THEY DON'T KEEP A FULL STOCK OF REPAIR PARTS AT ALL THEIR AGENCIES, WHICH IS AN OLD ADVANTAGE TO EVERY MAN THAT BUYS A REAPER.

They don't keep a full stock of repair parts at all their agencies, which is an old advantage to every man that buys a reaper. To all who have been obliged to send away for parts, the manufacturer, for repairs, for the most part, express charges, besides being delayed from four to six days in the midst of harvest, owing to not having a supply of repair parts on hand in the territory, will testify. Their plan of dealing directly with the farmer is the correct one.

Of the large number of farmers who brought McCormick's machines last year over proved himself to be more than satisfied. Mr. Johnson, one of the best and largest farmers in Ellis County, writes as follows:

WAKARUSA, March 17, 1876.
DEAR SIR—I bought a combined Advance last year, and cut three hundred acres of grain and grass, with it, and unsatisfactorily. I consider it by far the best machine for Texas farmers; I am familiar with all kinds of reapers and mowers, and I can say that I can get another, I would not get a better one.

It is such endorsements as the above and the reputation the McCormicks have for making such machines—and doing so honestly and fairly that accounts for the greatest sale of McCormick's machines.

A CORRESPONDENT OF THE STATESMAN SAID MR. J. W. JENNINGS, THE NEW CENTENAL COMMISSIONER, IS NOT A RESIDENT OF TEXAS.

The Donnell News has this to say of it: J. W. Jennings came to Donnell in 1875, and this has been the home of himself and family ever since. The first thing he did on his arrival in our city was to buy property and erect a residence, while he has never left the town, but he has been writing and public spirited citizens. Mr. Jennings is assistant doctreeker of the lives of representatives, and of course his duties require his presence at the Capitol of the Nation, but no amount of writing and public spirited citizens. CATTLE, SHEEP, AND WEST TEXAS

The spring cattle drive from Western Texas this year will take away from the pastoral country between 500,000 and 600,000 head of calves, cows, and yearlings. This will bring back into the country a large amount of money which, if judiciously invested, and the investment vigorously improved, will add much to the wealth of the country.

HOW TRAPPIST MONKS LIVE.

MEN WHO DEVOTE THEIR LIVES TO SELF-SACRIFICING LABOR.

[By the Superior of the Convent, Father Plummer.]

It is six years since the Trappists first penetrated into Bosnia. Trappists are people who have badly, work hard, and are not allowed to talk. They take their name from a barren spot in France called La Trappe, where, about 200 years ago the life of hardships which they still lead was inaugurated. They are practical people, and know how to make their good works not only useful to themselves but directly profitable for their suffering fellow-creatures as well. They live by the sweat of their brow, dividing their profits with the poor, and teaching them by example and instruction to work for themselves. As by the rules of their order they are prohibited from speaking except on certain occasions, and from giving and receiving instructions while at work, and as, further, they cease to correspond when in their convent with the outer world, they certainly are as little dangerous as they are idle. Trappists are the very strictest vegetarians. Not only is most or animal fat not allowed, but not even butter, oil, eggs, fish or sugar; they have to cook everything with water and salt. Vegetarianism no doubt agrees with the fathers, as they, as a rule, reach a considerable age; but they rely for health not only on their abstention from animal food, but just as much on their mode of living. Getting up at 2 in the morning, they work with short intervals for six hours, till night, allowing one hour for rest in mid-day, and go to bed at 7 or 8 in the evening. A Trappist's convent is like a bee hive without drones. The buzz from the different workshops and machines alone is the accompaniment to the busy inmates silently toiling on to get their own daily bread, but leaving the honey they produce to the sick, the poor, the stranger. They have no separate cells, but sleep together in dormitories, having only a hard straw mattress and a woolen blanket. On account of the hardships they have to undergo, the time of probation before being definitely received into the community is five years, during which the candidates are free to depart, or are sent away by the Superior if not suited for a Trappist life.

WORKING WONDERS. Such are the Trappists. Sprung from France, they are to be found wherever there are waste lands to cultivate, swamps to drain, deserts to be fertilized. Napoleon III sent them to Algeria, where they worked wonders. In America their congregations are pushing on everywhere. They are to be found in busy Belgium, and in practical England they have one house—at Whitwick, near Leicester; another in Ireland at Mount Melicary, Cappoquin, County of Waterford.

Six years ago they emigrated from Germany to Bosnia. A boundless field was there waiting to be cultivated—a field only opened up since 1868, by the convention according to Austrian subjects the right to acquire landed property in Turkey. Two Trappist brothers and their superior first went to the estate they had bought near the town of Banjaluka, with pickaxe and spade. They had to make the roads themselves which were to lead up to the house they were going to build. For three months a cow shed was their only shelter, and they slept habitually in the open air, living on beans and bread made of maize. They were their own architects, bricklayers, engineers, blasting the rocks in the channel of the Verbas River with dynamite, and utilizing the debris for the construction of a house and mill dam. The three original brothers have since increased to fifty; and where six years ago was almost a wilderness there is now a square house of solid masonry large enough for one hundred brethren, with a garden. They have finished the farm buildings, stables and sheds, erected a mill and a saw-mill and started a brewery, besides having opened several workshops. A great deal of woodland has been transformed into fields, grazing land and vineyards; several miles of road have been made and several bridges constructed, and the cultivation of hops and valuable fruit trees have been introduced. But before having thus ministered to their own wants, the Trappists set about providing means for the education of the wretched children of the neighborhood. They bought two houses and a garden for the sum of £1,000, of which £500 is still owing, sent for some Sisters of Charity, and opened a school.

ENLARGING THEIR FIELD. The first settlement having proved so successful and beneficial, 300 (Austrian) acres were purchased in the heart of Bosnia, about three days' journey from the first house, with the object of founding a second one. The benefits accruing to the neighborhood by the Trappist establishment, near Banjaluka, are looked upon so great by the Turkish authorities themselves, that they let the Trappists have 400 fir trees and oaks at the nominal price of three kreutzers and ten kreutzers per tree (one kreutzer Austrian being almost equivalent to a farthing, English money). The construction of this second house was at first ready in progress when the insurrection came to interrupt it.

THE COTTON MANIA. Bishop Pierce, in a letter from Texas to the Southern Christian Advertiser, offers the following rational advice to his Southern countrymen: "Verily King Cotton, like other kings, is consuming the substance of the people. Prosperity in this article of production, it seems, tendeth to poverty." A very heavy crop has been made, and yet the people are on the "ragged edge"

of insolvency. The more we make the poorer we grow. And yet the desperate bet is laid on another crop in the face of ten years' unbroken uniformity of results. The heathen destroy, "Whom the gods mean to destroy they first make mad," is being actualized. No soil, no fertilizer, no seasons, will save the country on the line of its agricultural policy. The result is just as disastrous on the virgin soil of Texas as on the wasted lands of Georgia. The man who loses money in making ten bags of cotton, will lose yet more in the production of a hundred. This is the best in experience, the spirit of losses and figuring. Forgive this episode, for I am really distressed at the prospects of the country financially. Bad government may destroy us and our property, but no legislation can life us out of the present "slough of despond," without home supplies. Bread and meat must be made, not bought. The great burden of expense lies right there. The stomach costs more than the back. Make bread, raise meat, live at home, be self supporting, financial plank in the coming out of the ground will save us. Help must come out of the ground, in breadstuffs. You may go to Texas—all tortons will swamp you; you may stay in Georgia and grow fat on peas, potatoes, wheat and corn. Let us fill our gardens with all manner of store; then our oxen will be strong to labor, our sheep will bring forth thousands; then there will be no "breaking in nor going out" in quest of food—plenty and peace will reign, "complaining in our streets," and we shall be a happier and better people.

A PENNY SIGHT. On a recent visit to the country, we stopped at a gentleman's house, who showed us a litter of four or five little kittens, all of whom had been taken charge of by an old hen, who would drive off the mother cat every time she would show herself. The old hen "clucks, clucks" to the kittens as if they were chickens, picks and carries crumbs, etc., to them for food, and does her best to shelter them under her protecting wings when night begins to fall. Notwithstanding her many discouragements—from the different nature of her adopted children to that of the chicken, she seems very proud of them, and will undoubtedly feel very sad (for a hen) when they get so large they will abandon her.—Exchange.

On the 26th day of Feb., John A. Stillwell and Miss Francis Ellen Herion, both of Phillips county, Kan., were married in Rooks county. The mother of the young lady was present, and upon being asked if she had any objections to make to the ceremony, she said she had none, and appeared anxious to have the ceremony performed. The Stockton News is constrained to explain as follows: "We are credibly informed that Mrs. Stillwell, the mother of the bride, was the former wife of Mr. Stillwell, he being her second husband, and that several children now living with Mr. Stillwell were born to them during the marriage relation. At the last session of the District Court of the 15th Judicial District sitting in and for the county of Phillips, Hon. Joel Hunt presiding, Mrs. Stillwell No. 1 and Mr. Stillwell were divorced, each party desiring a separation. Mr. Stillwell says it was expressly understood when he married the mother of his present wife that as soon as his daughter arrived at maturity, she should consent to a dissolution of their marriage relation, so order to allow him to marry the daughter. So says our informant."

THE CHARGES AGAINST THURMAN. [From the Northern Ohio Democrat.] We have been accused of throwing dirt on Allen G. Thurman, by insinuations that were obviously, because we intimated that he had received large fees as an attorney for the Atlantic & Great Western Railway. Now that there may be no mistake about what we have to say on this subject, we charge that he received one hundred thousand dollars for acting as trustee of said Atlantic & Great Western Railway for two years, and that this large and unprecedented amount of money for his services for not more than one-fourth of the time for the period he was employed, was paid him because he was a Sena or in Congress from the State of Ohio. Who ever heard of such an amount of money being paid any more lawyer for his services? He received this enormous fee because he was a member of the United States Senate to secure his political influence in the corporation that paid the money. We are tired of the funkism that clings to the coat tails of men in power, and empties slush tubs on those who refuse to wear the livery that they delight to appear in. We have been provoked by a gang of little whisperers, unscrupulous to make this statement, and we are ready to stand by it, and can prove it from the books of the Atlantic & Great Western Railway.
