Not versed in the lore of schools, but gifted with a great sum of intellect, the eternal glory of this man is, that he used all the mind he had in patient endeavors to find out the right way; ever on the watch to keep out of his decision everything like bias or prejudice, never deciding until he had exhausted every source of elucidation within his reach. Some questions he could not decide with his own mind, and he knew he could for after the application of the figanot. In such cases he bent all his ture, as long as life remains in the powers to ascertaining how the body, the whole of the limb, from subject appeared to minds fitted to the place of the constriction to the

Carlyle can seldom hear the name breaking forth with an explosion of contempt, especially, it is said, if there is a American within hearing. Washington is the exact opposite of a fell Carlylean hero. His glory is that he was not richly endowed, not sufficient unto-himself, not in different to human rights, opinious and preferences; but feeling deep-ty his need of help, sought it where alone it was to be found, in minds fitted by nature and training to supply his lack. It is this heartfelt desire to be right which shines January. so affectingly from the plain words of Washington, and gives him rank so far above the gorgeous bandits

On the right of the President, in the place of honor, sat Jefferson, now forty seven, the senior of all his cottengues older in public serv ice, too, than any of them; tail, erect, ruddy, noticeably quiet, and unobtablic in his address and demeanor; the least pugnacious of meu. The Grass Tree.

Among the anomalies of Australia is a singular growth of the forest that deviates as much from a tree as a kangaroo from the ordinary types of animals, although it is called a tree. The grass tree grows in rocky places unfavorable for other vegetable productions. Absolute barrenness is a spot where the plant flourishes best, apparent ly, though elements must abound there which are appropriate neurishment.
