### MIKE PAYNE HONORED WITH Adding Machine - Cash Register Paper-News-Recor

LEONA BENDER, popular radio star of KTSA says, "Every woman knows light Karo is best for cooking . . . and on the table . . .

### it's Karo for me, the best-tasting waitle syrup of 'em all'

Yes, indeed...biscuits go like hot cakes when you pour on plenty of delicious Karo waffle syrup. There's nothing like it for good eating. Satisfyin' flavor. So rich it stands right up on top of biscuits (keeps 'em light and fluffy). Keep Karo on your table morning, noon and night ... it tops anything!

Ask your grocer for Karo waffle syrup, in pints and quarts

# No other low-priced car even comes close

to matching these important Chevrolet advantages . . .

If you're planning to buy a new car, the one you just can't afford to miss seeing is Chevrolet-for 19 straight years America's best-selling car. The Motoramic Chevrolet offers you so much more than the other low-priced cars that it's hardly fair to compare them. And even the high-priced cars don't have all the advantages that today's Chevrolet offers you.

The beauty's built in-not bolted on! And that makes a big difference-not only in how your car looks today, but in how it will look tomorrow, too. Chevrolet's good looks spring from fine, clean, uncluttered design. The beauty is inherent in the basic contours of metal and glass. There's no excessive bolted-on ornamentation to go out of

style overnight.

#### The Body's by Fisher!

No other low-priced car has a Body by Fisher-but many of the high-priced cars do. That fact alone tells you there must be something extra special about the style, quality and construction of Body by Fisher. And there is! You can see it, feel it and even hear it when you slam the door.

#### Today's most modern engines!

That goes for Chevrolet's new V8 and two new sixes as well. For example, all Chevrolet engines bring you a modern 12-volt electrical system - double the voltage of other low-priced cars. This means quicker cold weather starting and a greater electrical reserve. Then Chevrolet's new "Turbo-Fire V8" has the available with built-in "muscles" to

and develops the highest power per pound of any V8 in the low-price field. It takes valve-in-head leadership like Chevrolet's to bring you truly modern engines like these!

#### A drive to suit your driving!

You can take your choice of three different drives-and every one's as modern as this minute. There's silky, peppery Powerglide, new Overdrive (both extra-cost options), and a new Synchro-Mesh transmission that's as smooth as they come.

#### All the power helpers you want!

Windows, seat, steering, brakes-all are shortest piston stroke in the industry, make driving as effortless as you wish.

And you can even have air conditioning if you like. These things are extra-cost options, of course, but they more than repay you with extra pleasure.

#### Fun is "standard equipment"!

You find that out the first time you take the wheel of a new Chevrolet. Here, you discover, is a car that takes the curves like it's on rails, that steers like it's reading your mind. It seems simply to ignore bumps-and when you stop suddenly, there's no excessive lurching or diving, either. There has never been such a difference in lowpriced cars as there is today-or so many good reasons why you should drive a new Chevrolet. Come in and take the key.

Over Ten Million Chevrolet owners - Two Million more than any other car!

### Pause for Reflection

There is certainly a ludicrous sort of paradox in the C.I.O. Auto Workers' threat to strike for a guaranteed annual wage—in other words, to enforce discontinuance of employment (for both themselves and those who would glady take their places) for the purpose of obtaining continuous employment.

This, it seems to me, is something like turning off a tap in order to keep the water running. Or stepping on the brake pedal, instead of the accelerator, in order to get up a hill.

Certainly the way to make a thing continuous is to keep it go -

ing-not to stop it. Or has some way been invented to circumvent universal law and permit us to be in motion and remain stationary at the same time —or secure continuous production by halting production? Have I missed something?
