Our Successes.

Those of our Democratic friends who are so fond of prophesying the early decay and destruction of the Republican party, would do well not to borrow too largely from the wish which is the father to the thought. The opposition has been doomed, during the last ten years of time, to " see their fondest hopes decay," and this last sanguine prediction is as baseless as the other glers that it has no female members abortive announcements, which one by one have gone down into the sea of oblivion. Republicanism has been tested too sternly and too oft now to falter and fail. Mightier foes never confronted any party, and grander or more complete triumphs were never before gained by any party. That party van-quished a monster rebellion, sympathized with by a powerful faction in the loyal section, as well as cubracing the entire force of eleven States of the Union. It abolished stavery, restored the national authority, established order, and gave to the people of all races and of every condition their proper places of citizens and voters in a free Re-public, making us what no other Republic has ever been, a nation with no class of its male citizens permanently shut out from a share in the government

When the war ended the Republican party met with the monster of official corruption, which is always generated by civil strife, and over threw it. It has given to the world a revenue system under which the public debt is being rapidly and steadily reduced, while the country has continually advanced in all the elements of prosperity and power. Our cities have grown as if conjured up by the power of Ithurial's wand. Our manufactures have adtion. Capital has found remuneral a row of Broadway stores.

Job No. 2.

A certain good-natured old Vermont farmer preserved his constant good nature, let what would turn up. One day one of his men came in, bringing the news that one of his red oxen was dead. "Is he!" said the old man. "Well, he always was a breechy cuss! Take his hide off and send it down to Fletcher's, it will bring the cash." An hour or so afterward the the cash." An hour or so afterward the man came back with the news that 'Lineback' and his mate were both dead. "Are

THE NEXT COTTON.—We have closely examined our exchanges for the last three or four weeks to ascertain the intention of examined our exchanges for the last caree or four weeks to ascertain the intention of the planters with regard to the next cotton erop. From nearly every section of the South the reports agree in stating that the acreage under cotton will be largely reduced this spring. In some districts, it is said, not half as much cotton will be planted as was last season. On the whole, we may safely estimate from 25 to 40 per cent. reduction in the acreage. Planters now fully realize the folly of their action last season in entirely neglecting food crops. They have paid pretty dearly for their experience, and the cotton crop of the South will henceforth, no doubt, be kept within the proper limit of 3,000,000 bales.—N. O. THE papers are engaged in a furious wrangle about the correct ness of Vinnie Ream's assertion that she is a Freemason. Any member of that Order could tell the wran--never had but one, if even that one were not a myth, but still the dispute goes on without abatement. One of the strongest practical denials of woman's rights is the obstinacy with which people refuse to appreciate a joke when a woman makes it. Vinnie merely intended, in call-

ing herself a Freemason, to convey the idea that she was an independent stone-cutter.

—Udolpho Wolfe, Esq., Present: Dear Sir: I have made a chemical examination of a sample of your "Schiedam Schnappe" with the intent of determining if any foreign or injurious substance had been added to the simple distilled spirits.

The examination has resulted in the conclusion that the sample contained no noise.

The examination has resulted in the conclusion that the sample contained no poisonous or harmful admixture. I have been unable to discover any trace of the deleterious substances which are sometimes employed in the adulteration of liquors. I would not hesitate to use myself, nor to recommend to others, for medical purposes, the 'Schiedam Schnapps' as an excellent and unobjectionable variety of gin. Through struggle and suffering, at the Through strugglo and suffering, at the cost of multiform agonies, beconvenients, devastations, the American Idea embodied in the preamble to our fathers Decharation of independence approaches its complete realization. The noble, inspiring assortion that "all men are created equal," and endowed by their creator with inalientable rights to life, liberty, and the pursuit of happiness, is no longer a glittering generality, a poet's fancy, a philosopher's speculation, but the recognized base of our political fabric. The beingu Revolution, which dates from the Moeton Massacre of 1770, finds its logical completion, just one century later, in the XVth Amendment, which gives to the equal political and civil rights of every man born or naturalized in our Republic the shield and defense of the Federal Constitution. The billows of Caste and Privilege may roar and rage around that rock, and may transically seem on the point of washing it away; but its foundations are deep laid and stealfast, and the breakers of Reaction and Slavery are hurled against and dash their spray over it in vain.

We do not underrate the forces of Prejudice and Arist cracy. We do not forget that a very large minority of the American People still, hold in their immest hearts that Blacks have no rights which Whites are bound to respect. We fully appreciate the desperation wherewith all the warring elements of hatred to Republican achievement will be combined and furled against the battlements of Republican ackendency in the Presidential Election of 1872. To Agriculture and the subservientaris, we have devoted, and shall persistently, devote, more means and space than any of our rivals. We aim to make THE WEEK-LY TRUNE such a paper as no farmer can afford to do without, however widely his polities may differ from ours. Our re-ports of the Cattle, Horse, Produce, and General Markets, are so full and accurate, calling, and our regular reports of the Farmers' Club and kindred gatherings, are so interesting, that the poorest farmer will find therein a mine of spggestion and counsel, of which he cannot remain ignorant without positive and serious loss. We sell THE WEEKLY to Clubs for less time its value in dwellings for waste-paper; and, though its subscription is already very large, we believe that a Half Million more large, we believe that a Half Million more farmers will take it whenever it shall be comended to their attention. We ask our friends everywhere to aid us in so commending it.

City Affairs.

Our city council and board of education have taken hold of the subject of public od the few hours or days time spent. Then they must prove their property, meation in a proper and commendable. Let it not be said Texans were so deficient. This they did after several days delay, and ucation in a proper and commendable dard of our public schools, to the height to position. A. 43. which leading States and cities enjoy, and a few mouths will find Sau Antoniomedebrated, among other things, for her next and commedious school houses and her thorough practical system of education.

It is needless for us to descaut upon the advantages of free education to all. There is not a well meaning citizen within our limits but what will look with favor upon the new order of things with favorable eyes, and flud in the charter provisions creating a board of education, an excellence that will increase rather than diminish in time to come.

What is peculiarly gratifying to the friends of our city administration and of our excellent charter, is the fact that with all the designed improvements of this year, there is no increase of taxation over that of formet years, under irresponsible Democratic or knownothing management. Well may the honest and hard working citizen pause, and viewing the paltry allowance then to public schools of \$1800 or \$2400, ask what became of the money then raised; an amount equal to that which now allows \$20,000 for school purposes? The answer is plain. It went into the pockets of a set of impecutions cusses, whose every effort has ever been to rob our city and impover ish it to their individual profit. Thank Heaven, we have no more of it. Our areaent city administration has relieved instead of imposed burdens upon our people. A Democratic debt of twenty to thirty thousand dollars has been paid off. The head and front of our late charter opposition and | ences of mongrels, tried to carry their railroad bond and coupon case through the Supressi Court, thereby filling their individual out the progress and enterprise germinated HEESELP, J. D. Logue, whom the jury found in the last few years.

We have clean neat streets, and will chartly have in position the fine new roadway bridge; yet not a tithe of the money C. Thompson, and C. E. Oweby, but we a has been spent upon grading and repairs of streets, such as in former times, under counsel, Thompson and fivaley yet remain Democratic rule (those good old days as the Grenouitte catts them) was often spent upon one street. Before the year is not additional atrost improvements will have presepaper standers, is now fairly invergebeen made, enhancing the value of properety and bringing our city up to the level size deserves. Next school houses and add: a sourked sign of advancing extractions, on teachers, will bespeak the provident care ravidance of a great improvement in the for the coming generation, and the beautiful river that courses through the municipal limits, will be spanned by elegant and dross of this wrong, feeling confident that adulatantial iron structures at a haif down a jury will pussels the crime, even in so favorable points rather than two.

It is well worth the while of our fair Reflect upon the men who have faithfully pisted or the mode deelin, when their names, conceived and executed the numerous imfactions opposition raises its head, to strike these benefits from your memory and coming ones from your grasp, hid it down tuerbariess, were easily personaled to adopt Down to the legel of its whiskey befullded among of the worst fetures of a state of me spousors, who bring the foul thing of Democracy, into existence as a slur upon the energy, integrity and faithfulness of fair and houset men. Remember, and remembering act the part of the grateful and appreciative citizen.

GROVER & BAKER'S

No 1 Shuttle Machine.

For Tailors, Boot makers, Saddlets, Carriago Trimners, and all others requiring the most ef-fective Lock Stich Machines. This Machine is distinguished from others of its class by the following points of excellence It runs quiet and rapid; without gears, cog-wheel or eranks. It is the most powerful and strongest Machine in use.

It has a Shuttle tension, and uses with equal scility silk, cotton and linen thread, doing all cinds of sewing, from thin musiin to heavy sole eather. GROVER & BAKER, S. M. CO.,

MARCEAU & FAIRWEATHER,

From Genio C. Scott's "Report of Fashions."

Residing at the fountain-head of American enterprise, and knowing the interests of the tailoring business from many years' experience, we most unhesitatingly pronounce the Shuttle-stitch, last invented sewing machine of Grover A Baker, one of the best machines—if not the very best—in the world for tailors use, or for the use of any trade requiring a tight scam in cloth or leather.

We have used the Grover A Baker Shuttle Machine No. I, and find it admirably adapted to our business. It runs lighter, makes leas noise, and is in every way proferable to the Singer machine for either light of heavy manufacturing.

Manufacturer of Clothing, No. 340 Broadway, New York. TESTIMONIALS.

I am the fortunate peasessor of one of your new Shuttle Machines, which you designate as No. 1. I have used many different machines in my business during the past eight years, and it gives me great pleasure in asserting that this one is far superior in all points to any that I have ever used. I want so better. SEBASTIAN BLEST, Boot and Shoe Maker, 194 South 2d Street, St. Louis Mo.

Having used the different cinds of Sewing Machines in the market, including Leavitt's Singer's and Howe's, have finally adopted your No. 1 Grover & Baker Machine; and having used it the past two years, can truthrully say it proves to be the best machine, and superior to any we have used.

YESTERDAY, with its amount of business, made our city fairly groan beneath the weight of heavy laden trains of freight, both going and coming. Main street was a nor New York felt the loss when Logan's solid jam of vehicles for hours at a time, and the way clerks and merchants flew around, and customers, both local and from the country, poured in, was something truly pleasing to see. The banks rolled in and roffed out huge piles of silver and gold, and in fact, everybody seemed to participate in the activity that our city had assumed.

San Antonio is a stirring, thriving place, its business connections are simply enor-

Major General Davidson arrived in our city Friday, to the delight of his many friends, who have learned to appreciate him as a man of sterling worth and a thorough gentleman and soldier,

His stay is necessarily brief, his duties at present being very arduous and onerons. The wear and tear of the last four of five months have made but little impression on him, however, as he looks hale and hearty. His promotion to Major General of the State Gnard Division, was an excellent move on the part of the State, for from a brief conversation with the General, we opine that a speedy and thorough organization of an tional type, ents, &c., and in a few weeks efficient system will be consummated.

ters, arrived from New Orleans, that left Fredericksburg for San Antonie on the 6th instant. Among this wandering mail, was a letter of Mr. Wahrmund's, containing drafts to the amount of three or four thou-sand dollars, remitted to this city, and which had already been considered lost beyond recovery.

Of course, its arrival-was a relief to all parties, and especially to the postmasters at both points. As yet it has been impos sible to determine where the fault lies regarding the sending of this package off its regular route It is pretty well shown that it cannot be the office here, for the arrangements of, and checks upon the postoffice system, here, are such that it could not happen, as it would require the same error at the hands of three different employees at three different times of handling, to send a package astray. All other offices in the State lack the care and system that prevails in the San Antonio office, so to some of them we ascribe the error. ----

WE had the pleasure yesterday of exam ining a work of art, from the hands of Mrs. J. M. Harwell, said work being a life-like portrait of our fellow citizen, S.G. Newton taken with the Masonic dress, and giver by the touches of the painter's hands, all the richness of colors and shade that makes the picture an almost portraiture. To the person of taste the style of painting affords a fine opportunity for study of those intricacies of the art, that books fail to contain theories of; intricacies wherein the subject for sketch or painting becomes a study, and the most striking peculiaritis of the person sketched enter with such fidelity in to the painting, that the effect of semblance is considerably heightened. We have seen the Colonel a hundred times, looking just as he looks in the picture.

He has an earnest, thoughtful look in the picture, but none of that stiffness that ar- 7-371d&wtf)

tists are so wont to infuse into a portiait. The dress, the effects of shadow, the ne trai tiuts of the background show a skillful and experienced training on the part of the lady artist. We accord it the highest enconiums. First, because it is deserving of them; second, because the art is of the highest order of refined judgment and cultivated taste, and lastly, because we feel that Mrs. Harwell has fully sustained the reputation she brought with her, of an artist of rare merit and promise. The picture is for the Masonic Lodge, over which Col. Newton presides, and it must ever be appreciated as a faithful and striking likeness of him, that will outlast perhaps a century." Mrs. Harwell deserves the patronage and encouragement of our entire community.

THE counsel for Logan, in their speeches in his detense for the libel of Judge Gamble, were exceedingly audatory of our worthy District Attorney, Mr. Dittmar. They declared him "the ablest, most faithful, most energetic, and most successful" attorney who ever represented the State in this county. Perhaps not, but we be lieve otherwise. How a State's Attorney could be "faithful" and do otherwise, may appear plain to Devine, Upson & Co., but will not be apparent to anybody else, who ever read the infamous and vulgar slander of the Herald. But the leading attorney for the defense, was energetically indignant ecause the information was filed by a car pet-bagger. There are those who will re member when he was also a carpet-bagger, and a district attorney, but the difference is, that was long ago. DR. SCHENCE advises Conminutives to go to Fiorida in
Winter.

Having for the last thirtyshys years de
voted my whole line and attention to the
study of lung diseases and consumption,
feel that I understand felly the course that
ought to be pursued to restore a felerably
bad case of diseased lungs to bealthy soundness. The first and most important step is
for the patient to avoid taking cold, and the
best of all places on this continent for this
purpose in winter, is Florida, well down in
the State, where the temperature is regular,
and can be bought from any druggist. purpose in winter, is Florids, well down in the State, where the temperature is regular, and not subjected to such variations as in more Northern intitudes. Palatka is a point I can recommend. A good hotel is kept there by Peterman. Last winter I raw several persons there whose lungs had been badly diseased, but who, under the healing influence of the climate and my medicines,

influence of the climate and my medicines, were getting well.

One hundred miles further down the river is a point which I would prefer to Palatka, the temperature is more even and the air dry and bracing. Merlonville and Enterprise are located there. I should give a decided preference to Mellonville. It is two miles from river or lake, and it seems almost impossible to take cold there. The tables in Plorida might be hutter, and patients com-

possible to take cold there. The tables in Florida night be better, and patients complain at times but that is a good sign, as it indicates a return of appetite, and when this is the case they generally increase in flosh and then the lungs must heal.

Jacksonville, Hibernia, Green Cove, and many other places in various parts of Florida, can be safely recommended to consumptives in winter. My reasons for saying so are that patients are less liable to take cold there than where there is a less even temperature, and it is not necessary to say that rature, and it is not necessary to say that where a consumptive person exposes himself to frequent colds he is certain to die shortly. Therefore my advice is, go well down into the State out of the reach of prevailing east winds and fogs. Jacksonville, or almost any other of the localities I have named, will benefit those who are troubled with a torpid liver, a disordered stomach. deranged bowels, sore throat or cough, but for those whose luigs are diseased a mor

southern is carnestly recommended.
For fifteen years prior to 1869, I was professionally in New York, Boston, Beltin ore and Philadelphia every week, where I saw and examined on an average five hundred patients a week. A practice so extensive embracing every possible phase of lung disease, has enabled me to understand the disease fully, and hence, my caution in regard to taking cold. A person may take vast quantities of 'Schenck's Pulmonic Syrup. Soaweed Tonic and Mandrake Pills," and yet die if he does not avoid taking old. In Florida, nearly all are using Schenck's Medicine's, especially Schenck's Mandrake Pills, for the climate is more likely to produce billsus habits than more northern lat-

duce bilbus habits than more northern lat-itudes. It is a well established fact that natives of Florida rarely die of consumption especially of the southern part. On the other hand, in New England, one third, at least, of the population die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cases there. What a vast per centage of life would be saved if consumpcentage of life would be saved if consump-tives were as easily alarmed is regard to taking fresh cold as they are about scarlet fever, small pox. &c. But they are not. Thuy take what they term a little cold, which they are credulous enough to believe will wear off is a few days. They pay us attention to it, and hence it lays the foundation for another and another still, until the lungs are diseased beyond all hope for

My advice to persons whose lungs are af-"fected even slightly is, to lay in a stock of Schenck's Fulmonic Syrup, Schenck's Seaweed Tonic, and Schenck's Mandrake Pilis, and go to Flortda. I recommend these particular medicines because I am thoroughly acquainted with their action. I know that where they are used in strict accordance with my directions, they will do the work with my directions, they will do the work that is required. This accomplished, nature will do the res. The physician who pres-cribes for cold, cough or night sweats. and then advises the patient to walk or ride out.

every day, will be sure to have a corpre on his hands before long.

My plan is to give my three medicines, accordance with the printed di. tions, except in some cases where a freer the Mandrake Pills necessary. My object is to give tone to the stomach—to get up a good apositie. It is always a room stomach when appetite, it is always a good sign when a patient begins to grow hungry. I have hapes of such. With a reliab for food and the gratification of that reliab, come good blood, and with it more flesh, which is close ly followed by a healing of the lungs, Then the cough loosens and abates, the creeping. chills and clammy night-sweats no longer prostrate and amnoy, and the patient get-well, provided he avoids taking cold.

Now there are many consumptives who have not the means to go to Florida. The question may be asked, is there no hope for such? Certainly there is. My advice to such is, and ever has been, to stay in a warm. room during the winter, with a temperature of about seventy degrees, which should be kept regularly at that point, by means of a thermometer. Let such a parient take his exercise within the limits of the room by walking up and down as much as his strength will permit, in order to keep up a healthy circulation of the blood. I have cured thousands by "list system, and can do an again. Consumption is as easily cured as any other disease if it is taken in time, and the proper kind of treatment is pursued. The fact stands undisputed on record that Schenck's Pulmenic Syrup, Mandrake pills and Seawed Tonic, have cured very many of what seemed to be hopeless cases of conof what sumption. Go where you will, you will be almost certain to find some poor consumptive who has been rescued from the very jaws of

who has been rescued from the very jaws of death by their use.

So far as the Mandrake Pills are concerned, everybody should keep a supply of them on hand. They act on liver better than calomel, and leave none of its huriful effects behind. It fact they are excellent in all cases where a purgative medicine is required. If you have partition too freely of fruit and diarrhoes ensues, a dose of the Mandrakes will cure you. If you are applied to sick headsche, take a dose of Mandrakes and they will relieve you in two hours. If and they will relieve you in two hours. If you would obviate the effect of a change of water, or the too free indulgence in fruit, take one of the Mandrakes every wight or every other night, and you may then drink water and est watermelons, pears, apples, plums, peaches or corn, without the risk of being made sick by them. They will prote I those who live in damp situations against chills and fevers. Try them, They are perfectly barmless. They can do you good
