nature.

In the meantime, during 1973, and using some of the first Revenue Sharing money made available, Bailey County had purchased a 20 acre tract of land across from the Roadside Park in the northwest part of Muleshoe as a potential site for the facility. It was thought that this property would be an ideal location, having more than 450 feet of highway frontage and reaching to the county road at the back. So it was decided to locate it on that site. Shortly thereafter, Frank Donahue, with Engineering Associates of Lubbock, was employed by the Commissioner's Court for the engineering and architectural work, and Joe Smith, with First Southwest Company, for the financial services.

The final building design included a 100 X 150 clear-span arena with concrete floors. And adjacent thereto are bleachers with seating capacity of approximately 650 people, a nice carpeted meeting room capable of accommodating 200 people, a large lobby capable of serving as an alternate meeting room, and accommodating as many as 100 people, kitchen facilities, concession stand, animal washes, and another room capable of being used as a three-bay fire station. It also will have two nice offices and lots of storage room. The entire structure contains approximately 26,000 square feet. There will be parking area for approximately 500 vehicles. Streets, parking areas, and other grounds around the facility will be paved.

Bids for construction were received April 29, 1977. The contract was awarded May 12, 1977 to Pharr Construction Incorporated and King Builders, both of Lubbock, who bid jointly. The total price was \$348,368, and work was to have begun May 22, 1977.

However there has been long and almost unreasonable interruptions, in the construction procedures so that the completion date has been delayed by at least six months. It is now expected that it will be completed and ready for occupancy July 1, 1978. The grand opening, with dedication ceremonies, are being planned for July 4, 1978. The July 4 activities will be held in it.

The total cost of the facility, including land site, construction cost, professional services, paving and work done by the County, will be about \$475,000. Of that amount approximately \$225,000 will have been paid in cash from the Bailey County Revenue Sharing Funds, and the remaining \$250,000 by the issuance of certificates of obligation. These certificates will be retired over a period of 15 years or less. They bear 6 percent interest, and were purchased by the local banks. They have 30 day call dates, so they can be paid off any time funds are available. At the present time a .07 cent tax is being levied to pay them and that fund is already building a surplus. So it is expected that they will be retired long before their due dates.

The major concern now, is that it is properly operated and cared for, that it may be preserved and enjoyed for years to come. A fine facility, carefully designed, well built and versatile enough to serve almost any purpose. A small charge will be made for using it and a deposit required to insure that it will be cared for. lines are being developed and will be officially adopted by the Commissioner's Court before opening date.

For legal reasons it is officially named "THE BAILEY COUNTY EXHIBITION CENTER AND COLISEUM." It is anticipated that the public will call it THE COLISEUM.

ACCIDENT CONTROL -- Does wearing a helmet impair a motorcycle rider's ability to hear warning signals such as sirens? On the contrary, a study at the University of Utah found that, because helmets reduce wind noise, test subjects could more easily detect a siren with the helmet on, reports the Texas Agricultural Extension Service.

W.I.F.E. To Hold Meeting

W.I.F.E. stands for Women Involved in Farm Economics. W.I.F.E. is a national organization of women trying to achieve:

- 1, legislative power; 2, investigative power; 3, to educate the public; and 4, to support agriculture.

W.I.F.E.'s primary function is to raise income for raw agriculture products sold. Secondly, their hope is to have sanitation standards set that will make imported beef meet the same requirements that U.S. beef must meet. Thirdly, they want imported beef to be labeled as such, so that the consumer will know what he is buying. The consumer must know when he is buying other material imports, and W.I.F.E. feels that agriculture products should be no different.

If you want to be heard and be a part of W.I.F.E. come to an organizational meeting Thursday, June 8 at 7:30 p.m. in the 16th and Avenue D Church of Christ Friendship Room.
