west by pavilions of foreign nations, of which twenty-four have accepted the invitation to participate, and on the east by an aggregation of amusement concessions which are to be of the most novel and entertaining kind.

The fourteen main exhibit palaces will house the displays of eleven departments, which have been classified into 156 groups, subdivided into 500 classes. The departments consist of the following: Fine Arts, Education, Social Economy, Liberal Arts, Manufactures and Varied Industries, Machinery, Transportation, Agriculture, Live Stock, Horticulture and Mines and Metallurgy.

Texas will find its particular appeal in the palaces of Manufactures and Varied Industries, Agriculture, Live Stock, Horticulture and Mines. In those palaces will be found the competitors of Texas in the industries there represented. All the great cotton growing states will have their exhibits to show to the world, while the countries which want cotton to manufacture into cloth and textures will visit those displays and choose their markets.

The palaces in which the displays will be arranged are of an unprecedented beauty, set in a picture which no previous Exposition has had for its natural surroundings. California's climate permits of floral extravagance if there ever could be such a joy as a superfluity of charm. The Exposition will be a garden in which the efforts of man will stand among the results of nature's own working.

America is the hostess of the world in 1915, and she wants to see that her own household is properly represented at the international "at home." Not to be fully represented is to offer a slight to the guests who are going to be there in their best clothes.

Texas has much to show. She has much to smile for. She has much to give, but infinitely more to receive. And she receives with no outward what-ever.

ADMINISTRATOR'S NOTICE.

The State of Texas: To the Sheriff or any Constable of La Salle County, greeting:

J. T. Carr, administrator of the estate of W. P. Butler, deceased, having filed in our County court his final account of the condition of the estate of said W. P. Butler, deceased, together with an application to be discharged from said administration, you are hereby commanded, that by publication of this writ for twenty days in a newspaper regularly published in the county of La Salle you give due notice to all persons interested in the final account for final settlement of said estate, to file their objections thereto, if any they have, on or before the October term, 1913, of said County Court, commencing and to be holden at the Court House of said county, in the town of Cotulla on the 13th day of October, A. D. 1913, when said account and application will be considered by said Court.

Witness: G. H. Knaggs, Clerk of the County Court of La Salle county.

Given under my hand and seal of said court, at my office, in the town of Cotulla, Texas, this 10th day of September, A. D. 1913.

G. H. KNAGGS
Clerk County Court, La Salle County, Texas.
A true copy, I certify:
T. H. POOLE

.22 RIFLES

The Little Rifles—Big in Quality

YOU are going to buy a .22 calibre rifle, single shot or repeater—you'll find that many well known crack shots started with a Remington-UMC .22. Their advice now would be "By all means, get a Remington-UMC" because they know that there is a tendency in some quarters to look upon these models as only "a small boy's rifle" and to cheapen them so that they can be sold at a price.

You have just as much right to expect full shooting value in your .22 calibre arm as in your \$75 big game rifle.

You want the Remington-UMC single shot at from \$3 to \$6, 22, 25, 10 or 32 calibre, made by the same people who make the famous Remington-UMC Autoloading Rifles.

Or, if you prefer the repeating rifle, the Remington-UMC slide-action .22 repeater with its easy take-down and special safety features, shooting .22 short, .22 long or .22 long rifle cartridges, at \$10 and up, is your arm. Sold by live dealers in this community—the most popular small calibre rifles in America.

Remington Arms-Union Metallic Cartridge Co.
299 Broadway New York

"LIV-VER-LAX" FOR SICK HEADACHE.

It is Your Inactive Liver and Clogged Bowels. Liv-ver-Lax is the Panacea For all Liver Troubles and Constipation.

You are bilious, your thirty feet of bowels become clogged up, poisonous gasses are generated in the bowels and thrown out in the system, your head aches, you have chills and fever, you are nervous and ill tempered, your system is full of bile not properly passed off, your disordered stomach and biliousness cannot be regulated until you remove the cause.

It is not your stomach's fault. Your stomach is as good as any. Try Liv-ver-Lax, it is purely vegetable, do not resort to harsh physics and calomel which ruins the system and softens the bone. Liv-ver-Lax acts gently, yet positively on the liver, stomach and bowels, it is pleasant to take, and does not gripe or sicken. It is recommended for grown ups and babies alike.

You will be surprised at the amount of bile a bottle of Liv-ver-Lax will clean out of your system.

Buy a regular 50c or \$1.00 bottle from N. C. Windrow's and be convinced on our guarantee. Manufactured by Lebanon Co-Operative Medicine Co., Lebanon Tenn.

None genuine without the likeness and signature of L. K. Grisby.

Passengers on Thursday morning's train reported that a very heavy rain fell at Laredo Wednesday night. It was estimated at seven inches.

Somerset Oil Field

Are You Interested in Oil Speculations

If so, now is the time to buy lots in the SOMERSET OIL FIELD. With the present amount of oil that the one well is pumping would justify you in buying a lot at the present price, \$30.00. Others have made fortunes on small investments. WHY NOT YOU?

SEE OUR GUARANTEE

THE NASH OIL COMPANY has given a bond of \$5,000.00 to guarantee the sinking of this well, thereby assuring all that buy lots that this well will be put down to the depth of 1100 feet, providing oil is not found in paying quantities at less depth. We further give to all parties buying these lots an interest in the well to be put down. We also have four expert drillers who will look personally to the interest of drilling this well. Should they fail to get oil they will lose their entire time, so it is strictly an oil proposition.

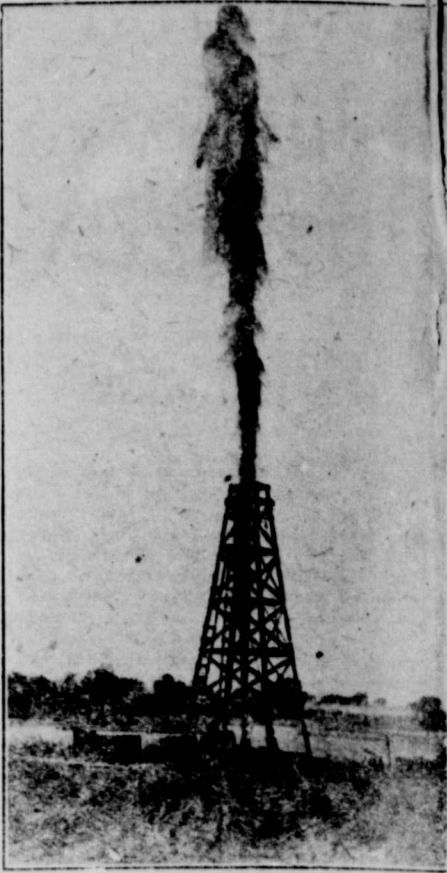

SEE OUR LOCATION

We join the SOMERSET OIL FIELD on the southwest, which has been pronounced to be the choicest located tract in the field. We are about 2000 feet from the well being sunk in the townsite. We have 24 acres divided into lots 25x50, with a 10-foot driveway. Should any of the several wells now being drilled come in, you could not buy one of these lots for several times what we are offering them for now.

WEIGH SUNSHINE AND MEASURES AIR

Charles F. Marvin Has Made Many Marvelous Inventions, for Which He Got Nothing.

WASHINGTON, D. C., Sept. 23.—What does a quart of sunshine weigh?
Nobody knows, you say? Oh, yes, Charles Frederick Marvin knows. He is the man who runs a tape measure over the wind and puts vapors on the scales and holds his thumb on the pulse of the earth. He is a quiet, kindly man who does little talking, and he is patient—even the pranks of Dame Nature do not make the chief of the government weather bureau frown.

Marvin wasn't even a name to the ninety million people of the United States until lately. Eight years ago German scientists recognized him as the greatest meteorologist in the world. Then he became the great-

begin calling him to tell their symptoms. But he kept in his back office until Secretary of Agriculture Houston accepted the resignation of Chief Willis Moore.

"Now," said Houston, "I must have a scientist. Doesn't any one know a nice scientist?"

So Houston wrote to members of the National Academy of Sciences, asking them to suggest a man for the place. He naturally expected them to nominate a member. Government employes are barred from membership in the academy but the academicians replied:

"Marvin is the man."

And when Houston asked "Who is Marvin?" they replied vaguely to the effect that:

"Why, Marvin—why—Marvin! That's all."

Marvin entered by the civil service route in 1884, being the first high grade man to take a civil service examination. Two years later he was chief of the instrument division. He had had a thorough training in mechanical science at Ohio State University. Incidentally, he was a genius. All the work of the bureau is done by instrument. Marvin invented or improved them all.

Between times he has written many books filled with interminable pages of figures. The average reader finds them wildly incomprehensible. The scientist keeps them on his shelves for reference. His tables of vapor pressure first reduced to mathematical formulas the processes which result in rain, hail or snow.

Twenty years ago Marvin did the first scientific kite flying. Then he invented a self-registering instrument—the Marvin meteorograph—which brought back every item of information about conditions in the upper air. Then the world became excited about kite flying.

"I will offer a prize for the best paper on kites," said Octave Chanute, a Chicago engineer.

"I have just concluded my monograph on that subject," said Marvin. "It is awaiting publication. Do you care to look at it?"

Chanute paid him the prize. Then he began to play with earthquakes. He invented the seismograph, the earthquake recorder which is in use wherever they use such things. He wrote a few large volumes about earth tremors. When not otherwise engaged he invented things for the government—not one of which ever profited him a penny of course.

Over and over he has been called a mechanical genius—it was only the other day that some one bought an invention that was fifteen years old and fifteen years forgotten—but he has never cared for money. He has preferred to stay in his office, doing the good, solid, substantial work that has made the weather bureau of the United States the first in efficiency on earth. He was born in Putnam, Ohio, is 52 years old, thorough-going and mentally honest and patient—patient patient.

What difference do a few years make to a man who works with the forces that make years?

But We Do Turn Out the BEST WORK

PREVENTING TYPHOID

(By Dr. Theo V. Hull, San Antonio, Texas.)

In all of the old text-books medicine is described as "the healing art." In the lay mind it is still "the healing art." But since the discoveries of Pasteur and their application to human maladies, a newer and more advanced idea permeates the work of the physician, and in a few years the practice of medicine will be spoken of as "the art of preventing disease." In this paper I wish to speak of certain methods of preventing typhoid fever.

There are two ways of doing this. The one is by destroying the germ and its carrier, and the other is by vaccinating or immunizing the individual against the disease. Ever since the specific germ was discovered, we have been trying to find some effective method of destroying it before it could find lodgment in a new host. Numerous disinfectants have been tried. Isolation of the patient, absolute cleanliness, destruction of flies, etc., etc., have been tried with some success. But, notwithstanding all our efforts, we still have an unwanted number of cases of typhoid fever each year.

The idea of vaccinating against typhoid fever is comparatively new, but all are familiar with the idea of vaccinating against smallpox. The discovery of the latter was purely accidental, and grew out of the observation of Jenner over a hundred years ago, that dairy workers were practically immune to smallpox, and this at a time when the disease killed practically ten per cent of the people, and an unspiced face was an exception to the rule. On the other hand, anti-typhoid vaccination has come about as the direct result of medical research. As soon as the typhoid bacillus was discovered thirty-two years ago by Eberth, the scientific world went to work to find some way to combat the disease in a rational way. The lesson learned from vaccination in smallpox was not forgotten. Neither was the additional lesson that those who had once suffered an attack and recovered rarely had a second attack, forgotten. It became evident that the body in some way protected itself against a second attack. When Jenner urged the use of cowpox virus as a preventative measure against smallpox in human beings, nobody had any idea what really took place to render the individual immune to the disease in the future, and in fact no one knew that a single disease was due to any specific organism. The mechanism of infection and defense of the body was entirely unknown. Now, thanks to medical research, we have a pretty clear idea of what actually takes place in both infection and defense. By infection we mean the process by which certain germs gain entrance into the body and produce disease. Many germs are ever present in the environment of human beings, and they gain entrance into the body in many ways, but chiefly with the air we breathe and the food we eat. Typhoid fever is largely due to the germs taken in with the food. Whenever the germ enters the body and finds the soil suitable it begins to multiply rapidly and exerts its harmful influence chiefly by mechanical irritation and the elaboration of specific poisons.

If the body is sufficiently strong or has recently suffered from a similar infection, the germs do not find a suitable soil, and therefore do not set up the disease. Whenever germs attack the body, if it be not overwhelmed at once, as sometimes happens in nearly all bacterial diseases, it begins to defend itself by the production of anti-bodies which are antagonistic to the germs or their poisons, or both. In the case of diphtheria the anti-body is a chemical antidote (antitoxin) to the specific poison, while in the case of typhoid fever the anti-body attacks and may destroy the germ itself. If the power of resistance is normal, the body defends itself successfully. The same thing usually happens when the body has suffered a previous attack because of the presence of anti-bodies.

As a result of experimentation it was found that in some diseases the germs could be so grown that when injected into a susceptible animal they would set up the same mechanism of defense in the body as the more virulent germs, without setting up the real disease. This is actually what takes place when we vaccinate against smallpox. In this case the germs by having passed through the cow (cow-pox) have lost their power to produce smallpox in the human being, but by arousing the same mechanism of defense, protect the person from future attacks. The same thing happens in anthrax—where living germs grown in the incubator under certain conditions were used to immunize sheep and other susceptible animals.

Further study and experimentation has shown that in some cases the dead germs injected into the body will produce the same mechanism of defense that the living germs do. This discovery has been taken advantage of in typhoid fever.

The development of anti-typhoid vaccination is quite interesting. It is only natural that the success attending vaccination in smallpox and the use of antitoxin in diphtheria should stimulate the search for a vaccine in typhoid fever. As this fever is found in all parts of the civilized world, the search began in many places. The attempt to produce an antitoxin as in diphtheria failed, and likewise an attempt to separate from the blood of animals that had recovered a specific substance that might destroy the germs, failed. It was found possible to immunize animals against typhoid infection by the systematic injection of graded doses of dead bacilli, followed by living bacilli. The first attempt to vaccinate human beings was made in 1896 by Pfeiffer and Kroll, who treated two persons with subcutaneous injections of dead typhoid bacilli. The result showed

that this could be done without danger to the individuals. Wright conducted similar experiments on officers and privates in the English army. The great prevalence of typhoid fever in the army made it very important to protect the soldiers in some way. The records show that in a period of four years, about 100,000 persons were treated under Wright's care. The result shows that anti-typhoid vaccination reduces both the number of cases of typhoid fever and the death rate among the inoculated. According to Wright's figures, there was a reduction of 50 per cent in the number of cases occurring and a similar decrease in the number of deaths among the cases that did occur. The result in the English army was so beneficial that it is now compulsory.

Anti-typhoid vaccination was recently introduced into our army and is now compulsory in all military reservations, except in persons over forty-five years of age, and those recently recovered from the disease. Typhoid fever is rapidly coming to be a source of terror in our army. Prophylactic vaccination in private practice has not been very generally used, but it is safe to say that in a very few years it will be very generally used to protect all susceptible persons. The vaccine and the method of its use are very simple. The vaccine is an emulsion of dead typhoid bacilli, each cubic centimeter containing 1000 million bacilli. The point usually selected for the injection is the subcutaneous tissue of the arm. Three injections are usually made at intervals of nine to fifteen days. The first injection is usually about one-half that of the two succeeding ones. So far, no deaths or permanent ill effects have been observed. In view of the great good resulting, this is remarkable.

Since typhoid fever is so prevalent in this country, the importance of anti-typhoid vaccination can hardly be overestimated. With this success attained, a long step has been taken towards making the practice of medicine what it should be—"the art of preventing disease."

ONLY SURVIVOR IS 72

"Curley the Crow," Half-Breed Sioux Scout, Caught General as He Fell Back Dead.

St. Louis, Mo., Sept. 23.—"Curley the Crow," the half-blood Sioux scout, now in his seventy-second year, is the only survivor of the Custer massacre. He says that famous painting "Custer's Last Stand," does not represent the scene truly, because it shows scalped and mutilated American soldiers on the field of battle at Little Big Horn, where, on June 24, 1876, Custer and practically all of his command perished.

"There was no scalping and no mutilation," says Curley. "Four hundred and seventy-three soldiers were killed, and not a mark was found on them that was not made by bullets.

"I was General Custer's scout and he had sent me for reinforcements the night before the battle. I was returning with Captain Bentline and his command. While I was still a long way off my horse was shot under me, and I got down and ran until I came into the thick of the fighting.

"As I got there I saw the soldiers were lying dead right and left. Those that had been surrounded by 6000 Sioux. I saw Custer fighting with his saber, and I thought he was the last man alive there, but I soon saw that his brother, Lieut. Tom Custer, was fighting beside him. He fell and General Custer stood alone.

"The Indians could have killed him easily before that, but the purpose was to take him alive. Fourteen Indians whom he had slashed and rashed with his saber lay near him, most of them dead or dying.

"I called to General Custer, meaning to tell him of Colonel Reno's refusal to come, and he said, 'You here, Curley? Well fight to the end.'

"Those were his last words. A big Sioux seized his arm and Custer turned on him and dealt a terrible saber stroke that half cut his head off. As he did this the son of the Sioux fired his rifle at Custer and the bullet went through his heart. I pushed through the toward Custer as he fell. I held his head as he sank back dead."

ALPINE DOGS SAVE AMERICANS.
Lead Monks to Rescue of Tourist Who Fell Into Ravine.
Geneva, Switzerland, Sept. 23.—Monks, guided by the barking of their St. Bernard dogs, rescued a young American, G. Dawson, from a precarious position in a ravine, into which he had fallen during an Alpine climb.

Dawson had attempted to cross a pass without a guide and fell into the ravine. He was not injured except for a badly sprained ankle and shock, but the ravine was off the usual travel route, and it is impossible to tell how long he might have remained there had not the dogs brought the monks to the rescue.

KNIFE GIVES HIM REASON BIGGEST U. S. WARSHIP
Vicious Murderer Completely Transformed by Removal of Piece of Fractured Skull.
TRENTON, N. J., Sept. 23.—Saved from seemingly certain death and his mentality restored, Janos Szikoly, who a few weeks ago was one of the most vicious convicts in the New Jersey State prison here, is today one of the institution's most ideal inmates. He has been completely transformed by the removal of a piece of bone that had been pressing upon his brain.

The man was received from Belvidere Oct. 11, 1911, to serve thirty years for murder. He showed signs of being irrational and an examination showed he was suffering from a fractured skull.

When the surgeons deemed the operation imperative to save his life, they removed a section of bone one and a half inches in diameter. An hour after the operation Szikoly recovered from the effects of the anesthetic, and, using good English, asked for a glass of milk. Prior to the operation he had spoken only in Hungarian.

INDICT THE MAN SPANKER
President of Indiana Baptist College Faces Charge of Assault and Battery.
Terre Haute, Ind., Sept. 23.—The grand jury, one of whose members was the Rev. C. H. Leason, has indicted the Rev. Dr. E. A. Hanley, president of the Indiana Baptist Col-

lege at Franklin, and formerly pastor of the Rockefeller church at Cleveland, for assault and battery. Dr. Hanley admitted he "switched" his father, Calvin Hanley, 63 years old, and issued two statements explaining that he did so because for thirty years his father was cruel to his mother. The grand jury heard the testimony of Dr. Hanley's brother, Oakley Hanley; Mrs. Calvin Hanley and the wife of Oakley Hanley, the only witnesses, and of Dr. Payne, who attended the father and found him badly injured.

San Antonio

TEXAS' LEADING EDUCATIONAL CENTER

This page of announcements shows that San Antonio is supremely endowed with schools and colleges. In any of the institutions enumerated your boy or girl will find a pleasing and cultured environment. Every care and influence is exercised conducive to correct, moral, mental and physical development. These are long established places of learning, from which many of our most prominent people have acquired the foundation of their success. Here Commercial, Musical, Literary and Classical education may be secured from eminently competent directors, where accommodations and healthful conditions offer many advantages over most "out-of-the-state" schools. Send your children to San Antonio schools, feel the comforting tranquility of their nearness; where you can closely watch their progress and keep within daily knowledge of their welfare.

ST. MARY'S HALL
Boarding and Day School for Girls
34th Year Will Open September 17th, 1913
Primary, Intermediate and College Courses, Music, Expression and Art.
A. M. Burroughs, Principal.

West Texas Military Academy
SAN ANTONIO, TEXAS
Prepares Boys for life as well as for Examinations. Affiliated with University of Texas. Class A by War Department. New \$100,000 fireproof building, steam heated and electric lighted throughout; Gymnasium, athletic field, resident army officer, small classes, individual instruction, strict discipline. Separate building for boys under twelve. For illustrated catalog address J. F. HOWARD, Principal.

OUR LADY OF THE LAKE COLLEGE, SAN ANTONIO, TEXAS
THE BEST
is not too good for your daughter. Location, Facilities, Course of Study, Position of Sisters of Divine Providence.

Address, SHAFER & DOWNNEY, Proprietors, 305-7-9 E. Houston St.

RICH; STARVED FAMILY
Lumbago and Rheumatism.
A quick relief from lumbago and rheumatism is had by the application of Hunt's Lightning Oil, the quick acting liniment. A friend writes, "We have been using Hunt's Lightning Oil for 13 years and deem it above all others."—Mrs. J. T. Nevels, Gordon, Texas, Route 2, Box 31.
25 and 50c bottle. All dealers.
Even a fast young man can't catch up with tomorrow.
There is nothing as impossible as some people.

MISSOURIAN Jailed When She Tells How She Was Forced to Work in Fields.
ST. LOUIS, Mo., Sept. 23.—Emaciated from hunger and overwork the wife of Frederick Idecker, a farmer reputed to be worth at least \$25,000, appeared at the office of the prosecuting attorney and told such a pathetic story that Idecker was immediately arrested. In an affidavit the farmer's wife declared that, though ill, she was compelled by her husband to work in the fields, and in the hottest part of the summer she was forced to earn all day. She charged that Idecker would permit her and the children to eat no food but bread and potatoes and refused to call a doctor when she was ill.
"I could not send the children to school, because he would not provide proper clothing for them," she said.
The Idecker home is surrounded by sixty acres of rich land, well stocked with cattle and horses. Idecker could find no one to go on his bail and a cash bond that he offered was rejected. He was put in jail to await trial.

LOCAL AND PERSONAL NOTES

W. N. Guinn went to Laredo one day first part of the week.

Miss Irene Henrichson of Artesia Wells, was in the city this week.

Mrs. A. D. Riddle has returned from her summer's visit to her old home in Nebraska.

When in need of Coffins, Caskets or Burial Robes, H. B. Stedham will appreciate a call.

Everett Coleman and George Russell left Saturday night for the A. & M. College.

We will close our entire line of Fay Ideal Stocks, 40 cent quality will go for 25 cents.

A. G. Salmon of Artesia Wells was here yesterday and reported a splendid rain over that part of the country.

Ed. Traylor, manager of the Cotulla Ice & power Company made a business trip to San Antonio during the week.

Claude Landrum returned to his home at Laredo Monday. He has been at the Lake Grove farm spending the summer.

Mrs. C. M. C. Brehmer of San Antonio, accompanied by her two children, were here this week on a visit to her brother, G. M. Soles, and family.

A cleaning sale on childrens hosiery will go on Tuesday next. An invoice line of boys, girls and childrens hosiery will go at a sacrifice. - K. Burwell.

Mrs. E. E. Daniel returned Monday from Laredo where she has been for the past three months visiting at the home of her daughter Mrs. Pearl Landrum.

Jack Baylor, Mrs. A. Burks, and Prof. R. A. Taylor went to Carrizo Springs last week in the former's car. Prof. Taylor returned Monday by rail. Mr. Baylor and Mrs. Burks returned Tuesday.

N. C. Windrow, is headquarters for LIV-VER-LAX. adv

Ray Keck has returned to take up his work at the State University.

Mr. and Mrs. J. T. Carr returned last night after a week's visit to their daughter, Mrs. D. N. Cushing in San Antonio.

The school board met last night and approved all vouchers of school teachers for the first month. The school has started off in good shape and indications point to a successful term.

Miss Lucile Rogers, daughter of United States Marshal J. H. Rogers, after spending a month here with her aunt, Miss Kate Burwell, left Wednesday for Pearsall where she will visit a week with Miss Mary Metcalfe.

Wanted—1000 cords of good mesquite wood, can use some of it green. Consumers Ice & Fuel Co., Laredo, Texas.

W. H. Robuck and family left this week for Stockdale to make their home. Mr. Robuck recently sold his cattle and ranch lease to J. W. Murray. He has said he was on a trade to lease another ranch in this section and if so expects to be in Cotulla often.

The Problem Solved

Billy Seldem

Two good rains in the last eight days makes lots of weeds and other green feed, also causes us truck growers to wonder what we will do with it.

Messrs Vick & Son have solved the problem and have taught us a valuable lesson. After gathering a heavy onion crop that was very expensive, they planted the land to Indian corn, then built a silo and when the corn was at the proper stage cut it, 150 tons, and put it in the silo. It was soon sold for a good price and will be fed to cattle on the farm, the buyer taking it out of the silo. They immediately planted the field back to Indian corn which is now waist high and with more than fifty days till we expect frost, they will duplicate the first crop and it will be necessary for them to build another silo to hold the growing crop.

It does not take much pencil work to satisfy us that this corn crop is going to bring them over \$50 an acre and are good for another crop just as good, and both crops will be made with less work than it took to make one crop of onions.

La Salle county ships hundreds of car loads of cattle that go to other countries to be fattened.

Here is the truck growers opportunity to make more off his land than he ever dreamed of with less work.

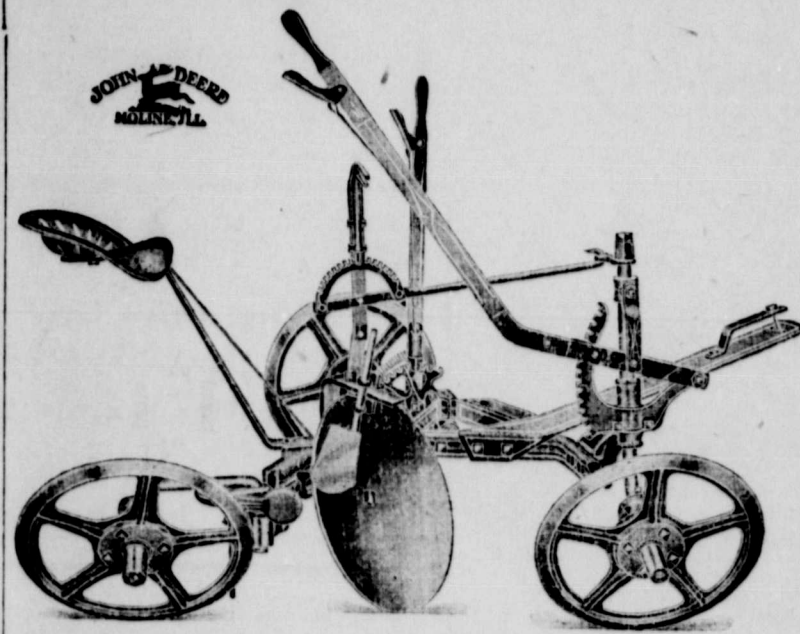

The silo will keep many farmers from putting onions on their farm. The Australian has found that he can dig out a hole in the ground and can keep ensilage for months without even cementing the walls. Many of our Oklahoma neighbors are digging out their silos and cementing them at 33 per cent of the cost that the wooden silo costs. There are several advantages in favor of the underground silo.

First: That all the work is done by our help who in turn spend their money with our home merchants, except the putting on the coating of cement.

Second, no labor foundation is required. Third: No guy ropes are necessary to keep the wind from blowing it over. Fourth: No new fangled doors are in it. Fifth: There are no lugs or hoops that should be looked after or tightened up. Sixth: No painting the inside every day while you are feeding it out.

For nine years I have had a wooden water reservoir and for 6 years an underground cistern and find if I do not keep the wooden reservoir full of water it is leaking and am sure that the silo will do likewise.

Ground is Soaked

Plow your Land with a Deere Disc

and it will be Plowed Right.

JOHN DEERE DISC PLOWS CUT EVERYTHING.

With the great season now in the ground you should soon start fall breaking. Remember we handle everything you need from a Double-shovel to power driven Gang Plows---and they have DEERE'S Reputation behind them.

K. Burwell.

Fire Narrowly Averted When Lamp Explodes.

The explosion of a lamp at the Copp home last Saturday night came near resulting in the loss of the house and Mrs. Copp was painfully burned.

It was about nine o'clock and Mrs. Copp was retiring and as she started to blow out the light it exploded in her hands. The burning oil scattered over her arms and but for the prompt assistance of her two daughters she would no doubt have been fatally burned. The room took fire and for awhile it looked like it was not going to be distinguished but the heroic work of

Misses Alice and Jessie got it under control. Mrs. Copp and two daughters, and Mrs. Copp's three little grandchildren of San Antonio were the only occupants of the house. Mr. Copp was away in San Antonio.

A Physician was hurriedly summoned and dressed Mrs. Copp's burns. She suffered considerably the first night but has been getting along splendidly since.

For Sale—255 acres of black land, no better in LaSalle County, one mile Northeast of Cotulla Texas. Sixty acres grubbed and fenced, windmill, well and tank. At a bargain if taken at once.—W. B. Guinn, Cotulla, Texas.

The silo is our salvation and with it we will demonstrate to the world that our Nueces River lands are worth \$500 per acre and will make their owner more than that.

MARSHAL'S NOTICE.

In accordance with an Ordinance passed by the City Council and published in the Cotulla Record, prohibiting the running at large of live stock, I hereby give notice that all live stock caught running at large after Monday, Sept. 29th, will be put in pound as provided in ordinance.

R. O. GOUGER, Marshal.
