by ARTHUR BRISBANE

**Satisfactory Show
Eclipse, the Yak
Conditions Are Better
Shall We Finance Him?**

In New York city, where this is written, overlooking the East river, Brooklyn bridge and some skyscrapers, the eclipse did its best against clouds and haze, and office boys, printers, pressmen, reporters and odds and ends of editors on the roof looking through smoked glasses were satisfied with the performance.

They appreciate health when sickness comes. Many appreciated the sunlight when it suddenly departed, leaving darkness that made it difficult to sign a payroll.

Human beings, thanks to the power of advertising, knew what was coming. Some looked, some did not; all went about their business calmly in the brief comparative darkness.

A baby yak, born while the eclipse was on, will go through life called Eclipse. In Thibet, home of his mother, where yak butter mixed with yak hair may be found in every cup of tea, such an eclipse would cause wild excitement, and immensely generous contributions to the thousands of Buddhist monasteries. The latter would get all the credit for bringing back the sun.

Atlanta, Ga., reports more cheerful days in the South, with cotton and tobacco recently rising in value "on paper" by five hundred million dollars.

President Hoover is told by important steel men that recovery in the steel industry is just around the corner. It seems certain that conditions are getting better, perhaps because they could not get much worse.

This is unusual. Rev. Harold Francis Davidson of London, convicted in a British court of "immorality," says he will come here, bringing one or two young ladies in the case with him, "to raise money for his appeal" from the decision condemning him.

You need not wonder at the reverend gentleman's decision. He probably said to himself: "Americans gave ten billions of dollars without much hope of getting it back to nations engaged in murdering each other. They surely would give a few thousands to a British clergyman convicted of demoralizing young girls."

We know that the reverend gentleman is mistaken, but you can't expect him to know. "Those Americans are so queer."

The "Apostle of Doom," real name Robert Reidt, and of Freeport, Long Island, is disappointed. Like the owl

and the beaver, he took the eclipse too seriously, predicted an accompanying earthquake that would destroy New York, and tacked on to one of his other prophecies the item, "Europe will demolish the United States in war."

Seven years ago this same prophet predicted the end of the world. He was sure of it this time, but the little moon passed in front of the big lamp, and that was all.

Great is the power of New York state's governor.

Not all governors have realized it. Justice Staley of New York's Supreme court, refusing to enjoin Governor Roosevelt from interfering with Mayor Walker, says the courts have no power over the governor, or of his person. For errors, if any, of law or fact or deed, the governor is responsible not to the courts, but to his own conscience.

The governor of New York and other states, like the President of the United States, could do almost anything. But they, and all of us, are controlled by public opinion.

In Bolivia Professors Bennett and Phillips of the American Museum of Natural History found deep in the forest a huge monolith 24 feet long.

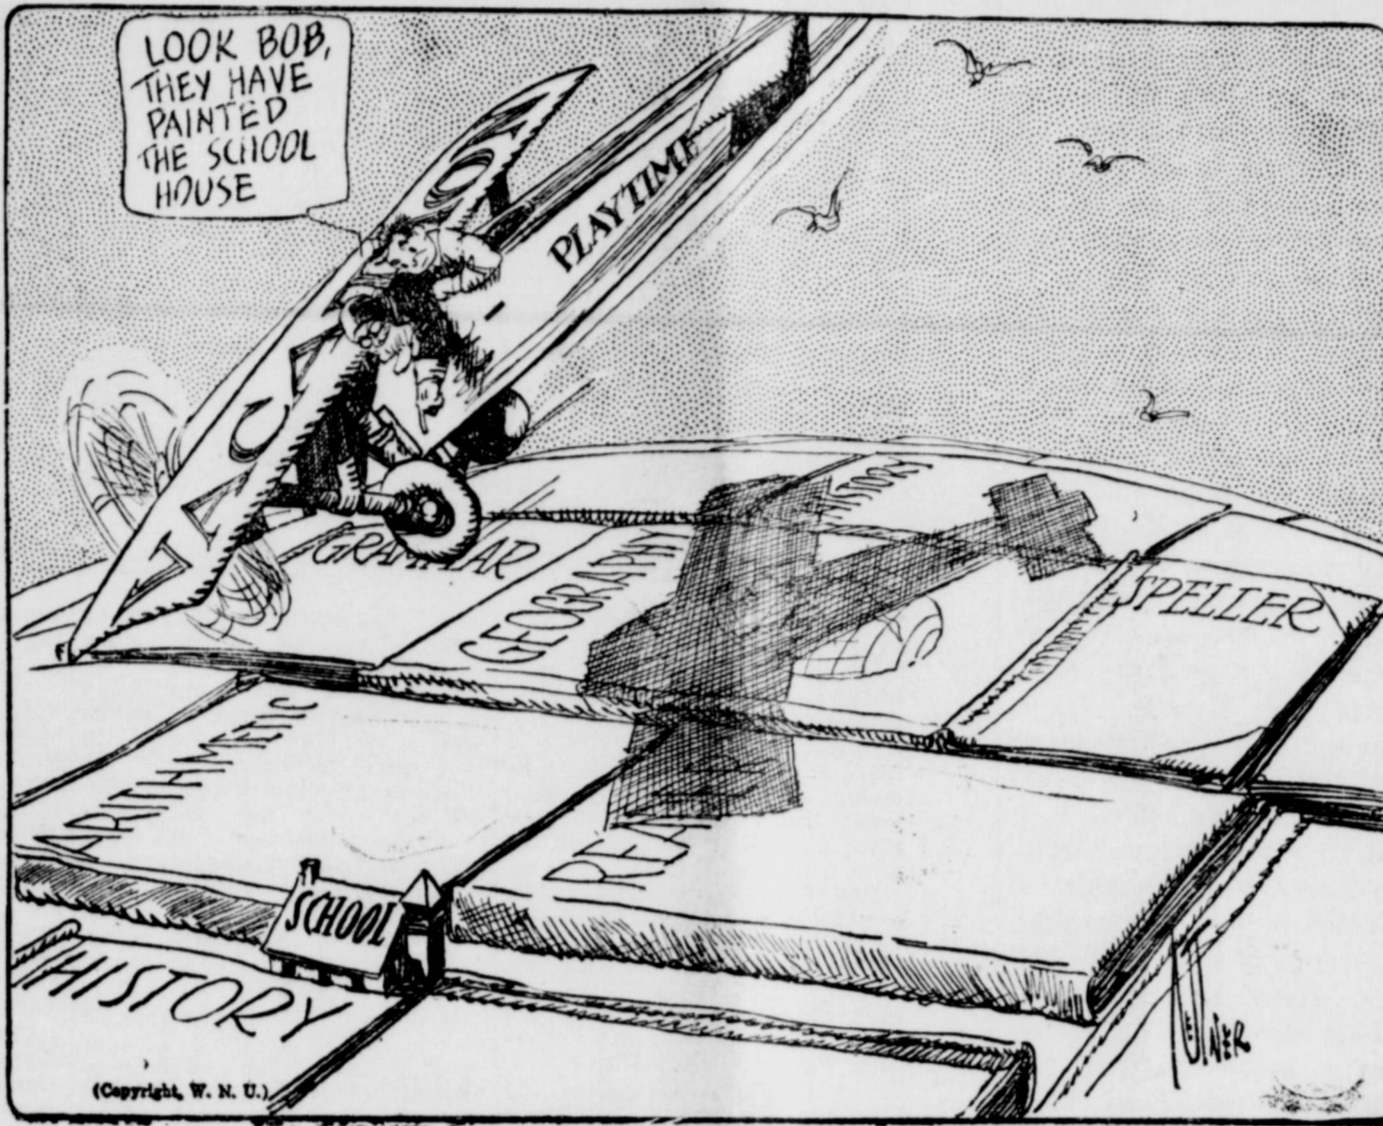

Men struggled over that heavy stone long centuries ago in Bolivia's forests, succeeded in excavating and moving it.

Today men are struggling to harness the tides, to harness the sun, and trying to refrain from murdering each other in war. Man, now and in the future, will succeed with his problems as those ancient Bolivians did. Struggle is born in us, and victory is stored away in ambition.

It appears that newspaper publish

(Continued on fourth page)

Coming Down to Earth

Heavy Small Grain Yield

About the first thing a new comer is told when he gets on the soil here, that this part of West Texas is not fit for farming.

That now and then a crop of sorghum or Johnson grass can be raised in favorable seasons. This old yarn was started and industriously circulated in the early days to discourage settlement of the rich pasture lands.

The old yarn was told so often that even some of the younger natives still believe in it, tho, they never proved it by trying it out.

It has been left to some of the younger set to nail the old yarn that the soil of Sterling is sterile. On the contrary, they have proved that the soil here is ideal for most all crops including small grain. Here are a few of the threshing reports as given by John C. Reed.

Mr. Reed recently threshed 385 bushels of wheat, 554 of barley and 722 bushels of oats.

J. D. Lane, a pioneer small grain producer, threshed 2,991 bushels of oats from 60 acres of land, lacking nine bushels of averaging 50 bushels per acre. Mr. Lane's total crop of oats measured up 3,671 bushels of oats, a mighty handy thing to have around a stock ranch.

Roy Foster, another youngster to try small grain along with stock raising, threshed 2,700 bushels of oats.

Mr. Henry on the U ranch threshed 2,200 bushels of oats and 800 bushels of wheat.

H. M. Mills, who raised a bumper crop of wheat and oats last year has not been reported. Bade Bros. and a number of farms on the Divide have not been reported, but it is said these crops will yield heavily.

Mind you, these crops were planted solely for grazing purposes. When the range got good in the spring, the boys took the stock out and let the grain grow.

The Panhandle of Texas has long been noted for being the best wheat country in the world, but the old propaganda made people forget that Sterling Country was only a southern extension of the Panhandle and that it is as good as the best of it. Sure, there have been drouths

here, and they will come again, and there will be scant range and crops, but where would you go to find a place where there are no drouths?

School Began Last Monday

Last Tuesday, in spite of a down-pour of rain, a big crowd gathered at the school building to see the kiddies start off the 1932-33 session of the public schools of Sterling.

Superintendent H. B. Lane and his faculty were present and ready to "crank up."

As the name of each teacher was called, he, or she arose and briefly addressed the audience.

Short speeches were made by a number of citizens, and each seemed to be enthused with the prospect of another profitable scholastic year. It seemed that every man, woman and child was full of enthusiasm and good will. Not one of the several hundred gathered there had a word of complaint or adverse criticism to make.

From time to time the News-Record will keep its readers posted on the progress being made in this school.

7.69 Inches of Rain

During the last nine days of the recent wet spell, J. T. Davis' rain gauge measured 7.69 inches of sky juice. The ground is wet to the substratum. Winter forage weeds are coming in great profusion over the range. The outlook for a good winter for livestock is very bright. To make it better, many of our ranchmen are sowing, and will sow a large acreage of small grain for winter pasture.

The rainfall for 1932 to Sept. 1, according to the records of J. T. Davis, Federal Volunteer Weather Observer is 27.73 inches. Following is the record as it fell in each month:

Jan.	1.30
Feb.	3.55
March.	0.20
April.	2.30
May.	9.32
June.	5.96
July.	0.
Aug.	5.10

The average yearly rainfall in this zone is 22 inches.

Garden City High Gets Recognition

Schools in Glasscock County began September 1. Institute was held August 29-30-31, at the school building in Garden City. All teachers in the county were in attendance. The problems and plans for the school year were discussed by different members of the teaching force of the county.

Seventy-five per cent of the teachers in Glasscock County hold degrees from recognized colleges of Texas. The school at Garden City is one hundred per cent degree teachers, in both the high school and grades. During the institute the entire teaching force of Glasscock County joined the Texas Teachers' Association. A County Teachers' Association was formed and six meetings during the year has been planned, at which all teachers of the county will get together for social purposes and for informal discussion of the problems of the year. Norman P. Taylor, principal of the Garden City high school, was elected president of the county organization. The teachers of the county are all looking forward to a pleasant year in the school work in Glasscock County.

Garden City High School has been classified as a four-year high school by the State Department of Education. This school year begins with 13 1/2 credits for the high school division and as a recognized four-year high school.

The schools in the county have been reduced to five in number, with a good bus bringing two schools of the county into the high school at Garden City. School cost has been reduced materially and the standard of work raised to a definite recognition by the patrons and the State Department of Education.

Prospects are for a good road from Sterling City to Garden City. The State surveyors are running lines for the prospective road into Garden City. This proposed road would give Glasscock County an outlet to the highway through to Big Spring and San Angelo. Good roads, good schools and good churches make for better communities and better citizenship.

SAN ANGELO 34 YEARS AGO AND NOW

Thru the courtesy of John Y. Rust, president of the San Angelo Telephone Company, S. D. Guimarin, local manager for the company, and this editor were guests of that institution last Tuesday at San Angelo.

After being shown thru the plant and its elaborate and wonderful equipment, we were amazed at the enormous proportions this industry had attained in the last 34 years. From a little iron wire line strung on 4x4 pine scantlings from Sterling City to San Angelo, this industry has grown to be the equal of any institution of the kind in America. Hundreds of thousands of dollars are represented in the installment of intricate apparatus and machinery to carry on the enormous business of the company.

It goes to show what rapid strides have been going on in most every line of industry in West Texas. The day that the Rust Brothers began to string wire on the initial line, there wasn't a paved road in all West Texas. San Angelo had no paved streets. It was the terminal of the Gulf Colorado & Santa Fe railroad. It was many years before an automobile was seen on the streets of San Angelo. Such a thing as an airplane was never heard of. In fact, the words, "Airplane" and "Radio" had not been coined.

San Angelo was a mere country town where most of the people went in horse and mule wagons after supplies. They put up at the wagon yards where the boys had gay times around the campfires. It took from three to four days to make the round trip from Sterling City to San Angelo, while the same trip is now made in less than two hours on the road.

In those days San Angelo had no prohibition, and the word bootlegger was not in the vocabulary, but now, San Angelo enjoys both of these modern innovations as most of up-to-date cities do. But even in those primitive days, San Angelo was a mighty good place in which to visit or do business. Those boys who were young and full of vinegar then, have grown older, but in spite of their years, their handshake is just as vigorous and their hospitality is just as warm as they were 34 years ago, as the following will show.

Leaving the telephone building, Mr. Rust piloted the writer to the Kiwanis Club where a splendid luncheon was spread and where this editor tried to eat all that was in sight, but couldn't, because there was so much of it.

These boys are artists in making an old man feel at home. There we met our old time pal, Hon. Brown F. Lee, Mayor of the city of San Angelo, but with all his distinction and dignity, he will always be to us just plain "Brown". We also met our friends B. W. Draper, Rev. B. O. Wood and others of those fine old boys.

Our host, Mr. Rust can't realize what a rare treat he was giving us in showing us thru the big telephone plant, being our host at the Kiwanis Club and then wouldn't let us go home until he had led us to a movie to see the incomparable Will Rogers in "Getting Back to Earth." It sure was a rare treat and shows that these old time boys are still long on hospitality. It was one of the bright days for us to be long remembered.

All schools of Glasscock County will be sustained for nine months of the scholastic year 1932-33.
J. P. Jamison, Supt.

That Sidewalk

The sidewalk leading from the drugstore to the school building is almost a quagmire since the recent rains. Troops of school children are forced to wade thru the mud in order to reach school. This could be fixed at a nominal outlay of money and labor. After talking with a number of people, we believe that enough volunteer labor can be had to build an all weather walk the whole distance. "Uncle" John Ray will contribute free of charge the caliche to do the job. It will be only a two-mile haul, and we feel sure that enough truck owners will haul it at a price that will meet the pocket books of us all. Then there is Prof. Bierschwale and his fine, husky V. A. boys, as well as the Boy Scouts, will only be too glad to lend a hand, because it is in line with their work.

ACCEPTING THE
SITUATION

If it is to be jimferguson, let it be so but don't try to insult one's intelligence by trying to make people believe that "Ma" as governor, will be anything more than a clothes dummy in a millinery shop. jimferguson will be the whole cheese and don't you forget it.

Had I voted for jimferguson, it would have been tantamount, to putting the stamp of my approval of dishonesty and irresponsibility in government. I would have been in the attitude of saying, "Amen" to every dirty official act of jimferguson during his disgraceful career as shown by Texas History and the records of the highest tribunal of the state. But the recent vote in Texas is notice to me that a majority no longer holds that honesty and integrity in the servants of the state is to be desired, but dishonest, foxy cunning is to be desired. They said so on Aug. 27, and let it be so!

As a man of my word and a democrat, I shall be forced by my pledge at the polls, to deliver my support to the nominee in November. No, no, don't tempt me not to do as I pledged I would. Why, even a nigger crap shooter has honor enough to pay the nickel he has lost in the game. Surely, you don't expect a nigger crap shooter to be more honorable than I, do you? But if I were to fail to deliver the goods as I said I would, the nigger crap shooter would have one on me in point of honor, wouldn't he?

Well, as much as I hate to, I expect to accept the situation, but in doing so, I want every Ferguson man and woman who has attained the length of an inch in Texas, to distinctly understand that I still believe in honesty and responsibility in government. I believe that the man who is to direct the policies of our Texas government should not be a convicted grafter and a peddler of pardons. And I shall so contend until "Thou Shalt not Steal," is blotted from the Book. I shall so con-

tend until I am convinced that it is best to put a foxy knave in charge of our affairs without any responsibility for his acts.

In accepting the situation, I shall do so, in the belief that one more dose of Fergusonism will cure Texas of the worst spell of damfoolishness with which any state of the American Union was ever afflicted. I accept the situation with the knowledge that jimferguson has never reformed and never will, but in the belief that his subsequent acts will be such an emetic to the people of Texas that they will spew up the whole mess like an overgorged hound pup on a butcher's offal wagon.

No, no, I'm not sore because my man got beat. I'm a good sport. I'll take my medicine and cheerfully chew my crow to the last black feather but I am sore because you have helped to bring this dirty shame on the good name of Texas, the good old Texas on whose soil I was born and on whose bosom I was nourished. The mother of Jim Hogg and John Garner, and the foster mother of Sam Houston, Travis, Crockett and all that host of illustrious men whose very names awake the admiration of the human race. My God, boys, you've played hell!

John Garner, Vice President of the United States! jimferguson, proxy governor of Texas! The first an eagle! The latter a tumble bug! Boys, I am going to eat my crow and stay with you and help you raise all the hell possible in Texas and help you enjoy your Fergusonism, even as some of you are enjoying your Hooverism. Uncle Bill

ACCIDENT PICTURE

The complete 1931 accident "picture" is an interesting study in contrasts.

Motor vehicle deaths numbered 33,500 — a new high record. Accidents were the second most important causes of deaths in men, heart disease being first. On the other hand, industrial plants reduced employes' injury frequently rates 38 per cent in two years, and railway crossing accidents declined 10 per cent.

In the past decade, industry has made amazing strides in preventing accidents and in lessening their severity. Part of this has been accomplished by improved guarding of machinery. The larger part, however, has resulted from a new spirit of safety first that has been instilled into workers and management alike. Precisely the opposite has occurred on our highways. Recklessness grows, rather than slackens; improvements in cars breed more death and injuries, not less.

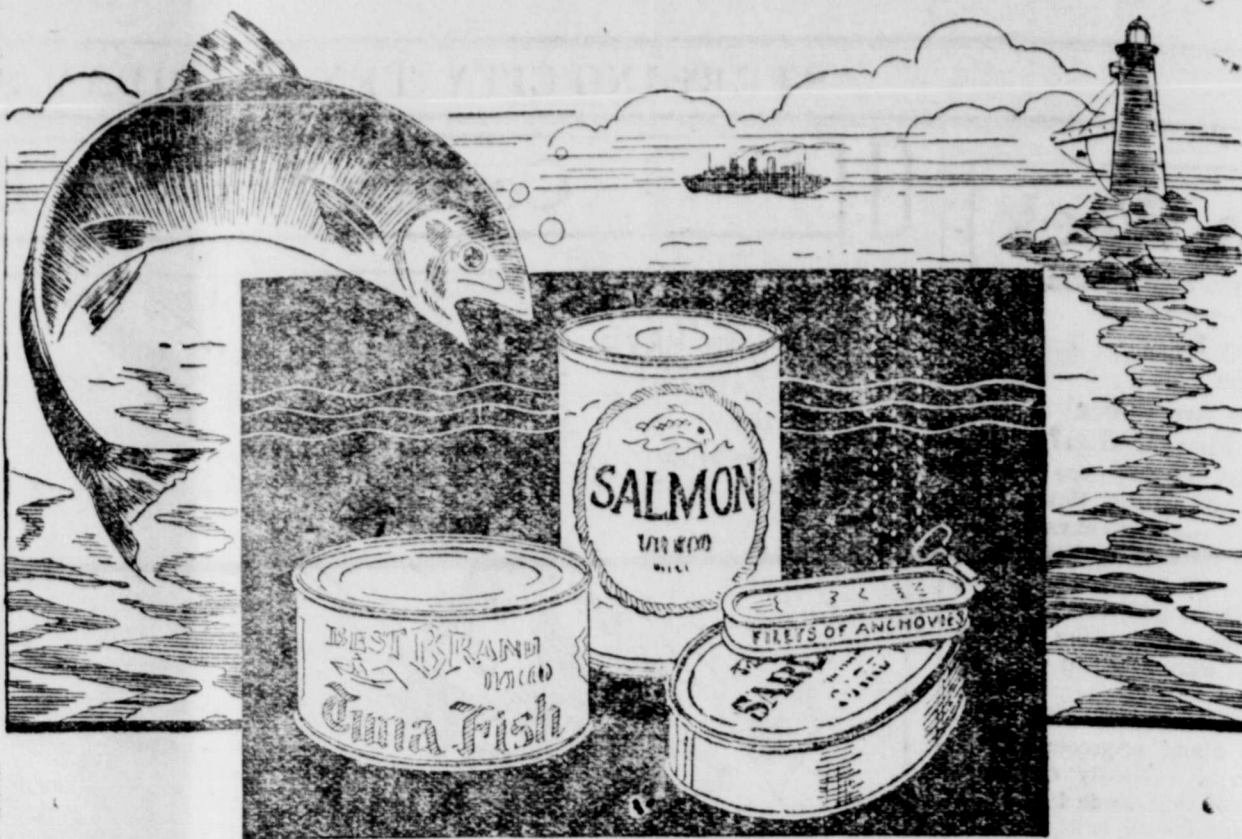

What has been done in industry can be done with automobile driving. Just as industrial management disciplines the heedless worker who endangers others, so must the state discipline the heedless driver. If industrial workers can learn the gospel of accident prevention and take it to heart so that it becomes a part of their mental operations, so can the automobile driver learn care, competence and courtesy.

It is time to take drastic action to make our streets and highways safe.

Arthur Brisbane, the popular paragon, is worrying because Uncle Sam refuses to recognize Soviet Russia. If Arthur will take the trouble, he will not have to go very far to find a valid reason.

In the first place, before the World War, Russia borrowed all the money it could from Uncle Sam, then murdered the Czar and all his kinsfolk and set up a crazy form of government and repudiated all its debts. Uncle Sam doesn't like people who repudiate their honest debts. The Red Communists do not believe in paying debts.

WONDERS OF THE DEEP

MOST of the earth has been discovered. More and more we are probing the secrets of the air. But the ocean remains, in many ways, the great mystery. And since nearly three-fourths of the earth's surface is covered by oceans, it will probably be many years before scientists can explain all of the wonders of the deep.

One of the never-ceasing sources of wonder is the quantity of food which comes out of the sea, and the nutritive value of this sea food. Science explains this, in part, by telling us that as the land becomes poorer, the sea becomes richer. By the processes of erosion and other factors, the land is being continually impoverished and the sea enriched. Water which seeps through the soil dissolves soluble salts and minerals and these eventually reach the sea. Man has even hastened this process by deforestation, and the seas have become a great storehouse.

Dietetic Importance

Commissioner Henry O'Malley, head of the Bureau of Fisheries

in the United States, says that he looks forward to the time when we will cultivate the seas as we do the land areas, increasing their production, much as we do with oyster farming today. In speaking of the importance of sea foods in the diet, Commissioner O'Malley says: "They have proved to be good sources of the minerals and vitamins so essential to a well-balanced diet, and of course, to good health. For a long time sea foods have been recognized as the richest known source of iodine among foods."

If you are a housewife, this all sounds very interesting, perhaps — but perhaps, also, you hate to clean fish. Scaling and cleaning even the most sleek and iodine-containing fish imaginable is not an inviting task. But unless you are a very old-fashioned housewife, this element does not seriously enter into your enjoyment of fish, because it is sold in such convenient forms today — and canned fish, which affords such excellent variety, has been found to retain food value excellently.

The following tested recipes will bring some of these "wonders of

the deep" to your table in tempting and nutritious form.

Fishes in Summer Dishes

Jellied Codfish: Make a white sauce of two tablespoons butter, two tablespoons flour, one and one-half cups milk, salt and pepper to taste and one slightly-beaten egg. Dissolve one tablespoon of gelatin in four tablespoons of cold water. Add to the white sauce. Cool, fold in the contents of two 10-ounce cans of codfish flakes and eight sweet pickles. Mold as desired. Chill. This serves ten persons.

Crab Meat Cocktail: Flake the contents of one 6½-ounce can of crab meat. Add two hard-cooked eggs which have been finely chopped, and six sliced stoned olives. Fork in lightly, one-half cup crisp shredded lettuce. Add one-half cup cocktail sauce, and serve in small green pepper cups. This serves six persons.

Cocktail Sauce: Mix together one-half cup catsup, one-fourth cup lemon juice, one-eighth teaspoon salt, one-eighth teaspoon Worcestershire sauce and two drops of tabasco sauce.*

When jimferguson heard that the legislature was considering an investigation of the charges of fraud in the recent runoff primary, he suffered a severe attack of jitters. If there is anything that scares jim into nine kinds of fits, it is an investigation. His first experience with an investigation was in 1917 when the senate kicked him out of the governor's chair and barred him forever from holding office in the future. The next time was when red headed Dan Moody prodded the American Road company which jim was very much concerned about. Dan scared jim so bad that he dreads the very word investigation. He is as afraid of an investigation as a coyote is of a No. 4 steel trap.

While Coke County is crowding over the 80-odd majority it registered for jimferguson, you don't hear those boys doing any shouting over the opening that part of the Butterfield from Robert Lee on west to the county line. Altho most of the landowners along the route offered to give the right-of-way for the road, yet, the commissioners court of the county of Coke has not crooked a finger, so far as we know, to layout and open up the road. Some awful got 1 people living over there and we like them, but there are a lot of bell wether Peter Donothings whom the younger generation will have to wait until they die before that road is opened.

Windows and mirrors can be given a bright polish by rubbing them with a compound made by mixing prepared chalk, 18 oz., whiting, 1 oz., and jewelers' rouge, 1 oz., to a smooth paste with a solution of wood alcohol, 6 oz., and distilled water, 10 oz. Rub the polish on the glass with a soft cloth. After the glass has been rubbed dry, polish with a clean cloth.

Japan is worrying because Uncle Sam has a flock of warships in Pacific waters. If Japan only knew it, there is no cause to worry. Uncle Sam wouldn't hurt a Jap a little bit if he could help it. Surely, the Pacific Ocean is large enough for the war fleets of both nations. Uncle Sam is not hunting trouble with Japan or anyone else. He had plenty of that kind of trouble several years ago when Germany was trying to teach him to speak Dutch. Your Uncle Sam has learned that the best way to keep out of trouble is to be prepared for it.

Sam McCorkle, District Attorney of Limestone county is authority for saying that he had the names and addresses of 500 negroes who voted in the runoff primary in three counties.

Several local ranchmen are finding plenty of work to do in keeping down cockle burrs. A patch of these burrs will easily ruin a whole clip of wool if they are not kept under control. Prospects of better prices for wool is quite an inducement to destroy the weeds.

Mrs. Mamie Lyles and daughter, Miss Louise Knight, came in from Denton last week. Mrs. Lyles will return to Denton, where her daughters, Mrs. Thompson and Miss Evelyn Knight are attending C. I. A., while Miss Louise will teach in the public schools here.

Masseur Service

Dr. S. Kellogg an osteopathic masseur is now located in the State Hotel at Sterling City, Texas. Dr. Kellogg treats and cures all kinds of diseases that is supposed to be treated by his method of treatment. He is a specialist in treating all kinds of skin diseases and all kinds of old sores, sore and weak eyes, granulated lids, also he adjusts and replaces all misplaced joints of the neck and back. Come to see him and let him show you the wonderful works that his method will do. His method is harmless, his treatments are painless, his charges are very reasonable and examination and consultation are free. adv. tf

Pigs for Sale. See Tom Blair. tf.

Mrs. O. D. Collins and son, T. F. of Big Spring, visited friends and relatives here this week.

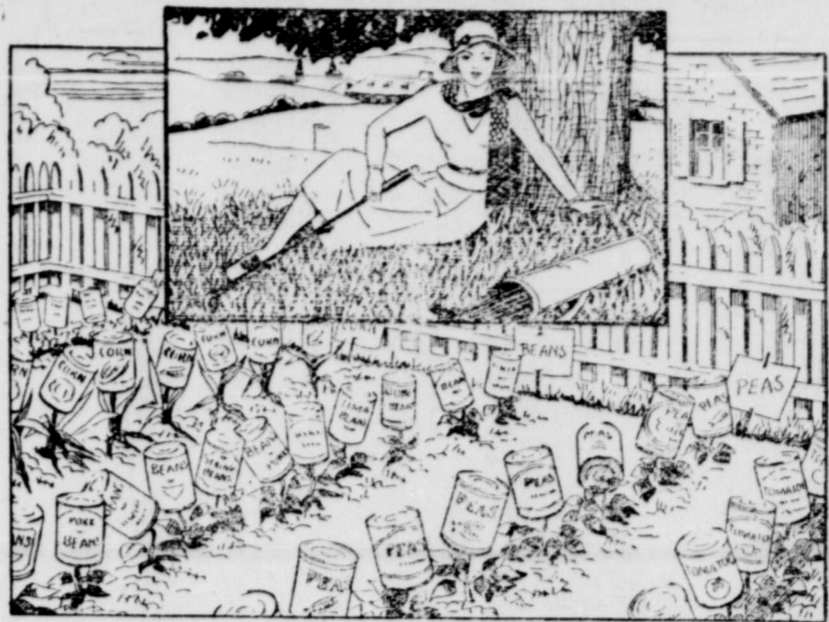

C. J. Copeland was up from Christoval last Monday. He and his sister, Miss Fannie Copeland, are at Christoval for the benefit of the healing waters of that famous resort, and are both improving in health.

Church of Christ

Sermons for the day are "The Three Witnesses" at the morning hour and "Rich in Faith" at the evening hour—7:45 o'clock. Bible school begins at 10; preaching at 11, and the Lord's supper is had at 11:45. The Ladies class was rained out last Tuesday. The lesson for next Tuesday will be the same one we would have had—chapters 4, 5, and 6 of Revelation. Anyone who would like to study with us is invited to attend. We meet Tuesday afternoons at 3 o'clock at the church house. Ted Norton.

Without a days vacation, Edith Southlee, the little girl who has set type for the News-Record during all this hot summer, started to school last Tuesday. But another fine girl, Florence Warren is at the type case in Edith's place. Edith is a senior in the high school this year, and if nothing happens, she will receive her high school diploma next spring. Florence received hers last spring. The world is looking for girls like these.

Cultivate Your Garden

It was that inimitable French wit and philosopher, Voltaire, who put into the mouth of the hero of "Candide" the advice to "cultivate your garden." There are several ways of doing this and the easiest and most time-saving, in these modern days, is to take advantage of the activities of those colossal gardeners, the commercial canners, and thus have more varieties of better fruits and vegetables than you could ever raise by yourself.

"Canned Gardens"

There are several distinct advantages in "canned gardens." There is no risk of spoilage because the surplus cans are ready on the shelf for the time of need, instead of spoiling in the garden basket while they are waiting to be used. There is no labor—un-

less you call opening a can labor, and there are now efficient can-openers on the market. There is no wastage because canned foods are packed in a variety of size cans—even down to the tiny individual size, when you want just a bit. There is a greater variety in canned foods than in your own garden because the canned foods gardens stretch from one end of the globe to the other—and even into icy and tropical seas where choice fish are "harvested." The seeds you sow in your own garden may or may not bring the best results, whereas the canner sows only selected seeds in selected soils.

And last, not least, utilizing the canners' gardens gives you more time for out-door life. Would you rather spend that time playing tennis, golf, motoring, sailing—or weeding your garden?*

Lower Prices!

You can now buy Grand Saline Salt at the price you have been paying for low grade salt. All prices Grand Saline reduced.

HALL FEED & GRAIN CO.

After a five week summer vacation, The Lion's Club held its weekly luncheon last Wednesday in the club room of the State Hotel. A good attendance of the members was had and a delightful entertainment was enjoyed by all. Your Lion's Club is the heart of your town.

Dr. Swann, county health officer, is supervising the installation of sanitary toilets for the Mexican school. They are being built on the plans and specifications of the State board of health. They are simple, inexpensive and effective. Heretofore this matter has been sadly neglected to the great danger and discomfort of those who dwell near the school.

On account of the continued excessive rains, school was suspended here last Wednesday to meet next Monday. So far as we recall, this is the first time in over forty years that a school in Sterling City was forced to suspend on account of rain. The continued downpour this week made it impossible to have a full attendance.

Dedicate "Lincoln Youth" Bronze

Secretary of Agriculture Arthur M. Hyde (top), who will deliver principal address at dedication in Ft. Wayne, Ind., on September 16 of the Lincoln National Life Foundation's massive bronze, "Abraham Lincoln, the Hoosier Youth." Dr. Joseph R. Sizoo, pastor of the Washington, D. C. church where Lincoln worshipped, another speaker at the impressive dedication ceremonies. Right—front view of the statue, created by the noted sculptor, Paul Manship, which portrays the Emancipator as a youth of 21.

HYDE, SIZOO TO DEDICATE NEW LINCOLN STATUE

Notables to Attend Unveiling Ceremonies in Fort Wayne on September 16.

FORT WAYNE, IND.—Dedication of America's newest Lincoln shrine, a bronze statue of "Abraham Lincoln, the Hoosier Youth," created by Paul Manship, noted sculptor, and erected here by the Lincoln National Life Foundation, will be dedicated with most colorful ceremonies Friday, September 16.

Arthur F. Hall

Lincoln scholars from all parts of the United States, the governors of Kentucky, Indiana and Illinois, surviving members of the Lincoln family, Civil War veterans who heard or saw Lincoln and scores of other distinguished men and women have been invited as special guests.

Secretary of Agriculture Arthur M. Hyde will be the principal speaker and deliver the dedication address following the unveiling of the heroic bronze located on the plaza of the Lincoln National Life Insurance company building. Among the other speakers will be United States Senator James E. Watson and Dr. Joseph R. Sizoo, pastor of the New York Avenue Presbyterian church, at Washington, D. C., which Lincoln attended while president. A presidential salute of 21 guns by U. S. artillery will be fired following the unveiling; Lincoln's favorite hymn will be sung by Cyrena Van Gordon, famed grand opera star and patriotic music suitable to the occasion will be played by the Fort Wayne American Legion band, one of the country's most famous bands.

To Broadcast Ceremonies.
The ceremonies, which will start at 11:30 A. M., central standard time, will be broadcast over the National Broadcasting company network on its National Farm and Home Hour with outlets in 47 of the principal cities of the country.

Following the dedication, a reception and luncheon will be held for the notable guests, presided over by Arthur F. Hall, president of the Lincoln National Life Insurance company. A history and description of the Manship bronze will be delivered by Franklin H. Mead, who conceived the idea of a statue of Lincoln as a Hoosier youth. Other speakers, most of them Lincoln authorities, are expected to include Judge Henry Horner, Ida Tarbell, Dan

Beard, Governor H. G. Leslie of Indiana, Governor Louis L. Emmerson of Illinois, Governor Ruby Laffoon, of Kentucky and Dr. Louis A. Warren, director of the Lincoln National Life Foundation. Old timers of Indiana, Illinois, Michigan and Ohio will speak of "Lincoln as I Remember Him."

Works Four Years on Statue.
The statue, which depicts Lincoln as a smooth faced Hoosier youth of 21 was erected in commemoration of the 14 formative years of the Emancipator's life which were spent in the Indiana wilderness. Paul Manship, the sculptor, in collaboration with Dr. Warren, spent four years in research and the mechanics of modeling the statue. The bronze represents the boy Lincoln leaning naturally against the stump in the simple costume of the frontier. As was his custom, he has a dog by his side, typifying his love for animals, an ax symbolizing him as the rail splitter and in his hand a book signifying inspirational thought. On each face of the pedestal is a group of heroic figures in medallion form representing some of the qualities for which the name of Lincoln stands—patriotism, justice, fortitude and charity. The heroic statue, classical in feeling, rises on its pedestal and plinth to a height of 24 feet.

When Mr. Manship was given the task four years ago he was told to produce an outstanding creation of art which would be one of the recognized monuments of the world. He made a long trip through the country of Lincoln's youth, the Ohio river and reminders of the old ferry boat days and glimpses of the Kentucky home-land instead of his childhood excited the sculptor's imagination. No pictures of Lincoln as a boy were available, as the Emancipator did not have a photograph taken until he was 37 years old. This made the sculptor's task more difficult.

"Lincoln the Dreamer and Poet."
"The desire to represent the young Lincoln as a dreamer and poet," said Mr. Manship, "rather than the rail splitter, was uppermost in my mind. These qualities were selected as being most important in view of the greatness of Lincoln's later accomplishments and without which the idealism and clarity of his future would never have been possible. The stories of his youthful physical prowess and his active backwoods life gave him a magnificent physique. His ax tells the story of his rail splitter days. The book symbolizes his intellectual faculties. We know of his friendship for animals, but here his relationship to the dog would symbolize rather a greater feeling of human sympathy and protectiveness which were among his conspicuous characteristics."

After completing his research Mr. Manship started actual work on the statue in May, 1926, spending six months in Paris and six in his New York studio. From the enlargements of the model the cast was made in Brussels, Belgium. The completed statue arrived here this summer, when it was assembled and erected in time for the dedication.

HE PROMISED HER

Caroline had promised Bill his answer that night. Bill was anxious to know his fate. Bill had declared his love for Caroline and had asked her to be his wife, and she had promised to give him the answer this very night.

They were sitting in Bill's new Ford under the shadows of the great pecan trees by the roadside. The river sang as it rippled over the bright pebbles of its bed, while the full moon looked down upon the lovers as they held each others hands.

Caroline looked sad and a shadow of doubtful anxiety clouded her beautiful face. She had made up her mind to accept Bill on one condition.

"Bill," she said, "before I promise to marry you, I must exact a promise from you."

"What is it, darling? You know that I would do anything in my power that is honorable for you. What is it, dear?"

"Bill, when we marry, I want to start our married lives right. I see so many couples trying to bring up their families and making failures because they neglect to provide this one thing that is so necessary to a happy home," said Caroline.

"Just anything, my darling, that you may ask," said Bill. "What is it, please say what it is. You know I will grant it."

"Promise me, Bill, before I give you my final answer, that when we are married, you will subscribe for the NEWS RECORD."

A Good Collection of Arrowheads

Jeff Davis has a rare collection of arrow points on exhibition at the Benge market. They are artistically arranged on a large card board and may be seen by anyone interested in such things.

One of these flint artifacts adorns the center of the collection. It is about five inches long and about two inches wide at the widest place. Altho it conforms with the typical design of Indian flint arrow or spear heads, yet, in all the thousands of these things that we have seen, we have never seen one that was quite like it.

In this collection are to be seen many points of different shapes and designs. Some of these will make one wonder why they were so shaped.

Most of these artifacts were picked up in the sand hills by Mr. Davis west of Odessa where it is evident that a considerable number of Indians once had their homes. The numerous metate mortars and pestles to be found there, together with the arrow points, are mute testimonies that they were farmers and hunters.

After a rain or sandstorm, human skeletons are often uncovered from the blanket of sand under which they have lain for centuries.

Mix Your Own Compounds to Waterproof Boots

The outdoor man who wears high-topped boots should have them waterproofed for his canoe or fishing trip. A thick compound is usually better for treating leather than thin oils, as it stays on the shoes longer and is not quickly affected by water. A good compound of this type is made, says Popular Mechanics Magazine, by mixing melted beeswax, 1 part, with coconut butter, 5 parts, the boots should be warmed to open the pores and the mixture applied with a stiff brush while it is warm. At least two applications are necessary. Another good mixture is made of cod-liver oil, 2 parts, neat's-foot oil, 2 parts, and melted beeswax, 1 part. This is also applied while

hot, and the soles are left standing in the liquid for a minute or two.

Old Books

A calf bound volume of Chitty on the law of contracts is among the books in the library of the News-Record. It was printed in 1827, making it 105 years old. The book is in a fine state of preservation and would be good for another hundred years under ordinary care.

It is one of a set of law text books purchased by this editor 50 years ago. The law of contracts as laid down in this old book obtains today. Of course there have been many changes in law in the last 105 years, yet, these changes have been made to conform to the principles set forth in the old volume.

We have two volumes of the "Treasury of Knowledge" printed 96 years ago, but they have been handled so much as reference books that they are somewhat worn, tho they are still usable.

A Card of Thanks

To the voters of Sterling County: In the recent Democratic Primary, enough of you supported me to make me the nominee for the office of County Treasurer of this County. For this, I am truly grateful and I thank you for conferring this honor upon me. In the discharge of the duties of this office after I am duly qualified, I shall do so with malice toward none and good will to all. I shall have no enemies to punish or friends to reward, for it is in my heart to treat all alike. Again I thank you.—Agnes Ainsworth.

Do you miscalculate the speed of approaching cars in passing?

Do you scrape a fender occasionally?

Do you hit curves at higher speeds than you intended?

Do you sometimes fail to see a visible obstruction until almost on top of it?

—If so, your eyes are at fault.

A number of cases of whooping cough is reported to prevail in Mexican town. It would be well if parents would keep their children away from that part of town.

Eighteen cases of typhoid fever are reported in San Angelo.

Do you try to park your car in a space too small for it?
