Work for Republicans.

Several important elections being expected to take place during the coming year, it behoves Republicans, solicitors for the success of their party, to ask themselves Are we ready? Are we in the full tide of certain of success?

Every Republican feels us, that it is our imperative duty to carry the next election, that it is most particularly necessary for the success of Republicans principles and measures, that Texas should cast her electoral vote for our General; it becomes a moral obligation for every Republican to exert himself to the utmost, to wipe out the stain of the last election.

We will wish that in helping Republicans did their duty, and that, wherever by threats and violence, they were not hampered. In their peaceful propaganda, they should be very responsible, because so even, that the State Control Committee could report an increase of 11,000 over the previous year. Well done, certainly, but we must do better yet, if we would regain that ascendancy, absolutely necessary to insure the success of progressive measures. The Republican party of Texas has proved her liberality by restoring the ballot to all, dispossessed by rebellion. This action resolved, as the sequel proved, an increase in the total voted at the election of which the Republicans received only two fourths, all the rest joining the disloyal Democratic party. This, and nothing else, gave that party the victory to the tune of the four Congressional Districts.

We all know, however, that the tactics of the Democratic party are such, that they are, at a man's service, ready to fix up a platform to suit anything, and they dash that up quickly hot. They are free to do in one State, and propagandists in the other, get standards and organization the general, and then, by a judicious combination of the two, "Death to the South" suggests in another, Carl Schurz Reformed and Conservatives at one meeting, and Yankees bators and revolutionaries at the other.

As regards the work perfectly organized, when they have nothing to propose, they artificially call the so-called constituents of some of the leaders of the opposite party, and when, like Schurz, suddenly, he is called to military duty, or to interfere, and, instead of doing his duty, they keep up a terrible, hellish, "strange and robbery," and by degrees suggest something unworthy, too infinitely better. THAT did we they prove. The abominable acts of tyranny committed by them, the wholesale murders of the Democratic Battalion, the unfeeling administration, and persecutions of thousands of innocent soldiers, are still again, and now, in another.

Carl Schurz Reformed and Conservatives at one meeting, and Yankees bators and revolutionaries at the other.

THAT did we they prove. The abominable acts of tyranny committed by them, the wholesale murders of the Democratic Battalion, the unfeeling administration, and persecutions of thousands of innocent soldiers, are still again, and now, in another.

If proper measures are taken the opposite will again disappear, and Republicans reign triumphant in our beloved State.

This is work for Republicans to do. Are your clubs perfectly organized? Is your friend, your neighbor, your brother a convert to Republicanism? If not, try to convert him. Are all the Republicans of your county educated in date, and does your club meet regularly to discuss measures to increase its numbers?

LOCAL AFFAIRS.

ALICE E. SWARTZ, Notary Public, Es-
tates.

A GENTLEMAN, recently from Fort Clark,
deserves the country this side of Turkey
Creek, as an old deitute of grain.

THOSE men of business in mass them
up these cold days, will find an excellent
article at the "Bimini."

THESE were six deaths reported last
week by the city physician, and they fall
under the heads of age & old age; lack
jaw 1, cellulitis 3, diphtheria 1, heart
disease 1.

We understand that Gov. Davis has
voted the election bill.

We shall await the receipt of his veto
message, after which we will discuss the
matter in all its bearings.

The Journal of Mr. H. C. Bennett
took place yesterday afternoon. It was
very largely attended, and among the par-
ticipants we observed some of our wealth-
iest and most prominent citizens. The de-
ceased was a young man and much liked
by everybody who had the pleasure of meeting
him for his many virtues and amiable
disposition.

The Market—Good live hogs were sell-
ing yesterday, averaging 10 cents per
pound, an extra wight being averaging probably
140 lb each, sold for \$16 each.

Chickens sold readily at \$1.50.
Turkeys were sold at \$1.50.
Eggs held their own at 40¢ per
dozen.

Butter was off 10¢.
Wine—Chianti, \$1.50.

In spite of the heated discussion generally
written to show the ill effects of tobacco,
in spite of being held as a noxious
commodity, to-day, in the great national legis-
lature, Bismarck, Grant, Tabor, Napoleon,
and other great men, and yet to
overcome the strength of their brains.—
These reflections were found by accident
in a copy of the Standard Tobacco Co., Con-
cerns, which I found in the pocket of
one of the learned professors.

It had been arranged, that the reception
should not take place in the blue room,
nor yet in the green room, but in the bar-
room.

GRAND MANNER.

The Duke descended from the coach,
the four edited ladies crowded around
to welcome, that it was as much as Mar-
shall Lyons could do to prevent them from
taking liberties with his person. One of
them, who didn't have any sense, did

not even know that he was in a
position to be received.

Because they knew their rights if they
shook him, that will be for the present.

Knowing in power, and consequently
when the people of all classes are educated,
they will have or later, obtain all the
rights to which they may be entitled, and
then they are free and intelligent, they
cannot be controlled.

Now, then, the next class, read
what follows, and then you will want to
know what is to be done.

If you have any idea of a
rebellion, now down before re-
gression in thought, that Illinois will

at least have the "independence" of having
two worthy successors to the shape of
the school buildings that have recently

been erected, use the bank of the
river, and then you will have

the two public buildings are exactly
alike and were designed by Mayor Thiel-
sape, when built, and still in archi-
tecture of old stone.

The Mayor is inspected the old Florida
Bridge, which is falling.

The aqueduct is situated on high cliffs
steeply adjoining the hillside of Mr. Francis' Cham-
ber, a house which has hardly been changed.

This is a short distance from the
Main-Place, and at the same time in a
healthy portion of the town. The build-
ing, which is of two stories, presents a fine
appearance from the street, and is a model
of compactness and elegance. The base
of which is constructed in the new

stone that was used to build the

Concord Bridge, from the head of the river,

which is probably the most substantial
building in the State.

The aqueduct spans the large cove
measuring twenty-four and twenty-
five feet, well lighted by three high windows
on each side, giving abundant light and
ventilation, two such important necessities
in all public rooms.

The second door is opening like the first and they are
opposite the aqueduct, opposite the high arched
front entrance.

The front, back, and

the top of the building are

decorated with a fine

concrete work.

As it is a good proof, and it was

getting late, we left.

Alexis and Catania, and Alexis painted a

"whiskey stain." (Gosselot & Co.,
catalogue in figures.)

All should come, the public know

how the way to manage it after the man

use of large cities,
