Questions asked will be based on gross and net business, labor costs, expansion, etc. All information is confidential as regards any other branch of the government, such as the bureau of internal revenue or any regulatory bureau of government.

Prairie Dog Control Work Underway

One of the tentative objectives set for the proposed Sterling County Game Management Association is complete eradication of all prairie dogs in Sterling County, according to Byron W. Frierson, Sterling County Agent. Although organization of the association has not been completed (due to rainy weather) the prairie dog eradication work will get underway as soon as the weather is clear.

The work will be done under the direction of Mr. Carl Jacobs of the Predator and Rodent Control Service, who will stay in Sterling until the work has been completed.

Frierson asks that all ranchmen who have prairie dogs on their ranches to contact him as quickly as possible. Mr. Jacobs will supervise the complete job and the ranchmen will be required to pay only for the cost of the cyanide flakes used on their places and for whatever help is necessary to put out the flakes.

Mr. Jacobs stated that he and one helper could treat 50 to 100 acres of prairie dogs in a day. Jacobs stated that there is absolutely no danger to livestock with methods he plans to use.

To really accomplish complete eradication of prairie dogs it will be necessary that all ranchmen work together and get them all at one going over, Frierson said.

Mrs. R. A. Garrett returned to her home Tuesday after having undergone a major operation in a San Angelo hospital last week.

"Covering the County"
By Byron W. Frierson, Sterling County Agent

It's nice to see the Game Preserve signs going up over the county. If you haven't gotten yours yet, come by the office and see me. I have some signs and will order more.

If you want to send some wool to the Sonora Wool Show, select your best individual fleeces and bring them in. I will help you prepare them for the show. Foster Price has selected some individual fleeces and a bag of wool to be entered in the show.

William Blair, a member of the Sterling County 4-H Club purchased a registered Hampshire sow pig from Bubba Foster last week. Bubba has a lot of pigs and William made a good selection.

End of the grass contest which is being held in the 4-H Club has been postponed from May 2 to May 6 to coincide with the scheduled 4H meeting. Some excellent collections have been made. Boys who turn in the best 5 collections will receive further training as a grass judging team and compete in a district contest at Buchanan Lake in June.

The Horse Show last week was a success according to my estimation. It was made a success by a group of officials who carefully planned the affair months in advance, then pursued those plans. Successful events of that nature are not accidents.

Nick Reed is spraying some spring oats with 24-D to kill sunflowers in them. This is a proven practice and thousands of acres of weedy grain have been sprayed in the farming districts of Texas this year.

Claude Collins, Jr. had a bunch of cattle sprayed at the stock pens last week with a DDT-Benzene Hexachloride mixture. This mixture gets the lice and eggs both at one spraying according to Extension Entomologists.

Crit Clark, Nick Reed, Stringer Ranch, and Earl Bailey are all joining in the Sterling County Game Management Organization. The majority of the acreage in the county is now included in the applications for membership. As soon as there is a little slack period in

As a climax to the stage show, "Fashions in Review", given last Tuesday night in the school auditorium by the homemaking department of the high school, ribbons were presented to nine girls for the clothes they had made in class.

The two homemaking teachers from Big Spring, Misses Thompson and Daughtery, judged the garments, basing their decisions primarily on construction, fit and style.

The list of winners is as follows:

- H.E. Ib—Skirts and Blouses**
- 1. Patsy Davis
- 2. Mary Davis
- 3. Charlene Drennan

H.E. Iib—Children's Division

- 1. Elizabeth Hildebrand (Modeled by Lois Ethel Price.)
- 2. Sue Lowe (Modeled by Vicki June Johnson)
- 3. Barbara Garrett (Modeled by LeRuth Reed)

H.E. IIib—Special Occasion.

- 1. Margaret Ritter (suit.)
- 2. Helen Lawson (evening dress)
- 3. Reita Faye Reed (evening dress)

The judges stated that they simply couldn't distinguish between three dresses in the second year group, and that they were all A-1 pieces of work. Therefore, first place winners were Elizabeth Hildebrand, Sue Lowe, and Barbara Garrett.

Looking Ahead

IF EVER this nation needed an economy-minded Congress, it is now. The cost of government has shot up all out of sight. Current high costs of government represent more than just dollar inflation. What we have had, without clearly realizing it, is a boom in government. This boom has flourished until there is danger of collapse from the very size of the superstructure itself. Our ship of state is indeed top-heavy.

Lumping all government together — federal, state, local — tax collections for the 1948 fiscal year came to 26 per cent of the national income. Perhaps you can see it better if we should divide up that \$55.2 billion of tax collections, to find what was your part. It amounts to \$377 for each man, woman, and child in the nation. You didn't pay that much? Brother, your share was tucked away in the price of everything you spent your money for!

Tax YOU CAN see how much boom taxes have grown, if you compare the above figures with those for 1940. Then tax collections were \$14.4 billion, or 18.9 per cent of national income. The amount for each person in 1940 was only \$109. In eight years, therefore, we have more than tripled our taxes. A lot of it results from the war. We're spending a lot in Europe, certainly. But let us not use that as an excuse for lack of vigilance about the rest of it.

We are inclined to justify boom government and resulting high taxes in a number of strange ways. In depression times, we call for more and more spending. That means taxes, but we put them off until later. Then in time of plenty, we think up more things that government can do "better" for us, feeling sure that

we can afford it. At the same time, we ignore war-time debt, and forget that we ever did any "deficit" spending!

Government **MUST WE** dedicate ourselves to unlimited government? Our federal government has been the worst offender here. Knowing that "power to tax is power to destroy," the founding fathers placed tax power upon Congress. This power was not meant to be abused. Citizens then were aware that government was meant to serve them, not they to serve the government. That is the viewpoint of taxpayers.

But times have changed. Nowadays American voters (though they be taxpayers to the tune of billions) look upon themselves first as receivers of government benefits, last as payers of tax. Our federal government is now making payments direct to 15,830,899 persons. Some of these are necessary. But too many of us, far too many for the good of the nation, have a personal interest in seeing government expenditures continue. Will any of these 16 million bite the hand that feeds them?

You see, this is the way we ourselves can undermine the cornerstone of freedom. Almost without knowing it, we have created a huge central government, then given it power to perpetuate itself. If big government can minimize the dangers of entrenched bureaucracy, keep public waste and extravagance out of sight, and go on taxing — then this thing will continue regardless of the party in power. When big government sells people on the idea of lavish handouts which they themselves pay for by high taxes, you can call this bribing people with their own money!

Neither Here Nor There

Coaches G. W. Tillerson and G. W. Blackburn are going into the house painting business this summer. Instead of spreading knowledge, this summer they will spread a little paint. They are after the business.

Supt. O. T. Jones flew down to Austin on business Wednesday of this week.

The ground is so wet from recent rains that the half inch rain of Tuesday night seemed like a real good rain. It all helps.

Coach Tillerson thinks it possible that Harold Baker will win the mile run in Austin this Saturday at the interscholastic league finals. Tune in on the TQN and listen to the races. Harold may do it.

Mrs. Ollie Carper, attendant of the community center building here, said there were two women up from San Angelo last week looking at the center, and contemplating getting one in Angelo like it. They two ladies really liked this one, she said.

Earl Bailey says the difference between a real cowboy and a drug

store cowboy is in the way they get up each morning and dress.

He says the drug store cowboy gets up and dresses from the feet up—putting on his socks first and on up. BUT the first thing a real old-timer cowboy puts on is his HAT.

When I was a young boy in San Angelo, one of our friends, son of a ranching couple would have me over for a meal now and then. It rather surprised me the first time at the table when both of the men in the house hold ate with their hats on, but I got used to it.

A cowboy feels "plumb naked" without his hat on his head.

NOTICE—Will whoever took my wool rack, please return it when they get through with it. I need it.

Rice Makes the Stew

By FRANCES BARTON

Rice makes the stew. Or should we say that rice makes the stew go further? There are many ways to concoct a stew—you can start from scratch, with one of the less expensive cuts of meat, and raw vegetables. Or you can take leftovers and make up a stew that's quick, easy and a meal in itself. Either way, the addition of a rice base adds greatly to the looks and over-all appetite appeal, especially if the rice is white and fluffy. And the quantities of necessary ingredients can be s-t-r-e-t-c-h-e-d to go a lot further when served on a bed of rice.

A one-dish meal of stew with rice is as simple as A,B,C to prepare, thanks to a new pre-cooked rice—Texas grown and Texas processed—now on the market in this area. And the rice that results is wonderfully light and fluffy—perfect rice every time with each grain separate. No

washing, no rinsing, no draining, no steaming necessary. Home-makers in the Lone Star State who know how well rice combines with other foods, will find this new pre-cooked rice the perfect mainstay for quick-quick meals.

Quick Stew with Rice

Serve a mound of fluffy rice with stew made from leftover meat and vegetables for a thrifty, speedy meal. Simply heat the cooked diced or cubed meat with gravy. Mix with cooked vegetables such as carrot slices or small white onions and continue cooking until heated through.

Pre-cooked Rice

To prepare enough rice for 4 or 5 servings, place contents of one package (5½ ounces) of pre-cooked rice in saucepan. Add 1½ cups cold water and ¼ teaspoon salt. Bring to a full rolling boil. Remove from heat, cover, and let stand in a warm place about 10 minutes. Before serving fluff rice gently with a fork.

S. BOND DRIVE BEGINS MAY 16

The people of Sterling County are being asked to invest a total of \$1,040,000 in Series E Savings Bonds during the Treasury Department's Opportunity Drive, May 16 through June 30.

This quota was announced this week by Mrs. Anna Lee Johnson, county Savings Bond chairman, after she had received the figure in a letter from Nathan Adams of Dallas, chairman of the Treasury's advisory committee for Texas.

Announcement of quotas for this year in all other Texas counties followed a dinner given in Houston Tuesday night by Governor Beaudry H. Jester and at which volunteers from all sections of the state were honored for their work in the Savings Bond program.

The Texas quota in the drive is \$950,000, and the national quota

is \$1,040,000,000.

"All quotas, including ours, apply only to the sale of Series E Savings Bonds," the county chairman said. "In this drive we want to place more Savings Bonds in the hands of average people, who, with the proceeds of their thrift, can enjoy opportunities and advantages not otherwise possible. At the same time, by their investments in Savings Bonds, they are helping to manage our national debt in such a way as to more nearly assure a strong economy in this country. The Series E bonds—popularly called the 'people's bonds'—are ideal for individuals."

She said that Series F and G Bonds would be sold as usual throughout the drive, but that their sale would not be counted

against the quota. The Series F and G Bonds, she explained, are normally preferred by business concerns, organizations and individuals of larger means.

"I urge the people of this county and all of its communities, to participate in this Opportunity Drive to the full of their ability," she said. "The county Savings Bond committee can always use citizens who can devote a part of their time to work in the drive, and I invite them to contact me. To others, I sincerely urge that they buy Savings Bonds and, if possible, to do so regularly through the Bond-A-Month plan at their bank. This kind of thrift is the kind that pays dividends to the individual, the community and the nation."

"When You're Pleased, We're Happy"—Cliff Wiley
BIG SPRING, TEXAS

"PARALYSIS"

By **GEORGE S. BENSON**
 President of Harding College
 Searcy, Arkansas

ON MARCH 14, at the direction of one man, our nation's coal production was choked off. More than 400,000 coal miners were asked to leave their jobs for two weeks to be followed by 67,000 railway employees whose jobs depended upon transporting coal.

The cause for this paralysis to a large section of our economy was not any grievance about working conditions, pay, pensions, or vacations. It appears, however, to result from personal dislike of one man for another. In response to the president's appointment of Dr. James Boyd as director of the U.S. Bureau of Mines, John L. Lewis ordered his United Mine Workers on a two-weeks layoff.

Excessive **WITHIN** his field, Power? John L. Lewis possesses the nearest approach to dictatorial powers of anyone to appear on the American scene. He has defied presidents and congresses, crippled production in the face of economic crises, and flouted the war effort by strikes in wartime. By directly controlling the output of a basic industry, he holds power to strangle our entire economy with a prolonged strike.

With this "spite" strike Lewis has encroached upon two basic fundamentals of our democratic progress: (1) The right of government to make appointments free of pressure, and (2) Freedom to work. This action presents a real danger signal to the American public. It shows what can happen when irresponsible leadership of a great body of influence—American labor—goes on a rampage. The implications are

alarming. If any one individual were powerful enough to dictate governmental appointments with threats of strikes, a new era of demagogues would indeed be at hand. Such power would be potentially disastrous.

Protect **THE WEAPON** of industry discriminate strikes is one which labor leaders alone control. Neither government nor management possess such a power. The rank and file of labor, too because of their organization, are subject to the orders of those leaders. Many labor leaders recognize this situation and act in a farsighted manner. However, the selfish actions of any one leader casts unfavorable reflections on the whole movement.

No more loyal group of American citizens exists than the miners themselves. It is sad irony these people should suffer the brunt of the strike. According to the Associated Press, they will lose about \$68 million in wages during the two weeks layoff. This means \$68 million in food, clothing, and other essentials must be forfeited to the whims of one leader who was elected by workers to safeguard their interests.

This points up sharply the need for adequate labor legislation. Without violating the rights of labor, we must draw clearly the line where those rights end and national responsibility begins. The average worker has everything to gain in such legislation. Labor must be accorded complete protection from irresponsibility—found within its own leadership, or elsewhere.

After one full week of debate on labor legislation, the lines were drawn last week for a show-down on labor legislation this week. The bill before the House was known as the Lesinski bill. It would repeal the Taft-Hartley law and completely re-enact the old Wagner Act. It goes further to

prohibit the States from passing laws dealing with the closed shop or compulsory check-off of union dues.

There are 21 states, including Texas, which now have laws prohibiting or limiting the closed shop. The Supreme Court recently held that the States have the constitutional right to legislate on that subject, and the Lesinski bill is designed to repeal all such laws passed by Texas and other states and to nullify the Supreme Court decision.

In an attempt to preserve the portions of the Taft-Hartley law which experience has shown to be good and to discard certain objectionable features, Rep. Wood of Georgia introduced a bill to that effect. It was offered on the floor as a substitute for the Lesinski measure.

That set the stage for the show-down. A vote against the Wood bill, would, of course, be a vote to

keep the Lesinski bill alive. All members who oppose the Taft-Hartley law and want to return to the Wagner Act and want to prohibit states from regulating the closed shop, would, of course, vote against the Wood substitute.

In an attempt to force the Lesinski bill through, without amendments, the labor business agents over-flooded the capitol with lobbyists from every state in the union. Old timers say they have never seen anything like it—a tremendous pressure drive.

John Lesinski, Chairman of the Labor Committee, and author of the pending bill, described the picture very well in these words:

"We've got all the strategy worked out. The leadership has agreed to fight every amendment to the Wood bill, and if it doesn't get amended, then it doesn't stand a chance. The galleries are going to be packed with Labor representatives from every district to watch the members go up the aisle on teller votes and they'll know what to look for."

The pressure was on—they say never before equalled in legislative history. As this is written, the outcome looks like a toss-up, with the Wood bill appearing to have the edge.
