Prestration Practice

Luckily for the sick, the idea that it is necessary to reduce their bodily arrength in order to ours them, is fast dying out. Modern science recognizes the fact that lisease is of itself more than aufficiently lepressing to body and mind, and does ot need to be assisted in its inroads upon the vital energy of the system by violent purgations and other debilitating mixtures. Prostration is, in short, "played out," and the practitioners who still cling to it he so few and far between that they sannot, like their predecessors of the same fatal achool who flourished half a century ago, fill the graveyard with their victims. The introduction of Heatetter's Stomach Bitters in 1852 was the heaviest blow that the old practice of depletion had everreceived, and from that time to the present as the celebrity of the great vegetable in tering, bleeding, water-gruel practice has Queen upon the fellewing merning declined. The effect of this famous preventive and remedy is to strengthen, build up, regulate and tranquilize, not to weaken, break down and violently disturb the system. It is a topic, alterative and nervine, with a pure stimulant as its propropelling and disturbing agent. This stiruulant diffuses the carative and life sustaining elements of the medicine through the whole organization, and brings them nto contact with the sources of languor, delility, low spirits, malariou disorders, &c., are complete and thorough and as a protection against the ailments caused or aggravated by celd and damp is

SUNDAY, FEBR. 9, 1873.

It is evident that the upper and lower Houses of our legislature do not get along together very harmoniously, and that instead of there being a prospect of a speedy close of the session, there is every probability of a prolonged one, without accomplishing any legislation of great merit. The bourbons are devoting their time inpressing revolutionary or unconstitutional measures, and buncomb speeches; while the really useful members are thwarted in every effort to push the proper business. We are glad to see, especially in the Senate, some democratic members who seem to realize the objects for which they were sent; let them and all republican members stick to the real work in hand, fluish it, and then carry an adjournment in spite of the Irelands and Shorts.
