The popular ignorance on this subject gener-ally takes this form: "I want a paper to want it to be either Democratic or Republicas ". This common statement is proof that partizan politics in this country has been such a blighting curse upon almost everything, that it has entirely blinded the popular mind as to the real province of journalism. It assesses that journal lem eight to be wholly devoted to poli-tics. whereas, it should be devoted to every department of thought, life, and civilization. How CHETER WAS KILLED -The fact that General Custer and his command were massacred by Indians armed and fed by our Government, is a diagrace to the country, and is a part of "the mystery of iniquity" called the Indian ring. Custer. shot three Indians with his revolver and killed three with his saber before he fell. He was shot and instantly killed by an Indian named "Rain-in-the-Face," a Chief whom Custer had foreibly arrested some

time ago for murder. The Indians that brought the news to the reservation say the Sioux nearly exhausted their ammunition, and that fighting will not be renewed until they get a supply from the agencies. Getting supplies from the agencies sounds like an impossibility, but that the hostile Indians have been getting arms and amtime, the late fights on the Rosebud and Little Big Horn prove beyond all doubt. It is an open question-which deserves punishment most, the Indians or the agents of the government!

FACTS BY WHICH DECIDE

In those spacious but insignificant advertisements of C. Pratt & Co., they en deavor to convince the public that our STAR OIL and PEERLESS are identically the same, which they know, even better than we could ever attempt to convince them, is not the case. Peerless is by no means one of the inferior grades of oil; it is in every respect equal and fully up to the actual standard (not the advocated) of Astral, and is like the latter 12 degress below the burning point of our STAR OIL. Now we propose to Parnish the Peerless, guaranteed equivalent in every respect to Astral, at One Dollar a case less than our STAR OIL, which we sell at the price of Astral, although our STAR OIL is 12 degrees better, hence saler, and consequently has the preference of the consuming public.

by 12 degrees better than Astral.

In Addition to the certificate alluded to, we herewith annex a certificate from Chemist Theo, Odet.

At your request, I have tested the samples of Star Oil taken from the store of George Duling, and find the flashing point at one hundred and thirty-thuse (133) degrees Fabrenheit, the burning point at one hundred and foray-four (144) degrees Fabrenheit. Astral oil, taken from the store of E. Kotula & Co., the flashing point at one hundred and twenty-one (121) degrees, and the burning point at one hundred and thirty-two degrees Fabrenheit. I am of the opinion that the Star Oil is by all means the best land safest oil.
