

Charlie Wiley went to the big city the other day. He caught a ride into town on a cattle truck and paid a visit to the zoo. He wanted to see all those strange animals people had been telling him about. The first animals he saw were the foxes and raccoons. Charlie knew foxes and raccoons. He'd trapped them and chased them with hounds all his life. He knew the bobcats, too and the coyotes and the great loafer wolves.

Charlie couldn't resist the urge to emit a chattering insult at the foxes. They took it up immediately rushing about the enclosure and barking angrily at him.

This disturbed the raccoons. They set up a quarrel. Charlie squalled a battling cry at them. They set up a clamor. Charlie snarled at the bobcats, insulting them in their own language. He cut loose with the wailing, unearthly call of the wolves.

The caged wolves went into a frenzy. The bobcats snarled and hissed. A nearby African Lion became aroused and roared out his mighty challenge. This set the ball to rolling.

Every creature in the zoo came alive to the threat of danger and let loose with all it had. The great Bengal tigers lunged at their bars. Monkeys scampered to high perches and screamed with wrath and excitement. The bears roared. Parrots chattered and scolded. The elephants rocked and moaned and blasted the air with ear splitting trumpeting.

The total result was a bedlam of horrible sound that belonged not to the safe and monotonous civilization of the other sight seers. It was more than they could stand. They screamed and fled to the dubious safety of their automobiles. They roared away, white of face stopping at every opportunity to send in repeated alarms, to the police, the caretakers of the zoo, the fire department and the city fathers.

Before any of these august and efficient bodies could arrive, Charlie had disappeared. He sat on a curbstone eating peanuts and getting a huge kick out of watching the police and fire engines clang by on their way to the zoo.

Charlie claims he's going back down there some time. He thinks the animals enjoyed his visit.

ooo
Charlie is a bachelor. He lives with his hounds in a chicken coop shack down on Wolf Branch, not so far away. Sometimes Charlie has to move out of his shack while the flood waters of the creek move in, but this isn't so very often.

The old hunter claims he had a girl once, way back yonder, but a milk calf kept his romance from ever ripening.

It seems that this girl was milking a fresh cow one evening and was unable to drive the young and foolish calf out of the pen. Finally she became exasperated, grabbed the little rascal by the hind legs, and dragged him out. The next evening she had the same trouble and solved it in the same manner. In a few days both the calf the girl had become so used to this method that they continued to keep it up and thought no more about it.

One Is As Essential As the Other

(WNU Service)

A Letter To Senator Wheeler

Dear Senator: Those cards which you sent out at government expense to soldiers and civilians last week, asking them to mutiny again at the United States government in case of war with a foreign aggressor is in keeping with you and your gang of trouble makers,

We expected you to use mean and dirty tricks in promoting your diabolical designs against Uncle Sam, but we never suspected that you were so lost to self respect and common honesty as to take advantage of your privilege as a senator to force the U. S. government to pay the expense of an insidious propaganda, which if successful, would destroy it.

According to your request, you would promote mutiny in the army, Navy, and airforce and thus place the United States at the mercy of Hitler and his legions of murderers and plunderers.

If your request were granted, it would emasculate patriotism, courage and every noble attribute in the citizenship of America.

Of all the Senators on the long roll of congress, none has bargained so cheaply with hell as to try to sell his country into slavery as you have. None have ever had the temerity to try to stay the hand of patriotism that is lifted to protect our land from aggression by a detestable force.

But your time is coming senator you and your dirty gang of traitors in the meantime make the most of your criminal activities. You—(censored) descendants of a race (censored) and barked at the moon (censored) you—buzzard.—Uncle Bill

But when Charlie came by the cowpen one day at milking time and saw the light of his life slinging a seven month old calf out the gate by the hind legs, the sight gave him such a shock that he could never go back.

"What chance," he asked me sadly one day, "would a skinny man like me have with a woman like that in the house?"

I Was Only Kidding, Honest

Pete Smith protests when Frankenstein's monster starts "giving him the works" during the filming of Pete's latest Microscopic short, "Third Dimensional Murder." The famed arm-chair adventurer reaches a new high in thrills in the Metro-Goldwyn-Mayer film by giving a third dimension to classic forms of movie murder.

Hodges Sheep Win At Sale

In the annual sheep sale at San Angelo this week, L. F. Hodges, local breeder of registered Ramboulet sheep, won a first and second place. Out of 500 sheep shown, selected from the flocks of noted breeders in the United States, Hodges' pen of five range bred rams won first place, while a yearling ram from his flock placed second.

For the past several years Hodges has been a consistent winner wherever his sheep were exhibited and his flock is known as one of the best to be found in the country.

W. N. and L. R. Reed closed a deal this week for four sections of land out of the R. C. Sanderson estate. These lands adjoin their ranch on the north.

Sterling Schools To Open Sept. 2

The Sterling Public Schools will open the 1941-42 session on Tuesday September 2, 1941 at 9 A. M. with a general assembly of parents, patrons, teachers and students. Four vacancies occurred during the summer due to marriages of Misses Margie Smith, Sybil Reiser, Dorothy Ferrell and Miss Mary Roach. One teacher was added to take care of the new second grade and public school music through the grades.

The Twelve Grade System has been officially approved by the Sterling Board of Education and will be installed for this year. All students in school prior to this year will be very little affected except both teacher and student will receive double promotions.

The complete faculty for 1941-42: O. T. Jones, Supt. Bachelor of Science degree from North Texas State Teachers College and Masters degree from Texas Tech.

F. C. Burnett, High School Principal and Coach, Bachelor of Science degree from East Texas State Teachers College, and a Masters degree to be conferred in August.

H. M. Carter, Bachelor of Science degree from Texas A & M and graduate study in A & M. Teacher of vocational agriculture.

Marshall Brown, social science and coach, and a bachelor of science degree from Texas Tech College.

Miss Mary Mathis, High School English, Bachelor of Arts degree from Texas Tech. and graduate study at the University of Texas. Teacher at the Garner High School at Knott last year.

Miss Mettie Virginia Dean, Home Economics, 1940 graduate of Texas State College for Women and a teacher of home economics at Mesquite last year.

Miss Pearl Faires, 8th grade Bachelor of Arts degree from Louisiana State University and graduate work at the University of Texas.

Mrs. F. C. Burnett, Bachelor of science degree from East Texas State Teachers College in August and teacher of Seventh Grade.

Miss Florene Allen, sixth grade Graduate of Texas State College for Women, a bachelor of arts degree.

BE CAREFUL WITH BABY

"The lives of thousands of Texas babies are being saved this summer by the intelligent parental care during hot weather. However many more infant deaths could be avoided if parents would have a keen realization of the value of simple common sense precautions," states Dr. George W. Cox, State Health Officer.

Records of the State Health Department's Bureau of Vital Statistics show that 2,506 babies died of diarrhea and dysentery during 1940, many of them occurring during hot weather. The infant death rate for diarrhea and dysentery in Texas is too high, as can be seen from the above mortality figures. Public health officials cannot solve the problem alone, parental cooperation is the real key to its solution.

The following suggestions, if followed by parents of infants, would go far in further reducing deaths from diarrhea and dysentery:

1. Whenever possible, infants should be breast fed for the first 6 or 8 months. When bottle milk is used it should be boiled or pasteurized.

2. Drinking water for the baby always should be boiled.

3. Personal cleanliness should be the rule for every member of the house. Those handling milk or food should be particularly careful.

4. Any member of the family or visitors showing symptoms of disease, no matter how slight, should be kept away from the baby. They should not be allowed to handle any of the food intended for him.

5. The house should be screened to protect not only the baby but all household food, from flies.

6. Every home should be provided with a sanitary or fly proof toilet or sewage disposal facilities.

7. Every home should have a safe water supply.

While most of the above suggestions are applicable at all seasons of the year, the following precautions are important in hot weather.

1. The baby should be kept as cool as possible. 2. He should be kept clean. 3. Clothing should be reduced to the simplest essentials. 4. He should be kept as cool as possible. 5. He should be protected again at insects. 6. He should not be over handled and kept in the open as much as possible. 7. Water should be increased internally and externally. 8. He should not be overfed and if there are any signs of illness the family physician should be consulted promptly.

Miss Rena Ball, bachelor of arts degree from Hardin Simmons University, and graduate study in Arizona. Teacher of fifth grade.

Mrs. Henton Emery, graduate of North Texas State Teachers College with a bachelor of arts degree, and teacher of fourth grade.

Miss Frances Aiken, third grade, Bachelor of Arts degree from the University of Texas.

Miss June Swartz, second grade and public school music. 1940 graduate of Texas State College for Women, a bachelor of arts degree, a teacher at Christoval last year.

Miss Oma Lea Elliot first grade and a bachelor of arts degree from Texas State College for Women in 1940. A teacher in the Port Arthur schools last year.

Miss Lois Stone, teacher of the Mexican School, and a bachelor of arts degree from Sull Ross State teachers College at Alpine and also graduate work there.

JACK AND MOLLY

Jack Wrather and Molly O'Daniel were to have been married in the Governor's mansion at Austin last Thursday.

That is supposed to be the reason why Governor Lee O' has not gone to Washington to learn the ways of the U. S. Senate.

Soon after the wedding, Jack is supposed to report for duty in the navy. It is reasonable to suppose that Molly can't be with Jack on his training cruises all the time and there will be periods of sweet misery for these loving youngsters after being separated for weeks and months.

Many will be the loving missives that will be written by the two. These missives will intensify and strengthen the bonds of love between the couple, so that a rift in their grand sweet song of love may never come.

I well remember during the Civil War when Aunt Marv and Uncle Rabb got married. Uncle Rabb was a young confederate soldier who came home on a furlough to visit relatives and friends.

Aunt Mary was a beautiful lass of sixteen or more years. They met at a party and agreed to marry the next day, because he had only five days before he must return to his command in the army. So they were married after the manner of their fathers and mothers.

Grandmother opposed the marriage on the grounds that Uncle Rabb was to leave so soon and that he might not ever return.

Grandfather approved it and said the separation would do them good. It would give them something to think about and the thoughts of each other during their separation would serve to strengthen their love. Grandfather said that when Rabb's term of service was ended, he would have a loving wife to come home to. That they would be more fitted to begin a wedded life than if they had not been separated.

Uncle Robb had been absent for more than two years. One eve I saw Aunt Mary running down the sandy road. The scream of joy she uttered still rings in the ears of my memory. It was a full diapason of uttered joy. He dismounted from his horse and she was in his arms crying her joy out on his broad bosom.

I have often thought that the ecstasy and thrill experienced by these happy youngsters went a long way paying toward for the miseries and worries of their enforced separation.

If it were left up to me to say what to do when a young married couple reaches the nagging stage and their love for each other has begun to sour. I would say, send the husband to the army and keep him there until he became crazy to see his wife and she to see him.

Separation for a brief period is a fine remedy in such cases.—Uncle Bill

HIGHER AND WEIDLER

Raven-haired thirteen year-old Virginia Weidler, who was chosen last season by Parents' Magazine as the outstanding juvenile player of the year, has one of the most promising roles of her career to date, with Wallace Beery, in "Barnacle Bill."

Virginia's work as the sister in "Young Tom Edison" won critical plaudits throughout the country. In "All This and Heaven Too" and "The Philadelphia Story" she demonstrated her versatility and great audience appeal.

The youngest of six children, Virginia has grown up in Hollywood. She is now under a long-term M-G-M contract.

SOUTHERN SAM SAYS

De only feller Ah knows dat makes a success of startin' at de top an' workin' to de bottom am a well diggub!

GOD BLESS AMERICA

By Irving Berlin
While the storm clouds gather,
Far across the sea, Let us swear allegiance

To a land that's free,
Let us all be grateful
For a land so fair,
As we raise our voices
In a solemn prayer.

God bless America
Land that I love,
Stand beside her and guide her
Through the night with a light from above.

From the mountains, to the prairies,
To the oceans white with foam,
God bless America
My home sweet home.

The Cowboy And Daylight Saving Time

Among the time saving, efficiency increasing devices which may apply to other industries but which will never apply to the ranch business is the practice of daylight saving.

President Roosevelt has requested national use of daylight saving time. Clocks will be set up, if his wish is granted and workers will begin their work an hour earlier than usual. They will also finish an hour earlier, if they are working on a straight hour schedule.

Obviously the efficiency experts may omit cowboys from their plans. Ranch hands "rise and shine" well ahead of the sun throughout the year. They work eight hours, all right—eight hours before dinner, and about that many after dinner.

One of the most perplexing habits of the average ranchman or foreman and his cowboys is that of getting up so early they have time to drink two or three pots of coffee before it becomes light enough to find the night horse in the small pen. Also it is the common practice when a pasture is to be rounded up to arrive at the back of it and then have to sit around and smoke until daylight comes. In the summer time it takes early rising to have this much spare time before daybreak.

The fact that a cowboy was getting up at 3 A. M. instead of 4 A. M. according to his alarm clock or

the cook's strident yell, might make him indignant if he had a liking for sleeping late.

Nevertheless, it would make no difference in the amount of work he did, since he works from light until dark every day.

Nobody who ever worked with livestock in West Texas disagrees with this condition. In summer, more work can be done in two hours during the early morning than can be done in four after the temperature rises. Especially true is this when it comes to working sheep. These animals simply cannot be driven in from a pasture successfully during the heat of the day—they have to be rounded up while it is cool and then doctored or otherwise "worked."

Therefore, an eight hour day is out of the question, and so is daylight saving time, on a ranch. What the cowboy wants is longer nights not longer days. It's harder to get eight hours sleep on a ranch in the summer time than it is to drive a 10 ton truck through a saddle gate, the average cowpuncher will declare.—San Angelo Standard

Tasty Recipe For New Kind Of Peach Short Cake

A new kind of peach shortcake has been prepared by the Georgia Extension Service, and has been tested and approved by the Georgia Carolinas Peach Marketing Board.

- The recipe;
- 2 cups flour
 - 4 teaspoons of baking powder
 - 1-2 teaspoon salt
 - 2 teaspoons sugar
 - 1-2 cup milk
 - 1-2 cup butter.

Method: Mix dry ingredients, sift twice, work in butter, add milk slowly and tos. on floured board. Divide in two parts, roll to desired thickness and bake in hot oven for 12 minutes or until done on buttered biscuit pan. Split and spread with butter.

Peel and slice fresh tree ripened peaches, sprinkle with sugar, chill and serve with whipped cream.

Sentiment Against Raiding Highway Funds Grows in U.S.

SENTIMENT against the raiding of highway funds is growing in all parts of the United States.

Legislatures of 20 states at their 1941 sessions, a nation-wide survey discloses, will consider proposals for constitutional amendments to protect automotive tax funds from being diverted to non-highway purposes.

Last year the people of four states voted for such amendments, making a total of 11 states that have adopted such constitutional safeguards. These states, as indicated on the accompanying honor roll, include California,

HONOR ROLL

- CALIFORNIA
- MICHIGAN
- NEW HAMPSHIRE
- MINNESOTA
- MISSOURI
- COLORADO
- KANSAS
- IDAHO
- NEVADA
- NORTH DAKOTA
- SOUTH DAKOTA

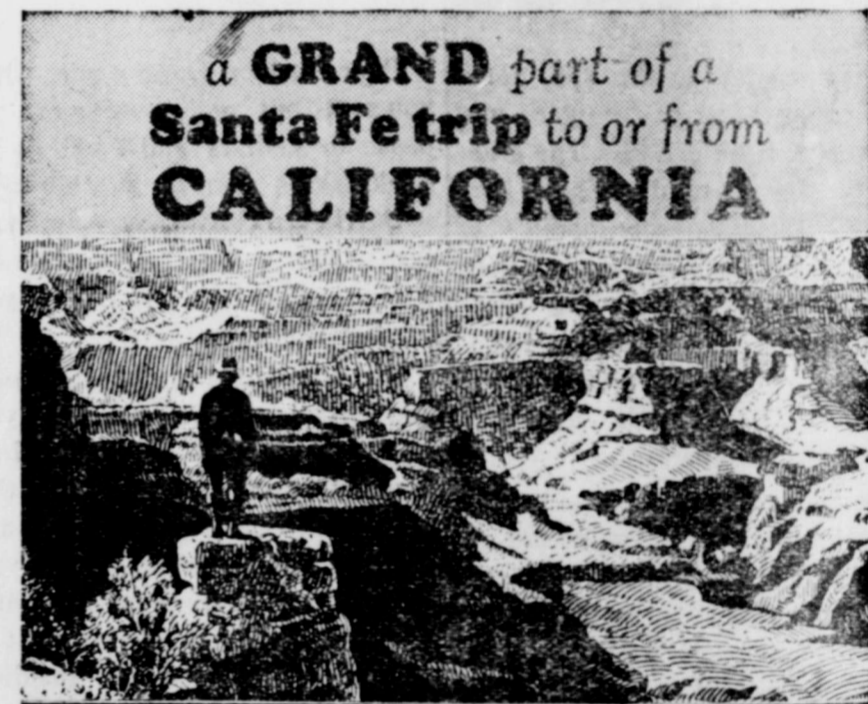

- OUR STATE? THESE STATES HAVE CONSTITUTIONAL AMENDMENTS TO PROTECT ROAD FUNDS!

Michigan, New Hampshire, Minnesota, Missouri, Colorado, Kansas, Idaho, Nevada, North Dakota and South Dakota.

Encouraged by the victories in those 11 states, groups of farmers, motorists, motor truck owners and others interested in highway transportation are pressing for the adoption of protective amendments in another score of states. Gasoline taxes and motor vehicle registration fees, they point out, were devised to provide funds to pull the states out of the mud. Roads built with those taxes not only are benefitting motorists, but they also are contributing much to the economic and social progress of the states. The practice of taxing the highway users for roads, and then using the funds for purposes having nothing whatsoever to do with

roads, it is widely believed, is unfair and unjust taxation.

Because taxing the people for one thing, and then using the proceeds for something else, is a new practice in public policy, present constitutions of the states do not cover the matter. The framers of the constitutions did not foresee the future. Since a legislature is legally free to act as it sees fit in matters not covered in its constitution, the only way that people of a state can express effectively their will against the practice is to bring their constitution up to date by voting in an amendment. That is exactly what they are doing. Public opinion definitely is repudiating the diversion of automotive tax funds to non-highway funds as an unsound and unjust public policy.

Years Crop Measurement Begins

Mr. W. W. Durham, the County A. A. A. Performance Supervisor, began measuring farms in Sterling County this week. Each farm operator is requested to be present at the time his farm is measured. The A. A. A. Office is using aerial photographs this year for the first time. There are 13 cotton farmers in the county eligible for cotton stamps if they divert below their 1940 cotton acreage. These stamps will be issued immediately after the measurements on the farm are computed, and they can be used to purchase cotton goods.

Each farm operator will be notified of his planted acreage, just as soon as the figures are computed

How to become A SKILLED DRIVER

By RAY W. SHERMAN
Courtesy of the
FORD GOOD DRIVERS LEAGUE

Driving at 30 miles an hour into another car coming from the opposite direction at the same speed is like driving a car off a three-story building.

KNOW THE LAWS OF PHYSICS

A thorough knowledge of the laws of physics comes ahead of actual skill in handling a car.

How many drivers realize as they turn a corner that two tons of weight want to keep on going in a straight line? Here are a few of the important things to remember about the laws of physics:

At 25 miles an hour a car has developed enough energy to roll over once. At 50 it has developed not twice but four times the energy—enough to roll over four times. At 75, it has developed not three times but nine times the energy—enough to roll over nine times.

At 25 miles an hour you can make a fairly sharp turn; at 50 only one-fourth as sharp; at 75 your turn can be only one-ninth as sharp as when you were going 25.

It requires 30 feet to brake a car going 20 miles an hour, and four times that, or 120 feet, to brake it at 40.

RURAL TRENDS

PAYING TOO MUCH TO EAT

A leading farm journal recently printed some very interesting and very significant figures. It made the statement—and backed it by evidence—that out of every dollar farmers spend for consumer goods, 41 cents is spent for food.

Kyes

Consumer goods of course means things that are used up—food, clothing, drugs, toilet preparations, household supplies and the like.

We all look upon the farm as the place where food is raised. Of course we do not expect any single farm to produce every kind of food its people might like to eat, but it does seem that a well-run family farm should be able to feed its operator and his family on a well-rounded diet, without the need of buying 41 per cent of its food in the market.

Perhaps this figure points to a bad habit that too many American farmers have acquired—the habit of growing only a single crop, or a few crops, and depending upon others for the diversification that means healthy living and profits.

These one-crop farmers are always at the mercy of the market for their specialty. They are very likely to be in the position of selling their own crop at a low price, and being compelled to buy what they need at a high price. At the very time they are asking for economic changes that will bring them more cash, they are actually wasting some of the cash they have, by spending it for food they could raise.

Yet there is hardly a farm on which a good-sized kitchen garden could not be planted, and hardly a farm on which there is not enough time wasted to take care of that garden. And with modern farm machinery to do most of the work, spare time for gardening is still more available.

A thrifty farmer can raise on his own place just about everything needed to provide a healthful and adequate year-round diet, except sugar, salt, coffee, tea and perhaps fresh fruits during the winter.

And a thrifty farmer's wife can preserve enough fruits and vegetables to last a family through a long winter.

In the old days, before so many new-fangled ideas became popular, we who lived in towns used to look upon a farm dinner as just about tops in plenty of good things to eat. They didn't buy many of the good things they gave us. They raised their own fruits and vegetables, and they killed and cured their own meats. They were actually prodigal with fried chickens and luscious country ham and sausage. They baked their own bread and pies, and what pies they were!

We've lost a good deal since the arrival of the can opener and the cellophane-wrapped package. The stores sell us fine foods, clean, well-selected and well-preserved. But they cost money, because to buy them we have to pay a good many profits and expense items that are not in the picture when equally good things to eat can be produced right where they are eaten—on the family farm.

If you are one of the farmers who think a garden is too much work, why not get together with a few neighbors, and each raise enough of a few fruits and vegetables for the group.

Then let other members of the group raise a different selection, and share with you and with each other these money-saving garden crops.

Sounds like a very simple idea, but it's a very practical one that too many farmers have been overlooking as a means of conserving the cash that is sometimes so hard to accumulate.

Despite efforts of several state departments, including the Game department to eradicate timber wolves, there are still a few of the huge beasts in Texas. Four were dug out of a den near Crockett, in East Texas, recently, after the mother had been caught in a trap. Two of them were killed by dogs but the other pair are now in the zoo at Beaumont.

Largest Peach Crop In 10 Years

Americans this year have the privilege of enjoying the finest and largest peach crop in the last decade. Unlike war torn Europe America is not suffering from a shortage of needed foods—but is suffering from under consumption, with more than 40 per cent of our entire population actually undernourished.

In making this statement, Mr. Malloy, Co. Agent added that a cooperative public spirited educational campaign sponsored by the Peach Producing Industry and Food Trades Industry in cooperation with the U. S. Department of Agriculture is now under way to increase the consumption of fresh peaches by everyone.

During the period July 24th thru 30th all housewives in this area and the South are urged to serve more fresh peaches and to preserve thru home canning and an adequate supply for year round use.

Mr. Malloy said, "Very few people know the importance of peaches in nutritional and dietary values. It is not generally known that peaches are rich in valuable minerals, calcium, iron, phosphorus and potassium needed to build bone structure, protect the teeth, enrich the blood, regulate body functions, and make clear complexions.

"The abundance of valuable food factors in peaches, scientists say, includes Vitamin A, which helps growth and vitality and is nature's first line of defense against disease of the nose, throat, and lungs, Vitamin B, needed for growth and health, increases appetite, stimulates digestion and aids in protecting the body from nerve diseases Vitamin C needed to keep the body in good condition, aids in resistance to infection, and stimulates growth, and Vitamin G vital to nerve tissues

"WHO SAID GOOD BLADES HAVE TO BE HIGH PRICED?"

and maintenance of body vigor, as well as helps to maintain normal skin and complexion".

Texas Wildlife

The mountains of West Texas about six miles from Van Horn are the scene of a rather strange friendship. A seven point deer and a young ewe bighorn mountain sheep have been seen together several times. Not long ago a biologist of the Game Department came upon a strange pair bedded down together under a bluff on the side of the Beach Mountains. They sprang up together and the buck bounded off up the mountains, closely followed by the sheep.

And here is another note which attests to the fact that Texas still has a variety of wildlife, although some of it is not desirable. A game warden in the Panhandle reported recently that he had killed nine huge rattlesnakes within a period of six weeks. The largest was 6 feet, 2 inches in length and had a circumference of twelve inches. Four other rattlers each measured more than five feet in length.

SAFETY CONCLAVE HONORS HEROIC N. Y. POLICEMAN

New York's latest police hero, Patrolman Charles Fratello, the traffic policeman who saved the lives of two children, was presented with the "Bulova Nick O' Time Award" by President Frank L. Jones, of the Greater New York Safety Council, at the Annual Banquet of the Twelfth Safety Convention and Exposition, in New York.

Officer Fratello saved the lives of William Kellerman, 7, and his sister, Florence, 5, when he dove beneath the wheels of an onrushing 2 1/2-ton truck and pushed the children to safety. Fratello, himself, was pinned down by the heavy truck's wheels. Scraped, bruised and shaken, the policeman was taken by ambulance to Roosevelt Hospital, where X-rays disclosed no fractures.

Both of the Kellerman children were present at the ceremonies to applaud their hero, when he was presented with the "Bulova Nick O' Time Award"—a 21-jewel Bulova "President" wrist-watch—by Safety Council President Jones.

(The "Bulova Nick O' Time Award" is a permanent Award to a person who, with great danger to himself, performs an heroic deed in the nick o' time.)

But It's True

HENRY CAHILL OF NORTH, WEST VIRGINIA, HAS CHICKENS DIRECTLY DESCENDED FROM FOWL OWNED BY GEORGE WASHINGTON—AND NO OTHER STOCK HAS EVER BEEN ALLOWED TO BREED WITH THE FLOCK.

BERTON FIELD OF SANDUSKY, OHIO, PLAYED A FULL GAME OF SEMI-PRO BASEBALL AT THE AGE OF 98! HE MADE ONE HIT IN FIVE TIMES AT BAT, SCORED ONE RUN, AND IN THE OUTFIELD HE CAUGHT ONE FLY, MADE ONE ERROR... SEPT. 3, 1937...

THE CORNSTALK WITH 21 EARS ON IT—GROWN AT THE ST. LOUIS AGRICULTURAL INSTITUTE... IT WAS 21 FEET HIGH / SUMMER OF 1930.

A MAN NAMED JOHN REILLY IS ONE OF THE WORLD'S LEADING AUTHORITIES ON HEBREW LITERATURE... HE IS CURATOR OF THE LIBRARY OF HEBREW THOUGHT, LONDON, ENGLAND.

WNU Service

"No fun straying any more!
It's too easy for the Boss to
round me up by telephone"

When livestock strays, the telephone is a big help in rounding it up. A few calls to nearby neighbors are usually enough... in fact, neighbors will often call you before you've realized that the stock is off your place. And locating stock quickly is one good way to keep it from harm. * * * A telephone on the farm pays for itself many times over.
