IMMEGRATION from the old world has fallon off, and yet the immigrants have nearly all prospered in this country. Only 30,936 immigrants arrived at New York during the quarter ending June 30, against 45,556 during the corresponding period last year. The stagnation in all kinds of business no doubt accounts for the falling off. Yet the return tide to the Old World must be otherwise explained. A reporter of the Landon News recently visited some of the incoming steamers and on questioning the steerage passen gers found that for the most part they had some money. They were not disasting fed with America, but work not being driving just now, bad thought they would viste their friends.
