THE Comptroller at Anstin is believed to be a very efficient individual in a small potate patch, if he had somebody to consult with, but when it comes to understanding anything about the management of his office we have never heard of his being suspected of it. In fact a legislative committee sesisted by a number of expert accountants came to the conclusion, after a three months investigation, that his ways were past finding out. There is a great vigilance displayed in collecting the taxes, and the Sherius seem to have no difficulty in finding out how to pay over their money; but when the servants of the State, after waiting for over a year in many instances, ask for the money they have earned they are told that there is no mency there.
