THE LONG TAILED TROGON

A Most Gorgeous Bird Is the Na-

tional Emblem of Guatemala. By far the most interesting bird emolem of a modern state is that of the republic of Guatemala. It has been adopted as the national crest for so long that, partly through the taste for stamp collecting, the existence of one of the rarest and most beautiful of the bird creation has been made far more widely known than it otherwise would have been. There is a race of birds called trogons, most of which have very fine feathers and remarkable coloring. They are found in India and the Malays, but are most numerous in Central and South America. It was tlemen. I am old enough to vote, from their plumage that the Mexicans made their famous mosaics of feather work. From the tail feathers they made the lustrous green belmets of their kings and nobles. The most gorreous of all was the long tailed or redent trogon, which was kept as a lot. sacred or royal bird in the palace of Montezuma or in one of the two houses which formed the royal menageries. Adequate description of the bird is almost impossible. It has a rounded plume on the head, cascades of feathers falling from the back over the shoulders, plumes falling over the tail a yard long and a most elegant contour. The color of the whole of the apper surface and plumes is a most redent golden green, that of the breast and under parts crimson or scarlet. Such is the national emblem of

Gibraltar's Story.

In 1704 the rock of Gibraltar fell into the hands of the British by assault. The Prince of Hesse-Darmstadt commanded the troops and Sir George Rooke the fleet, and in the remarkably short time of four days the stronghold surrendered. Many times the Spanfards attempted to get back the key to the Mediterranean, but without success, though on one occasion they got 500 men within the fort, but failed to re-enforce them. In 1726 it was in the mind of ministers to give back the tion arose against such a step that it was abandoned. There followed a slege by Spain and France, which lasted from 1727 to 1783. On Sept. 18, 1782, no fewer than 40,000 men constituted the besieging army, and in the grand attack delivered on that day 200 heavy guns, 47 ships of the line and 10 | dry as a hone." powerd of 5,000 red hot shots were gasped. Travelers to California

Naturally desire to see the grandest and most impressive scenery en route. This you will do by select ing the Denver and Rio Grande Western, "The Scenic Line of the World," and "The Great Salt Lake Route," in one or both directions, as this line has two separate routes across the Rocky Mountains between Denver and Ogden. Tickets reading via this route are available either via its main line through the Royal Gorge, Leadville, over Tennessee Pass, through the Canon of the Grand River and Glenwood Springs, or via the line over Marshal Pass and through the Black Canon of the Gunnison, thus enabling the traveler to use one of the above routes going and the other returning. Three splendidly equipped fast trains are operated to and from the Pacific Coast, with through standard sleepers daily between Chicago, St. Louis, Denver and San Francisco. Dining cars (service a la carte) on all through trains. If you contemplate such a trip, let us send you beautifully solves: "To its old principles illustrated pamphlets, free. S. K. Hooper, G. P. and T. A., Denver, Colorado.

PROPERTY.

Real Estate Versus Modern Paper

Evidences of Wealth. What a wonderful change has passed over our entire conception of the word "property!" The writer is old enough to remember when nothing except land and houses were regarded as true property, but now a man may be a millionaire and own nothing that he can see. A few pieces of paper in a box at his banker's or, better still, an inscription In a book of which he knows nothing except that it exists constitutes him a man rich beyond the dreams of avarice, and, moreover, a man who has not to guard his property and who can realize itwhich the rich man of old could not do -in half an hour. It is a very curious change and one the full results of which we have yet to perceive, but we suspect that among them will be an immense increase in the amount of wealth at the disposal of industry and enterprise and an astonishing decrease in the permanence of the wealthy famiites. It is so easy to spend shares or bonds, and there are so few to notice whether you spend them or not. It took years to spend a great landed estate, but a fortune in bonds may disappear in a year of unlucky speculation or in the early lifetime of one spendthrift heir.--London Spectator.

Petrified the Englishman Too, "Colonel Tom Ochiltree once upset Lord Lonsdale when the latter was entertained in New York on his way home from an expedition to Alaska," said a man who saw the fun.

"At a dinner given in his honor Lord Lonsdale told many thrilling stories, and an audible 'oh!" went around the table when he finished teiling of a petrifled forest in Africa, in which he found a number of petrified lions and elephants. As the Englishman lapsed into silence and the applause sank to an echo all looked to Colonel Ochiltree to defend his nationality and beat this petrified lion story.

"Texas, said the colonel after a pause, 'has its petrified forests; but, although they contain no petrified lions, they are remarkable for having petrified birds flying over them."

"'Nonsense!' said Lord Lonsdale. That is impossible. Such a phenomenon is contrary to the laws of gravitation.

"'Ab, that's easily explained,' responded Colonel Ochiltree quickly. 'The awa of gravitation down ther petrified too.'

Circh Street, London.

Up to the seventeenth century Grub street was on the outskirts of London. It was a street tenanted by bowyers, fletchers, makers of bowstrings and everything else that appertained to archery. Later on John Fox lived in Grah street, though he did not write his famous "Book of Martyrs" there. Fox's residence in Grub street occurred about 1572. John Speed, the tailor archæologist, was a resident of Grab street, where he was famous as the most responsible purent, having a family of twelve sons and six daughters. Grub street of old and Milton street today is noted for its great number of alleys and courts.

From Grub street issued such famous old literary skits as "Jack the Giant Killer," "Tom Hickathrift," "The Wise Men of Gotham" and scores of others now a part of every boy's library. Probably literary men first began to populate Grub street in any numbers during Cromwell's time. Then a great number of seditious and libelous pamphlets were circulated, and as the authors for safety had to seek obscure living places they found a fitting retreat in the maze of alleys which webbed the Grub street section. At any rate, by the commencement of the eighteenth century Grub street had become quite notorious as the poor authors' quarter of London.

Man and His Chin.

In man the front of the lower jawbone possesses a well marked projection, known as the chin or mental prominence, covered by a fleshy pod of corresponding shape. In all other backboned animals the jawbone slopes back without any such protuberance. It is a singular fact that the presence of a well marked chin is associated with firm character and well marked intellectual qualities. This is one of the best founded rules in character delineation by physiognomy. The late Professor Huxley used to illustrate the matter by drawing a profile with good chin on chin and replacing it by a receding curve. Any one who repeats the experiment will be surprised at the result. perhaps say that a well developed jaw is associated with good digestive powers, which have more to do with char-

Antiquity of Grains.

Nearly all the grains now in use are of unknown antiquity. Wheat was cul-

the north of Europe. Had there been an early civilization on this continent the wild oats found here and there would probably have developed into the useful cereal now considered absolutely essential to the proper nourishment of horses. This continent is credited with having given Indian corn to the old world, but this useful cereal was doubtless known in India and China many hundred years before the discovery of America.

A Dog Story.

An elderly clergyman living some few miles from a market town and somewhat absentminded withal was in the habit of driving there weekly, where he put up his horse at a particular inn, his dog always in attendance. One day when returning with a friend he was much annoyed to discover that the dog was missing and insisted on driving back to find him. The inn was reached, and there, sure enough, was the dog, and not only the dog, but the parson's horse as well. The hostler had put another horse into the vehicle, but the dog, recognizing the mistake, elected to stay with his animal friend rather than return with his master .-"Letter of a Dog Lover."

She Remembered.

"Rev. Mr. Stern's remarks over poor John were so sympathetic, I thought," said the widow's friend.

join the great majority."

"Well?" "Well, in his sermon several Sundaysago he declared that the great majority of people go below."-Philadelphia Press.

The Others.

Don't live for yourself and do not be afraid of diminishing your own happiness by promoting that of others. He who labors wholly for the benefit of others and, as it were, forgets himself is far happier than the man who makes himself the sole object of all his affections and exertions.

Kinned to Death.

Betty, the infant Roscius, when at the zenith of his juvenile fame was on one occasion walking with some ladies when another bevy of female admirers bore down upon him and, pulling him away from his companions, commenced to lavish upon him endearments and kisses. The others promptly rushed to their idol's rescue, who between the contending parties, each determined to possess the boy actor, was thrown to the ground and so much bruised and injured as to be unable to appear for a couple of nights.

Insignificant, however, was this mischance to the fate that befell M. de Langy, a courtier of the time of Louis XV., whose supreme conceit so irritated certain ladies of the court that they resolved to inflict upon bim a novel punishment. Feigning one day to be overcome by the beauty of his face and person, they fell upon him on masse, hugging and kissing the wretched dandy till he cried for mercy. Deaf to his entreaties, the ladies continued their merciless enresses until the object of their mock love, who indeed was but a sorry weakling, in endeavoring to break away from their clutches broke a blood vessel and died a few days later.

Rabbits as Acrobats.

The rat is, as no one will doubt, a very fair climber. He can scamper about anywhere on the roof of a barn or can ascend the ivy that grows on the blackboard and then wiping out the the house wall and make the lives of the pigeons in their cots anything but happy ones. The rabbit, on the other hand, is not usually accounted a climb-The reason is not clear, but we may ing animal. A writer in Field describes the astonishment of his sisters at seeing a rabbit jump from the bough of a tree and, picking himself up, "scamper acter than one might at first sight sup. off rather dazed to his warren." Wherever a rabbit is found in a tree except when he is carried there by flood or left there by a receding snowdrift, it will be found that a sloping bank or other easy method of approach has tivated in all latitudes as far back in been made use of. He is, however, very the past as we have authentic knowl- expert at climbing stone walls that edge. Barley is thought to have origi- bound his fields and even the wire netnated in the Caucasus, but it was ting that the farmer valuly imagines known and used everywhere in the will keep him from the choicest crops. most ancient times. Cats, like rye, We have seen rabbits run up the face were unknown in ancient India and of a quarry to their holes toward the "If I knock a fare down, the company

Trundle Beds Out of Date.

"There are no trundle beds on the market nowadays," said a New York furniture store salesman. "They are not manufactured. It has been years since we carried them in stock, and the chances are that they will never be in vogue again. Science is against them, for one thing. Doctors and nurses have agreed that as a promoter of colds the trundle bed has no equal. For hygienic reasons trundle beds have been superseded by cribs and infants' beds of a dignified height. Fashion has also had something to do with the change, Regular beds are now built so low that it would be next to impossible to slip the trundle bed under them. Perhaps there may be a few out in the country districts that have not been seized by curio collectors or split into kindling wood, but you cannot find one in a New York furniture store."

Skulls In a Crypt.

In the crypt of St. Leonard's church at Hythe, England, are 7,000 skulls. The remains have been the subject of much discussion by scientists. They were once declared to be the bones of Danish invaders. Now the balance of opinion assumes that they are the outcome of a battle fought between Vortimer, a prince of the Britons, and the invading Saxons about A. D. 456. Many of the skulls bear the marks of the battleax. On a table on one side "Sympathetic!" replied the Widow of the crypt are placed two skulls Gayrake. "He said John 'had gone to which are declared to be typical Saxon and British, one being long and narrow and the other short and broad. The custodian points out in another part of the crypt what he contempuously describes as a "common churchyard skull."

His Two Great Remedies.

"Meddicin chests!" said the old retired skipper, with a snort of contempt. "I didn't 'ave no such tomfoolery aboard my ship when I were a goin' to sea. Ketch me a-coddlin' of my croo. No, sir! If so be as wun of the 'ands was feelin' queer, I sez to 'im: 'W'ere's the pain? Is it above the belt or below the belt? If 'e sez it's below the belt, I gives 'im a hemmetic; if 'e sez it's above the belt, I gives 'im a dose o' hepsom sorits. Turn my ship hinto a bloomin' chemist's shop! Not me, sir!" -London Telegraph.

Ointments From Whales.

Spermaceti, which is often used internally in catarrh and other affections, well as in the form of ointments wounds and excoriations of the skin, is obtained from the head of a monster of the whale kind which abounds in the south seas, while the highly esteemed ambergris is only a condition of disease in the same animal.

拉克斯特尔斯拉斯 Strategy.

Deep.

"I don't see why you call him greedy when he gave you his nice large apple

"That's just it. Of course I had to give him the biggest piece."

We see others as they are not; ourselves as we should like to be.-Saturday Evening Post.

The "Ear of Dionysius."

A cunningly constructed prison cav ern, consisting of a large chamber connected with one of smaller dimensions, situated near Syracuse, Italy, has gone into legendary history with the title of the "Ear of Dionysius." The smaller chamber was unknown to the prisoners kept in this underground dungeon, and the tyrant by whose name it is known had a habit of secreting himself there to listen to the conversation of the convicts, who were mostly political offenders. An ingenious device constructed at the smaller end of the larger chamber transmitted the sounds through the partition, thus enabling the suspicious ruler to hear even the whispered conversations of his "suspects."

Something to Shoot.

The other day a solitary sportsman, his gun under his arm, was wandering when he met a small boy making for the school.

"I say, my boy," he remarked, "is there anything to shoot down here?" The boy looked around for a moment and then answered with eagerness: "Aye, there's a skulemaister comin'

The Giruffe.

owre the hill!"-London Answers.

The children had written compositions on the giraffe. They were reading them aloud to the class. At last the time came for little Willie to read his. It was as follows: "The giraffe is a dumb animal and cannot express itself by any sound because its neck is so long its voice gets tired on its way to its

Little Latitude.

"I suppose a man has to be pretty careful in order to hold his job," said the talkative passenger.

"Yes," assented the conductor sadly. Egypt and among the Hebrews. The top, a feat which we have not found it kicks, and if I knock a passenger down Greeks and Romans received it from easy to imitate.

Reports me,"—New York Times.

Cinderella and Her Slipper.

Yes; I know you are saying to yourself, "That headline would have looked and sounded better had it been 'Cinderella and the Glass Slipper," says a critic, but the writer has been making a close study of this most interesting nursery story and finds that the famous "glass" slipper properly has no place in it. The "glass" slipper is really the "fur," "cloth" or "felt" slipper, the word "glass" having been substituted through a strange mistranslation of the story. In the original it was written pantouffe en vair, which, being translated, would be "the fur slipper." The translator, however, wrote it as if it had been pantoufle en verre, making the "little cinder girl's" fur foot covering one of glass, which, it must be admitted, would be one quite appropriate to a fairy.

A Cinch.

The editor of the Glasgow Echo avers he is not much of a sport; but, he says, when we meet a cinch in the road we recognize it." He accepted a proposition the other day, made by a friend, through which he was to give his friend a dime for every time a woman passed them and did not put her hand behind her to learn if her skirt was all right behind. On the other hand, the editor's friend agreed to give him a nickel for each time a woman felt of her belt behind, "We got sixty-two nickels," the molder of opinion says, "and paid him one dime. A woman with both arms full of parcels came along."

Wax From Trees.

The wax palm of the Andes is a vegetable wonder. It grows to a height of nearly 200 feet and thrives not only on the plains, but the mountains. The wood is tough and durable and is employed in carpentry. The wax comes from the pits between the trunk and fronds. It is yellow or grayish white, is as pure as beeswax and is used for making candles. A peon climbing the trees can gather from twenty to thirty pounds from each.

The Measure of Success.

It is one of the appointed conditions of the labor of men that in proportion to the time between the seed sowing and the harvest is the fullness of. the fruit, and that generally, therefore, the farther off we place our aim and the less we desire to be ourselves the witnesses of what we have labored for, the more wide and rich will be the measure of our success.—John Ruskin.

A Symphony of Colors.

Gray was asked why he had written the "Elegy In a Country Churchyard." "Because," he returned, "I thought it was the best place to make the ghost walk."

And indeed this seemed reasonable when it was remembered in addition to being Gray he had both duns and blues.-New York Tribune.

A Breach of Etiquette.

"Am I to understand that you were discharged from the army for a mere breach of etiquette?" queried the interested friend.

"Yes, sir." boldly asserted Colonel Blupher.

"What was it?" "Turning my back to the enemy."-

Philadelphia Record. Use It.

The higher a man's character the less he need concern himself about his reputation -New York Press.

Cushing's Chair For Visitors.

Caleb Cushing desired people to keep at a distance from him while talking, and many of his callers had a habit of gradually moving their chair nearer to him during a conversation. So one day, down a country lane in Inverness-shire having been very much annoyed in that way, he sent for a carpenter and made him fasten two pieces of board to the legs of the chair and then screw it to the floor at the place where he wanted people to sit. When it was done, he contemplated it with a smile and remarked: "I guess I have got them now. They can't blow their bad breath in my face any more."

That chair raised a laugh on many a visitor, who, after several ineffectual attempts to move it forward, would, on looking closer, find it fastened to the floor.

Collar Is Good to Ent.

"Collar" is the unusual name applied in England to a preparation of meat that is only slightly different from one often served here. Equal parts of cold cooked ham and tongue are put through the meat chopper and afterward pounded to a paste, a little dry mustard added and the whole heated. When warm, press down in a bowl, put on a weight and let stand to get cold and pack into form. Slice thin and serve at luncheon

THE FER-DE-LANCE.

Ris Terrible Bite Often Causes Benth In a Few Moments.

The terrible fer-de-lance will strike again and again and is the cause of great mortality where he exists, causing death often in a few moments. Over the whole earth there is none to compare with him except the notorious cobra of India. Although not a water snake, he is fond of the river and flat lands in its vicinity, seldom being met with in the hills. This denizen of the reedy swamp and sedgy river banks is found over the whole north of the South American continent as well as in the islands of Trinidad. St. Lucia and Martinique. He is truly the evil genius of the two latter, where deaths from his bite form a high percentage every year.

In Martinique especially it is necessary oftentimes in some districts to burn the cornfields so as to destroy these snakes before the negroes dare enter to cut the canes. On one estate thirty-seven fer-de-lances were killed on a plece of ground containing eleven acres.

Of a dull yellowish or clay tinted ground color, he is ringed with irregular, blackish bands, narrowing toward the back and broadening downward. This arrangement of coloring makes him extremely difficult to discern on the flat alluvial lands where the sun baked clay, mixed with the blackened color of sticks rotten and water soaked, makes a carpet of a color with his coat. He is from five to seven feet in length. as thick as a man's wrist, with a flat triangular bead.

An Odd Barometer.

A common leech makes a good barometer. Fill a tumbler half full with water, put the leech into it and tie a piece of muslin over the top to keep the leech from getting out. All you have to do to find out what sort of weather we are going to have is to watch the little animal.

For example, when the day is to be fine the leech will remain at the bottom of the glass, coiled up in spiral shape and quite motionless. If rain may be expected, it will creep to the top of the glass and stay there until it

clears off. If the leech twists itself and is very restless, there is going to be a windstorm. If it keeps out of the water for several days, look out for a thunder-

storm. The indications for frosty weather are the same as for fine and for snow the same as for rain. In fact, a leech is almost as good a forecaster as the weather man himself.

A Comedy of Errors,

When Baron Haussmann went to Constantineple on a visit to Abdul Aziz, who was then sultan, he had an interview with the grand vizier, who did not know a word of French. At the beginning of the interview the old long Turkish pipes were brought in, and then Baron Haussmann began making a very long speech in French. The grand vizier could not understand a word, but listened most attentively till be noticed that his pipe had gone out and clapped his hand for a servant to come and relight it. Haussmann, thinking he was applauding, rushed toward him with outstretched hand, intending to shake hands and thank him. The grand vizier, seeing his hand put forth, shook it warmly and said "Goodby," under the impression it was Haussmann's intention to leave, and quitted the room.

Reform Blocked.

A Beautiful Pen Picture of Home Life.

I saw a young man, handsome and resolute, and a young woman, turity is wise and well. The man queenly and charming, leave the marriage altar in a shower of good wishes, and repair to the sacred tries is reasonably sure of doing shade of their little nest behind the trellised honeysuckle. I saw them with leaping hearts beautify it and fill it through and through in that case everything bearing on with love and love's ecstatic tokens. I beard their sougs and merrymaking and future planning, and I thought they were happy in the instinct of love and nest making. A little later I heard the clarion Huntsville Post. chant of the first born, herald of the keenest joys and bitterest griefs that ever stimulated or depressed the human heart. I saw the light of a new experience in the parental eyes, the glow of divinity, the ecstacy of heaven. saw the happy home nest peopled States in the Union, we have withwith cherub faces and alive with in its border a great variety of chubby palms and the white dove of peace and joy bovered reverentially over the hallowed scene. saw the crimson turn to gray on in Texas than in any State of the the cheeks of the mother and the United States. face of the father tattooed by the chisel of care. I saw the children grow into ripe maturity under the warm seasons of parental love, and strenuous manhood and charming womanhood going in and out with golden sheaves of promise. And been living in a prairie or timber then I saw the instinct of mating country. It is better for the man and nesting rise like a tide in the to bend to suit the soil, climate pulsing channels, and the kisses of and seasons than to try to bend adien, as one by one they left the the country to suit the man. In home nest to find a home tree of other words, it is much easier to general rode on. their own and a nest of their own in its sacred shade. I saw the old For those of limited means, and couple once again alone as they who have been accustomed to livbegan, but broken in spirit and ing in a timbered country, the sorrowful in their desolation .-Comanche Chief.

Not Boll Weevils.

Some days ago W. N. Flynt of the Cline's Prairie section brought in some insects gathered on weeds and which he and his neighbors thought were boll weevils. Mr. Adair Wynne of the Gibbs bank sent them to State entomologist at College Station and very promptly received notice that they were not the family with milk and butter. boll weevils, but a bug that infested the indigo plant. They are some smaller than the boll weevil and are silver gray in color and make their appearance early in the spring. Doubtless many people have found these same kind of bugs and called them boll weevils. It is not safe to say that no weevils will make their appearance this

What the Texas Farmer May and May Not Do.

The Texas farmer may not own an oil derrick, but he can raise more cotton per acre than any other man on the globe.

He can raise better rice and more of it per acre than the farmers of other states.

He may not sell Northern Pacific stock at \$1000 per share, but he can raise a few Herefords or Shorthorns and each calf will bring from \$100 to \$300.

He can have a variety of plums, pears, berries and grapes.

He can raise vegetables that equal those of any other section and have them on his table all the year round.

On a single acre he can raise from 200 to 300 bushels of sweet potatoes, and on a little patch he can raise enough rice to feed a Chinese colony.

He can raise tobacco equal to the best Cuban product.

He can plant pecan trees in his fence corners and can have an income of \$10 to \$12 a year from

From an acre he can make 200 gallons of syrup of the finest grade. He can place a few "bee gums" in his orchard and have all the honey he wants and to sell.

He can breed horses that will come up to the Kentucky standard. He may not have an automobile, but can do most of his work while riding on a sulky plow

under the shade of an umbrella. His wife can raise poultry of every kind from pigeons to pea-

His daughter can make better butter than ever came from Elgin, and his boys can breed Belgian hares enough to stock a mammoth rabbitry.

The Texas farmer can be the most independent and easy-going money-maker and best citizen on earth.-Texas Stock Journal.

The Hand and Heart.

Collier's Weekly last week had

a splendid editorial on two characters that are now before the American people seeking a name and place other than financial wizards. The two dealt with were Carnegie and Rockefeller who held that the world needed sympathy more than financial help, while Carnegie acted on the line that it needed cold dollars rather than sympathy. While both men were making every effort to build for them a name as philanthropists and benefactors, both of them were conspicious failures. While they had done much in their line, Washington, April 15.—The both were viewed indifferently by that Texas will derive more profit with no mention of Bryan's uame. generous in his sympathy, but The opinions for a platform are withheld the hand that should be state in the Union. Speaking of this, makes kidneys and bladder right. recipient. Gonzales Enterprise.

If young people, especially in small towns, would form "courtesy clubs" or graft this idea upon existing organizations, it would result in great advantage not only to the young people belonging to such associations, but also to the towns themselves.

We find a great many men and women side tracked all along the pathways of life because they were not taught the value of good manners and of a fine, gracious courtesy in their youth. The result is that they have grown up hard and coarse and repulsive in manners and have not been able to win favor or attract trade or business. In other words, their bad manners and repulsive ways have kept them back and handlcapped their ca-

It is astonishing how fine manners and politeness in children develop into ease and attractiveness in manhood and womanhood. Other things being equal the employee who is selected for advancement is the one with good manners, a fine, gracious demeanor, a good presence. These qualities are the best kind of capital, even better than money.

Everywhere we see young men and young women drawing big salaries largely because of their superior politeness. The fine mannered are wanted everywhere as superintendents, as nen, as traveling representatives, as clerks, as private secretaries or as credit men. In fact, agreeable deportment is the one indispensable quality sought after everywhere.

There is nothing else which will so quickly open the door to opportunities, to society, to the hearts of all.

Courtesy is to business and society what oil is to machinery. It makes run smoothly, for it eliminates the jar and friction and the nerve racking noise.-Success.

A GOOD CHANCE TO BUY.

But He Hadn't the Nerve to Pay the Price Demanded.

A handsome bachelor of Baltimore, well known in social and educational circles, acknowledges the truth of the following story: He was driving with a very pretty and attractive young woman when on the outskirts of the city they met a lad of about twelve years leading by a chain a singularly ugly but finely bred bull terrier. The pretty girl went into raptures over the dog. and her escort determined the animal should be hers.

'Say, sonny," he called, "what will you take for your dog?" "Nawthing," replied the lad.

ense," cried Mr. Blank, "Here's "No, I won't. This here dog ain't for

"Ten," said Mr. Blank, and then, growing desperate, "fifteen, twenty."

But the owner still refused. All the time the conversation was going on the youth, although talking to the man in the buggy, kept his eyes fixed on the other occupant of the vehi-

cle, and at last be said gravely: "I don't want yer money, but if you'li just give that lady there a kiss you

may have the dog." Mr. Blank was speechless. He stared at the boy an instant and then put the whip to his horse, starting him off at a

The story goes that a mile was gone over without a word being spoken, when as the horse's rapid gait became slower as it turned down a country pretty girl turned ever so and said shyly, "Oh, Mr. why didn't you buy that dog?"-

New York Pawnbrokers.

New York the pawnbroker is comto wait a year and one month bee offering pawned articles for sale. During the last month of this period the merchandise must be so advertised that the person who pawned the goods may recognize them as his property from the description given in the published notice.

As an instance of the severity of the court against any infraction of this rule a pawnbroker who loaned a certain lady \$6,000 upon a valuable necklace valued at \$12,000 and at the empiration of the required limit sold the jewels without specifying explicitly enough so that the lady was enabled to recognize and redeem her property the New York court ordered that the lender pay to the lady \$6,000 and a year's interest on the value of the necklace.

A Curious Royal Custom.

When any Spanish sovereign dies, the body is at once submitted to the process of fossilization, nor can it be placed in the royal pantheon until the body has been absolutely turned into stone. Curiously enough, the period required for fossilization varies considerably. Some royal bodies have become solidified in a very short period, while others have taken years before the fossilization took place. It took exactly thirteen years to convert the body of the father of Alfonso XIII. of Spain into

Forced to It. "You ought not to beg," she said. "No, ma'am," admitted the tramp. "Why do you do it?"

"Well, ma'am, I wouldn't if I could git people to give me money by jest lookin' sad."--Chicago Post.

Stewed Apples. To stew apples so each quarter is unbroken and so clear one can almost see through it is an art, and yet it is a simple thing to do if one only knows how. Peel tart apples very thin, cut them in quarters and remove the cores and seeds. As fast as you can peel and quarter them drop the apples in a placed cold water to the depth of two inches. When the apples are all in, put the saucepan over a slow fire, cover it till the water reaches the boiling point, then remove the cover and let the apples simmer almost imperceptibly till you can pierce them easily with a broom splint; then sprinkle the sugar over them and let them just simmer until it is all melted. Remove the saucepan from the fire and let it stand where the apples will get cold before turning them into a dish for the table. -Green's Fruit Grower.

The Samovar. While it is generally known that the samovar is a distinctly Russian article, the fact may not be so familiar that in the land of the czar the manufacture of samovars is a privilege of the government, and the imperial crest is found upon every genuine Russian tea urn. The reason given for the government's engaging in this manufacturing business is that the samovar may be within the purchasing power of the humblest peasant, and it is therefore found in the humblest as well as the most pretentious home in the land. The real article is always heated by charcoal, but returned travelers, and particularly Americans, find-it more convenient to have their samovar adapted for spirit lamp heating when intended for use in their own homes.

Not Dutiable.

"Have you any articles of value with you?" asked the customs inspector. "Nothing," answered the returning ow whom I expect to marry as soon as and five is centipeds." I land."

> > Living by His Books.

An amusing story is told of Robert Buchanan, the author, who, like many another well known literary man, had a hard struggle at the beginning of his career. He had just published one of his early novels when one day he found himself the possessor of a fine appetite, but without any money in his pocket at the moment to get a meal. He thought of ways and means for

some time and finally hit upon an idea. He went to the office of his publisher and asked for three copies of his new novel, directing that the cost should be placed to his account. Armed with the fresh, nicely bound volumes, he immediately sought out the nearest secondhand bookseller and disposed of the copies for as much as they would bring.

"I remember I enjoyed that dinner tremendously," he said. "It proved to my entire satisfaction that even the humblest author could live by his books!"

A Bit of Diplomacy.

An American from Texas got into trouble with a gendarme in the City of Mexico during the Spanish-American war, when foreign and local sentiment was against the United States. The offense consisted largely in the fact that the stranger was an American, but he landed in jail nevertheless. Not wishing to see the Texan spend the night in jail, his friends sallied forth to obtain his release. First they visited the home of the American ambassador and found he was out of the city. Then they went to the home of the English minister and found him in bed. By dint of insistence they succeeded in getting into the house and were met on the staircase by the minister himself, arrayed in official pajamas. Carefully disguising the fact that their imprisoned friend was an American, they appealed for assistance. "Ah," said the minister cautiously, "your man is in inil, is he? But tell me, is he a British subject?" "Your excellency," said General Agremonte, who acted as spokesman, "the prisoner speaks English perfectly." "Ah," said the minister, "then the presumption is in his favor?" Half an hour later, thanks to the personal intervention of the Britfrom the Mexican jail.

The Tune Was Familiar.

An interesting anecdote is told of the old tune to which a well known song is now sung. The story runs that when the army of the first Napoleon was in Egypt in 1799 the camp for awhile was near the pyramids. One afternoon about sunset the band was playing, and the natives of the desert had collected and were listening to the music. Nothing unusual happened until the band struck up a tune which we now hear under the name of "We Won't Go Home Till Morning." Instantly there were the wildest demonstrations of joy among the Bedouins. They embraced each other and shouted and danced in the delirium of their pleasure. The reason was that they were listening to the favorite and oldest tune of their people. The tune had been taken to Europe from Africa in the eleventh century and had lived separately in both countries for over 700 years. .

What Is Happinesa?

Happiness is the greatest paradox in nature. It can grow in any soil, live under any conditions. It defies environment. It comes from within. It is the revelation of the depths of the inner life as light and heat proclaim the sun from which they radiate. Happiness consists not of having, but of be ing; not of possessing, but of enjoying. It is the warm glow of a heart at peace within itself. A martyr at the stake may have happiness that a king on his throne might envy. Man is the creator of his own happiness. It is the aroma of a life lived in harmony with high ideals. For what a man has he may be dependent on others; what he is rests with him alone. What he obtains in life is but acquisition; what he attains is growth. Happiness is the soul's joy in the possession of the intangible. -William George Jordan.

Cheerfulness,

It is said there is nothing which diffuses itself more quickly in a family than the coolness, indifference and discontent which manifest themselves in the countenances of one of its members. This thought is not absolutely true. There are some things which communicate themselves with as much rapidity and more force. They are a bright smile, a frank and open manner, a cheerful face, a happy heart.-Selected.

A Mean Dig.

Maude-Mr. Willing asked me to accompany him to the opera tomorrow evening.
