New York, June 19.—The Herald's cable apecials say there is no longer any reason to doubt that the Turks have suffered a severe defeat at Kars. Every effort is being made by the authorities at Constantinople to conceal the truth in reference to the Asiatic campaign.

Muhktar Pasha had established a portion of is forces near the river Rhasi between Kars and Erzeroum, with the object of covering his communication with the latter city. This force had taken the precaution to erect earthworks, and considered themselves safe. On Thursday last the Russians unexpectedly appeared in force and began a vigorous attack. The Tarks repulsed the attacking columns several times, only giving way when driven from their positions by superior numbers. The battle continued till night/sall when the advantage rested with

Charley Noyes, the great showman, and so well known in this section for the interesting performance of his circus combinations in years gone by, has invented a fire-escape. After the burning of the Southern Hotel, St. Louis, and the great loss of life consequent thereto, he put his wits to work, and invented a means for the salyation of human life in similar ordeals. W. Royes, the well known circus manager. This is easily described, being nothing more than a wire chair which can be operated by the persons who descend in it. At man can descend and seasily pring down a woman or child in his arms without the least danger. It is next to an impossibility for anything to break it, and if can be misnaged by persons on the ground, should the party descending be unable to operate it. The chair can be returned and an indefinite number of trips made up and down a hould it be necessary. It occapies, when packed, but a small box, and is easily handled. I am happy to be able to inform the public that have purchased the exclusive right for Bexar and Comal counties, to make Photographs by the celebrated Lambert patent process, by which all the less work in Europe and America is being made. The pictures are printed in Carbon, the most permanent cubstance known. I have spared neither labor nor expense, in preparing for this class of work, and can make pictures Life-size, combining all the gottness and elegance of the small Photograph. These pictures are equal in appearance and permanence to the best Oil Paintings, and being so much cheaper, are much preferable to either Oil Paintings or Photographs. Small pictures copied and enlarged, and all work in this line done at very moderate prices.

The Demonetizing of Silver.

Speaking of the circumstances under which silver was demonetize Segame ed, the Boston Advertiser says: For ten years the precious metals for most purposes had become a Yellow clarified commodity, and only indirectly constituted a measure of value. Nork A Crushed Congress, occupied with other controversies, took little interest in what had no practical bearing upon insues more immediate, and trusted implicity in the few among their associates who professed to be chose chalce their lard. ciates who professed to be les. There was little discussion oracles. There was little discussion and there existed no such disturbances of the relative value of the two medals as fixed by French law, or our own, or by the rule of the Bank of England, so as to attract attention. It seemed probable that gold was accumulating more rapidly than silver, and consequently by the financial usages of the world, as the cheaper medal at its the relative standard, was to rule, till the equilibrium should be restored, or the scale turn the other way.

be borne in mind that this fluctuation is not to be attributed exclusively to the depreciation of silver. That is not the only commodity that has fallen in price. With much more propriety it may be asseribed to the appreciation of gold caused to the appreciation of gold caused by an unusual demand from the Eastern war, for German coinage and other purposes which silver would not serve.
