In New York it is practically the same way, the tax on realty being only nominal. New York has substantially the same tax laws as Pennsylvania, the tax on legacies and successions alone being one per cent. An illustration of the latter method is furnished in the case of Jay Gould's immense fortune. His estate was probated at seventy-two millions and the "succession tax" hundred thousand dollars.

INCOME TAX.

"Are you aware of the enormous expense incurred in sending coupon bonds across the Atlantic?" asked a gentleman of a friend. The gentleman answered "No." "Well, let me give you an instance," said the questioner. "Mr. Gabel has just left New York for Glasgow -with \$2,500,000. When I first heard of his being sent some 3,000 miles I thought it was a piece of folly-a waste of time and a waste of money. But I find it was an economic step after all. The shipping companies charge at the rate of \$3,50 for \$1,000 worth of bonds, and \$3 more for marine ins urance; that is \$5.50 for each \$1,000 worth. A slight calculation shows that the total charges on the sum named would be \$13,750. So that it is much che aper to pay the expenses of a trip than to pay the freightage.

BOUND FOR THE POLE

THE ADVENTURE

The Explorer Expects to Pass Through Behring Straits Around the North Pole Into the East Greenland Seas-Will Start in February.

O VESSEL HAS ever been so care fully designed and built for the purpose of battling with the Arctic ice and endeavoring to solidly constructed or perfect description of vessel has ever before been turned out of a builder's hands for

Arctic service than the one just finished for the use of Dr. Nansen's Arctic expedition. The vessel is constructed on nearly similar lines to those of a Scotch buckieboat or Norwegian pilot. She is furnished with engines of about 170 indicated horse power, powerful pumps to be worked by steam or hand power and electric lighting machinery. She also takes with her a baloon to be held captive for purposes of observation and carries seven boats-four on davits and three on capable of carrying the entire crew, with provisions for several months, and warm tents in the event of the abandonment of the vessel.

The expedition will leave Norway in Pebruary next so as to arrive at Bering firmly. Because these birds are destraits in June, when the vessel will outer the Arctic waters and push her way as far as possible toward the pole to the north of the Liakhov islands, where she will be frozen in, and then conveyed, according to Dr. Nansen's theory, to and past the pole, and be finally discharged into the East Greenland seas.

per ct. difference. Royal Baking Powder Strongest, Purest, Most Economical.

As to whether any of the baking powders are equal to _ the "Royal," the official tests clearly determine. When samples of various baking powders were purchased from

the grocers, and analyzed by the United States Government Chemists and the Chemists of State and City Boards of Health, the reports revealed the fact that the "Royal" contained from 28 per cent to 60 per cent more leavening strength than the others, and also that it was more perfectly combined, absolutely pure, and altogether wholesome. As most of these powders are sold to

consumers at the same price as the "Royal," by the use of the Royal Baking Powderthere is an average saving of over one third, besides the advantage of assured purity and wholesomeness of food, and of bread, biscuit and cake made perfectly light, sweet, and palatable.

The official reports also reveal the presence, in other powders, of alum, lime or sulphuric acid, by which their use is made a matter of grave danger to the consumer.

Whenever a baking powder is sold at a lower price than the" Royal," or with a gift, it is a certain indication that It is made from alum, and is to be avoided under all circumstances. Nearly any proposition looks well in
