In those spacious but insignificant advertisements of C. Pratt & Co., they on deaver to convince the public that our STAR OIL and PEERLESS are identically the same, which they know, even better than we could ever attempt to convince them. IS NOT THE CASE. Poorless is by no means one of the inferior grades of oil; it is in every respect equal and fully up to the actual standard (not the advented) of Astral, and is like the latter 12 degrees below the burning point of our STAR OIL. Now we propose to Furnish the Peerless, guaranteed equivalent in every respect to Astral, at One Dollar a case less than our STAR OIL, which we sell as the price of Astral, although our STAR OIL is 12 degrees better, hence safer, and consequently has the preference of the consuming public.

Our, certificates, formerly published, (originals of which case he seen at our office) from our local, disinterested chemists, Messre, Goo, II. Kaiteyer, A. Netts and E. Dreiss, who tested both oils, and declare our Star Oil

) 12 degrees better than Astral.
In Addition to the cortificate alluded to, we herewith ansex a certificate from Chemist Theo. Odet.

At your request, I have tested the samples of Star Oil taken from the store of George Dullang, and find the flashing point at one hundred and thirty-three (133) degrees Fahrenheit, the burning point at one hundred and foray-fone (144) degrees Fahrenheit. Astral oil, taken from the store of E. Kotela & Co., the flashing point at one hundred and twenty-one (121) degrees, and the burning point at one hundred and thirty-two degrees Fahrenheit. I am of the opinion that the Star Oil is by all means the best and safest oil.
