London, April 27—All London journals support editorially the position taken by the British Coverament in the Winslew extradition case.

The Manchester Guardian's London correspondent, however, anys a very strong impression is current that the legal advisors have led the Soverament into a tangle.

The point at issue is, whether the 'Act of 1870 sets assisting the American Treaty of Rights Act, and whether all doubts are not removed in favor of the prisoner's extradition, by clause 27 of the Act which specifies that whatever is consistent with existing treaties shall be excepted from its operation in the face of so simple a set of circumstances. Many persons are a good deal puzzled to understand upon what granneds the English Government can maintain its present position.

More attention should be given to the growing of wheat in Western Texas, in 1874 there was an insufficient quantity for home consumption, and in a few years the article has become one of the first staples. In the counties north of Bexar the average yield is from twenty-five to thirty bushels per acre. In in-dians, Illinois and Wisconsin twenty dians, Illinois and Wisconsin twenty busicels. We have a superior sell for the product, which out-ranks the yield of the first wheat-growing States of the Union. Pearless is by no means one of the inferior grades of oil; it is recovery respect equal and fully up to the actual standard (not the advecated) of Astral, and is like this inter 12 degrees below the burning point of our STAR OIL Now we propose to Farnish the Poericas, guaranteed equivalent in every respect to Astral, at one Profess a case less than our STAR OIL, which we sell at the price of Astral, sichough our STAR OIL is 12 degrees better, hence safer, and consequently has the professions of the consuming public.

As your request, I have tested the samples of Star Oil taken from the store of George Dulloug, and find the dashing point at one hundred and thirty-three (133) degrees Fabrenheit, the burning point at one hundred and foray-four (144) degrees Fabrenheit. Astral oil, taken from the store of E. Kotula & Co., the flushing point at one hundred and twenty-one (121) degrees, and the burning point at one hundred and thirty-two degrees Fabrenheit.
