SNOW DRIFTS ALONG FENCE . . . This fence near Lazbuddie shows the effects of a wind whipped snowstorm which left up to three foot drifts in the area during Saturday night and Sunday. The wind whipped snow almost covers this fence just west of Lazbuddie.

although the ground in front has been cleared by high winds which accompanied the snow, along with -0 temperatures which were recorded Saturday night and Sunday night. An estimated three inches of snow was recorded in the latest winter storm.

Three Year Contract Approved For Dillman

Muleshoe School Superintendent Neal B. Dillman will be superintendent here for at least the next three years as a three year contract was approved by members of the school board during their regular meeting Monday night.

The superintendent, along with Tom Jinks, recently attended the Texas Association of School Administrators Advisory Conference in Austin last week, and a report was given on the meeting. Dillman also recently attended the General Membership Meetings with the Texas Association of Community Schools; Texas Association of School Administrators and Texans for Equitable Taxation.

The board members also approved a request from the Bailey County Ministerial Alliance to have a county wide revival meeting at the Muleshoe High School Football Stadium

July 24-31 and approved a request by the Muleshoe High School band to go on a spring trip to Canon City, Colo. The band will participate in the Music and Blossom Festival April 30 and May 1 in that Colorado city.

Three Way area residents are reminded of the health screening tests scheduled this week. Today (Thursday) and Friday are the final two days for the tests for vision, hearing, height, weight, and TB skin tests for students.

School board members heard various reports, including the budget balances of the operating fund; bank balances; and the current financial report. They approved transfer of \$7,500 to the athletic fund from the maintenance fund and approved payment of current bills.

First Half Stock Show On Saturday

Ken Cook, Lubbock County Agriculture Extension Agent will be judge for the first half of the split Bailey County Junior Livestock Show at the beef show Saturday, January 15.

The show is scheduled to get underway at the Muleshoe High School bus barn at 2 p.m. and will feature the best beef show cattle for the county FFA and 4-H youth. The second show will be the barrow and lamb show on February 24 and 25 at the same location.

After 4 p.m., adults will be tested for blood pressure, diabetes, anemia and other illnesses. The tests are being conducted at the Three Way School.

According to a report from the Tax Collector for the Schools, 69.15 percent of current taxes have been reported as collected, in the amount of \$739,926.60.

Exhibited will be market steers, breeding heifers and feeder steers, and Bailey County Agent Spencer Tanksley said a large show will be conducted during the date of January 15.

He reminded all boys and girls that animals must be in place by 11 a.m. on the date of the show and that entry fees will be paid at this time.

Don't forget the election for High Plains Underground Water District Director, A.W. Webb Gober, incumbent, is unopposed and two county committeemen, including David Stovall and Ernest Ramm, candidates. Eugene Shaw is candidate for committeeman-at-large.

Mrs. Ann Oyler, Mrs. Matilda Reyna and Mrs. Diane Skipworth were all approved as employment for teacher aides to complete the current school year, and the resignation of aide Theresa Cabrera was accepted. Mrs. Cabrera plans to move to Kermit where her husband is employed.

"We are expected a real fine show," he said. "And it will last approximately two hours. We encourage anyone interested in beef cattle and in youth to attend this event and back our youth and their activities."

His domino-playing partners praised the man for his alertness and his continued enjoyment of the game during a surprise party at Foster Fertilizer Monday afternoon. Clark thought he was just going to the fertilizer company, which is operated by his nephew, to play dominoes with his frequent partners, when he was surprised.

Election is Saturday at the Enochs Co-op Gin and the Bailey County courthouse.

Six Weeks Report Card Will Be Pink

According to an announcement by Wayland Ethridge, principal at Muleshoe High School, the third six weeks session of school for 1976-77 ends on Tuesday, January 11. Report cards for junior and senior high school students for this six weeks session are pink, and are not to be returned to the school said Ethridge.

"We are expected a real fine show," he said. "And it will last approximately two hours. We encourage anyone interested in beef cattle and in youth to attend this event and back our youth and their activities."

Clark was born January 10, 1887 in McDonald County in Missouri and moved to Texas in 1905. He said when he was six years old, he moved with his family from Missouri to Oklahoma. They traveled in a wagon which was pulled by a yoke of cows. He said the cows were milk cows and doubled over to provide milk for the traveling family.

Larry Shuttlesworth, a Sudan native, will be moving his glass and mirror company to Muleshoe in the near future from Littlefield.

Report cards will be distributed to students on Monday, January 17, and report cards are not to be returned to the school for sixth through 12th grade students.

At the same time, local 4-H and FFA youths are working hard getting ready for other shows, added Tanksley. He said that five upcoming shows in the state will be visited by Bailey County youth to show their animals, including beef, swine.

His father was a farmer and operated a sawmill. When he moved to New Castle in Young County, Texas, he became a coal miner. Clark innovated the first slope mining, which was sloping in a tunnel under a mountain. He also did strip mining until he moved to West Texas in 1939.

Gavin Ray Clark, grandson of Mr. and Mrs. Bob Hardaway, is in Room 5046 of Baptist Hospital, Jackson, Miss. Gavin is reported to be doing better.

STORM LEAVES DRIFTS . . . A snowstorm, whipped by high wind, deposited snow in drifts on the steps at Muleshoe High School. Students cautiously found the steps through the drifts Monday morning in order to attend class. The unbroken drifts marked the passage of an extremely cold front which went through the Muleshoe area Saturday and Saturday night.

Clark also did some farming in Young County, which served him well after he moved to Parmer County, near Lazbuddie. He said that farms were hard to rent in Young County, so he started checking around and found land available to buy at a reasonable price in Parmer County. He purchased land and moved his young family to Parmer County and established a farming operation. However, he didn't move by wagon as he had moved earlier in his life. He said he had progressed to a trailer and a car by the time he moved to this part of the country.

The longtime resident had married in 1906 in Young County, but his first wife died while giving birth to their fifth child. He remarried in 1925 and he and his second wife had another two children. Five of his children are still living, including a

Commissioners Turn Down County Salary Increases

Relief Dispatchers Get Pay Equalization

Meeting in regular session Monday, members of the Bailey County Commissioners court voted to leave salaries for elected officials and employees the same as they were in December, 1976. An exception was the salary of relief dispatchers for the Bailey County Law Enforcement Center, who were raised to \$2.81 per hour to bring that salary in line with regular dispatchers, who received a raise approximately three months ago.

How about ice packed streets for several days and no accidents reported? That is just what has happened in Muleshoe and Bailey County since Saturday afternoon when an expected snow storm dumped approximately three inches of snow on the ground by Sunday morning.

Lazbuddie Area Pioneer Honored

"He still plays a darned good game of dominoes," praised the domino-playing cronies of 90-year-old Edwin Clark, who was honored by his buddies on his birthday Monday.

Freshmen Stretch Victory Record, 12-0

When freshman basketball players from Muleshoe visited Gattis Junior High School in Clovis, N.M. last weekend, they walked home with the top win in the ninth grade division of the Clovis Friendship Tournament.

Police Report

Only four arrests were recorded during the past several days by local officers.

Bula-Enochs Fire Department To Be Organized

Plans are nearly completed for a community-wide meeting on Saturday, January 15, at 7 p.m. in the community center at the former Bula School lunchroom to organize a Bula-Enochs fire department.

HAPPY BIRTHDAY TO A PIONEER . . . When Edwin Clark, seated, went to play dominoes Monday afternoon, he was surprised with a sneak birthday party honoring him on his 90th birthday. The Lazbuddie pioneer still enjoys his dominoes, and frequently goes to his nephew's business, Foster Fertilizer, where he enjoys playing with his friends. Pictured with him here are from left, his son, Wayne, and grandson, Loy Dale, who were in on the surprise, but didn't tell him until the party was ready to start. Of course, his birthday cake had a motif of his favorite pastime.

Supplemental Bird Feeding
Although you can plant trees, shrubs, vines, and ground cover in your garden and yard to furnish birds with food and cover, there are certain times of the year when supplementary food will be utilized by your feathered visitors.
If you plan to put out food for birds, there are several procedures you could follow for best results.
"Feeding birds should be done twice a day, every day, and once the birds flock to the feeding area, don't stop or you will cause a hardship or even death," said John Smith, non-game biologist.
"Once the birds know you are going to feed them, they will

come in growing numbers and depend upon this new food supply," Smith continued.
All birds have a high metabolism rate and to survive long winter months, a continuous food supply must be maintained.
Eating habits of birds can generally be divided into two groups: a diet primarily of insects and other small organisms, and a diet mainly of seeds.
The various sparrows are the most familiar seed eaters and a display of commercial bird seed, grain crops, sunflowers, or a mixture of these ingredients will draw these birds along with aggressive bluejays. For troublesome birds, place a separate feeder some distance away allowing the smaller birds a chance at the food.
The insect eaters such as swallows and chickadees prefer suet (all-fat trimmings from meat) or table scraps in an aerial feeder.
Use a variety of suet and seeds and if a particular species of bird is desired, determine what that bird likes, and display it

separately from the rest.
Another part of the bird's diet that is overlooked is grit. Sand particles and crushed shells help grind the food in the bird's crop and provide useful minerals. A cupful of grit on the food platter would be welcomed by birds.
As spring nears and green plants and insects appear, ease off slowly on the bird feed but do not stop suddenly. A transition period between winter and spring feeding habits will occur but even April and May could be a critical time as long, cold rainy days keep birds from finding adequate food for survival.
Like man, birds are creatures of habit and it may take awhile before your bird banquet is discovered and used. But once it is, you will enjoy the birds and their antics which seems to make the winter days pass a little faster.

SPURIOUS CHRISTIANITY:
Acts 19:13-15 (For a better understanding read versus 11-22) This recorded incident in the experience of the New Testament Church clearly sets forth a case where men had but a surface knowledge of Christ and His Kingdom's Work. All they knew about Jesus and His wonder-working power was hear-say. These men certainly didn't act like they had had a personal experience with Jesus. And the truth of the matter was - they hadn't. In the name of this Jesus, great miracles had been performed and they were simply trying to cash in on this strange power.

JESUS WAS THE CHRIST WHOM PAUL PREACHED:
The sons of Sceva thought Paul had some magic in being able to cast out demons in the Name of Christ. But Jesus is not a magician's trick. Simon Magus as recorded in Acts 8:9-22 had the same conception of Christianity. This strange power has appeal to many who would try to capitalize on it and thus profit by it. Jesus was not and is not the kind of Christ who could be possessed, believed in or preached by proxy. If one casts out devils in the Name of Christ, it will not be by the soul. Christ is not, nor has He ever been a tool in the hands of wicked

designers. Christ will not thus be used. During His public ministry He was often asked to show them a sign or perform a miracle for their benefit. To them it was a matter of entertainment and He never yielded once. The Christ Paul preached was well known to the demons. They said: "We know Paul, and we know Jesus, but we don't know you." They had clashed with Jesus many times and I'm pretty sure they spoke the truth when they said: "We know Jesus." They knew Him to their own undoing.
THE CHRIST WHOM THE DEVILS KNEW: The devils had openly opposed Christ but they had lost every battle. They had turned to persecution, to legal blockades, to religious prejudice, but such methods had never been fruitful. For awhile it seemed to work, but always in the end, Jesus Christ was the victor. And when this failed - they turned their attention to imitating Jesus. This method has proven a more effective weapon because imitators are worse than open foes could ever

be. When you find a person who seemingly talks like Jesus, walks like Jesus, and who does many things Jesus would do, but whose life has not been changed by Jesus, you have a real problem on your hands. But the success of even this method is of short duration. The name of Jesus is rendered meaningless and powerless when spoken parrot-like by the lips of a fake religionist. There are preachers and teachers and just plain ordinary folks who pose as Christian instructors - but the only Jesus they know is the Jesus that someone else has - for they themselves are strangers to the real Christ.
THIS JESUS IS THE CHRIST WHO PREVAILED: His word grew and prevailed in spite of all the opposing devils. Not all the devils in hell can prevail against the gospel of this Christ. The gospel of Christ has conquered every inch it has gained by personal conquest. And if a person is a true believer in Christ - He is quick to confess his sins - bold to denounce his wrongs - and

ready to destroy his wicked devices - for Christ makes new creatures out of them. No sacrifice is counted too great to make for Christ. If our works of art are anti-Christian - then let them be burned at any cost.

Voters Approved Cotton Referendum

Producers of upland cotton have voted in favor of amending the cotton research and promotion order to provide for a supplemental assessment on each bale of cotton they market, the U.S. Department of Agriculture has announced.

A preliminary count of returns on a mail referendum which ended December 17 shows that 67.1 percent of the producers

voting favored the proposed amendment, with 35,842 in favor and 17,147 voting against the proposal. Approval by two thirds of the producers voting, or by a majority accounting for two thirds of the cotton represented in the referendum, was necessary for the amendment

to become effective. Effective date for the amendment will be determined after the referendum results are officially tabulated and announced -- a process which will take about two weeks, according to officials of USDA's agricultural marketing service.

Mahon Talks Farm Future With Secretary

Congressman George Mahon met this week with Secretary of Agriculture designate Bob Bergland to discuss future appointments to USDA policy positions and other matters of importance to American agriculture. The Congressman stressed to Secretary-designate Bergland the importance of having people in key positions in the Department of Agriculture who understand the special problems of Texas agriculture.

Bergland and the West Texas Congressman also conferred about particular provisions to be included in the new farm bill to be written by Congress this year. Mahon emphasized the need for a farm program which will provide greater stability in agricultural markets and assist the farmer in obtaining an adequate return on his investment.

Mahon pointed out to Bergland the need for retaining the disaster provisions of the present farm program, as well as seeking ways and means to improve their administration.

Bergland, a member of the House and a member of the House Committee on Agriculture, will resign his House seat when he is confirmed by the Senate as Secretary. Bergland is regarded by his colleagues as an able, sincere, and well informed friend of agriculture.

Beginning with the 1977 crop, the supplemental assessment would be four tenths of one percent of the value of cotton as determined by the cotton board and the Secretary of Agriculture. This amount, together with the \$1 per bale growers now pay, will be used to strengthen cotton's competitive position and to maintain and expand domestic and foreign markets and use for U.S. Cotton. The administration of this program is handled by the Cotton Board, comprised of producer representatives named by the Secretary of Agriculture.

Contract...

the high school cafeteria, 7 a.m. to 7 p.m. The terms of David Stovall and Carl Bamert are expiring.

According to figures released to board members, school enrollment is down a total of 62 in all schools this year. Junior high school leads the drop in enrollment with 30 students less than last year, while high school only has two students less than the same time last year. Mary DeShazo Elementary shows a drop of 17 students and 12 less in Richland Hills Primary. There is also one less student in special education. Total school enrollment for this year is 1,748.

Recent workshops were discussed and reports given on the work sessions including teachers certification and school transportation.

Snow...

Cont. from Page 1

quate even with increased demands to extreme cold.

A spokesman at West Plains Medical Center said colds, bronchitis and influenza and pneumonia continued to plague area residents with the off-again on-again cold to warm weather. The hospital continues to be at near peak occupancy and the doctor's waiting offices remain full of winter-related illnesses. No major epidemic of any type has been reported however.

Mild weather was expected to continue during the next several days throughout the area with daytime temperature expected to be in the 50's for Wednesday and Thursday, with nighttime temperature reaching downward to the high teens and low twenties.

Outdoor activities were expected to be hampered due to the slow melt of the snowcover and wet grounds.

No major cold conditions were expected for the next several days, with members of the 4-H and FFA hoping for continued good weather through the stock show scheduled for Saturday afternoon.

County...

Cont. from Page 1

Terms of court were set for the third Monday of each month for Justice Court and the first Monday in each month for County Court.

Appointed as Road Overseers were the commissioners of each respective precinct, Bob Sanders, Matt Dudley, Loyd Stephens and Rudolph Moraw. Dr. Gary Albertson was named county health officer with an annual salary of \$1,283.52.

Members of the commissioners court also made no decision on a proposal by Gene Lowe to purchase a tract of land adjacent to the proposed Bailey County Agricultural and Civic Center site. They indicated they would reach a decision in the near future.

Routine bills were also paid during the all-day meeting, along with approval, with minor changes, of the budget for the County Extension office in the courthouse.

ON MARIJUANA USE

A recent government survey released shows that American young people are using marijuana more often, but the overwhelming majority continues to frown on other drugs.

Finance Companies Ask Increased Interest

"Finance companies are trying to pass a bill that will legalize loan sharking in Texas and clog the courts," said Senator Bill Patman of Ganado today. "Loan company lobbyists have publicly called for raised in present interest rate limits to enable them to charge Texas borrowers as much as 25 percent more than the extra-high rates they are already gouging them with. The charges on a 37-month loan of \$1,000 would increase from \$339.17 to \$425.50 under the loan company proposal."

"Only \$165.87 can be charged for the same loan under the constitutional 10 percent limit, but in 1967 the Legislature authorized the \$339.17 finance companies now charge. Under the 1960 amendment to the Texas constitution, the limit of 10 percent only applies where the Legislature does not legalize higher rates. The Legislature is now unlimited by the constitution as to the interest rates it may authorize."

"Without new legislation, the loan sharking penalty for deliberately charging such outrageous interest (\$425.50) would be \$851.00, plus reasonable attorneys' fees fixed by the court. The loan company bill will not only permit the lenders to escape the penalty of \$851.00

and the attorneys' fees but will enable the finance companies to go to Texas courts to enforce such unconscionable contracts," said Senator Patman. "Our already overcrowded court dockets will swell from lawsuits brought by loan companies to enforce the higher rates. The administration of justice will suffer throughout Texas."

"It is particularly inappropriate for loan companies to be seeking higher rates at this time. Their own borrowing costs have been sharply reduced in recent months. The prime rate has gone down from 12 percent in July of 1974 to 6.78 percent in October 1976 (latest month for which figures are available) -- a decline of 43.5 percent. Yet these powerful special interests have served notice they intend to pressure legislators for a sharp increase in interest rates imposed upon Texas families."

Senator Patman said, "The battle against high interest rates will be more severe this coming Session than any in recent years. Unless people throughout our state get in

touch with their legislators and other public officials, the loan industry will prevail.

ON KICKBACKS LAW

The Senate has passed a bill to make it a federal crime to demand political kickbacks from state employees paid in whole or in part with federal funds.

ESA To Sponsor District IX Meeting

The Epsilon Chi Chapter of Epsilon Sigma Alpha met for the monthly business meeting on January 4, in the community room of Tri-County Savings and Loan Association. Hostesses for the meeting were Mrs. Charles Isaac and Mrs. Wayne Tunnel. The program was presented by Mrs. Ronnie Barrett. She introduced Jerry Mick and John Blackwell, who gave a short

demonstration on how to use CPR - Cardio Pulmonary Resuscitation.

Following the program, a business meeting was held. Items discussed included spring rush and the District IX meeting that is to be held in Muleshoe, January 22.

Members attending the meeting were Mrs. Allen Smyer, Mrs. Jack Rennels, Mrs. Wavne

Tunnell, Mrs. Charles Isaac, Mrs. Ronnie Barrett, Mrs. Andy Douglass, Mrs. John Blackwell, Mrs. Charles Moraw, Mrs. Derrell Matthews, Mrs. Johnny St. Clair, Mrs. Jerry Gregory, Mrs. Terry Parham, Mrs. John Birdwell, Mrs. David Anderson, Miss Virginia Bowers, Miss Judy Lambert and Miss Janet Ellis.

More women than men moving to lecture roles.

Girl Scouts Presents Life Saving Methods

The Girl Scouts will have a demonstration on life saving methods Friday, January 14, at 7:30 p.m. at the Muleshoe State Bank Community Room.

John Blackwell and Jerry Mick will demonstrate mouth-to-mouth resuscitation by using a life size mannequin and a baby mannequin. A film will also be shown.

All parents are expected to attend this meeting with their Brownie or Girl Scout daughter.

Ester Turner Guest Of Young Homemakers

The Sudan Young Homemakers met Monday, January 3, in the Homemaking Cottage. Ann Carson led the opening ceremony.

Ester Turner of the National Multiple Sclerosis Society from Lubbock brought the program. Its latest developments and the work being done in the Lubbock area to better the equipment and service for MS patients. The Young Homemakers will be sponsoring a Read-A-Thon program to be offered to the school children in the near future to help raise money for MS.

Following the business meeting, refreshments were served by Dyanna Humphreys, Nancy Harrison and Cheryl Kinzie to Joan Gaston, Charle Anne Williams, Rita Ann Conley, Barbara Bond, Doyleene Seymore, Nell Ingle, Dorothy Hill, Geneva Newman, Kay Wiseman, Sharon Thornton, Deanna Humphreys, Ann Carson and special guest Jody Tension.

The Young Homemakers will be serving cold drinks, coffee and donuts at the local F.F.A. 4-H stock show, Saturday, January 22.

Miss Arthur, Gibbs Repeat Vows

Vows were repeated by Miss Billie Kay Arthur and Boyd C. Gibbs Friday, December 31, in the New Deal First Baptist Church. Rev. E.D. Throckmorton of the Faith Temple in Lubbock performed the double-ring ceremony.

The bride is the daughter of Mr. and Mrs. Charles Arthur of Lubbock. The bridegroom is the son of Mr. and Mrs. Ben Gibbs of Goodland.

The ceremony was performed before an arch candelabra with spiral candelabrum on each side. Baskets of pink and white floral arrangements completed the archway. Candelighters were Terri Castner and Carla Kay Arthur, cousins of the bride. Special wedding music was played by Mrs. M.M. Hutcheson. She was accompanied by Miss Wanda Kelso, soloist.

Escorted to the altar by her father, the bride wore a gown of veiled polyester organza, accented by a high neckline with scalloped Venise lace trim. Sheer illusion fell over the front and back of the gown. The bodice was trimmed with Venise lace appliques with seed pearls. The gown had a natural waistline and full circular skirt with a chapel train. Her waist length

veil fell from a tierra of Venise lace, accented with seed pearls. The bride carried a bouquet of white roses and carnations.

Maid of honor was Miss Nancy Arthur, cousin of the bride. Serving as bridesmaids were Rhonda Heisel, Janette Caviness and Renee Hargrove. They wore floor-length dresses of pink with burgundy trim, and pink hats with burgundy velvet ribbons. They carried an arrangement of pink carnations with burgundy streamers.

Willie Gonzales served as best man. Gary Gibbs, brother of the groom, Larry Trevethan and Grant Griffith were groomsmen. They wore burgundy tuxedos with pink shirts. Ushers were Chuck Arthur, brother of the bride, Junior Ashmore, cousin of the bride, Richard Heisel and J.L. Hutcheson.

Following the ceremony, a reception was held in the Fellowship Hall of the church. Laid with white lace over pink, the serving table was centered with an arrangement of flowers in the bride's chosen colors of pink, burgundy and white. A white tiered cake, decorated with roses and love knots in pink was served by Mrs. Kay Ashmore, aunt of the bride. Punch, served in crystal appointments, was served by Mrs. Pat Atterbury and Diann Gibbs, sister-in-law of the groom.

After a wedding trip to Ruidoso, N.M. and other points in New Mexico, the couple will be at home in Lubbock.

The bride is a graduate of New Deal High School and is a Junior at Texas Tech. The groom is a graduate of Three Way High School and a student at Lubbock business college. They are both employed in Lubbock.

Portales Associates Hold Meeting

The Portales Associates met Tuesday, January 4, at the Tri-County reception room for their regular monthly meeting. They worked on craft articles for the gift sale for the Portales Christian Children's Home which will be this fall. At each meeting they will be working on this project.

Members present were Mrs. Modene Elmore, Mrs. John Bennet, Mrs. Gary Duncan, Mrs. Roland McCormick, Mrs. Elmer Cornelison, Mrs. Rheil Williams, Mrs. Ethel Julian and Mrs. Mabel Caldwell.

Trail Blazers
The pioneers who blazed the roads now have descendants who burn them up.
-Tribune, Chicago.

Selecting A Nursing Home

COLLEGE STATION - Finding a nursing home which provides the services and an atmosphere a person needs and prefers takes time and effort, as well as information, Mrs. Vivian Blair, family life education specialist-aging, says.

"Considering that a nursing home becomes a person's home and community for as long as he remains there explains how necessary and worthwhile the search can be.

"It helps to plan ahead for the future of older members of your family as well as your own later years. Advance planning makes one better able to locate the right nursing home care at the right price - or to find suitable alternatives to nursing home care. It also enables one to accept the decision to enter a nursing home in the event it becomes necessary," she said.

Mrs. Blair is with the Texas Agricultural Extension Service, The Texas A&M University System.

"Explore the alternatives to nursing home care in your community or area. There are increasing services available such as visiting nurses, home-

makers and home health aides. These services enable a person to remain in his own home longer, she pointed out.

"When an older person needs help with dressing, shopping, meal preparation and personal chores, and when these needs cannot be filled by his family or community services, then nursing home care could be needed. It is also needed when the older person requires medical attention which the family cannot provide at home or when keeping him at home severely upsets family life.

"The decision should be discussed among family members - including the patient. Consult your physician. Always consider

the patient's needs and preferences. After all, his lifestyle may be changed. Everyone, regardless of age or degree of health, has a right to influence his own fate. Consider family needs. No one needs to feel guilty about a loved one moving into a nursing home if all alternatives and consequences have been carefully weighed and if the nursing home is chosen with care," she said.

The specialist pointed out that contrary to general belief, only five percent of all people 65 years of age or older reside in nursing homes or similar institutions. But if you live to be 65, there is one chance in five that you will die in a nursing home.

Sudan FFA Launching Membership

The newly formed FFA Alumni Association of Sudan is launching a local membership drive this week. Anyone interested in FFA is eligible for membership.

The aim of this organization is to promote education in new agricultural practices and support the local FFA.

Officers of the organization are Fred Maxwell, chairman; Bo Boyles, vice-chairman; Randy Pierce, secretary; Kenny Fisher, treasurer; and Don Harper, reporter.

the Calvary Baptist Church, came Sunday afternoon and brought a fine message.

Mr. and Mrs. Cliff Odom were visitors in the home Friday.

Mr. and Mrs. Muri Stevenson visited Mrs. Nicholson Sunday. Mrs. Nicholson fell last week and hurt her arm but no bones were broken. We hope she will soon be feeling better.

Audra Jean

Mr. and Mrs. Albert Lee of Muleshoe are the proud parents of a new baby girl born January 7, at 11:10 a.m. in West Plains Medical Center. The baby weighed six pounds and was named Audra Jean Lee. She is the couple's first child.

Grandparents are Mr. and Mrs. Wylie Lee of Muleshoe and Mr. and Mrs. Francis Urbain of Firestone, Colo. Great-grandparents are Mrs. Sarah Lee of Levelland and James Howsden of Sedgwick, Colo.

Pamula Sue

Mr. and Mrs. Sam McIntosh of Muleshoe are the proud parents of a new baby girl born January 7, at 10:50 p.m. in West Plains Medical Center. The baby weighed nine pounds and three ounces and was named Pamula Sue McIntosh. She is the couple's first child.

Grandparents are Mr. and Mrs. T.G. Howard of Muleshoe and Mr. and Mrs. Bobby McIntosh of Cumberland, Kentucky. Great-grandparents are Mr. and Mrs. O.T. Howard of Muleshoe, John Talley of Clovis, N.M., Mac McIntosh of Dimmitt, and Mr. and Mrs. Russell Bullock of Kentucky.

The average distance between neighboring galaxies is about a million light years.

WINTER FUN
If you are one of those farmers who likes to take a winter vacation, remember, take it easy! Resort area traffic can be heavy which means you'll have to drive extra careful. If you go to a sunny, warm climate, don't overdo the first few days. Avoid too much sun and don't try to see and do everything in one day. Relax and enjoy your winter fun in safety.

Clothes Can Insulate Against Cold

COLLEGE STATION - Wearing the right amount and type of clothes is the key to keeping warm - but how much is enough?

Mrs. Becky Culp, area clothing specialist, points out that if a woman replaces a skirt with pants, she will feel 1.5 degrees F. warmer. And wearing a full slip with a dress adds one degree F., while a light long-sleeved sweater adds 1.7 degrees F. and a heavy long-sleeved sweater adds 3.7 degrees F. This specialist is with the Texas Agricultural Extension Service, The Texas A&M University System.

"If a man replaces a summer-weight jacket with a winter-weight one, he will feel 2.5 degrees F. warmer. Also, replacing a short-sleeve shirt with a long-sleeve one adds eight-tenths of a degree.

"Accessories even add extra warmth. If a woman wears nylon hose, she adds one-tenth of a degree, while wearing enclosed shoes rather than sandals adds two-tenths of a degree. For men, a necktie adds two-tenths of a degree, and replacing ankle-length socks with knee-length ones adds six-tenths of a degree," she explained.

Cut electric bills

AUSTIN, Texas (Spl.)-If you want to cut your annual electric bill almost in half, don't march on city hall but take some simple steps at home, a University of Texas energy conservation expert advises.

Energy-saving tips offered by Dr. Jerold W. Jones include:

- Increase insulation in the attic to six inches.
- Weather-strip doors and windows, seal structural gaps with caulking, plug air leaks at light switches and electrical outlets.
- Use 60-watt bulbs except in work or reading areas.
- Set thermostats at 68 degrees in winter, 78 in summer.

Many a flare up between a man and his wife has been caused by an old flame.

-Times, Davenport, Ia.

WINTER FUN

Winter sports and other outdoor cold weather activities bring pleasure to rural America's millions. Don't let accidents spoil your winter fun. Dress warmly. Use the wind-chill index as a guide rather than temperature. Treat frostbite with warm water 108-112 F. no warmer. Sealed and ski on areas free of stumps, rocks and other obstructions, and away from road traffic. Keep cool and enjoy your winter fun safely.

Study Aimed At Heading Off Farm, Ranch Accidents

A move is under way to put a halt to the mounting farm and ranch accidents that occur in Texas every year -- accidents that claim more than 200 lives

Area Resident Now Serving In Germany

Private First Class Lawrence W. Gilreath, 25, son of Mr. and Mrs. George L. Gilreath, Sudan, recently participated in a training exercise in Grafenwohr, Germany.

The exercise demonstrated current doctrine and training methods employed by units in Europe. The demonstration was filmed by Army signal units and will be made into a training film for world-wide Army use.

Pfc. Gilreath, who is serving a six-month tour of duty in Germany, is regularly assigned as a driver in the 2nd Armored Division at Ft. Hood, Tex.

He entered the Army in November 1975.

Pfc. Gilreath is a 1969 graduate of Sudan High School.

His wife, Landa (sic), lives in Killeen.

Thomas Millsap Died Saturday In Amarillo

Thomas C. "Buck" Millsap, 63, died Saturday, January 8, at Veterans Hospital in Amarillo following a lengthy illness. A resident of Muleshoe since 1955, he had been a mechanic up to the time of his illness.

He was born June 24, 1913 in Bromide, Okla., and served with the U.S. Army in World War II where he received the purple heart.

Funeral services were conducted at 2:30 p.m. Monday in Trinity Baptist Church with Rev. David Everts, pastor, officiating. Burial was in Bailey County Memorial Park under direction of Singleton-Ellis Funeral Home.

Survivors include four sisters, Mrs. Dorothy Bowers, Muleshoe; Mrs. Grace Allison, Friona; Mrs. Thelma Sparlin, Victorville, Calif. and Mrs. Ruth Hoffer, Oklahoma City, Okla.; and one brother, Homer Millsap, Muleshoe.

and cause more than 4,000 disabling injuries.

The effort involves a survey in 42 Texas counties that will be conducted throughout 1977 to determine the causes of farm and ranch accidents. From the information provided, safety education programs will be launched.

Coordinating the Texas Farm and Ranch Accident Study is Dr. Gary S. Nelson, agricultural safety engineer with the Texas Agricultural Extension Service. Providing yeoman service during the year will be some 700 neighbor volunteers who will be interviewing almost 7,000 of the state's 205,000 farm and ranch families.

"We are really concerned about doing something in Texas to reduce the high cost of farm accidents, both in terms of human suffering and property damage as well as associated production losses," points out Nelson. "To set up a firm base from which to operate and reach out with safety programs, we need to know just what is happening in farm and ranch accidents. That's why the survey is so important. It will provide the best information on the nature and extent of accidents -- what is happening to whom and why."

Volunteers involved in the study will be contacting farm and ranch families in early January to obtain "base data", such as size and type of operation and equipment used, explains Nelson. These same families will then be contacted every three months to determine if accidents have occurred and to

gather all available information on such accidents.

All survey information will be sent to county Extension agents who will in turn send it to Texas A&M University for analysis. Nelson hastens to point out that the information will be completely confidential since only code numbers will be used on the questionnaires. Only the neighbor interviewer will know which farm and ranch families are participating.

"Due to the seriousness of the accident situation and the fact that the individual information will be kept confidential, we hope that the farm and ranch families contacted will all cooperate to the best of their ability," notes Nelson.

The study is endorsed by the Texas Farm Bureau, Texas Home Demonstration Association, Young Farmers and other groups. Local Farm Bureaus are supplying a significant portion of the volunteer interviewers.

In addition to providing guidelines for farm and ranch accident prevention education, the study may help equipment manufacturers identify and eliminate machine hazards, improve 4-H safety education programs, and reduce insurance costs through reductions in accidents and accident costs. The study may also help prevent bad farm legislation and limit legislation to what is realistic and practical, contends Nelson. The ensuing study has nothing to do with the Occupational Safety and Health Act (OSHA), adds the engineer.

"This study is a project by Texans for Texans," emphasizes Nelson. "It has the potential of saving the lives, limbs and productive talents of Texas farm and ranch families as well as preventing the loss of millions of dollars through equipment damage and production losses."

A wise man knows just how far to go and when to stop.

New cancer drug showing promise.

Typical new home in U.S. costs \$42,702.

Gasoline price controls end urged by FEA.

THOMAS C. MILLSAP

introducing... MISS AUDRA JEAN LEE First Little Miss Of 1977

Audra Jean Lee was born Friday, Jan. 7, 1977 at 11:10 a.m. in the West Plains Medical Center to Mr. and Mrs. Albert Lee. This is not only the first baby for Baily County but the first child for the Albert Lees. Little Miss Lee weighed six pounds and was 18 and one half inches long.

Cotton Prices Lower Toward End Of Season

The United States Department of Agriculture's Agricultural Marketing Service reported cotton trading was moderate to slow during the week ending January 7, according to Paul R. Dickson, in charge of the Lubbock Cotton Classing Office.

The Lubbock Cotton Exchange's Spot Quotations declined approximately \$25.00 per bale from the previous week. The base price for grade 41, staple 34, mike 3.5 through 4.9 was 62.35 cents on Friday, January 7, down 475 points from the previous Friday.

Demand was moderate, Dickson said.

Prices paid growers for cottonseed ranged from \$85 to \$112 per ton, mostly \$94 to \$105. Grades 42 and 43 were predominant in classings at Lubbock this week. Grade 42 accounted for 15 percent and 43 made up 24 percent. Bar reduction was assigned to 49 percent of the samples classed.

Predominant lengths were staples 30, 31, and 32. Staple 30 was 26 percent, 31 accounted for 35 percent, and 32 was 23 percent.

Mike readings in the desirable 3.5 - 4.9 range amounted to 33 percent of the total. Mike 3.3 - 3.4 was nine, 3.0 - 3.2 accounted for 16 percent, 2.7 - 2.9 claimed 18 percent, while 2.6 and below was 22 percent.

About 39,000 samples were classed by the Lubbock Cotton Classing Office during the week. Season's total stands at 874,000 compared to 671,000 on this same date a year ago.

Winter lingering chills the lap of May.
-Oliver Goldsmith.

Bargain In Texas Oil Slipping Away

By Billings D. Barnard, Economist
Federal Reserve Bank of Dallas
 When the allowable was reduced to 99 percent in December, crude production in Texas was ordered cut for the first time since April 1972. Then, for January, the allowable was reduced to 98 percent.
 At a full 100 percent, the allowable has been the highest rate of production that could be reached without impairing the efficiency of a field.
 The last time the Texas Railroad Commission cut the allowable was in November 1971. That was from 63.2 percent of maximum efficient production to 62.5 percent.
 Back then, when the country still did not use two-thirds of the oil Texas could have produced without hurting its fields, reserves in the state were so large that even a fraction of a percentage point change in the allowable was enough to affect do-

mestic crude supplies.
 The biggest producer state, Texas, provides about 40 percent of the domestic crude. That is twice as much as the country buys from Saudi Arabia, for example.
 Without the Texas system of prorating production to meet demand, prices would have been lower, at least for a while. But reserves would have been pulled down faster than oil was used, bringing on higher prices soon.
 By prorating production to demand, the state stabilized crude prices, preventing the ruinous overproduction that once wasted resources.
 But despite conservation efforts, effects of the growing demand for Texas crude reserves were eventually felt anyway. Since early 1972, over a year before the Arab oil embargo, Texas has not been able to turn up as much crude as refiners would like to buy. And as

demand could not be met anyway, the commission has let producers take all the oil they could without damaging the fields.
 But now it seems, fields may have been hurt after all.
 Even with care taken to stretch out production as long as possible, fields eventually wear down. Kept too long at what was considered their highest practical flows, Texas fields have become progressively less productive.
 For some, the flow has slowed. For others, the same flow is taking more of the pressure out of reservoirs.
 Either way, it is the kind of waste associated with overuse of resources. With production held so long at such high levels, even though they were once thought the best levels, fields are becoming rapidly depleted.
 Depletion has come in spite of efforts to regain lost capacity of thousands of Texas fields.

In the first nine months last year, for example, 10 percent more applications for drilling permits were filed than in the same period a year earlier.
 Competitions are also up. Through October, more than 10,000 wells had been completed in Texas last year. About two-thirds of them were oil wells, the rest being gas wells.
 That was over 14 percent more completions than in the first nine months of 1975.
 Drilling, in fact, has nearly doubled in Texas since the oil embargo. More than twice as many wells are being drilled as ten years ago.
 But for all the effort to find more oil, by October, crude production in Texas was down 6.5 percent from a year before.
 When production was trimmed back in December, some fields were already falling short of their allowables. Rather than wait to redefine maximum rates of efficiency, the commission

moved by cutting back on the allowable.
 But after a steady decline in output that reduced the flow of Texas crude 13 percent in just four years, the lower allowable did not reduce production anything like the percentage change indicated.
 All told, the reduction in December probably did not amount to more than 7,500 barrels a day. That is very little compared with the 3.2 million barrels Texas produces every day.
 It was enough, however, to point up that Texas crude is a bargain.
 On average, Texas producers get about \$7.64 a barrel for their crude. And until OPEC boosted its prices again, Americans were paying about \$11.50 a barrel for imported oil.
 Having foregone purchases of even a fraction of the crude they had been buying in Texas, processors were forced to buy more foreign oil. Altogether, they probably spent \$30,000 a day more on crude than before the allowable was cut.

The additional cost will be even more this month. And it is apt to be still more in the months ahead.
 There is no expectation of an increase in production, certainly for any length of time. And according to some estimates, the highest practical level of production in many Texas fields may be no more than 80 percent of what was once considered their maximum efficient rates.
Male-female roles focus of UT study
 AUSTIN, Texas (Sp.) — How children learn "proper" male-female roles in the home is part of a study being made by two University of Texas psychologists.
 The study by Profs. Janet Spence and Robert Helmreich has import regarding society's changing assumptions about the psychology of masculinity and femininity, and about male-female roles.

Representative To Be Speaker
 U.S. Rep. Jack Hightower will be one of the featured speakers at the Tenth Annual Membership Meeting of Water, Inc.
 The meeting has been set for Saturday, February 19, in Lubbock with more than 300 Water, Inc. members and guests expected for the yearly gathering. Hightower will headline a program that addresses the unique water problems of the High Plains as Water, Inc. completes a decade of work toward meeting the area's future water needs.
 Water, Inc. President J.W. Buchanan of Dumas said the non-profit organization has served the High Plains well during its 10-year life. "Through the efforts of Water, Inc., residents of the High Plains are acutely aware of our problem and are better educated about water needs than most people in other sections of the state."
 Water, Inc. is a non-profit organization which seeks alternative water resources for the High Plains area. The organization's public education efforts are supported by donations from more than 2,200 members.
 Buchanan said of the annual meeting, "This is the one opportunity for all of our members to gather and show their support for the Water, Inc. cause. With the legislature in session and a revision of the Texas Water Plan likely, it is important for residents of the High Plains to steadfastly exhibit their solid support and unity so that Austin can't help but look favorably upon our needs."

 Too often habits make men instead of men making habits.

 The individual "with an idea" is often a nuisance to his friends.
