Since the year 1806 we have added to our railway system in the Unites States twelve thousand miles of railroad a year, and we have now more than fitteen thousand miles projected, of which seven thousand five hundred miles are in process of construction. Nineteen years ago we had but eight thousand eight hundred and seventy-six miles of railway, all told, whose earnings were \$30,446,256; and last years we had fifty thousand miles of railroad, whose earnings had raised to \$300,000,000 and the aggregate formage was one hundred millions, against only five millions in interest years ago.

Miscegnation

A correspondent of the New York Tribine relates the following little experience That, shortly after the unpleasantness, he was reserved in a crowded car on a Geory gis ralload, sealed immediately in the run of in ellerity, loud-balking, red meed plant-er and a New York commercial demands, who were discussing the vexed diestion as to whether the negro would work. It ain't no use trying to do nothin' with them, no how; they ain't fit for nothing, except to be improved off the face of the yearth, said Georgia, in an excited manner, with a sweeping gesture, as if he were clearing s field of timber. "It seems to me," re- and torted the Yankee, "that you have been improving them: I see you have got them nearly all white." The correspondent remarks on the unfairness of men in general, by referring to the fact that no one in the whole car giggled except himself. This was the only improvement that re-

ceived much attention in the South previons to the war, but if any person is desirous of ascertaining what an amount of energy was developed in this direction, let him take a stroll over Paseo street bridge take a bird's eye view of the yard full colored children that are playing there. Every possible shade from jet black to light cream color is represented, and the view affords a rather peculiar comment on the miscegenation articles which are occasionally are dished up to the Southern public. Another man to whom the Republican party is indebted is Frank Blair of Missouri. Frank is a good-natured fellow, and does not mean any great harm to any body; but his tongue is powerful and and always swift. He wants to fight over the lost battles of reconstruction, and whenever he gets a chance he drags and whenever he gets a chance he drags them out again and holds them up like a Raw Head and Bloody Bones for political geese to be frightened at.

A Friend not a Fiend.

"Convince a horse that you are his friend and he will gladly do anything for you that he knows how to do," was the substance of Mr. Rarey's teachings, and I have had many opportunities of testing its value and correctness. Good feed and good fences are said to be the best safeguards against breachy cattle, but as regards my own cattle I attach infinitely more value to the former than to the latter, and both are owerless unless accompanied by such anagement as will tend to make the anipals quiet and contented with their lot.

Some of my own fences are quite is ficient to confine them, if they were posed to stray, and I can only account for the singularly good behavior of my herses on the supposition that they feel no temptation to act in opposition to the will of one who is uniformly kind to them.

When I go through the pasture I fre-sently carry a few crusts of bread, an ear corn, or some lumps of salt or sugar, and distribution the by distributing these and a few caresses I ultivate such an acquaintance with my orpteges that I can catch, examine, ordress any of them, without provoking either fear or resistance, and I have also the satisfac-tion of believing that I am regarded with affection and confidence by the noble brutes whom. One of the latest Canfornia crops is tarantulas. They are raised in Calaveras county, and sold, with their wonslerful cells, to eastern fourists as curiosities. The cells are from three to eighteen inchis deep with a water proof lining, coated with a substance looking like chamois skin, but as fine as velvet, with a door or lid which they close after them when they go in. When rearing their young they latch it, bolt it, and then seal it perfectly water tight. They increase about one hundred and fifty feld

Scripture and Science have met together. Genesis and Geology have kissed each other. SCIENCE THE BIBLE.

A book of thriling interest and greatest importance to every human being. The Papers, Pulpits and People are all discussing the subject and book, every man, woman and child wants to read it. The long fierce war is ended, and honorable peace secured, Science is true, the Bible literal, pure and beautiful, both now satisfied and firm friends. God's work days, six actual days, not long periods. This book gives the very cream of science, making its thrilling realities, beauties, wonders and spark-ling gengs a hundred times more interesting.
