District Rally L. M. S.

Mrs. W. M. Reeves and Mrs. Eugene Henley, of Fort Fort, will hold an all day District Rally July 9th, 1913, beginning at 10 a. m., and 2:30 p. m., in the Graham Baptist church. Every sister, old and young, is urged to attend and give these visiting sisters a hearty welcome. Those from our sister churches, in town and country, are cordially invited to meet with us.

Mrs. S. R. Crawford, President L. M. S. and Woman's Auxiliary to Young County Association.

Mrs. Corley Dead.

Mrs. E. E. Corley died at her home six miles east of Graham, Friday night and was buried in Oak Grove cemetery at 4 o'clock Saturday afternoon. She leaves five sons and two daughters, all grown. She had been in bad health for a number of years.

Mrs. E. H. Morrison and children will leave tomorrow for a visit to relatives in Haskell.

The music was furnished by the Graham Concert Band. The boys enjoyed the day and appreciated the many courtesies shown them by the Loving people.

One of the main features of the day was a ball game between Jacksboro and Loving. It was one of the best games of the season. The only runs made was by the Loving team in the last half of the eighth inning, when four men found their way around the diamond. Soon after the game closed a cloud appeared which put an end to the joyous day.

Those in attendance from a distance are loud in their praise of the Loving country and the Loving people and all look forward to another picnic at Loving in the future.

GRAHAM NEW SCHOOL BUILDING

Work began last Friday on the new school building. If there are no delays in the work it will be finished in time for school in September.

When the building is finished Graham will have the best building in this section of the country. We have long had the best school, but have needed more room.

The readers of The Leader have noticed from time to time the advancement that has been made in the Graham school. Plans are being made to make next year better than any previous year. Our school is affiliated with the State University and has been recognized as a high school of the first class by the Department of Education at Austin.

Before pupils enter colleges and universities they should finish some high school course. The Leader is glad to recommend the Graham High School to boys and girls throughout this section and would be glad to see many of them enter this fall. All colleges and universities give full credit for work done in the Graham High School.

Election May Be Called.

The Leader has been informed that an election in Graham Independent School District will be called in the near future for the purpose of voting bonds to install a new heating plant in the school building.

It is understood that the present plant will be inadequate for heating the building after the new addition is finished, hence the necessity of voting bonds to clarify the situation.

LOCAL TENNIS TOURNAMENT ENDS

The tennis tournament which has been going on every afternoon, that the weather permitted, for nearly two weeks, wound up Monday.

As we went to press last week the last game of doubles had not been played. Intense interest centered in this game as the champions of the Shawnee Court were the players: Messrs. Lynch and Doty against Ed Graham and Q. Street. The result was a score of 6 to 2, 6 to 5 in favor of the first couple.

From where our record stopped last week, the singles run: McClatchey vs. Hall 6:1, 5:6, 6:1. Short vs. McClatchey 2:6, 6:4, 6:4. Short vs. Reed, 6:3, 6:1. Doty vs. Short, 6:4, 6:3. E. S. Graham vs. Lynch, 6:3, 6:5. E. S. Graham vs. Doty, 6:4, 6:3.

We have given the winner's name first, so it will be seen that E. S. Graham holds the championship for singles.

Among the ladies, several were out of town, so only three played. Their games stand: Mrs. Rose vs. Miss Rubenkoenig, 6:1, 6:5. Miss Nelson vs. Mrs. Rose, 6:1, 6:4. Miss Nelson hold the ladies championship.

We heartily congratulate Miss Nelson and Mr. Graham on their singles and Messrs. Lynch and Doty on their winning in the double game. And we say "hurrah" for the many splendid plays made by many of the others.

A good crowd witnessed these games, many seated in buggies and autos. They proved so enjoyable that it is likely another tournament will occur before the season closes. We thoroughly endorse these open air sports, and are glad to see natural roses in the ladies' cheeks, and strong, healthy lungs for the men. Of course, good appetites go with these and a general exhilaration of spirits comes from exercise in the open air.

Picnic at Bryson.

The Woodmen of the World at Bryson have arranged to have a big picnic at that place Saturday, July 12. Circulars have been printed and distributed inviting all the people of Young county to attend. An interesting program has been arranged for the occasion.

New Brick Completed.

The last brick was laid on the new brick Wednesday and it will in a few days be ready for occupancy. The inside work is being rushed so that the building will be completed at the earliest possible moment.

Record time has been made on the construction of this building, but without the work has been thorough and satisfactory in every way.

Presbyterian Services.

Rev. C. M. Dellinger will preach Sunday morning at the Presbyterian church. Services again at night at 8:30 o'clock. Public cordially invited. Gaines B. Hall, Pastor.

BIG PICNIC AT NEWCASTLE

The big three days picnic and reunion which had been advertised to be opened at Newcastle, opened on schedule time yesterday morning and as we go to press it is full swing.

A large number of Graham people were there on the first day of the celebration, quite a few having gone today and a big crowd is expected to go tomorrow, the last day.

The program, we understand, is being carried out as nearly according to that advertised as is possible. Friday being the Fourth of July and the last day of the picnic, it is expected that it will be the biggest day of the celebration, both in point of attendance and entertainment and in addition to the large crowd of people from this county expected to attend, there will likely be quite a number from Throckmorton, Archer and Stephens counties.

No Concert Tomorrow Night.

There will not be a band concert at the park tomorrow night owing to the fact that a number of the members of the band will be either in Newcastle or Mineral Wells. On the following Friday night, July 11, the usual band concert will be given.

These free open air concerts have grown more popular this year than ever before and a large number of people from quite a distance in the country are always in attendance. It is hoped that the report of the report of cancelling of the concert for tomorrow night will reach all the people in time to keep them from coming to town to be disappointed. A good crowd is hoped for on July 11th.

The house rules committee today
agreed on a rule by which the de-
ficiency appropriation bill to be re-
ported early in July will carry a
specific provision to abolish the
commerce court and vest its juris-
diction in the U. S. district courts.

Representative Calloway, of Tex-
as, who has repeatedly blocked a
\$4,000 appropriation to send Dis-
trict of Columbia veterans to the
Gettysburg celebration, was called
out of the house chamber for a few
minutes and came back in time
to find the house in roars of laugh-
ter and the resolution unanimously
passed.

A large number of the newspaper
friends of Lieutenant Governor Will
H. Mayes, formerly of Brawwood,
are urging him to make the race for
governor next year and while he
has as yet made no announce-
ment of his intentions with
regard to the proposition, close
friends insinuate that he might
be prevailed upon to offer himself
as a candidate for that office if
his friends bring the proper amount
of pressure to bear upon him. Mr.
Mayes is a clean, honorable and
upright gentleman, is a thorough
business man and would make Texas
a governor to be proud of. He is
an old newspaper man and has
served as president both of the
Texas Press Association and the
National Editorial Association.

The sixth annual session of the
University of Texas Summer Schools,
at Austin, opened on June 14th and
will continue in session until July 31.
The registration this year is larger
than any previous session. It is ex-
pected that over one thousand stu-
dents will have been registered be-
fore the end of the session. The
summer session of the University
was established especially for the
benefit of teachers and other per-
sons who cannot attend the regular
sessions. Teachers employed in the
country and city schools find in
the summer school opportunities to
increase their scholarship and to
become acquainted with university
methods of instruction. In addi-
tion, many students are registered
for courses in the department of law,
in the summer normal leading to
teachers' certificates, and the special
courses in the teaching of agricul-
ture, manual training, and domestic
science.

An Indefensible Proposition
While you can find Americans in
plenty who would like to see the
Philippine Islands off of our hands,
yet we doubt if you can find many
who will endorse the suggestion that
we sell them to Japan.

Such a proposition is indefensible.
It was bad enough that we should
have trafficked in the purchase of
a people, but we did have the ex-
cuse that we proposed to raise them
to a higher level, and then aid
them in working out their own sal-
vation. The time is rapidly approach-
ing when the islanders will be able
to stand on their own feet, as a
ward, perhaps, for a few years
but with every prospect that they
will ere long be able to walk alone.

To sell them to Japan, or to any-
one else is to move backward. The
thought is repugnant and it is not
in keeping with American standards
or with American sentiment. There
is something higher than dollars
in this world—ideals and principles
should not be sacrificed for the
sake of the national purse—and if
such a plan was seriously entertain-
ed it would injure America be-
fore the world and would dim the
light which now shines so brightly
as a beacon pointing the way to all
people who would be free.

War with Japan is unnecessary
and unlikely. Still no one knows
what the day will bring forth. But
even if it should happen that our
country is to be forced into a war
against its desires, still there are
times when peace can be purchased
at too big a price.

We have done big things in a
big way and it is the history of
the country that we try to do what
we believe to be the right, accord-
ing to our lights. So we expect
that the future will be as the past
—possibly an improvement on it.
To fit the islanders for self-govern-
ment and start them on the road
with cheer and encouragement—
that is the American way. To sell
them would be to degrade our coun-
try and debauch ourselves, and few
real Americans are ready to take
that step.

Former Graham Resident Marries.
The following from the press of
Amarillo, Texas, will be of interest
to Fresno friends where the bride,
a sister of Miss Eda Cornelius, deputy
street superintendent, has been a
resident and where she is affection-
ately known among her intimates as
Miss "Dollie" Cornelius.

"Miss Mollie Margaret Cornelius
and Mr. A. S. Fuqua, Jr., were quiet-
ly married Saturday evening at 6:30
at the home of Mr. and Mrs. R. E.
Underwood, 1309 Van Buren street.
Miss Cornelius is a sister of Mrs.
Underwood and has been a guest in
her home since last autumn when
she came here from her home in
Fresno, California, where her par-
ents reside.

The home was beautifully decor-
ated for the occasion with a profu-
sion of cut flowers and ferns.
The simple and impressive wed-
ding service, performed by Rev. R.
F. Jenkins, pastor of the First Baptist
church, was witnessed by only a
few of the relatives and immediate
friends of the bride and groom.

The wedding march was played by
Miss Marie Mauderdale.
The bride was lovely in a gown of
white charmeuse with shadow lace
trimmings. She wore a flowing
white veil, held in place with a
wreath of orange blossoms and car-
ried in her arm a huge bouquet of
white carnations.

Mr. Fuqua is a progressive young
business man of sterling qualities
and holds a responsible position
with the First National Bank.

His bride is a beautiful and tal-
ented young woman and her many
friends will be glad to learn that
she will make her home in Amarillo.
—Fresno (Calif.) Herald.

Miss Mollie Cornelius is well
known here, she and her parents
having lived east of town, and has
many friends who will be glad to
learn of her marriage.

379 Goats in Young County
A census report which has just
been published shows 379 goats in
Young County which are valued at
\$867. The report is based on data
gathered by the census enumerators
in 1910 and relates to that
year.

The total number of goats on all
the farms and ranges of Texas is
1,135,344 and are valued at \$2,214-
077. Two percent, or 7927 of the
417,770 farms of this state raise
goats.

Jacksboro Gazette.
J. F. Boyd received a car load of
autos this week, the first carload
lot received in Jacksboro. Five

J. W. Gaskin has received his
bond and as soon as he completes
making it and it is approved he
will take charge of the postoffice
at Jacksboro which will be in a
short time.

Mr. Marcus Dodd who is log-
ging the Colorado-to-Gulf high-
way came in Saturday night from
Fort Worth and was accompanied
on to Henrietta by Judge J. P.
Simpson and Messrs. F. N. Foxhall
of the condition of the roads Mr.
and Lewis Johnson. On account
of the condition of the roads Mr.
Dodd gave no encouragement to
Jacksboro. The roads were rough
in Jack as they had not been
dragged since the recent rains, and
the road in Archer was very bad.
All will regret that Jacksboro did
not succeed, but the traveling pub-
lic demand good highways and the
towns and counties that build best
will win when a contest comes.

Jacksboro News
There is much complaint still
going up at the destruction by
rabbits. There seems to be more
than ever before. Some are keep-
ing them out by continual shoot-
ing of them, others have put out
poisoned salt in pans out of the
way of stock. This meets with
good success in some cases while
in other cases the rabbits do not
seem to take to the bait.

Last Monday a few of the busi-
ness men of Jacksboro met in
Board of Trade meeting and there
was a long session in discussing
matters of interest for the town
and county. It was decided to not
only continue the First Monday
feature but to enlarge upon it. In
order not to have to call a meet-
ing of the entire Board each month,
it was decided to appoint a gen-
eral committee of 12 men, three of
whom shall be chosen each month
to prepare a program for the next
Trade Day.

The present officers of the Board
of Trade, Mr. J. P. Hackley and Mr.
Lewis Johnson, with the various
committees working with them have
done a world of good for Jacksboro.
It has been done by hard work
and continual effort on their part,
and those who have never done
anything of this kind cannot real-
ize the cost, and work attached to
it. They have managed to get
another railroad for Jacksboro, they
have done much toward the wagon
roads improvement, they have, by
hard work, secured a wholesale
grocery house and numerous other
enterprises.

Mr. J. M. Storie has been put-
ting his spraying machine to good
use since he received it. He first
tried the coal oil emulsion on the
grasshoppers, but this did not seem
to do the work so he tried spray-
ing the cotton with arsenic, which
he says is very effective.

The past month has been one of
unusual gaiety to Miss Hazel Leath.

Since her return home she has en-
tertained the following guests:
Misses Beulah Allen, Lucile Doty
and Vera Norman all of Graham.

It truly represented the splendid
crop conditions in this county this
year.

Two cattle deals were pulled off
in this section of the country last
week. Art Taylor sold W. C. Good-
win one hundred steers and Robt.
Davis sold S. L. Moon two hundred.
J. M. Crudginton of the Sandy

with eight gallons of honey, which
he had no trouble in disposing of.
There are many things on the

Invents Auto Tire.
Wiley Puckett was demonstrat-
ing his invention in the way of an
auto tire last week that bids fair
to become one of the most popular
features of auto building.

This tire is set upon a series of
spiral springs which he fastens to
a rim of any auto wheel, another
rim comes over the springs and this
rim is made so that rubber very
much like that used on buggy
wheels can be put on.

There is no air needed hence no
puncture can occur. Mr. Puckett
has applied for a patent and has
every reason to believe that he will
secure it without any unnecessary
delays. He believes he has an auto
tire that will become very popular
and his invention may be worth a
big sum of money to him some day.

Woodson Record.
Dr. and Mrs. C. B. Van Horn
left Wednesday for Fort Worth
where they went for the purpose of
an operation on Dr. Van Horn's
foot as it is thought amputation is
necessary. He has been dangerously
ill for some time and has been under
the treatment of Dr. Turner. It
is hoped that the operation will be
successful and Dr. Van Horn will
recover his health.

We are informed that new ar-
rangements have been made in re-
gard to the school here. Instead of
J. W. Watson being superintendent
and T. R. Odell, principal, these
two gentlemen will be co-principals,
with equal responsibilities and equal
compensation. No other teachers
have been elected at this writing.

Jermyn News.
A Grasshopper Machine.
Did you ever hear of such a thing
as a grasshopper machine? Well,
there is such and that, too, right
here in our midst.

Tuesday, Wright Davis drove by
our place and had in his buggy a
five-gallon can full of grasshoppers
caught in his grasshopper machine
on his farm. According to estimate,
there were ten thousand grasshop-
pers in the can. The grasshopper
machine is past the experimental
stage. Mr. Davis made his machine
and we suppose two others now in
use by C. M. Davis and D. M.
Spearman.

People who have grasshoppers to
fight should investigate this idea.
It is simple, yet very effective.—
Dr. Hughes and Rev. H. M. Reed
were here Saturday in the doctor's
auto to meet Rev. Cannedy, of Sey-
mour, en route to Bryan to preach
the dedicatory sermon at the Bapt-

Dallas, was to hold the service, but
was unable to be present.

Edward Harvey, of Plano, a young man who has been teaching a country school, has discovered a new method of going to college. He entered the University of Texas Summer School recently, after having ridden from his home, a distance of two hundred and fifty miles, on his motorcycle. Rains and bad roads beset him on his trip, but he was undaunted, and registered without delay in the Summer School. Several years ago, one student rode from his home in Plainview upon his horse, camping out on the way. He traveled a distance of over five hundred miles.

Afternoon Party.

Thursday afternoon at 4 o'clock a bevy of beautifully dressed girls gathered at the home of Mrs. A. E. Logan in east Graham, for a pleasant little party in honor of Miss Ruth Allen, of Goree, granddaughter of the hostess.

Progressive ruck was the favored game for the afternoon, Berenice Miller making high score and was presented with a box of tinted stationery. In the cut Mary Ellen Burkett was successful, winning a pretty buffer.

Dainty refreshments were served by Misses Eula and Allie Logan, assisted by Mrs. Carlton, after which the guests were delightfully entertained by Misses Beulah Bell and Lovella Eddleman at the piano and Juanita Adair and little Ina Mae Price in humorous readings.

Those enjoying this pleasant little affair were Misses Winnie Tankersley, Lottie Bell Wallace, Ruth Doty, Kate Arnold, Beulah Bell, Lillie Morrison, Lucile Reed, Lovella Eddleman, Eileen Henry, Berenice Miller, Mary Ellen Burkett, Nola and Juanita Adair, Beulah and Eula Stone, Willie Kizer, of Spring Creek, and the honoree.

One hundred and forty-four students of the University of Texas were officially commended by Dean H. Y. Benedict of the College of Arts upon the excellence of their scholarship standing. This number received an average grade of B or better in all their work, B denoting good work. A similar report given out in the fall contained the names of ninety-six students while one hundred and fifteen were so commended at the end of the winter term.

County Correspondence

Pickwick

Mr. McKee, who was staying with his son, Lee McKee, fell from a bluff while fishing last Tuesday, and was hurt badly, but was getting along nicely the last time we heard from him.

Born, to Mr. and Mrs. Bud Doan, on June 18, a girl.

The river has been up and Miss Cora Costello has been on this side, but she crossed over Sunday.

Miss Millie White attended a singing at Mrs. J. A. Caudill's Sunday afternoon.

Will say to the Henry Chapel correspondent the reason we Pickwick people did not attend their picnic, it was too far and the people were busy in their crops.

Mr. and Mrs. Kidwell, of Graford, visited Mr. and Mrs. W. O. Porter last week.

The New 1913 Sag **Got in**
With the Patent
Angle Steel Rib

Last season's Sag was pronounced superior by dairymen and stockmen all over the country. It was wholly unnecessary to attempt improvement. Despite this, we came out with this new Model. The feature of the 1913 is the **Angle Steel Rib**. This new invention adds about 50% to the life of a Silo. And wonderful, when you consider the Sag has been known to be the strongest and most durable Silo ever.

Doing the "Impossible"

The Angle Steel Rib has done what other Silo makers only a feat was considered impossible. It has given you a Silo that will last 50% longer than any other Silo. It is made of the best material and is built on the same principle as the Silo. It is built on the same principle as the Silo. It is built on the same principle as the Silo.

Other Noted Features

The Sag has a new feature called "The Silo With the All-Steel Drive Frame". This follows the Sag's long history of being the most reliable and durable Silo. BAPTIST FIFTH SUNDAY MEETING

The Fifth Sunday meeting was one of the very best we have ever had. From the very start the spiritual tide ran high and from every talk made you could clearly see that the brethren had been with the Lord.

The program, as published in the Leader, was carried out almost to a letter up until Saturday night, when God saw fit to send a good rain and services could not be held. We all certainly do thank God for coming into our midst with Bros. Boswell and Haggard. They are young and full of life and vigor; with the cause of our Lord uppermost in their hearts. They are men of power, because they are sustained and skilled workers and were constant companions of our Lord, and gave much inspiration and force to our meeting. As this was the first meeting of this kind they had been with us, we all look forward to the next; where we can meet the splendid spirit and hear the magnificent talks and sermons of these two as well as all the other brethren.

The Pleasant Valley church certainly did a good part by the meeting. Each day there was a bountiful supply of dinner and horse feed and the ground to feed both man and beast.

The meeting would convene at 9:30 a. m., work up to 12 m. and adjourn for dinner. At 2 p. m. we would begin and adjourn at 5 p. m. We certainly had a good and profitable time.

Steps were taken to get an organization in the county to build church houses and we hope before many years, every country church will have an adequate house of worship and all the city or town churches have such improvements as

The outlook in the country was never brighter. Every important community will be reached with a recent meeting and let us pray that God will give us great victories and many souls be swept in to the Kingdom of Jesus.

The Missionary was paid up in full and a nice balance was left in the treasury, and it looks as if we were going to the association one time with our debts paid.

The next Fifth Sunday meeting goes to Ellaville in November. We have a splendid program prepared, and we are all expecting a great

time. Let us all go to this meeting and do our very best level best to honor God and make next year the best in the history of this county. Let us all put our shoulders to the wheels and roll with all our might for the Lord. Help them that help themselves. So, let us do our best for ourselves and Him.

Yours in the work,
Joe R. Mayes.

Memory of Mrs. Phoebe L. Keeter

Sister Keeter, who but a few days ago fell asleep in Jesus at her son's home in Portales, New Mexico, was born in Gordon County Georgia, January 8th, 1848, and was born of the Holy Spirit in the year 1864 and joined the Sardis Missionary Baptist church August 31st, 1870, and was baptized on the following day. She was married to Perry Benson Keeter, September 13th, 1868, at the home of her parents, W. B. and Nancy Akins. To this union were born eight children, two boys and six girls, five of whom are yet living, two boys and three girls.

Sister Keeter put off her earthly tabernacle June 6th, 1913 and her remains were brought to Graham, Texas and laid to rest by the side of her husband, Rev. P. B. Keeter.

The writer has known Sister Keeter and family since 1886, and has never known a more consecrated Christian woman than she was. She lived many years in South Bend, Young County, Texas, where her noble Christian life is well known to many of that community. Forty-nine years did she give in service to her Lord who redeemed and saved her with an everlasting salvation.

To the dear children left behind, I will say, comfort yourselves by reading the precious promises Jesus has given in His Book.

U. S. POSTAL SAVINGS BONDS

Washington, July 1.—Beginning today the government will, in the future, issue postal savings bonds in lieu of postal savings accounts. In no other way may the new bonds be secured than through regular postal savings accounts. Interest will be paid at the rate of 2 1/2 per cent per annum after July 1, 1913. The bonds are redeemable at the pleasure of the United States at any time after one year from the date of their issuance. In case deposits are converted into bonds in less than one year from the date the certificates begin to bear interest, the interest on the deposits are forfeited, just as though the deposits were withdrawn for any other purpose.

Glass Promoter Here.

J. J. Handley, of Wichita Falls, was in the city Tuesday endeavoring to interest local capitalists in a window glass plant.

Mr. Handley represents Independence, Kansas, parties who have a plant that is not in operation on account of the failure of the natural gas supply there.

He stated that the plant set up here and in running condition would be worth \$75,000.00, and that it would give employment to over 100 people.

His proposition is for local capital to take stock to the amount of \$25,000.00 in the enterprise, the present owners taking the balance of the \$75,000.00.

Mr. Handley stated that he would return in a short time and endeavor to get a meeting before the people whom he might interest in the proposition.—Henrietta Independent.

Through the efforts of the chamber of commerce, a candy factory has been secured for Comanche and is now in operation. A good demand for the product assures a steady, growing business.

The work of soliciting subscriptions to the Panhandle State Fair Association has begun at Amarillo, and the committee is meeting with much encouragement. That city will come across with her part during the present week, it is thought, and then outside points will be visited by the committee. The big fair looks like a winner.—Clarendon News.

THE GRAHAM LEADER

The Leader has received the following communication which is self-explanatory and which we are glad to publish. We hope our readers will peruse it carefully and if they have not already contributed to this worthy cause, that they will do so at once. The cause is so deserving and one of such profound interest to every resident of the city that we feel sure no urging will be necessary to bring the citizens to see its importance and cause them to give it their hearty and substantial support:

The Graham Leader,
Graham, Texas.

Dear Sirs:
I enclose herewith a list of the subscribers for the Oak Grove cemetery Fund for the year 1913. This is a matter of interest and importance to the people of Graham and many in other parts of the county and for that reason I will ask that you publish the list and request those who intend to contribute, but have neglected or failed to do so, to attend to the matter.

Yours truly,
E. S. Graham,

MEET HEADS

Gettysburg, Pa., July 1.—Forty thousand old veterans of the war between the North and South are encamped on the field here, the scene of the greatest battle of the Civil War. The old men are survivors of the armies that opposed each other fifty years ago in that bloody struggle, but they meet as friends and comrades, now, not as foes, of the fiftieth anniversary of that mighty engagement. They have lived long enough to forget past bitterness, and to remember only the courage and the soldierly qualities that made Gettysburg one of the greatest battles of the world's history.

The University of Texas celebrated its thirtieth anniversary during the recent Commencement at Austin. Glass reunions, a barbecue, a parade, and a ball game between the championship University team and the Alumni were features of the celebration. Eighteen thousand students have attended the institution since the opening of its doors in 1883 to two hundred students in charge of a faculty of eight persons. More than two thousand three hundred students were enrolled during the regular session this year. In addition to this number, about one thousand are taking the work by correspondence, and another thousand are deriving benefit from the University Summer School which is now in session.

Ordinance No. 60

An ordinance levying a tax on vendors, peddlers, merchants, auctioneers, hucksters and traders in fruits, produce and goods, wares and merchandise as a street permit, where such persons use the street and alleys of the city of Graham in which to ply their trade or calling, and providing a penalty for the refusal or failure to pay such tax.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF GRAHAM:

Section No. 1. That from and after the passage of this ordinance there shall be levied and collected the sum of not less than one dollar and not more than ten dollars per day on all vendors, hucksters, peddlers, auctioneers and traders who ply their trade within the streets or alleys of the City of Graham for the purpose of selling or trading fruit, produce, goods wares and merchandise.

Section 2. That any persons who so ply said trades or avocation within the streets or alleys of the City of Graham and who refuse or fail to pay said tax shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not less than five nor more than one hundred dollars and each day said offense is committed shall constitute a separate offense and shall be punished as such.

murderers. County Attorney Miller and Squire Benson went out and held an inquest over the body of the deceased that night. The writer was present and will ever remember it as one of the most touching scenes he has witnessed. The widow, with her five little ones, the youngest a nursing babe; the stalwart form of the murdered father and husband; the dim light of the lamps; the pale, determined faces of the officers and the jury inquest, hastily summoned, made a scene long to be remembered. The baby died in Graham a few months after and the widowed mother was soon to follow her husband and her little one to the grave. She succumbed to the burning heat of the great drought of the following summer and the four other children, three boys and a girl, were adopted into kind and merciful families and have grown up into lives of usefulness and honor, of which their parents would be proud.

But the murderers escaped; several men were arrested and put in jail and two were indicted subsequently for the murder; every effort was put forth to secure testimony sufficient to convict, but after pending in the courts for a year or two the cases were dismissed for want of testimony, and to this day the murderers of Friedrich Lichte go unpunished except for the pangs of that "worm that dieth not," a guilty conscience. The saying that "murder will out" has, so far, been disproved in this instance.

We come now to consider the darkest, gloomiest days in the history of the county—the great drought of 1886-7. A little rain enough to sprout the corn, fell in April 1886, but from that time on till the first part of September a fiery sun shone down through a sky of brass and blasted and withered everything but hope. Throughout the long days of the summer the people watched the skies and prayed for rain. Sometimes the heavens were clouded and then the people came out in the streets and waited for the falling drops. We remember at one time Col. E. S. Graham and J. B. Norris went out on Mar's Hill near Graham with a quantity of dynamite and bombarded the lowering clouds for hours in the vain effort to force them to give forth their riches of moisture to a perishing earth. But the rain came not. The faithful assembled at their places of worship and fervent prayers were offered to Elijah's God to send to us the blessing He sent to him in the days of old, but to no avail. The curse seemed to be upon the land. At last the time came when something had to be done; people were suffering for the mere necessities of life. Hundreds left the country; others left their families and went forth to labor in more favored fields and thus secure bread for their loved ones. No stricken people on the face of the earth ever faced a famine more bravely and resolutely than those of Young county. Public meetings were at last called and agents were sent forth to other states and more favored sections of this state to appeal for help. There was about \$1700 in the Road and Bridge Fund of the county and the commissioners court paid it out for work on the

roads, supplanting the only money that should be employed at the rate of a dollar a day. J. E. Ryan, F. W. Knight, W. L. Willis and D. C. Brown with others went forth to solicit aid and in the course of time, cars of meal and bacon began to arrive at Weatherford for the drought-sufferers of Young. A central depot was established at Graham, under the immediate supervision of County Judge H. D. Williams who gave his whole time and energy to the relief of the suffering. He was ably assisted by Capt. A. T. Gay and Col. O. E. Finlay. All three of these men are now gone to their reward; to where we hope their work for the people during these dark days will "come up as a memorial." Others deserve special mention of credit, but the list would be too long for publication. The work of the relief committee was to seek out and relieve the suffering; to do this they had to adopt rules requiring the filing of an oath as to the financial condition of the beneficiaries and this came to be called the "paupers oath" and a great many of our people were too proud to make it and suffered want, rather than file the necessary oath with the county clerk. The result was where one undeserving family received relief there were a dozen deserving cases who failed to get it. But the committee searched them out and did the best they could in the face of all criticism and relieved distress wherever it could be found.

On the 10th day of September, a great event occurred—IT RAINED (To be continued)

HUSBAND RESCUED DESPAIRING WIFE

After Four Years of Discouraging Conditions, Mrs. Bullock Gave Up in Despair. Husband Came to Rescue.

Carion, Ky.—In an interesting letter from this place, Mrs. Bettie Bullock writes as follows: "I suffered for four years, with womanly troubles, and during this time, I could only sit up for a little while, and could not walk anywhere at all. At times, I would have severe pains in my left side. The doctor was called in, and his treatment relieved me for a while, but I was soon confined to my bed again. After that, nothing seemed to do me any good. I had gotten so weak I could not stand, and I gave up in despair. At last, my husband got me a bottle of Cardui, the woman's tonic, and I commenced taking it. From the very first dose, I could tell it was helping me. I can now walk two miles without its giving me, and am doing my work. If you are all run down from womanly troubles, don't give up in despair. Try Cardui, the woman's tonic. It has helped more than a million women, in its 50 years of wonderful success, and should surely help you, too. Your druggist has sold Cardui for years. He knows what it will do. Ask him. He will recommend it. Begin taking Cardui today.

Rev. T. E. Cannedy spent Sunday at Bryson, Jack county, where he preached the dedicatory sermon for the new Baptist church. He organized this church, held its first meeting and raised \$1,000 for a building. He has since held two meetings there and nothing would do them but that he should dedicate the new house.—Seymour Banner.

Postmaster General Burleson has ordered, through the treasury, postage stamps estimated to be needed for the fiscal year beginning July 1. The order calls for 11,980,500 ordinary stamps of various denominations; 20,000,000 special delivery stamps; 26,980,000 "postage due" stamps; 31,400,000 stamp books and 1,291,000 coils of stamps to be used in vending machines.

Resignations of collectors of customs whose offices will be abolished by the customs reorganization on July 1, poured into the White House and treasury. One hundred and thirteen collectors will lose their jobs by the reduction of the number of customs districts from 162 to 49. All the resignations were formally requested by Secretary McAdoo. Three collectors declined to resign on the theory that they had been appointed for four years. Their names were not divulged, but treasury officials declared they were not worried over the situation as the new law clearly turned them out of office automatically on July 1.

MADE MORE

Kaffir silage made 28 per cent. more profit than corn silage in feeding beef cattle at the Kansas Agricultural College. Sweet sorghum silage made 3 per cent. more profit than corn silage. This feeding test made with Hereford cattle shows that eastern Colorado, western Kansas, eastern Oklahoma, the Panhandle and all western Texas may be centers for fattening.

Cotton seed meal was fed with each kind of silage. The daily gains made from feeding Kaffir and sorghum silage were slightly larger than those made from feeding corn silage. The chief increase in profit came from the lower cost of both Kaffir and sorghum silage on account of the higher yield per acre of these crops. The yields obtained per acre on upland were: corn 7.1 tons, Kaffir 6 tons and sorghum 8.2 tons. The yields per acre on bottom land were corn 15 tons, Kaffir 17 tons, sorghum 23 tons.

In a two year test at the Kansas dairy cows, it was found that silage from corn, Kaffir and sorghum were practically equal pound for pound for milk production. Cows gave daily per head one-sixth of a pound more milk on corn silage than on Kaffir silage and gained slightly more in weight on the Kaffir silage. Corn silage produced an average daily yield of milk of one-half pound per cow more than sorghum silage. These differences are so small that they show the feeds to be practically equal. The choice of crop to plant depends upon the probable yield per acre.

Prof. O. E. Reed, who made the dairy test, says, "that the time of cutting Kaffir had sorghum for silage is all important in making good silage from these crops. These crops should be practically matured with the stalk still filled with sap. If put up too green the silage will be sour. Kaffir and sorghum should be put in the silo before frost if possible, but it is advisable to let the crop stand until after frost rather than to put it into the silo too green. After a heavy frost the crop must be cut and put in the silo immediately. If it dries too much, add sufficient water to pack well."

Every farm in the Southwest should have one or more silos. H. B. Johnson, Chickasha, Oklahoma, fattens 3,000 or more steers yearly last year he fattened 1,250 head with silage and the others without it. His silage fed cattle brought him \$10 per head profit above those fed without silage. He says that every farmer even though he has only 80 acres should have a silo and that if he were a small farmer, and lacked credit, he would pledge everything he had to buy a silo rather than go without it.

When a farmer has money he can build a concrete silo or buy a metal or wood one. If his means are limited he can dig a pit silo and plaster it with cement. If he cannot afford the cement, he can dig a pit silo and fill without plastering. A pit silo without walls plastered will probably fail in after it has been emptied the first time but the profits from one filling will make it pay.

H. M. COTTRELL, Agricultural Commissioner, ROCK ISLAND LINES.

Senator Fall gave the Senate its first official information of the report of the committee which investigated the Madero revolution in Mexico, in a speech urging the repeal of the law of 1912, which permitted former President Taft to forbid by proclamation shipments of arms across the border. As a member of that committee, Senator Fall declared he was convinced that not an American dollar was used in financing the Madero revolt.

...ordinary coun-
...power you will see
...small puddles along the wheel ruts
...and sometimes larger pools. This
...water stays on the road surface
...because it cannot drain away into
...the side ditches. If you look close-
...ly you will see the ditches which
...have grown up with bushes and
...weeds in many cases, and which
...are so far from the traveled part
...of the road that the rain water
...does not drain into them. That
...part of the roadway where the
...wagons travel is called the travel-
...ed way. To prevent water from
...standing on the traveled way the
...road should be raised in the center
...and should slope gently into
...broad, shallow ditches. It is then
...said to have a crown. If it is 10
...feet from the center of the road
...to the side ditch, the surface at
...the side ditch should be at least
...10 inches lower than it is at the
...center where the horses travel. The
...road then has a 10-inch crown.
...The rain that falls on a road prop-
...erly crowned will run quickly to the
...side and not soak into the surface
...or form pools. The side ditches
...for surface water should run paral-
...lel to the right of way, and should
...be open at every low point so that
...the water can run out of them
...into neighboring brooks or streams.
...If the ditches merely collect the
...water from the road surfaces and
...it cannot run away, large pools will
...be formed along the roadside, which
...will gradually soak into the soil
...beneath the road and make it so
...soft that the wheels of the wagons
...will cut through the road surface
...and soon destroy it.

Sometimes water runs from along the road into the road and forms tracks or in the middle where the horses travel. When driveways built across the side ditches they frequently form channels for water from the farm yard to run into the road. The pipes under driveways become filled with kaves or rubbish and the water can no longer run away. If the driveways that stop the ditch water were rebuilt so that no pipes were necessary and the ditch could be left open, much trouble from surface water would be stopped.

Sometimes a road runs across low ground or through a swamp where the road can not be drained by the side ditches alone. If the road were built higher like a railroad embankment across such low land and made with a crown, it would be dry and hard. Sometimes a road passes through what is called a cut. This is a place where the earth has been dug out so that the road can go over a hill without being too steep. The water which always flows quietly under the ground on hill sides is known as ground water. In road cuts such water sometimes makes the road very muddy, and the road then needs what road builders call under-drainage. A good kind of under-drainage is a trench to go along under the side drain and about 3 feet deep and a foot and a half wide. In this trench a pipe is laid near the bottom and covered with loose stones no bigger than an egg. When the trench is completely filled with loose stones the ground water, instead of soaking into the roadway, will stop among the stones and flow down the hill through the pipe.

To keep a road smooth and crowned the best method is to drag it with a road drag. A road drag is made easily with two halves of a log which has been split. The log should be about 6 or 8 inches in thickness and about 6 or 8 feet long. The two halves of the log are set 3 feet apart with the smooth faces forward and upright. They are then fastened together with braces set in holes bored through the log. A pair of horses may be used to drag the road and are hitched to a chain fastened to the front half of the log. The road drag should move forward so that it slants across the road in such a way that a small amount of earth will slide past the smooth face of the log toward the center of the road, thus forming the crown. The edges of the logs will smooth out the ruts. The best way to drag is to begin at the side ditch and go up one side of the road, and then down the other. In the next trip the drag should be started a little nearer the center and the last trip over the road the drag may work close to the center itself. Small ridges of earth will be

...called ...
...to make the surface of the road
...smooth and water-tight after the
...sun comes out. The road is always
...dragged after it has rained and
...not when it is dry. A good
...strong pair of horses with a well-
...built drag can drag about 3 or 4
...miles of road in a day, and it is
...the best way to maintain good
...roads. In every county some farm-
...er along each 4 miles of road
...should own a drag and drag the
...road when it rains, and he would
...always find the road in good
...condition when he goes to market.

Owing to the fact that many rural schools were closed at the time when the prize maintenance essay was announced by Director Logan Waller Page, of the Office of Public Roads, it has been decided to expend the limit for receiving the essays to October 15, 1913. In addition to the gold medal given as first prize, two silver medals will be given as second and third prizes. If a child who has submitted one essay previous to the issue of this notice, should care to try again, he is at liberty to do so, but he must be a pupil of a rural school. There is some misunderstanding in regard to the subject of the essay. The idea is to set the children thinking how to better their earth roads with the material they have at hand.
