33 SUNDAY, NOV. 10, 1872.

Sufficient returns have been heard from to show that Mr. Greeley, asthe candidate of the Democratic worst defeated candidate the history of the country exhibits, when there were not more than two real candidates in the field. No one experted that the O'Connor movemore than it was expected in 1848 that cthe Birney sabulition movement would accomplish material resuita. We are not surprised at the result we should have been greatly surprised had it proved otherwise The whole Clucinnati movement was a fraudulent one, and, politically speaking if not otherwise, immoral. It demonstrated the fact, that there considerate has party of principle which could make head way noder the Democratic flag It was a desperate resort to secure from the ranks of the Republican party a sufficient number of its ammers and unservicable troops to samble the leaders in the explode od State's right's dogma to capture a sumcient amount of commissary and quartermaster stores to restore a famishing army to a war footing. In this they have signally failed; and while the whole country may with reason rejoice, there are none who ought to be more glad than those who feel a genuine district of ment of Republican ideas, because this election will bring about a reorganization of the opposing elemants upon deflued principles. Then a piston chamber, where the air acts as we may look for benedicial results to steam would in slevating and depressing the country; a restraint upon the the pistos-rod. Motion is transmitted to Radical tendencies of the Republican party, as well as a restraint upon the extreme tendencies of its opposition. We need in this country, (and the necessity is one based upon a law indiananable to every free country,) two parties so nearly any other force. A machine of this kind side covering is torn to pieces and the bag the area of the late are. A model of it has been sent to the area of the late are. A model of it has been sent to the office of the acciety for the prevention of the Republican party are was used with great success as a substitute for steam in the construction of with a fuculty for outspoken talk and plain English, reported the

We seeknowledge the courtesp of an invitation to be present a range. Total H also invariably on hand with the charge "you did it." There were several bring about this defeat. In the first place the contumacy of the board of appeals and revision in refusing to obey, a writ of the Diagrics Court. Secondly, the apparent intention to unfairness, at least, shown by the notice posted of names of registered voters whom it was proposed to strike from the registrawere of old residents and former which is to be erected at Berliu in front of lated to increase the Republican

vote. Another serious injury was inflicted upon the party in the corporate election, which grew out of the refusion and previsions and appeal to obey the writ of the District Court. The board undertook to justify 'it's action by exhibiting in court a telegram signed by Gov. Davisand Mr. oAtty Gent. Alegan der. ments are quite distinct under the aw. It is not necessary for us to the majority rules. Let us hope that defeat in this Republican city will teach its proper lessons to those who are most in need of them.

In New Orleans, a few days ago, a Chiness firm of that city, Fou-Loy & Co., accused a citizen of a ridiculous charge of theft, of several thousand dollars. The untter was brought before the court, and after a due hearing of Chinese witnesses, vas dismissed. But what was curious in the affair was to hear and see the Chinese vere on hand en masse, and as they all abbered at once the din was deafening. One peculiarity of the trial was that at the end of each Chinaman's testimony the witgess would hurt a china plate which h and with him to the floor, breaking it or ot, as the case bappened to be. Indeed, the plates were the chief feature of the trial, This process of plate-breaking seems to be a special incident in Chinese law ases. It is the method adopted in China o decide upon the justice of a case. When we parties present themselves before the idge, they take the precaution to bring with them a dozen or two china plates scoording to the importance of the trial. An exchange is then made before the mag istrate, and each of the interested parties takes, the plates of his adversary. He whose plates stand the tost the best is edjudged to have the right on his side. The Chinese resconing, justifying this pro-due of plates, is about as follows: Confu-cins is averything; when he permits the plates to break it is because their owner. wrong, and vice versa. With the plates you have no corrupt juries, no partial adges, and no lawyers who make the truth appear false. The plates break or they do not: they regist or they do notall depends upon them. And this is why the Chinese believe that their judicial system is the best of all the world.

Segrounble Suggestions. The heavy mists and cold night down which characteries the present season are vary trying to delicate engunizations, and is low-lying and awampy localities they preduce an enermous even of intermistent fevers of various types and degrees of intensity. At this very time there are probably half a million of people in the United States suffering from periodical fevers by minematic fegs and exhalations. What makes the prevalence of this evil the more deplorable is the fact that it might in all cases be easily prevented. Malaria and damg produce little or no effect upon the aystem pre-fertified by a course of Hostet ter's Stomach Bitters. Every fall and apring hundreds of letters are received from persons residing in fever and agne districts, who state that while their neighbore are inespitated for labor by that debilitating disease, they have been happily exempted from attack by the regular use of the great vegetable antidote to missma. As a chlologopic or specific for intermittent and remittent fevers the Bitters may be justly accounted infallible. They eralicate the complaints in their most obstinate forms; but the wiser course is to fore-stall attack by taking the preparation as a preventive. The amount of productive labor withdrawn from active service during several mouths in the year by malarious maladies is immense, and the pecunis ous maladies is immense, and the pecuniary losses to individuals, families, and the nation from the cause is incalculable. Bear in mind that by toning and regulating the ayatem with Heatester's Bitters before the calamity comes, it may always be escaped; and let it also be remembered that indigestion, general debility, biliousness, constinuation, pervous complaints, and indeed almost all disturbances and derangements of the physical system are controlable by this general restorative. 45

A REMEDY FOR DISPRESTA.

The stimutating influence of Buchu up en the mucus membrane of the stomach and bowels, has given it reputation in Dysand nowers, as given it reputation in Jys-pepsid. It augments the appairte and pro-motes digestion. In combination with Pepsine and Bismuth when there is a de-ficiency in gastric secretion, its beneficial effects are decided and really wonderful. In Atonic Dyspepsia complicated with urinary diseases, it tends to prevent the malassimilation of the food and consequent generation of the sedimentary deposits in the urine, while the diuretic property holds the latter in solution and favors its discharge.
