Use Dr. Price's Cream Baking Powder.

IF YOU WISH TO AVOID THE TWIN DRUGS.

ALUM AND AMMONIA

Dr. H. Endemann, for twelve years chemist of the New York Board of Health, in his paper read before the American Chemical Society at Washington, in October, 1891, states that an ammonia baking powder acts on the gluten of the flour, altering its chemical properties, and cites numerous high authorities to prove its injurious effect on the stomach and kidneys.

Liebig the great chemist says. "The use of alum in bread is very injurious, and it is very apt to disorder the stomach and occasion acidity and dyspepsia."

The following powders are known to contain either ammonia or alum or both: Royal, Chicago Yeast, Columnet, Bon Bon, Taylor's One Spean, Unrivaled, Forest City, Sur. Hall

EARTHQUAKE SCARES.

tine Thing That a Person Can Never Get Used To.

It is a curious fact that the earthquake scare is the one danger to which we can never become accustomed by familiarity. The oftener we feel it the more we become demoralized. I cannot better illustrate this than by a story told me by Col. Bailey Peyton, United States minister to Chili in 1852 and city attorney of San Francisco in 1856. To a party of friends in 1856 he said: "Boys, it's of no use talking; we can become accustomed to all dangers, no matter how imminent, by familiarity, except the danger of earthquakes. The more you fer i 'em the more you don't like 'em and tos worse you hate 'em. I have heard the whistle of bullets and the roar of cannon in battle and never dodged. But my experience in Chili took the starch out of me. I had been but a few days in Santiago, the capital of Chili, when I visited the leading store on the plaza in that city. While standing behind the counter, in an instant, without any premonition, the proprietor and twenty clerks simultaneously leaped the counter and rushed out of the front door. I looked at them in astonishment, and said to myself: 'Are they'crazy? What's the matter with them?' Slowly they returned to their places. I asked them what was the matter. They replied: 'El temblor! Didn't you feel the temblor? To me it was a trifle. Two weeks later I was giving a swell dinder to the diplomatic corps in Santiago. In the midst of it came a temblor, a very lively one, and every man of the party leaped from his seat and rushed for the door or the window. I said to myself: 'Of all the cowards I ever met with these people exceed.' But boys, I hadn't been in that country more than three months before no quarterhorse in Tennessee could beat me in a break for the front door when one of those temblors made his appearance. You can stand bullets and cannon balls, but the temblors will fetch you.

To any one who has never witnessed the distribution of rations at an Indian agency the performance is remarkably interesting. The government building is ordinarily a barnlike structure, surrounded by a platform, on which the squaws form in line, each with her ticket. As they pass through a door, in single file, a clerk looks at each woman's card and shouts marble, a beautiful alabaster altar, out the number of rations to which candelabra and ornaments of gold she is entitled. Supposing that there and silver, and a basement of equal are three in her family, she is entitled to twenty-one rations for the week, of illustrous dead-such as bishops and course. Her card shows that, and presidents-are interred. every time it is presented the clerk

punches it once. After it has been punched fifty-two times, being good for one year, it is exhausted.

The squaw passes on to another clerk who distributes corn. He has a number of scoops of different sizes, each holding so many rations. The amount of corn due the woman he niches is fronted by a marble tablet promptly dumps in her shawl, tied up bearing in letters of black or gold for temporary use as a receptacle. bring sacks for the flour.

How It Is Created and What Damage

The fog, it is needless to say; is caused by atmospheric conditions which keep the lower stratum of the air comparatively stationary and prevent smoke from rising as it ordinarily does even when there is no wind to and jolts and bumps the cadaver move it. Consequently the air in about in a shocking manner, while London streets remains to great extent the pallbearers step up the ladder to unchanged during the prevalence of a receive it and shove it into the nar thick fog, but it is by no means in the row receptacle.
