Call for a Convention of the Germans of Texas.

The undersigned have determined to call a Convention of the Germans of Texas to meet in Austin on the 7th day of August, 1873.

In doing this they are but carrying out a desire which has already found universal expression among the Germans of the State.

The object of this Convention to solicit a free discussion of our present political situation, and to obtain from the German-Americans of this State a plain expression of opinion as to their future position to the political parties, of the land and to unite on a course of action to be pursued by them in the opening political campaign.

The questions to be submitted to sion are " protection of life and property," "the education of the rising generation," "improvement in the financial standing of the State," the "promotion and protection of immigration," and an energetic opposition to all those obnoxious measures which are calculated to impair the personal rights of the

Our readers will find in the col umps of our paper, a Call for the necting of a Convention of the fermans of Texas to take place on August 7th, in Austin.

Not only have the most promi nent of the German citizens of the counties of Galveston, Harris, Washington, Travis, Comal, and Bexar subscribed to the Call, but many others of those and other counties will do so as soon as

On reading the names attached to the call, it will be perceived that the signers are all respectable citizens, that all parties are represented, that they are men who seek no office, and that their only object is to reform the present administration of public affairs.

Although our political position is of a most positive character we extend our hand to the movement, being convinced it augurs well for the State and the German population. An untramelled discussion of public affairs is worth more than ten excellent editorials in the best newspapers of the country. We trust it will result in setting up a platform that all men can subscribe to with a good conscience, and which can be practically carried out.

It is a cheerful sign of the times that the Germans of the land are beginning to take part in public at fairs, that they have determined to be treated as voting cattle no longer, that they are determined to have a word to say in filling the offices of State, and are going to make themselves heard and felt.

We will be able to accomplish this if there is concert of action

As far as the representation of Bexar county is concerned we propose that the Germans be on hand at Firemen's Hall in as great numbers as possible on the 2nd of August at the Republican meeting and after the close of the Republican meeting a delegation of Germans be brief. be selected to attend the Austin Convention.

WELL, we shall not pay much attention to the Espress, hereafter, until the editor comes back, which he had better do as soon as possible, for the reputation of his paper .- Statesman

If the editor of the Statesman would pay less attention to his own paper it would be more readable.

LIKE causes produce like effects. The last Legislature has made itself infamous for its repudiation policy. What the city of San Antonio has done for the county of Bexar, that is exactly what the Legislature of Texas did for the International. It has repudiated his just obligations solemuly entered into. Hence the eredit of San Antonio and the State of Texas are about on a par. If one is lower than the other the cause is to be found in the fact that the Legislature has adjourned and our City Council will continue to be in session for the next 18 months. What would State warrants be worth if the 13th Legislature were to continue in session for 18 mouths from date !

The City Council and the Legislature are both Democratic, they have both disappointed their friends, they are both repudiated by their friends, they have both swindled the people, they have both repudiated, and members of both bodies will be candidates for re-election.

THE editor feels constrained to surren-der at discretion to the almost invincible army of ever encroaching dulness. The odds against the writing up of an enter-taining column of local frems are tremen-

The mails come to time and we have there fore no just reason to complain of the postmaster, the weather is warm but then that is the only kind of weather we have at this time of the year. In fact July and August should be regarded as months of recreation by the people of this State just as the dead of winter in the North is marked by a suspension of business. This ie not a time of the year for hard work, but should be devoted to smoking cigars under leafy bowers by purling brooks, reading light literature and cooling the system with iced refreshments.

How would our subscribers take it if we were to adjourn Court to Boerns and rusticate for a few weeks !.

AFTER a hard day's work no matter whether it has been manual or brain work, there is nothing so refreshing to body and mind as the enjoyment of pleasant society. Our friend Mr. Karber struck the nail right on the head when he established and opened his garden. This pleasant retreat is finely illuminated every night and while the breeze makes the stay there cool and comfortable, the foliage over your head makes you forget that you are in the midst of our rather dusty City.

There was the stere room and the "giving out" of previsions. Living on plantations remote from towns, as many did, and purchasing supplies in large quantities, the keybasket was a necessity. Who ever saw a bouthern housekeeper without that hadge of authority? It stood by her on breakfest table, or was at hand on the sideboard. It went with her on the daily rounds, and its bunch of keys locked up many a thing besides food. The hot bread which smokes on the Southern breakfast board was measured into the cook's kneading bowl the night before. The confee was given out, not the uncertain viriety, half chicory or two-thirds rye and molasses, which we drink who buy it ground, but the best Java, bought green, browned over the fire in a spider, and ground as in wasted. The eggs ware counted for the batter cakes or the pone, and the least minutin of saft and spice, every condiment was distributed under the mistress's eye. This was the only way under that system, of affairs, for with the easy going shiftlessness of Chice and Dinah, had they been as homest as a pane of glass, things would have melted away like anow in a March sun.
