try. There are two ways of raising fowls, both very simple, one for warm weather and one for winter. In the first case, you start with a friend along about II o'clock on a Summer's night (not later, because in some States—especially in California and Oregon—chickens al-ways rouse up just at midnight, and crow from to thirty minates, according to the ease or diffiealty they experience in getting the public waked up), and your friend carries with him a suck. Arrived not your own), you light a match and hold it under first one and then another pullet's nose, untill they are willing to go into that bag without making any trouble about it. You then return home, either taking the bug with you or leaving it behind, according as circumstances shall dictate. N. B -- I have seen the time when it was eligible and appropriate to leave the sack behind and walk off with considerable velocity, without ever leaving any directions where to send it. In the case of the other method mentioned for raising ponltry, your triend takes along a covered vessel with a charcoal fire in it, and you carry a long siender plank. The publication of the dispatches from San Francisco announcing the incorporation of San Francisco and New York Mining Company with a capital of \$10,000,000, to develop the new diamond fields near the beadquarters of the Rio Colorado Chiquito has attracted considerable attention, especially as capitalists in this city have taith in the new tails of its exact location, or its predactions, but affirm that it is sus office, the total area of the Unit-the richest diamond mine that has ed States and Territories amounts

of diamonds from the recently discovered fields-how many he de clined to state—and a few rubies had been received by Tiffany & Co., for the purpose of having their value tested. A few of these had been cut. No stone of a greater value than \$400 or \$500 had been ent by them, but some which would probably be worth not less than \$5,000 each, had been out sufficiently to show their quality. The diamonds were pronounced by him fully equal to those from South America and far superior to those from the South African fields. No stones from Arizona have been placed upon the market, the cutting hav-ing been done solely with a view to estimate the quality and value of the gems. The rubies examined by Mr. Cooke were not so good in quality as others in the market .- N. Y

Zach. Chandier's Little Joke

In Senator Chandler's speech at Jackson on Thursday night he quoted the tollowing editorial expression from the Detroit Free Press, the Demogratic Greeley organ: estimation of Greeley would be complete which did not mention his lite long devotion to truth." For 1872.

THE consolidation of Italy, so long fragmentary and important, into one powerful State, with Rome as its capital; the humiliation of France through a series of crushing defeats, anding with the siege and capital attention of her proud and gay meaning the Bourhous sod capital atton of hec proud and gay me-tropolis; the expulsion of the Bourbons from the Spanish throne, and the substitu-tion for them of a scion of the most liberal among royal houses; the virtual absorp-tion of the kingdoms of Saxony, Wurtten-berg, Bavaria, with Badon, Heese, the Hause Towns, &c., under the headship of Prussia, into the triumphant and powerful empire of Germany; and the arming of Russia to ressent her preponderance in the councils of Europa, or to presecute her often postponed but never relinquished often postponed but never relinquished designs on the great city founded by Constantine and the vast but decaying and anarchical dominion of the Sultan, all comarchical dominion of the Sultan, all com-bine to invest with profound interest the ever-changing phases of our tidings from the Old World. THE TRIBUNE, through trusted—correspondents stationed at all points in Europe where great movements are in progress or imminent, aims to pro-sent a complete and instructive panorama of events on that continent, and to mirror the prolonged struggle between middle-age Feudalian and Ecclesiasticism on the one hand and Niteteeuth-Century skepti-cism and accularish on the other. Recorcism and accularish on the other. Recognizing a Divine Providence in all that proceeds and is, it looks hopefully on the great conflict as destined (like our own recent convulsion) to evolve from strife, disaster, and seeming chaos, a fairer and happier future for the toffing misses of mankind. In our own country, a war upon corrup-

tion and raccality in office has been inau-garated in our City, whereby the govern-ment of our State has been revolutionized through an initial triumph of Reform which surpasses the most sanguine antici-pations. It is morally certain that the movement thus inaugurated cannot, is its gress, be circumseribed to any locality or any party, but that its purifying influence is destined to be felt in every part of the Union, rebuking venality, exposing robbery, wresting power from politicians by trade, and confiding it in those worthiest and fittest to wield it. To this beneficent and vitally needed Reform, THE TRIBUNE will devote its best energies, regardless of personal interests or party predilections, esteeming the choice of houset and faith-ful men to office as of all New Departures the most essential and auspicieus.

The virtual surrender by the Democratic party of its hostility to Equal Rights re-gardless of Color has divested our current However parties may henceforth rise of fall, it is elear that the fundamental principies which kave hitherto honerably dis-tinguished the Republicans are henceforth to be regarded as practically accepted by the whole country. The right of every man to his own limbs and since when the equality of all citizens before the law-the inability of a State to enslave any portion of its people—the duty of the Union to guarantee to every citizen the full enjoyment of his liberty until he forfetts it by crime—such are she broad and firm foun-dations of our National edifice; and pal-sied be the hand which shall seek to dissted to the hand which shall seek to dis-place them? Though not yet twenty years old, the Republican party, has completed the noble fabric of Emancipation, and may fairly invoke thereon the sternest judgment of Man and the benignant smile of God.

Henceforth, the mission of our Repub Henceferth, the mission of our Republic is one of Peaceful Progress. To protect the weak and the humble from violence and oppression—to extend the boundaries and diffuse the blessings of Civilization—to stimulate Ingenuity to the production of new inventions for economizing Labor and thus enlarging Production—to draw nearer to each other the producers of Food and all Paperies. Of Grains and of Metale. and of Fabrics, of Grains and of Metals and thus enhance the gain of Industry by and thus changes use gain of normary by reducing the cost of transportation and exchanges between farmers and affishmench is the inspiring task to which this Nation now addresses itself, and by which it would fain contribute to the progress, enlightenmt, and happiness of our race. To this great and good work, The Tribuxe contributes its realous, persistent efferts.

Agriculture will continue to be more especially elucidated in its Weekly and Semi-Weekly editions, to which some of the ablest and most successful tillers of the soil will steadily contribute. No farmer who sells \$300 worth of produce per armum can afford to do without our Market Reports, or others equally lucid and compre-hensive. If he should read nothing else but what relates to his own calling and its rewards, we believe that no farmer who can read at all can show the second out such a journal in The Trinuws. And out such a journal in The Trinuws. And we aspire to make it equally valuable to those engaged in other departments of Productive Labor. We spend more and Ball's New Patent Ivory Eye Cups. Bead on countrymen's generous patronage enumber of the second we are resolved that who can read at all can afford to do withed in varied excellence and interest by those of 1872.
