The news that Mount Hood, in Oregon, is throwing out a dense column of amoke, and threatening an active volcante crupiton, surpris-es most Eastern readers, who know the mountain only as they have seen its snowy crest in the back ground of Bierstadt's canvass. Mount Hood is one of of several news of the Cascade Mountain peaks of the Cascade Mountains (known as the Sierra Nevada in California), each one of which is an California), each one of which is an extinct volcano, unless the present manifestation of life makes the word "extinct" in appropriate. The other important peaks are Mount Jefferson, the Three Sisters, and Mount Pitt, being in height from ten to cleven thousand feet; the height of Mount Hood is about thirteen thousand feet.
