Official Journal of the United States

OFFICIAL JOURNAL OF TEXAS COUNTY.

A. SIMMERING & CO., Proprietors.

A. SIMMERING & CO., Publishers.

TUESDAY, July 6, 1875.

To the Republicans of the 99th Congressional District.

On Thursday the 15th of July, at 12 M., a convention will be held in this city, to take into consideration the nomination of candidates for the Constitutional Convention. All counties in the District are invited to send delegates.

H. MACCORMACK, Ch'm'n Rep. Ex. Com., 29th Dist.

The yellow fever is still epidemic in Key West.

COL. ORRISTO in Matamoros has given order to shoot Cortina in case an attempt is made to rescue him.

The Democratic Convention of the Victoria Senatorial District nominated the following candidates for the constitutional convention: F. S. Stockdale, of Calhoun, J. W. Stayton, of Victoria, J. F. Lynch, of DeWitt.

The earthquake in Columbia was worse than at first reported. In one city alone, Ocuta, ten thousand people were killed and the whole city was destroyed. In most every town in Columbia the Cathedral fell down.

Church Property.

The question has been recently raised in some of the Northern and Western States why Church property should not as well be taxed as private property? If we examine church property we find it to consist of exactly the same material as any other property. It consists of real estate, of wooden, rock or marble buildings, of chairs, benches, gold and silver ware, money, bonds and other articles. All these things can be bought, sold and exchanged. Where there is a church to day, a manufactory may have taken its place next year; where the word of God is preached to day, a Turners Hall or a Dancing Saloon or a Theatre may arise in future. A certain locality is exempt from taxation as long as preachers follows their avocation therein; why is this not, when a laymen takes possession of it? Who can say that the doings of the church have done more for the welfare of the State than the work of an industrial man or a manufactory or of a good theatre or a Turners Hall? The State does not pretend to control the church, nor did it ever attempt to do so. It may be said that in some instances the church does further the interests of the State; why, every Turner's club or Firemen's Company or other association for common good does the same thing; and while the latter do it as a matter of course, the church very frequently works against the interests of the State, and this very fact makes the injustice of investing her with privileges more glaring. There is nothing that can be said in favor of exempting church property from taxation but the still living idea of the relationship between church and state and its unwarranted liberality of the state in cases of indirect support. Although the principle of a relationship between State and Church is dead and buried, yet it still lives somewhat in the prejudice of the people.

We are glad to witness a gradual fading away of this prejudice. The cities of Rochester, Buffalo and others have taken this matter into consideration, and the resolutions of those commonwealth give evidence that the catchword of the taxation of the word of God has lost its terror.

A free church is a free State must cease to live on the expense of the State; a separation of State and church means that either will live without the support of the other, no privileges from the State for the church; and no church in the affairs of the State.

The people should pay this matter the attention it deserves, and not leave the law makers in doubt as to the changes public opinion demands in this respect. Let the candidates for the constitutional convention rise and explain! Will they do away with this antiquated and costly privilege, a relic of the middle age?

Our Letter From Washington.

Our readers will find in the columns of to-day's EXPRESS the first of a series of letters from Washington, which, we hope, will prove interesting to the public at large and to Republicans especially. They will principally treat of Texas matters as viewed in the capital of the nation and follow up the doings of our Representatives. They will also keep a watchful eye on the federal officers in Texas and communicate their actions as far as they concern the Republican party.

We hope Gen. Shields will be able to explain away the apparent inconsistency to be charged with. As for the attack of Gov. Davis upon President Grant we do not know that Gov. Davis ever made an attack upon Grant's Administration; to the contrary he followed the advice of Grant at once and relinquished his office; but we are tired to say, and such is, if we understand correctly, Gov. Davis' opinion too, that Grant in the case of Coke vs. Davis acted entirely different from the policy he pursued in Louisiana and Arkansas, and we say further that Gov. Davis' position was right in law. But this has in no way affected the relation of the Republican party of Texas or of Gov. Davis towards President Grant, and no reconciliation is required where there was no enmity. The Republicans have always been in full accord with the President.

We have before us the monthly report of the department of Agriculture for May and June, from which we clip the following:

The condition of winter-wheat is still reported low. There has been material improvement of the winter wheat in the States of Kansas, especially in the high reputation as a wheat district. The averages for condition in the winter wheat district beyond the Alleghanies are as follows: West Virginia, 60; Kentucky, 81; Ohio, 57; Michigan, 80; Indiana, 71; Illinois, 64; Missouri, 55; Kansas, 97. In West Virginia frosts have been followed by drought. Improvement has been marked in Kentucky, but the losses have been too serious to be repaired. In Ohio the remnant still alive is generally late, and in some places has been injured by the fly, chinchua, and by drought. The prospect is better in Michigan than elsewhere between the mountains and the great river. The crop is light and patchy in Indiana, but is improving. The crop of Illinois was too badly injured for more than partial recovery.

In the Gulf States the wheat is a positive success, particularly in Texas, where a large increase in acreage has been made, and where our correspondents insist upon making the condition very high, the average of the percentages of condition being 115. In Arkansas and Tennessee there was some injury from frost, which the genial season has not since repaired.

Going north on the Atlantic coast, the high condition of winter grain becomes gradually reduced, State by State, until Maryland is reached. Pennsylvania, by its good culture and use of the drill, maintains a higher condition than Maryland. New York succumbs to the severity of winter's frosts, and reports a prospect for scarcely more than half a crop.

The condition of spring-wheat is higher, but is scarcely a full average, except in Texas, Michigan, and Nebraska. In the Western States the percentages are as follows: Illinois, 91; Wisconsin, 94; Minnesota, 96; Iowa, 97; Missouri, 97; Kansas, 97; Nebraska, 105.

The prospect in California, which was darkened at the last report by the drying winds and absence of the latter rains, has improved some what in certain sections from the influence of atmospheric moisture in fogs or dews; yet the injury from drought will materially reduce the expected yield.

The average condition of winter and spring combined is 80 per cent for the whole country. In a large portion of the cotton area, at the usual time for planting, the soil was wet and cold in Atlantic coast districts, and in a less degree in more western areas, and germination was retarded, but not destroyed. Afterward, the weather became favorable for growth and the chopping out process, with a tendency in places to an injurious lack of moisture. A frost on the 19th of May, in North Carolina, destroyed cotton on certain swamplands. Late frosts were somewhat injurious in all the States except Florida and Texas.

The stand is much better than that of last year, and the plants more advanced in growth, notwithstanding their late start, and the crop is generally quite clean. No serious injury has been done by insects, though the cut-worm is noticed in some counties of Florida, Texas and Arkansas the plant has been infested with loc in some fields in Florida.

The threatened reduction in area has not been accomplished. While there has been an increase in corn and wheat, it has not been at the expense of cotton. Nor has the re-

duced area of last year been much enlarged. Our returns make only 1 to 2 per cent increase.

The condition of rice is much higher than that of wheat, yet only eight States reach a full average, viz: Maine, New Hampshire, Florida, Alabama, Mississippi, Texas, Arkansas, and Kansas. Average for the central western basin, 86 per cent.

The breadth of oats is slightly increased. The comparative area of some of the largest States is as follows: New York, 105; Pennsylvania, 99; Ohio, 98; Michigan, 100; Indiana, 104; Illinois, 105; Missouri, 103. In New York and New Jersey this crop has replaced winter-killed wheat to some extent; and in the West the area has been similarly enlarged.

Spring barley has got quite its usual area in the Middle States, but its acreage has been increased, beyond the Mississippi. Ohio and Wisconsin appear to have a full breadth, while other Western States indicate a slight falling off. Condition is generally placed very near an average, with some deterioration from insect ravages and drought.

FRANCISCO V. AGUILERA, the President of Cuba, has written and distributed a proclamation among the Spaniards of that island, in which the cause of the patriots and its claims upon all the people of that island are set forth at length, and enforced in a strong, firm and temperate manner. He declares it was not hatred to Spain that produced the revolution of 1868, but a determination to obtain those rights which have been denied to the masses in Cuba for three centuries. Under the constitution of the Cuban Republic all men are equal. The Spaniards in the same footing with the Cubans. They are all brothers and citizens of the same country. In 1808 when the city of Havana was captured by the Cuban forces, and the Spaniards expelled the names on the lists of free citizens and used the ballot to designate who should rule over them in civil capacities. But Spain would not recognize the will and voice of the people. It denounced the republic and commenced a bitter, brutal, unyielding war upon the Cuban people. This war has been kept up until the present time, and both Cubans and Spaniards have suffered in persons and estates. Each year of the war costs Spain from ten to twelve thousand lives, and Cuba \$30,000,000 in extraordinary expenses. And what are Spaniards to Cuba to give up the policy? Their property is in Cuba. It is heavily taxed at the present time to aid Spain in the war. It may be destroyed by the Cubans in their advance upon Spanish territory. And if Spain should succeed the people of the island are still "beware of wood and drawers of water" to the tyrannical, despotic, and unjust rule of the Spaniards. But Cuba free, and all the people free, and the advance of the material interests of the Republic will be unprecedently rapid. These are the points of the address, and they cannot fail to have an effect upon the thinking Spaniards of the island. The future prosperity of the country, a strenuous desire to put an end to the wasteful and unproductive war, the waste of treasure, are declared to be the motives of the President of the Republic in issuing this appeal to the Spaniards of Cuba. If he fails, it is not his fault, the motto of the patriots "blood and fire forever, or independence and progress for all."

NEW ADVERTISEMENTS.

TO LET—POST HOUSE.

The desirable residence known as the "POST HOUSE," Alameda Street, East of Mr. F. Groves' residence, is now for sale by DITTMAR, Ag't. Office over Bennett & Thornton's Bank. 6-7-43w

THE ORIGINAL HOWE!

The World-Renowned Elias Howe Sewing Machine is the oldest established of any in the world, they being the FIRST SEWING MACHINES ever made, and having been manufactured by the original inventor and under his own supervision, Elias Howe Jr., since 1846.

The Howe Sewing Machine.

For some years I have been actively engaged in increasing the facilities for manufacturing my Sewing Machines, and have succeeded in organizing a most complete system, combining perfection of workmanship with the largest productions at the smallest cost.

In order to obtain these results, time, labor, money, and the EXPERIENCE OF MY LIFE, as a practical mechanic, have been freely contributed, and I believe, with success. Further to facilitate the manufacture and sale of my Machines, THE HOWE MACHINE CO. has been organized, and the business will be carried on in the name of that Company, under my supervision. The enviable reputation of my Machines has induced persons to use my name in connection with Machines of an inferior description—and I have, therefore, to protect myself and the public, adopted, as an especial TRADE MARK, a MEDALLION, having in the center the profile of the inventor surrounded by the legend, "ELIAS HOWE, JR., INVENTOR AND MAKER, NEW YORK, U. S. A." This medallion is embedded in each Machine, and none are a production of the HOWE MACHINE COMPANY unless they bear this distinguishing Trade Mark.

ELIAS HOWE, JR., President of the Howe Machine Co.

PERSONAL—We are glad to welcome Mr. Edward Cobb, traveling in the interest of the well-known firm of Weil, Kahn & Co. in Cincinnati. Mr. Cobb, who had the pleasure to know in old times, is a worthy representative, and we bid him welcome and a pleasant and profitable stay in San Antonio.

Two little colored boys met with a sad misfortune yesterday. The mother had left the boys at home and gone out, when one of them got hold of a can of kerosene and poured the oil on some living coals in the chimney. The oil took fire, the can burst, and the burning fluid engulfed the unfortunate in a sea of flames.

Col. Humpoway left this morning for Austin. The Colonel, who travels under orders of the Russian Government to report upon the culture of cotton in the South, has spent about two weeks in San Antonio, and is delighted with our climate and our people.

The FUGITIVE—(Signed) PANORAMA.—According to the programme published in the city papers, the different associations of San Antonio assembled and formed into procession on the Alamo Plaza shortly after seven o'clock, under the command of Maj. Kampmann, Capt. Karber, Mr. Dugner, Jan., and the Chiefs of the Fire Companies.

First Lieut. W. P. Yarnes, First Artillery, has been detailed as Professor of Military Science and Tactics at Cornell University. Lieut. Yarnes is a graduate of the United States Military Academy at West Point, and has served in the 1st Artillery during the late war.

After this the line of march was taken up again, and the Fire Department, leaving behind their engines and other apparatus, made their way out to the San Pedro Springs, where a fine lunch was served by Mr. Dugner.

The weather was not such as we might have expected on the holiday of the nation; threatening clouds hung over the city, a thunderstorm approached from south-west and occasionally a slight rain fell in consequence of which the procession was delayed for some time.

Straw and summer hats in all the latest styles just arrived at PANCOAST & SON.

TO LET—Dri-ble's furnished residence, Enquist at Gamble's Book Store.

The House We Live In—In other words, our bodies—must be kept in repair. We must prop and sustain them when they exhibit signs of weakness and decay...

Health is Capital. Who can doubt it? Do we not every day see the vigorous and clear-headed pushing on to fortune, and the feeble and listless, who are unable to do anything...

NOTICE! THE FIRM OF WRIGHT & CO., heretofore consisting of J. D. Wright, G. Schmidt, and Chas. E. Taylor, dissolved by liquidation. Claims and liabilities of the firm to be adjusted by Chas. Schmidt, who will continue business as the old stand, Main Plaza, under the firm of CHAS. SCHMIDT & CO.
