

CONGRESS IN SESSION.

The Convention Begins Without Excitement in a Matter of Fact Way.

WAYS AND MEANS COMMITTEE ESTIMATES

On Rivers and Harbor Improvements, \$12,000,000, or an Increase of \$5,000,000—The Silver Men Are Not Satisfied.

WASHINGTON, Dec. 5.—The house assembled at noon with 242 members present. As a rule on the assembling of this body, the members get in the hall early and swap stories and inquire as to local political conditions, but on this occasion the hall was nearly empty till 11 o'clock. All the Texans were on hand except Abbott and Gresham, both of whom are reported as at home and sick. In the senate there was, as there always is, less noise than in the house. Both the Texas senators were present. A committee was appointed to inform the president that the senate was ready to transmit business and as in the house a recess was taken.

Interstate Trade.

WASHINGTON, Dec. 4.—The following is a synopsis of the seventh annual report of the interstate commerce commission. Attention is called to the peculiar office of common carriers in interstate commerce, and to the fact that the actual enjoyment of this right, the right of every person to receive just and equal treatment in all that pertains to public transportation and the paramount purpose of regulating enactments to secure the same, is the actual enjoyment of this right. There must be a common public rate prima facie just and reasonable, which measures the lawful charges of the carrier. The enactment of the long and short haul clause is deemed a public necessity. The commission recommends additional legislation on the following subjects:

1. With respect to proceedings to enforce the lawful orders of the commission, Monday.
2. To give legislative construction to the word "line" in the statute.
3. To provide for establishing through routes and joint through routes.
4. To give the commission power to prosecute to competitive points.
5. To provide for the adoption of uniform freight classification.
6. To make to the corporation subordinated to the indictment for violation of the law.
7. To provide a penalty for the failure on the part of carriers to file their annual reports within a specified time.

The Internal Revenue.

WASHINGTON, Nov. 29.—The internal revenue bill has not come out yet. It is said that the reduction contemplated in the tariff bill will amount to \$40,000,000 or \$50,000,000 per annum. If this is the case, and there is no reason to doubt it, then this deficit must be made up by the internal revenue tariff. The report is in circulation that the income tax, as far as it applies to individuals, has been abandoned. Messrs. Wilson of West Virginia, Stephens of Massachusetts and Cochran of New York were opposed to this, and so the report goes that Mr. Cleveland with these three and the committee concluded to abandon the income tax as far as individuals were concerned. Had it not been for Cleveland's opposition the committee would have brought in an income tax bill anyhow. On all sides it is agreed that Mr. Cleveland should not be asked to make up the deficit by individuals were concerned. Had it not been for Cleveland's opposition the committee would have brought in an income tax bill anyhow.

Ways and Means Committee.

WASHINGTON, Dec. 5.—The ways and means committee held a meeting yesterday morning and discussed in general way the method of proceeding when the new tariff bill is introduced. There was submitted to the Republicans members of the committee a list of proposed changes in the present law. For rivers and harbors a total of \$12,510,000 is estimated, an increase of more than \$9,000,000 over the appropriations for the current year. Of this amount \$7,000,000 is to be expended as directed by congress. Among the items in the list is Galveston, \$500,000.

The Silver Question.

WASHINGTON, Dec. 5.—The silver men say that the president has not said anything in favor of silver yet, though through the fight on the bill to repeal the Sherman law those favoring the repeal declared that there would be silver legislation of a kind and in the amount as applied to the president was not approved. The men favoring the repeal answer that the president very wisely takes the position that the present conditions must be allowed to remain till their effect is known before other financial experiments are tried.

Congress on the March.

WASHINGTON, Dec. 4.—Those who have been counting upon an internal revenue bill will be disappointed by the report of the committee on the subject. Now for the Tariff.

The Wilson Bill plays havoc with the tariff barons.

There is not harmony in the democratic ranks over the proposed new tariff bill.

Get ready for the grip, if such a thing is possible. It is coming and unfortunately no system of quarantine can exclude it.

Senator Cook can serve the people of Texas with greater satisfaction to himself and the people of the state at Washington than he can at Austin.

All there, Gov. Hogg! Did you let Hogg that a democratic committee on Ways and Means refused to abolish the sugar bounty utterly? What are you going to do about that?

The democratic party in New York seems to be hopelessly split. Fairbank, Cleveland's Secretary of the Treasury, is heading a movement for the organization of an independent party.

The Fourth Party has been born. Read the following:

St. Louis, Mo., Nov. 29.—A special to the Republic from Toronto, Kan., says: W. F. Rightmire to-day issued a call for a conference at St. Louis, March 29, to organize a new party. Rightmire called the conference in 1892 at Cincinnati. He was, until last year, a leading politician, but since then he opposed Governor Foraker and his administration. He was chairman Fairbank and many leading politicians are with him in this movement.

Chicago, Ill., Dec. 7.—A special to the Republic to-day received a letter from Governor Wain of Colorado declaring in favor of the new party movement.

Poor old Third Party! Two years hence there will be none to do it homage.

In the forcible but rather inelegant language of Governor Hogg we would remark that in the next election the Third Party will not amount to a "Bunt finale in a cyclone."

And now the Third Party is split, rent asunder, torn to pieces, busted. One faction adheres to the Omaha platform and the other repudiates it and proposes to organize a separate party on the single plank of free-coinage.

If the Third Party ever succeeds, it must do two things. It must repudiate its wild vagaries of governmental science. Having done this, then let it throw overboard its present leaders and get men who can command the confidence of the people.

Third Party leaders in some of the states are advocating the coinage of silver by the states. This, too, in utter ignorance or defiance of the Federal Constitution which expressly prohibits any state from coining money. This illustrates to what desperate extremes some of the leaders of this organization are willing to go.

The Palestine papers continue to urge the name of Hon. Jno. H. Reagan as a proper candidate for governor. If he should conclude to run as now seems probable, the contest will be a spirited one. There is no man in Texas more universally and sincerely esteemed by the masses of the people than Judge Reagan.

Sunday's News had a rather sensational interview with an ex-official of the state senate in which said official declared with supreme confidence that Senator Cook in a few weeks would announce his candidacy for governor. We are constrained to think that there is no foundation for such a statement. Senator Cook has no reason to fear that he will not succeed himself in the Senate. There is not a man in the state that can beat him. Then why should he wish to exchange a seat in the Senate for the executive office at Austin? The salary can be no inducement for that of Senator; it is greater than that of Governor. The question of official tenure can be made for the former holds for six years while the latter is for two years only. There are other reasons which render such a story altogether improbable.

The grip pestilence has again become epidemic in Europe and England. It is said to be much more violent than formerly and almost as fatal as the cholera. Half the population in some cities is prostrated with it. A peculiarity about it is that it singles out and assails persons of the most robust constitution.

Congressman Gresham in an interview speaks as follows of silver: To say silver is demonetized is all stuff. Silver is still money, and more can be coined when deemed necessary, but it must be coined on public, not private account. Silver is being used as money in England, Germany, France and many other countries but none of them coin it free for private individuals.

"Suppose we had a free coinage law. England would send over here to buy cotton at, say 10 cents a pound, the gold price. Instead, however, of sending the gold itself she would go into the market buy silver, carry it to mint and have each 60 cents of it coined into a dollar, and with each dollar would buy ten pounds of cotton.

"I am opposed to making the United States the dumping ground for the world's silver at the expense of the people of this country."

Hon. John R. Fellows of New York, member of congress and Tammany leader, said to a News interviewer regarding cheap money:

"We people of the north and east don't understand you people. The southern people seem to be under the impression that the cheapest and poorest is the best money for the masses. The whole burden of the debate, from the standpoint of those who desired the free and unlimited coinage of silver, was cheaper money. We don't know what you mean by cheaper, unless it is money of less value than our present money. We can't understand why you would want money of the lesser value instead of the best money. It seems that the natural desire would be for best; but the agricultural masses have got the idea in their heads that if the government printing presses and mints would go to work and turn out additional money they would be benefited. It ought to be the primary of education that money of any character

—gold, silver or paper—in any quantity is nothing to the individual unless he has labor, products or something else with which to secure it. Cheaper money might enable the debtor to pay what he owes with money of a depreciated value, but ultimately he would get the worst of the bargain. After he had paid his debts he would find that all the necessities of life would cost him more, while in all likelihood his resources would not be increased. We of the north and east believe that the country should have only the best money. Why put the country in the attitude of being against all the world? When southern people come to study the situation they will find we are not going to dump all the silver into the sea. There will be just as much silver here in the country as there ever was; we have only ceased buying it as a commodity and handing it up in the government vaults.

An Income Tax.

WASHINGTON, D. C., 30, 1893. It is practically settled that an income tax will be a conspicuous feature of the internal schedules upon which the majority of the members of the Ways and Means Committee are now working. The details of the plan are gradually taking shape. It will exempt individual incomes, and, as heretofore stated in this Republic, will apply in a general way to inheritances and corporations.

Data furnished by the Treasury Department shows that during the 10 years the tax was in existence the receipts in round numbers were \$874,000,000. The largest figure was reached in 1886, when the receipts aggregated \$78,000,000, and in the year following they were \$87,000,000. The great increase in population and wealth since then tends the committee to believe that a tax on corporations alone will furnish a considerable amount of the revenue needed to supply the deficit caused by the reduction in tariff duties.

Chairman Wilson now believes that \$95,000,000 will cover the decrease in revenues from imports caused by the bill just made public. He reached this conclusion after a careful examination of the new tariff bill, and it is shared by Secretary Charles, with whom the chairman has had repeated conferences. The committee has reached no understanding as regarding whisky.

Depression in Cotton.

WASHINGTON, D. C., Nov. 30.—Reports received from the subcommittee on Agriculture, which is investigating the low price of cotton, are to the effect that the committee has almost concluded its investigation in the cotton growing districts. The committee is at present in New Orleans, where it has been engaged for the past 10 days, having gone there from Memphis, where eight days' time were spent. The investigation has been very thorough into the cause of the depression, and the testimony of many persons who are in possession of facts bearing upon the question and of those who hold opinions has been taken by the committee. There has been complaint of over production and a lack of diversity in crops in the South; the general belief seems to be that the scarcity of money is the one great cause for existing depression. The committee is expected to complete its labors in time for the members to reach Washington for the assembling of Congress next Monday or later. It is probable that the committee will visit New York and the cotton manufacturing districts of the Eastern States soon after the holidays.

GRAPELAND.

Thanksgiving day was not very generally observed here. A few baked turkeys, several fat "possums" and a half days' suspension of the school followed by a "social" at Mr. J. M. Melkirk's at night constituted the round of thanks for the many blessings that we should be thankful for. We should never become so engrossed in business as not to be able to spend one day in the year in thanking our Maker for the many good things we are permitted to enjoy, but this day like Christmas is so often perverted by revelry and drunkenness that Christians are becoming disgusted with it and often wish they would never come. Several of the boys went "possum" hunting the other night and bagged seven and it wasn't a very good night for "possum" hunting either. Our school is in a very flourishing condition. They have now seventy pupils and it is still growing. People from a distance are beginning to seek this point as an educational center, and some are buying property and moving their families here for this purpose.

Mr. Ben Gray has moved his family into town and is living in the Brooks house until he completes his residence.

Mr. N. F. Hadler is just completing a residence for Mrs. Will Hadler in North Grape land and will soon begin one for himself in West End. This part of the city is rapidly being bought up and parties wishing a chance to get a home in the fashionable part of the city had better get a move on them or they will get left.

Mr. J. N. Tyre has sold a half interest in his saw mill to his nephew in Shelby county. He is now moving it to that county where it will be run. This leaves an opening here for another mill.

Mr. Will Neal and wife and baby of Mikhart were in town this week visiting friends and relatives. Mr. Neal has been sick for several weeks but is now convalescent.

Messrs. James Haxon and Sidney Johnson were in town last week on business.

Mr. B. E. Keen was in town last week buying and receiving a stock of goods for duty.

Messrs. Lively & Wright have bought the Wallace Totty stock of goods and have moved from the Masonic building into the Totty house. The health of the community is good.
