Haight died as a result of the poison. Capt. Gillio is under arrest charged with being Latimer's accomplice. Latimer tried to release a prisoner near his own cell, but failing made his own escape by way of the front gate. He secured a rifle and a quantity of ammunition before going, and will surely make a desperate fight. Those who know him say there is not one chance in a thousand of ever taking him alive. There is the most intense excitement, and hudreds of men are searching the city and surrounding country. Telegrams have been sent all over the state, and it seems impossible that he can escape.

Wants to Trade. since the collapse of the bank, has made a proposition to the authorities, providing for retrieving the fortunes of the bank on a compromise basis, namely that he be fined instead of imprisoned. Mosher, it is said, has secured assistance from his relatives whereby the depositors of the failed institution will not lose a cent if his proposition is agreed to.

Want to Investigate.

WASHINGTON, March 28.-After numerous conferences among themselves the Republican members of the senate have decided that they will insist on an investigation of the charges made in the public prints relative to the character of Mr. Roach, recently Selected senator from North Dakota. BOOKSELLER'S PROFITS.

The prominent booksellers of Boston have not achieved such encouragement from the holiday book trade that they can look upon the prospects of business with complete satisfaction. "There ought to be a reorganization of our business," one of the most influential booksellers said recently to a newspaper critic. "Publishers and book dealers should combine in placing the trade upon a new basis. A popular fallacy is that we dealers make large profits, but nothing can be farther from the truth. The people forget the discounts, the continual cutting and cutting from our profits. What does the 'publisher's price'

mean? Nothing at all." "People certainly buy books at cheap prices. According to the advertisements of some dry goods establishments, people are buying their books at almost nothing."

"Don't you understand that? Take" paper novels, for instance. The firm buys the books by the hundreds at about 8 cents apiece, although the publisher's price is 25 cents apiece. The advertisement announces 'books at 10 cents apiece, reduced from 25 cents.' "In supplying large libraries there is requires a certain book which can only

violent deaths. From the Christian era to the reign of Henry II. of England the record is not more promising. There were apparently seventy-eight kings; of these thirteen died natural deaths, that is to say that they presumably did not live long enough to enable them to share the fate of their predecessors and successors; one was drowned in a fog: one had thirty sons, in itself enough to cause death; one was choked by a fish bone; three were killed by "thunderbolts," but as the three reigned bread, which most of us remember suppose that the "thunderbolts" were but "rocks," "hefted" by the hands of aspirants to the throne; the remaining fifty-nine succumbed to the inevitable assassination or death in the battlefield. WHILE there are so many alum baking powders in the market, the use of which all physicians decide render the food unwholesome and liable to produce dyspepsia and other ailments, housekeepers should exercise the utmost care to prevent any powder but the Royal from being brought into their kitchens.

AN HISTORIC LEMON. Was Expensive and Ill-Fated Anne

Who ever thinks of connecting such commonplace article of diet as the emon with the romantic history of ill-fated Anne Boleyn? Yet, indirectly, she was the cause of its first introduction into England and so into popular notice. Henry VIII.-who, if he rid himself of his wives like a brute, certainly won them like a prince-gave such splendid feasts and pageants in honor of the coronation of Anne and of their previous nuptials as had seldom been accorded to queens of the blood royal. These kingly entertainments were in turn followed by great cacies to add to the splendor

At one such banquet, graced by the presence of the royal pair, a lemon was introduced as an elegant novelty.
