THAT THE

OIL

OIL

Best, Purest and Safest Oil

IS THE

EVER OFFERED IN THIS MARKET.

A FEW OF OUR REASONS WHY WE CLAIM IT AS SUCH :

1. It is made upon scientific principles, and guaranteed to be pure, syntaining no mixture nor chemical of any kind, no Naptha nor Gasoline.

11. It barns slewly, and is honce more economical, and has no offensive oder no requestly found in humang other oil.

III. It gives a meltow light, thereby more beneficial to the eye.

IV. It will not explode, and is as safe as the old lard oil.

V. Is will in all tests and trials be found fully up to the standard of the shem-

Why We Denounce

Inferior Oils.

It is a deplorable fact, but nevertheless frequently practiced in several branches of manufacture, that whenever an article has assumed and attained a popularity and reputation on the merits for its good quality, those manufacturers, presuming to have established an unflinching demand for such then see fit, for reasons best known to them, to send out an inferior article under the same name and style of package; and now we assert and prove by the below submitted certificates of our local chemists (known as competent and honorable men, who made six tests of STAR OIL and Astral Oil,) that such is the case with the brand of oil introduced here is

1870 as Pratt's Astral Oil.

At the time of its introduction said oil was then fully up to the standard of the certificate of G. H. Kalteyer, shemist. To what hims it been reduced now? Those recent tests show in one instance IS degrees, and in another 26 degrees below the referred to flashing point of 1870.

We furthermore desire to impress upon the minds of consumers that even at the present standard of said Astral Oil there is no uniformity in its quality, (a property generally found with the most inferior grades,) as in testing a case, containing two five-gallon cans, purchased from H. Grenet, it was discovered that a Difference of Nime Degrees existed in the flashing point of the cans alluded to.

Those advertisements claiming such superior qualities for the Astral, prove to be exaggerated, as only recently, at different times, in the Casino building, a lamp filled with that Astral Oil fell to the floor and in a moment all was in a blaze, and had it not been for the prompt assistance of those present the building would be a total rain. How reliable and of what good qualities oils so extensively sold in this city, is found in an article effered by the trade as Pratt's Radiant Oil, which proves to have only a flashing point of 92 degrees and burning point 162 degrees.

As it is our constant desire to furnish our

Unexcelled, Twice Distilled Star Oil.

always uniform and up to the advocated standard, we have effected an agreemen with Mr. G. H. Kalteyer to examine each and every case and attach a certificate with his signature to such, before offered to the public. The Star Oil is only fur siahed in cases of two five-gallon cans, and every can is stamped with our tradimark, of which this cut is a fac simile.

OUR PROOFS.

Certificate from Kalteyer's Chemical Laboratory, San Antonio, Texas : Mesers. Wagner & Rummell, City—San Antonio, Texas, Jan. 11, 1876.
Gentlemen: Referring to the advertisement of Mesers. Charles T Fratt & Co. in the city papers, I see my certificate, given in 1876, republished, which was then in accordance with the quality of the Astral Oil found in this market.
Since that time I have at various times tested Fratt's Astral Oil, from different dealers, with various results, some having the flashing point as low as

One Hundred and Seventeen Degrees Fahrenheit

I have tested one case bought from H. Grenet, containing two five-gallon came of Astral Oil, and found the flashing point of the ell in one can to differ NINE DEGREES from that of the other.

Yours truly, GEORGE R. KALTEYER, Chemist.

Certificate from Kalteyer's Chemical Labratory.

San Antonio, Junuary 11th, 1876.

Measra. Wagner & Rummel, City—Gentlemen: According to your request to examine the different brands of Astral Oil made by Measra Charles T Pratt & Co., which is sold in this city, and the Star Oil sold by you; the undersigned took samples of the different Oils, and find the following results:

Pratt's Astral Oil from the stores of Mr. H. Greuet, A. Bruni and H Wagner, The mean of six tests give the following results:

PRATT'S ASTRAL OIL-Flashing Point, 125-Burning Point, 136.
PRATT'S RADIANT OIL-Flashing Point, 92-Burning Point, 162.

Wagner & Rummell's Star Oil, from the stores of L Briam & Bre., T H Schneffer A Bruni and L Moke. The mean of seven tests gives the following result: Wagner & Rummell's Star Oil-Flashing Point, 134, Burning Point, 148.

From the result of above the tosts it will be seen that your

STAR OIL IS THE BEST AND SAFEST-From three hundred and sixty-five different experiments, with twenty-five different kinds of lamps, made by Prof G T Chandler, of New York, the highest temperature reached in lamps was 129 degrees Fahrenheit. (See American Chemist of August, 1872.) By referring to the above it will be seen that YOUR STAR OIL IS FIVE DEGREES ABOVE THE HIGHEST TEMPERATURE EVER OBSERVED IN ANY LAMP.

We remain yours very respectfully.
