But God will never. Wool.

Wool has without doubt been used by mankind in the production of fabrics for clothing from the most remote period of the world's history. The great need of warm material to counteract the inclemency of Winter, especially in Northern climates, has tended in every age to create a demand for this useful commodity, Black destroyed a colony of rats which has hence become a staple in the markets of all nations.

The manufacture of woolen fabrics was introduced into Great Britain about the time of the Roman the wood-work was pulled down, invasion, but there is little doubt the coachman said: "Well, rat that it was known to a limited ex-tent even before this, as Phoenican years ago, a great deal more corn merchants, previous to this period, traded with England for metals, especially tin, and doubtless wool was numbered among the numerous arrival away their hoofs, and had nearticles used in barter in those ancient by driven them mad, times; and it is highly probable that the Aborigines of Great Britain, rude and uncouth as were their customs, were acquainted with in squirrel cages. He had sent some primitive method of manufacturembers of the "birge tail species" turing this commodity. Policy of the Administration

In conclusion, I would sum up the polic of the Administration to be a thorough enforcement of every law, a faithful collection of every tax provided for, economy in the disbursement of the same, a prompt payment of every debt of the nation, a reduction of the taxes as rapidly as the re-quirements of the country will admit, the reduction of taxation and tariff to be so arranged as to afford the greatest relief to the greatest number, honest and fair dealing with all other people, to the end that war, with all its blighting consequences, may be avoided, but without SURRENDERING any right or obligation due to us, a REFORM in the transferrent of Ludians and in the whole the treatment of Indians and in the whole civil service of the country, and finally in securing a pure, untrammelled ballot, where EVERY man entitled to east a vôte may do so just once at each election, without FEAR elestation or Proscription on account.

An Outline of the German Empire.

of his POLITICAL PAITH, NATIVITY OR COLOR.

Considerable misundersto prevail among our American citizens generally, in regard to the status of the new German Empire of which King William is head. While the latter assumes the title of Emperor, the Confederation of States as it exists, is more that of a federal Union, governed by laws passed by a General Congress, whose members in the lower House are elected by the suffrages of the people. Like in our own country, their Congress is divided into two branches, the Reichstag which is the Representative assemblage of the people, and the Council of princes, who hold their positions similar to that of our United States Senate, that is, in the matter of law making for the people.

The German Empire thus far consists of twenty-five States or Principalities as followz : Auhalt, Bavaria, Baden, Brunswick, Bremen, Hamburg, Hesse, Lubeck, Lippe Detmold, Mecklenburg Schwerin, Mecklen- and pillage. burg Strelitz, Oldenburg, Prussia, Renss. Schleiz, Reuss Greiz, Saxony, Saxe Weimar, Saxe Meiningen, Saxe Coburg, Gotha, Baxe Altenberg, Schwarzenburg Rudolstadt, Sonderhausan, Schaumberg Lippe, Wurfemberg and Waldeck.

ALABAMA CLAIMS.—We are informed that the most persistent and unyleding of the private citizens who have claims vs. the British Government are Dr. J. C. Aver & Co., of Lowell, Mass., the manufacturers of medicines. They will consent to nothing less than their demand for medicines destroyed by the British pirates shall be paid in gold and in dollars to the last cent. They are emboldened by the fact that the de struction of their goods by the English in China and elsewhere (for where are not that troublesome nation trampling upon somebody f) have hitherto been paid in full and they now say that they shall be. They however propose this compromise : - Give us Canada and we will call it even, because we can then send our remedies fliere without duty.-Washington News.

A Dangerous Man-

While we are willing to make all allowances for human ingratitude, we must con fess that we were not prepared to find a man occupying the position of Senator of our State, turning all the callousness of an obdurate heart, against the sufferings of a class, who deserve most the sympathy of the entire State. We alludg to those pioneers of progress in our State, who striking into the wilds of the forests or the desolaion of boundless prairies, bring forth from the wastes, rich harvests to be poured into the lap of our common country. The same issue of a journal that comes to us recking with the tales of horrors, of murder and outrage, upon women and children, by the ruthless savages, brings us the foulest blots upon the record of Morgan C. Hamilton, that ever attached themselves to a being who had been trusted by his fellow men.

While prayers written with the blood of nurdered victims are going forth, erying for protection, and a redress of their horrible wrongs, this cold hearted, disappointed misanthrope, casts upon them the foulest slanders, and turns the bleeding and ghastly forms of victims of savage hate, into mocking mummers, to aid him m the car rying out of his malevolent spite against a people whose greatest crime has been the election of him to a position of trust.

We give the words that drop from his lips as the shadows of murdered innocents fall athwart the sun of National security: The Indian policy of the State administration is all wrong. The stories about Indian depredations are grossly exaggerated, and many of them are INVENTED by paries in the interior, who want a contract or authority to raise a company."

If this wretch, this second monstrosity, with all the hellishness of a Calignta or a Nero, in his disposition, will tell when and where and how a story of Indian outrages vas invented, or even depicted in half the herrible coloring of truth, then he can acquit himself of the foulest charges that ever rested against one, who pretended to be of God's Humanity. If not, he will stand tice to Circuit Court. with the people as he stands with us now, branded slanderer, a naievolent wretch who laughs while a suffering frontier is deluged with untold horrors.

Our Frontier.

THAT our claims for protection from Indian outrages, are beginning to receive notice, we call attention to the following, taken from the Washington Chronicle of January 13th. The espousal of our cause by influential Journals, and the untiring exertions of our Congressmen, will soon bring about a state of security, best quaranteed by an efficient protection force

Condition of Texas.

The bill introduced by General Clark in the Bull introduced by General Clark in the House of Representatives to reimburso, the State of Texas for expenditures made in putting in the field a ranger force to aid the United States troops in giving protection to the frontier against the pursions of hostile Indians, awakens a new earsions of hostile Indians, awakens a new interest in the subject, and suggests an in-quiry into the grave indictment cited in its preamble against the Federal Govern-ment for its failure to give ample protec-

It is asserted that these figures do not tell half the story of horror

The inauguration of a State govern The inaggiration of a State government in Texas, in harmony with the Administration at Washington and the first State government since the year the rebellion opened, naturally caused the frentier people to look to that State government to secure protection to the frontier. SMALL ARMS.—A youth, while travelling in California, was ambitiously displaying a small pistol before a brawny miner, whose belt was weighted with two heavy revolvers, when the miner asked what he had there.

"Why," replied the youth, "that is a piated."

"Wal," said the rough, "if you should shoot me with that, and I should find it out I'd lick you like fun."

The fellow spied the policeman, and attempted to give leg bail, and the policeman followed, thus affording an exciting race. The house breaker ran pretty well, so well that he ran straight into the river, induced specially so to do by the stimulus of a shot fired at him by the pursuing policemau.

Nothing daunted by the sight of the San Autonio rolling rapidly, the policeman dived into its watery depths after the fellow, and a struggle ensued. The would be thief was evidently a powerful fellow, for he was fast getting the better of the policeman, and had him half drowned, when two more of the guardians of the night came to his rescue. With the case of one of our webfooted fowls, the would-be robber swam off, leaving our policeman rather chilly from the effects of his too sudden immersion,

WE to-day present our readers with the last of the city charter. Those who have followed us steadily day by day in our print of it, have been able to see how far a few fossilized political hacks have, in their opposition to its wise provisions, scrupled not at the most infamous falsehoods and mis-

Should time and the growth of our city demand any changes in its provisions, they will be made. Not by irresponsible shysters, but by good solid and substantial men, who are determined to keep the city out of the ruts of such fearful management as that which formerly disgraced our place, with the Lyons' administration.

QUILP is responsible for the following:-Fine blood.-Good horse.-Smart man. A less days since one of those jovial and good natured fellows, who are always wilfug to give the benefit of their experience apon any subject, was explaining the fine spoints of a handsome Morgan horse, which he had become possessor of, and which like few days since one of those jovial and good natured fellows, who are always wilking to give the benefit of their experience upon any subject, was explaining the fine he had become possessor of, and which like

al fellow ever possessed, was classed-'smart."

Now it happens that the individual to whom he was explaining the points of the horse, is not much of a stock man; and looks with horror upon the very idea of owning a horse with corn at \$1.60 per bushel.

Perhaps a little indifference on the part of the listener to the brilliant theoretical deas of our jovial fellow, spurred Smarty's ambition to achieve practical results, so having told how smart his horse was, and how still he would stand untied, he started towards the horse (then standing quiet in the street) and the horse happening to move one foot, ye practical "Smarty" roared out

Woe indeed. That horse put out at a pace that would have shamed Bonner's Dexter, and "Smarty" was left to chew the bud of bitter faney, and meet the rather significant grins of a few witnesses of the smart-ness of that horse. The last seen of the animal, he was doing his level best to get by a couple of polite young fellows who had stopped his impetuous gait. "Smarty" now offers anyone twenty-five dollars to take that horse off his hands. ?

HOW TO CARVE-A FEW HINTS ON A DESTRABLE ACCOMPLISH MENT .- Carving is & very desirable accomplishment for both ladies and gentlemen, and should be taught. One cannot learn it by tuition but by practice, joined by a small slice style of serving mean sliced is fast hanishing the necessity of carving gantly printed on fine tinted paper, illustrated with Three Hundred and Weed Endle in the table of the rich, but in midof theory. It is true that the French dle life, where such elegancies are gravings and Two beautiful not practical, a knowledge of carv. COLORED PLAT ing should be a part of a boy's or

girl's education. How often do we hear a person say: "Oh, excuse me, I can't carve; I never tried." Or, if it be attempted, one soon finds himself sadly embarrassed. He grasps the knife and fork desperately. He has learned that a slice of the breast of a turkey is a dainty; that a wing is good; the second joint also; that the leg is not so good. But it is not an easy task to separate them; and he things that he would rather chop wood than cut turkey. He does not know that on the back lies a delicious morsel called the oyster, Sec. 250. All acts done by the acting and the side bones below the second

joint are considered titbits. This must be taught him. Ladies ought especially to make carving a study; at their own homes the task often devolves upon them, and they should be able to perform it with ease, not to be forced to accept the assistance of visitors who would probably dread the operation. The platter should be placed so near the carver that he has full control over it; if far off nothing can prevent an ungraceful appearance. A sharp knife is requisite, and a thin and well tempered blade.

In carving turkey, cut off the wing nearest to you first, then leg and second joint; then slice the breast until the rounded piece appears; insert the knife between them and seperate them, this part is the nicest bit of the breast; next comes the "merry thought." After this turn over the bird a little, and just below the breast you will find the oyster, which you seperate as you did the inner breast. The side bone line beside the rump, and the desired morsel can be taken with out separating the whole bone. Proceed the same with the other side. The fork need not be removed during the whole process. An A garden, Mr. Chairman, was a experienced carver will dissect a woman's earliest home, and horti-culture her first employment. The great field trials at Sedalia, Mo., and at Xenia, Ohio, in the Summer of 1863—where 'The Clipper' met some 40 competitors including all the leading machines built, and was awarded the First Premiums and Gold Medal—proves that the proprietors have been able to sustain in the filed their claims of superiority for The Clipper Machine over all others. Its extraord/nary lightness of draft takes one-third of the labor off the team. The adjustability of the fingers is an extraord. team. The adjustability of the finger-par, to cut high or low without stopping the team is worth \$25 on any machine. It is the only mower that has the true center draft. in cordance with correct mechanical principles. In short, it is the lightest, the most perfectly the least complicated, the most perfectly constructed, the most aximumetrical in design. of any implement of its class.
