LET US HAVE PEACE WITH MEXICO.

The proper policy to be observed by the United States government, and by the government and people of the State of Texas, toward our neighbor Republic of Mexico, is a matter which demands more serious attention then has generally been accorded to it. The people of Western Texas particularly, should be wise in this regard. The future welfare of the country, including the generations to come should be the great end bad in view, and and not merely the gratification of a present local or personal animestry, or revenge for local and personal grievances. And the protection of this great and requires the prosperity of our sister Republic, and the maintenance of the closest and wost, cordial relations of pages and good-will between the two cuantries.

PERAMENTON, January 23rd, 1876. DRAR EXPRESS : In my letter to you last week, I stated that I would leave for Prio City in a few days; at the time of writing my lotention was to do so, but I have found such s good field in the thickly settled neighbor-hoods of this and Wilson counties that I have postponed my trip to Frio City until I visit all of these places. GOV. HENDRICKS of Indiana Gov. Tilden of New York, Senator Bayard of Delaware, and Senator Thurman of Ohio, are the prominent names likely to be presented to the National Democratic Convention for nomination to the Presidency. SHEET-IRON. Gov. Hendricks, at present, seems to be the strongest man. It the West and the South unite on him, his nomination seems almost a certainity. And such a combination with Hendricks at the head of the ticket, would require the best man and the united strength of the Republican party to beat it. Vendricks would carry Indiana, and eifie, by the united efforts of the Pierce would render Ohio doubtful, both of which States are counted on by the Republicans, Ohio especially Blaine and Hendricts will probag bly be the Republique and Democratic caudidates. good start, yesterday. The Democrats. and supporters of the People's ticket, were upon the streets and banging about the bar-rooms the entire day. Much whiskey was devented, and quite a number of perons, by their too free indulgence, were led to be very poisterous and disorderly. The assemblages on Main street corners were nothing short of nuisances to ladies, and persons who have something better to do than hang about the streets and enter into unprofitable political discussions.

- Yesterday evening, a man, a sporting haracter, by the name of Morris, sent Jack Harris word to "heel" bimself, that was coming to fight him. In compli ance with the request, Mr. Harris provided nimself with a revolver, and awaited the arrival of his enemy. It was not long before he appeared, when Jack stepped into shrift whistle and thomsand attendant in the street, and ordered the growds, which were assembled on the corners discussing politics, to get out of the way, that there was going to be some shooting done. When all were dispersed, which was not long taking place, Mr. Harris informed Mr. Morris that he was prepared for him. The latter denied being armed, and Mr. Harris, not wishing to shoot an unarmed man under such circumstances, was about to let the matter drop, when Sheriff Bonnet appeared upon the seene. Mr. Morris was then taken, into custody, and, on searching his person, a six-shooter, full cocked, was found sticking under his belt

A FEW OF OUR REASONS WHY WE CLAIM IT AS SUCH

1. It is made upon scientific principles, and guaranteed to be pure, containing mixture nor chemical of any kind, no Naptha aor Gasoline.

11. It barneslowly, and is house more economical and has no offensive oder sequently found in burning other oil.

Why We Denounce

Inferior Oils

It is a sleplorable fact, but nevertheless frequently practiced in several branch-It is a sileplorable fact, but nevertheless frequently practiced in several branches of manufacture, that whenever an article has assumed and attained a popularity and reputation on the merits for its good quality, those manufacturers; presuming to have established an auflinching demand for such, then see fit, for reasons best known to them, to send out an inferior article under the same name and style of package; and now we assert and prove by the below submitted certificates of our logical chemicles (known as competent and honorable men, who made six tests of STAR OHL and Astral Oil,) that such is the case with the brand of oil introduced here in

\$70 as Pratt's Astral Oil.

At the time of its introduction said oil was then fully up to the standard of the certificate of C. H. Kalteyer, chemist. To what has it been reduced mow? Those recent tests show in one instance 18 degrees, and in another 26 degrees below the referred to flashing point of 1870.

We turtherwore desire to impress upon the minds of consumers that even at the present standard of said Astral Cil there is no unitormity in its quality, (a property generally found with the most inferior grades,) as in testing a case, containing two five-gallon cane, purchased from H. Grenet, it was discovered that a Difference of Nine Degrees existed in the flashing point of the data alluded to.

Those advertisements claiming such superior qualities for the Astral, prove to be exaggerated, as only recontly, at different times, in the Casino building, a lamp Those advertisements cisiming such superior quartiles for the Astral, prove to be exaggerated, as only recently, at different times, in the Casino building, a lamp filled with that Astral Oil fell to the floor and in a moment all was in a blaze, and had it not been for the prompt assistance of those present the building would be a total rain. How reliable and of what good qualities oils so extensively sold in this city, is found in an article effered by the trade as Pratt's Radiant Oil, which preven to have only a flashing point of \$2 degrees and burning point \$102 degrees.

As it is our constant desire to furnish our

From the result of above the tests it will be seen that your STAR OIL IS THE BEST AND SAFEST.

From three hundred and sixty-five different experiments, with twenty-five different kinds of lamps, made by Prof O T Chaudler, of New York, the highest temperature reached in lamps was 129 degrees Fahrenbeit. (See American Chemist of Angust, 1872.) By referring to the above it will be seen that YOUR STAR OIL IS FIVE DEGREES ABOVE THE HIGHEST TEMPERATURE EVER OBSERVED IN ANY LAMP.
