The organization of peace on a world-wide level is within our grasp. And yet—the probability is that we shall run into our own destruction because of the conformism and complacency of the press, radio, movies, churches and all the other organizations and technical media of mass enlightenment and education. I thank you for the rare exception you represent."

During the Civil War there were many southern sympathizers in the North. When the mad John Wilkes Booth shot Lincoln it was generally believed in the Union that the Confederacy had engineered the assassination. "Flying Eye"

PITTSBURGH, PA. — This bomb-like "flying eye," which helped win the battle of the Atlantic, will usher in a new era of oil exploration from the skies. Originated by Gulf Oil research as a magnetic detector for aircraft, it can "see" submarines hidden underwater — or "look through" the earth's crust to chart the underground magnetic structure. As the first practical airborne prospecting device, it opens to oil exploration hitherto inaccessible jungle, mountain and ocean regions; and will tremendously speed-up discovery of the world's remaining oil resources. The young lady perched on a pontoon of the exploration plane hears from E. W. Westrick, engineer who assisted in its development, how the "flying eye" trails from a cable in flight.

Electricity Works for Peanuts!

And if you aren't up on today's expressive slang, "peanuts" means a very small amount of money. Like your electric bill. It really is "peanuts," isn't it—compared to most other items in your family budget?

While the cost of most things climbed through the years—the price of electric service kept right on going down. Even in wartime, when practically all prices popped up, electricity actually became a few "peanuts" cheaper.

As a matter of fact, the average American family gets twice as much electricity for its money today as it did 15 years ago!

All of this goes to prove an important point. Sound business management—and experienced employees—together have given the American people dependable, low-priced electric service—the best and most in the world! You'll enjoy that service even more in the electric years ahead.
