If the former, the labors of Commission will probably be protracted far beyond the 5th of March; while if the findings of the committees be accepted, by what means will the Com bias, and give them strictly impartial and judicial aspects? The Austin Correspondent of the News, having solicited of General Steele a statement of the reason why Capt. McNelly had been Jeft out of the new organization has been furnished with the following, which is based upon the records in his office:

Inasmuch as articles have appeared in several papers which give an erroneous impression in relation to the action of the Executive in reorganizing the force mustered into service for the suppression of lawlessness and crime under Capt. McNelly, and as the idea is kept in front that Capt. Me. Nelly has been, after doing great and laborious service, improperly left out of the new organization, I wish you to publish the following facts:

Capt. McNelly organized his company July 25, 1876, wiith 33 men, and sent them to Oakville, where he joined it Aug 27th.

at S. A., and a few days after, the 9th of October, sends a surgeon's certificate of disability, in the following words: "I certify that Capt. L. H. McNelly is noder treatment for an affection of the wind pipe and lungs, which disables him from service in the field. The disability may be temporary, but it is at present com-plete, as he can not bear exposura without a great and manifest risk. Sigued, Geo. Cupples, M. D." He then asks that the headquarters of his company may be brought to within ten or twenty mite of San Antonio, so that he could direct their action, he remaining in San Antonio, where he continued until | \$1. Nov. 20, when he asked permission to visit Austin, which being granted, he came and remained a few days and went to his home in Washing. ton county, and he did not join his company though perhaps keeping up the semblance of command by requiring reports from his lieuten. ants, and sending telegraphic re ports of operations that were received as early from the Galveston

that has come to my knowledge, was visiting Galveston with a guard to take a few prisoners to that city, which duty should bave been performed by a supordinate. With such a record of duty, I took the further precaution of writing to the surgeon who had attend.
ed upon the captain in San Antonio
as to the probability of his disabili.

Dr Davison, having adopted as his line of practice
the treatment and cure of ty being temporary. His reply, dated Jan. 21, 1877, is: "In answer to yours of last week I beg to state you had perfectly comprehended the meaning of the certificate I gave Capt. Mc Nelly. I believed at the time the certificate was given that he would not be fit for active service at any time during the winter, and all I have since seen of him confirms me in that belief. His Treatment by Correspondence. W B. L. E. I. G. H.,

would I have been justified in rec ommending, or the Governor in appointing, Captain McNelly to the command, when there was at band an officer who had already been represented by the people amongst whom he had been serving, in command of a pertien of McNelly's Groceries, company, as the right man in the right place, and who was in the full vigor of early manhood and health.

I do not consider the command of Liquors, the lew men that can be paid from the small remnant of the appropriation for this company as the proper place to put an incompetent man, no matter what his previous services may have been. The present company, selected from the best of the old company, and costing less than half as much as the old, is, in opinion, the best mode of utilizing the small means at hand; if not, will some of the vice acres clashrate a plan by which the State can get the requisite service and not pay Reduced Prices. three or four dollars for each dol

would go far toward the erection of the proposed building. Under the proposition submitted, the dits would be given the present county jail which would serve well as a city lock ep, and which is substantial enough to defy old Chrysler's in genity in picking himself out again. The new building could be used as a fall till such time as snother should be acquired. It is, we understand, the intertion of the county court to levy a tax at rts next bession for the purpose of building a jail It is also the intention of the The County Commissioners' Court settlement of the pending controversy in the courts. In view of those parts, we will meet on Monday next, when road unatters and the building of the County sideration of the council of the committee.

CITY FIRE ALARM,

Editor of Express : The petition now before the City Counoil looking to the erection of a fire alarm, seems to be a job in the interest of one

man alone. The first thing the city, and especially that part connected with the Fire Depart of the manufacturers, the kinds of apparatus used in other cities, and their 2 cooking stoves, 1 lot blacksmith's

experience with the different patents. For instance, the American alarm, the oldest and most reliable fire alarm in ex hails This does not speak well for his patent, unless we avail ourselves of the adage, "A prophet is not without bonor. case may be.

Again, this company has exected its alarms in all the principal cities of the United States, Baltimore having lately discarded an old aystem and adopted the American starm instead.

This article is not written to influence prejudice for or against any set of alarms. If the gentleman representing the petition now before the Hon. Mayor and members of the Council can show that his appliances are superior to any other, then by all means give him the contract. On the other hand, if there should exist those who are capable of showing to the contrary, by all means let them be heard.

The Pire Committee is fortunately composed of gentlemen who will not look further than the interest of the city and its citizens, and we are satisfied that they will consider the matter in all its appendages before taking action.

We will have something more to say on this subject very shortly; Fire alarms are not child's play, and vigilance on the part of those in charge is est in the matter, or the difficulty would quite as essential as features which seem have been overcome. Let proper action | most prominent to those not drilled in the be taken at once to supply this necessity. details of this guardian of life and prop
