VOL. 3.

In modern pharmacy is, undoubtedly, Ayer's Cathartic Pills. Except in extreme cases, physicians have abandoned the use of drastic purgatives, and recommend a milder, but no less effective medicine. The favorite is Ayer's Pills, the superior medicinal virtues of which have been certified to under the official seals of state chemists, as well as by hosts of eminent doctors and pharmacists. No other pill so well supplies the demand of the general public for a safe, certain, and agreeable family medicine. "Ayer's Pills are the best medicine I ever

used; and in my judgment no better general remedy was

Ever Devised I have used them in my family and caused them to be used among my friends and employes for more than twenty years. To my certain knowledge many cases of the following complaints have been completely and permanently cured by the use of Ayer's Pills alone: Third day chills, dumb ague, bilious fever, sick headache, rheumatism, flux, dyspepsia, constipation, and hard colds. I know that a moderate use of Ayer's Pills, continued for a few days or weeks, as the nature of the complaint required, would be found an absolute cure for the disorders I have named above." - J. O. Wilson, Contractor and Builder, Sulphur Springs, Texas. "For eight years I was afflicted with con-

and regular action, so that now I am in ex-

CULTIVATION OF PATRIOTISM

This national holiday in honor of "the father of his country," this State holiday set apart by the Legislature and proclaimed by the Governor for the commendable purpose of making more pleasant and beautiful the public and private premises of the people and institutions of the State, affords most favorable opportunity for the cultivation of the patriotic principle in the minds of the youth. The life and character of no man are more befitting the cultivation of a love of our country and its institu-

tions than those of Washington. No service will give the youth a higher regard for the property and institutions of the State than that of allowing them to help make this property and these institutions more pleasant, attractive and beautiful. Our youth should be educated to care for and protect all public property. In order to protect the property of the State it should not be necessary to post

placards reciting the statute against injury to this class of property. In thus educating them to protect public property they are being educated to respect all of the interests of the government. Thus they will become law-abiding and patri-

May this be a day well spent and may the lessons learned and the trees planted be of lasting benefit to the children and property of

TRAIN WRECKING FOR FUN.

Simple Cape Breton Boys Try an Experiment with Remarkable Results. Of late faraway Cape Breton island, with its quaint manners and customs and the simplicity of its habitant, has attracted much attention among the people of the states. This is largely due to the fact that the continuation of the Intercolonial railroad across the island has made it

accessible, and it is now visited an-

nually by people.

As might well be imagined the first train of cars that ran on the island attracted great attention. The Gaelic people collected from miles around or down to the Gut of Canso. Some blow would scamper away like

frightened animals.

The trains had not been long in operation before two young brothers, aged twelve and sixteen years respectively, conceived the brilliant idea of removing a rail or two. They did this in pure simplicity and without any appreciation of the heinousness of the crime. It was merely an experiment upon their part; they wanted to see if the train would not run as well on the naked ties as on gation was as might be expected. A train came along, left the track and those adjoining which stood in dan fell into a ditch. Fortunately it was ger. His proposals were commonly the needle guns which the German ferent parts of the country. The a freight train and no one was killed, but the damage was considerable. The two lads were easily captured. cape, and had remained seated near Rome.-Chicago Standard. the scene of the disaster, which they

ing to jail in the winter time.' The boys were both so innocent Notes and Queries. and it was so evident that they intended no harm, that after serving a few months only they were pardoned.-New York Herald.

Symbolical Marriages.

Dr. A. H. Post, the well known anthropologist, describing various marriage customs, refers to a strange sort of symbolical marriage which is supposed to have originated in India. It is a marriage with trees, plants, animals or inanimate objects. If any one proposes to enter upon a union which is not in accordance with traditional ideas, it is believed that the ill luck which is sure to follow may be averted by a marriage of this kind, the evil consequences being borne by the object chosen. In various regions a girl must not marry before her elder sisters, but in some parts of southern India the difficulty is overcome by the eldest daughter marrying the branch of a tree. Then the wedding of the second daughter may safely be celebrated. Dr. Post gives several other instances, which are likely to be new to many students of anthropology.

John Bright's First Salmon. An interesting story of Mr. John Bright's early angling experiences is told by Mr. Corballis. Mr. Bright was receiving his first lesson in salmon fishing from the grandfather of patch. the present Lord Lovat at the Groam Pool, on the Beauly. Shall be made vocal with the noise of an give ther gentlemen fruit cake and lears an inscription in runes.—

London Athenseum. ed to the manufacture of all grades and styles of furniture, vehicles and agricultural implements. Walnut, White Oak, Linn, Ash, Hickory of every variety, Post Oak, Cypress, Long and Short Leaf Pine Curley Pine, Holly, Beach. Cherry, Magnolia and all other species of timber found in the woods of East Texas.

Houston Co. took the Gold Medal

At the Fort Worth Spring Palace in 1890 for its magnificent display of timbers. The North-eastern, Northern and North-western sections of the County are rich in iron of the Laminated and Brown Hematite varieties. Soils of every variety to be found in the state are to be found in Houston County, from the black waxy to the light sandy.

The Railroads of the County

are splendid. The International & Great Northern runs through it directly North and South. The Trinity & Sabine belt on the South, the Houston, East & West Texas on the East and the Kansas & Gulf Short Line on the North, thus affording to every section of the County asy and rapid means of transportation to and from market. Besides there are two other lines surveyed and projected through the County, running in a North-westerly and South-easterly direction. Rivers, Creeks and streams of living water abound, furnishing through the dryest summer an abundance of pure, fresh water. The Trinity River is the County's boundary on the West and the Neches on the East, The County School fund is perhaps the

reaching the splendid sum total of \$70,000, from which is annually derived for available use in maintaining the schools of the County from four to five thousand dollars. This added to the amount raised by local taxation and that bestowed by the State furnishes the princely sum of thirty thousand dollars spent annually on the free schools of the County. The population of the County is 20,000 and largely white,

FRUITS AND VEGETABLES

f every variety are produced here and the County yields to none in the State in adaptability of soils to the growth for market of peaches, pears, figs, plums, apricots, grapes and berries.

Houston County's Schools

are unsurpassed by any in the State, in respect of efficiency and competency of teachers, standard of scholarship and duration of free term. Its own unsurpassed permanent School Fund supplemented from other sources enables us to come nearer fulfilling the constitutional requirements of a six-months term than any other county. The debt and tax-rate of the County are almost nominal. Its climate is mild and healthful, the temperature never reaching extremes in either Summer or Winter. Its water supply for both domestic use and manufacturing purposes is unexcelled. Springs and streams of never failing water are to be found in every section of the county.

County Products

are cotton, corn, oats and other small grain, sorghum, ribbon cane, fruits and vegetables of every variety, hay, and in some places rice etc.

CROCKETT

the county seat of Houston County, is situated on the L. & G. N. B. R. It has a population of 2000. The people of the town have recently voted to take charge of its schools and support them by taxation, nine months in the year. The City Council have assumed control and esablished graded schools for both white and black. Handsome and commodious brick school buildings with all the modern appointments are under construction. The town is destined to become the educational center of East Texas.

LOVELAD

to the South, on the I. & G. N. R. R., is an enterprising town of 500 people, good society, several churches and a splendid High School maintained all the year in one of the finest high school building in Eastern Texas.

GRAPELAND

theirs, may add 80 cents to such figure as may be their rate of sub- to the North is another enterprising town of several hundred people fully alive to the demands of the hour and supported by a superior section of country. They have in course of erection a very fine high high school building in which the public spirited citizens of that place propose to sustain during the entire year a high school second to none in the County.
