- [From the San Francisco Monitor.] A Chinese printing office is a greater curiosity than one would think. The alphabet numbers way into the thousands, and a cap and lower-case goes all the way round the inside of a two story building and balf way up to the roof. It takes an apprentice twenty years to learn the case, and then be has to use a step ladder to get at the E and BOCKPORTonce in Canton, and it took five days to remove the type from the form of the foreman. They punc-FRIO CITYtuate wherever they can drop a dot, without regard to the prospec tive. When the editor coins a word the printer whittles out a new character with his jack knite. The journeymen set by the square foot, and never belong to the union. They do their press work by hand, use boxing gloves to ink the type. They have one paper in the empire a thousand years old, and the bound volumes half fill a pagoda. Railroad Time Table. It is rumored that Bennett has started to edit that venerable paper. The editor's head is responsible for all the items published in the paper, and is taken off whenever an article of news is published. Not an editor has been beheaded in China for the last five years. Improve the Live Stock of the Farm.

Even on a well.managed farm provement in the live stock. Horses are sometimes kept until they are old and weak, unable to perform the necessary labor and unfit for sale. Cows are sometimes kept un. sale. Cows are sometimes kept un. fit for the dairy or for breeding, but they consume as much provender as those which are in their prime and able to yield a large supply of milk, and strong, healthy calves. A great improvement might be made in a flock of sheep by culling out from it, at least once a year; all the ewes that produce light fleeces of an interior staple of woo!, and supply-ing their places with others of superior quality in every way. A great improvement may be made in swine by getting rid of unthrifty animals and introducing the best breeds which possess the desirable properties of fattening readily, coming to maturity at an early age, and paying well for the food they eat.

Farmers' Gardens

The subject of farmers' gardens has occupied unto attention lately, and useful papers have been prepented upon it at the Farmers' Insented upon it at the Farmers' Institutes, and other places. It is generally admitted that no part of a farm pays so well as, or supplies more satisfaction and comfort to a farmers' tamily than a well-arranged truit and vegetable garden.
