Valley Grain Products Schedule Expansion

NEW PLANT CONSTRUCTION PLANNED—Groundbreaking ceremonies were held at 9 a.m. Tuesday morning at the site of Valley Grain Products in Muleshoe in preparation for the construction of their new masa plant which is scheduled for completion in about a year. Company president Willard Pitman was on hand for the event which he labeled as a first of its kind for the Company.

Sudan Alien Faces Murder Charge Following Saturday's Stabbing

What started as an apparent domestic quarrel culminated early Saturday afternoon in the death of a Sudan woman and attempted suicide of an illegal alien residing in Sudan.

Late Monday evening, Lamb County District Attorney Curtis Wilkinson, issued a warrant for the arrest of Oscar Manuel Arras Olivas, 28, on a murder charge. Olivas is charged with the alleged stabbing death on Saturday of San Juana (Janie) Davila, age 29, of Sudan. Mrs. Davila was said to have had as many as 20 stab wounds, according to officials who transported her to South Plains Hospital in Amherst, Texas, where she was pronounced dead on arrival by Earth Justice of the Peace, Beulah Newton. An autopsy has been ordered by Lamb County Justice of the Peace Lloyd Cleavinger, but no reports were available at press time.

Events seem to take shape after alleged witnesses reported the Davila woman's stabbing to local Sudan authorities. The alleged

stabbing is said to have taken place at the Davila woman's home. Olivas is said to have left the scene in a reportedly stolen 1977 yellow Ford LTD, apparently abandoning the auto one mile east and one and three fourths of a mile north of Circleback, a small farming community southwest of Sudan in Bailey County. From that point, authorities believe Olivas to have walked westward and upon finding a pickup stalled 6/10 mile east of Circleback beside the road, attempted to drive away in it. The owners of the pickup, E. G. and Bobby Edwards, arriving on the scene, stopped Olivas when he attempted to leave, and at that time spotted a knife protruding from Olivas'

chest. As they moved toward him, they observed what appeared to be several stab wounds in his left chest. Olivas jumped from the pickup and started walking in a westerly direction, prompting the Edwards men to call the Muleshoe Law Enforcement Center. The Edwards men returned then to the scene to find Olivas lying on the roadway.

Bailey County Sheriff Bob Henderson received information by police radio while enroute to the scene of a report from Lamb County to be on the "look-out for the Olivas man, since he had cut a woman real bad in Sudan."

Upon arriving at the scene, Sheriff Henderson determined that the suspect was in fact, Olivas, and the person that Lamb County officers were pursuing. Lamb County Deputy Jay Livingston was also on the scene within minutes. Olivas was transported to West Plains Medical Center in Muleshoe by Ellis ambulance. Cont. Page 6, Col. 4

Local Law Enforcement Agencies Tag Six

Muleshoe and Bailey County law enforcement agencies stayed busy over the weekend with various offenders and incidents.

On June 20 city police arrested Duvelia Saucedo on a charge of disorderly conduct and abusive language, apparently stemming from a disturbance at the Muleshoe Housing Complex. She was placed in the county jail.

On June 20 Pablo Cano was arrested on a warrant for failure to appear on a charge of speeding and no liability insurance. He was placed in County Jail and released later on a \$214 bond.

Pablo Sanchez Lira was arrested on June 18 on a warrant charging him with criminal trespassing. His bond was set at \$1,000 and

he was later released.

On June 20, city officers arrested Jose R. Porras after the car which he was driving almost struck a patrol car at the intersection of Avenue B and East 2nd Street. Porras was charged with driving while intoxicated after he failed to pass a sobriety test. He was later released on \$265 bond.

Allsup 7-11 reported the theft of gas on June 19, accomplished by the party putting more gas in the car than was paid for. On June 18, Lori Tunnel reported the theft or loss of a billfold while she was stopped at the Target Gas. The billfold was later found by a local resident, minus about \$75.

On June 19, Francisco Gonzales reported a criminal mischief, wherein an auto glass window on the driver's side of her vehicle had been broken out.

Early Sunday morning a vehicle driven by a juvenile hit high water on American Boulevard, causing the auto to go out of control, striking light poles along the roadway. The vehicle came to rest on the Muleshoe Motor Company car lot, hitting an auto parked there which belonged to

Cont. Page 6, Col. 3

Bargains Abound At Sidewalk Sale

Muleshoe's annual sidewalk sale is scheduled for Saturday, June 26 with this year's theme being "A Carnival of Values." Besides the many bargains to be found from local merchants, the Muleshoe Chamber of Commerce will be sponsoring a giant community garage sale where anything from sewing machines to lawn mowers will be available at a minimal charge.

Some of the Muleshoe merchants who will participate in the Sidewalk Sale include Bass Appliance, the Fair Store, Charlie's Originals, the Spudnut Shop and Anthony's.

Also Lindsey Jewelry, Pay and Save, Sam's Sporting Goods, St. Clairs, Main Street Beauty Shop and Wilson Appliance. Others include Thriftway, Lee's Western Wear, Cashway and White's Auto.

Bargains offered will include 75 percent off of mixed ladies ready-to-wear, as well as stemware for \$2 which regularly sells for \$8 and curling irons priced at \$7.50 each. If you need a comb, one business establishment will sell you two for \$1 and you can buy

'Masa' Facility May Boost Economy

Groundbreaking ceremonies were held at Valley Grain Products, east of Muleshoe Tuesday morning in preparation for the construction of their new "masa" plant. Construction on the new facility, which will cost in the neighborhood of two to two and a half million dollars, is targeted for completion in June, 1983.

"Masa" is a corn product which is ground to the texture of flour and used in corn ships, tortillas, taco

shells, tostadoes, tamales and other like products. The new Valley Grain Masa plant, when completed, will be able to handle about 48 million pounds of the product in a year's time. According to manager, Jeff Smith, the plant is being built large enough for a two-phase operation and when the second phase is activated, the plant will be able to double its handling capacity.

"Masa" is made from both white and yellow food corn which is processed by first cooking it in lime water for a period of from 8 to 12 hours, in which time, it is in a continual steeping process. Following the lime water, the corn is then washed, stone ground and dried. The drying temperature is relatively high for this process. After the final steps of drying, the processed masa will then be sacked in 50 pound sacks and ready for shipping.

The shipping in this case will encircle about a 500 mile radius of Muleshoe, supplying manufacturers. Some however, will be shipped to the East Coast by rail. Cities such as Las Cruces, Albuquerque, Dallas, Odessa and Lubbock will be receiving the product. Cont. Page 6, Col. 2

Justice, Municipal Court Cases Increase

A total of 36 cases were filed in Justice of the Peace Tana Holmes court over the past seven days. Sixteen of the violations were for speeding.

Other cases filed included two for no liability insurance, two for no registration in trust; two for defective equipment, two for non valid MVI and three for being excess of 34,000 pounds on a tandem axle. One case each was filed on the following list of violations: failure to yield right of way, failure to stop at a stop sign, failure to display placards on hazardous material, transportation of hazardous material without shipping papers, operating unregistered in Texas, no motor carrier authority, passing in a no passing zone, operating unregistered vehicle and displaying fictitious license plates.

Disposition of 40 cases were filed in Justice Court over the past week. Twenty of these were for speeding violations, two for operation of an unregistered motor vehicle in Texas, two for expired license plates, two for racing, two for no drivers license and two for Cont. Page 6, Col. 1

July Celebration Plans Include Wide Variety

Another big July 4 celebration is being planned for Muleshoe and area residents. A carnival sponsored by the Muleshoe Rotary Club will kick off the events running from June 29 to July 4. It will be located in the new City Park.

On July 2 and 3 at 8 p.m. each night, the Muleshoe Junior Rodeo will feature thrills and excitement for area rodeo fans with bull riding, calf roping and barrel racing. Entry blanks for the rodeo may be obtained at the Chamber office or *The Journal*.

At 8 a.m. on July 3, the 10,000 meter run will start in the New City Park. For further information on this

event call 272-4453.

Also scheduled for 8 a.m. is the annual 4-H Omelet Rodeo. The feed features all kinds of omelets and fixings for breakfast. It is sponsored by the Bailey County 4-H'ers and adult council and will be held in the Bailey County Civic Center.

Here's something all you Mule Shoe Pitchers will be interested in. Registration for the annual Mule Shoe Pitching Contest begins at 8 a.m. in the new city park. Events scheduled are men's singles, women's singles, mixed doubles and juniors. The contest itself is scheduled to get underway at 9 a.m. and is dubbed as the "World's Championship Mule Shoe Pitching Contest."

Kid's activities will begin at 10 a.m. in the Bailey County Civic center. Also at that time, booths in the

civic center will open which promise food, fun and entertainment for the entire family with crowd participation.

At 11:30 a.m. Hawkins and Purdy School of Gymnastics will present a gymnastics and karate exhibition, featuring local students. This has been one of the most popular events in the past years.

The annual Old Settler's Reunion will take place at 2 p.m. in the Civic Center. Those who are going to attend are encouraged to wear a hat -- however, it isn't required, and if you don't wear one, come on anyway.

All civic center booths will close promptly at 2 p.m.

At 4 p.m. the parade line up will begin at the Boy Scout Camp grounds on the south end of Main Street. The parade has become a

tradition in Muleshoe and those who have not yet entered are urged to do so before the deadline. The Jennyslippers will have charge of the parade this year and Parade Marshalls will be Jenne McVicker and Bob Sanders, Muleshoe's Outstanding Citizens of 1982. The parade will commence at 5 p.m.

Finals for the Championship Mule Shoe Pitching contest are set at 6 p.m. approximately, in the new City Park.

The day of celebration will be topped off with the annual fireworks display in the park. Time approximate for this event is 10 p.m.

For further information on any of these events, call the Chamber at 272-4248 or come by the Chamber office. All events are subject to cancellation without further notice if a lack of funds or interest warrant it.

Around Muleshoe

Local and area farmers received from 2 6/10 inches of rain between Muleshoe and Needmore to 1/10 at Baileyboro and even less in the far southwestern parts of the county. From pea size to golf ball size hail was reported in various areas. The West Camp area once again reported heavy flooding conditions of roads and fields with some hail. Sand also levied attacks at whatever crops were left standing in the wake of last week's savage storms which raked the county area. One farmer said when questioned that "it looks like we just don't have anything left enough to worry about the weather." Local officials are planning an all out conference sometime in the early part of next week, to seek some answers to current financial and crop problems which are now confronting the county farmers.

The Muleshoe Men's Softball League will sponsor a slow-pitch tournament on July 3 beginning at 8 a.m. This will be a '3-2 double elimination' tourney and the entry fee is \$50 per team. This fee should be paid prior to June 25 and further information may be obtained by calling Brian Pohlmeier at 272-41-27 or Steve Neptune at 272-5113 in the evening hours.

Listed on the dean's honor roll at Texas Tech for the spring semester from Sudan were Becky Byerley, Cont. Page 6, Col. 1

FRIDAY IS PARADE ENTRY DEADLINE

TEXAS A&M CLUB OFFICERS—The Muleshoe branch of Texas Aggies recently elected their first slate of officers to serve for the coming year. Standing (from l to r) Nick Bamert, Max Crittenden, Kyle Kimbrough and seated Hollye Hooten. The organization has many plans for the coming year, and a membership drive is currently underway.

Baby Shower Honors Mrs. Tonya Gartin

Mrs. Tonya Gartin was honored with a baby shower Thursday, June 17 from 7:30-9:00 p.m. in the fellowship hall of the First Assembly of God Church, Starla Zimmerman, sister of the honoree, registered the guests.

Anita Lobaugh and Beth Watson served sparkling punch, cookies and heart

Whatley, Baker Wedding Announced

Mr. and Mrs. Billy Bob Whatley of Hemphill announce the marriage of their daughter, Rhonda Kay, to Staff Sergeant Ronald Lee Baker, son of Mr. and Mrs. Lilburn A. Baker, of Searcy, Arkansas.

The couple was united in marriage March 26, in the home of the bride's parents.

Rev. H. D. Hale officiated and Miss Becky Felts of Hemphill served as maid of honor. Lilburn Baker, father of the groom, served as best man.

The groom is a United States Army Recruiting Station Commander of Lufkin. In the fall, he will be promoted to E-7, Sergeant First Class, after 10 years in the service.

The bride is the granddaughter of Suzy Whatley and the late R. Q. Whatley of Muleshoe.

The couple reside in Lufkin.

shaped mints from crystal appointments.

The serving table was covered with a white lace over satin cloth and accented with a lace bassinet filled with yellow silk daisies and baby's breath. The honoree's corsage was of white daisies.

Special guests included Mrs. Boyd Magby, mother of the honoree; Mrs. W. W. Wilson, grandmother of the honoree; and Starla Zimmerman, sister of the honoree.

The hostesses gave individual gifts. Hostesses were the Women Ministries of the First Assembly of God Church.

Childrens Home Associates Quilt, Quilt

The New Mexico Christian Children's Home Associates met Monday, June 21, in the home of Vickie Hendricks with seven members and one visitor present.

The group quilted on a quilt. Five members went to Portales to the Childrens Home for the monthly meeting. They took with them Spam, tuna and a quilt.

The next meeting will be in the home of Mable Caldwell on June 15th.

Refreshments of cake and ice cream were served.

MRS. TONYA GARTIN

From Journal Files

40 Years Ago

1942 Mrs. John Smith returned to San Diego, Calif. on Tuesday, after spending a week here in Muleshoe.

Several hundred pounds of scrap rubber had been turned in at each filling station in Muleshoe in the first three days of the two week drive to round up this necessary war item. One hundred thousand pounds of rubber has been set as the goal for Texas in the rubber salvage drive which began Monday.

30 Years Ago

1952 Cpl. and Mrs. Jess P. (Pesky) Winn spent last week with his parents. Cpl. and Mrs. Winn live in Roswell, N.M. They have a new son, Jimmy Don, and a daughter, Bobby Shawn.

20 Years Ago

1962 The Muleshoe Journal will receive the Governor's Traffic Safety Award at the Texas Press Association banquet in Corpus Christi Saturday night, the paper's publisher, Larry Hall, was informed Thursday. Grocery specials include potted meat 8 for \$1; cut green beans 5 for \$1; peas

5 for \$1; pears 4 for \$1; peaches 4 for \$1; tomatoes 4 for \$1; olives 7 3/4 ounce jar 39 cents; 6 ounce jar 39 cents; 6 ounce can lemonade 10 cents and eggs 25 cents per dozen.

10 Years Ago

1972 Grocery specials advertised in The Journal include rib steak 98 cents per pound; chuck roast 68 cents per pound; pork chops 78 cents per pound; swiss steak 98 cents per pound; short ribs 49 cents per pound; mellarine 1/2 gallon 39 cents and shortening 3 pound can 69 cents.

Sudan 4-H Club Meeting Held

The Sudan 4-H Club held a meeting Monday night in the home of Orville Hill with 12 members and five leaders present.

At the meeting it was decided to have a dart throwing booth, at the Fourth of July celebration. Twenty six members will be participating.

Events planned for July include a dress review July 1st in Littlefield; July 12 is the annual 4-H Rally Day at the Crescent Pool at Littlefield; July 16 and 17 will be for a 4-H garage sale at the Littlefield Community Center.

The group voted to go to Lubbock to play miniature golf on August 14. Debbie will send out cards to tell more about it.

People who hold public office sometimes forget that they are supposed to represent all the people, not just a few.

Baby Shower Honors Mrs. Rhonda Hodge

Mrs. Rhonda Hodge was honored with a baby shower Saturday, June 19, from 2:30 until 4 p.m. in the

4-H Girls Fashion Revue

4-H girls who have recently participated in the 4-H clothing project will be modeling garments they have made at the Fashion Revue to be held Monday, June 28, at 1:00 p.m. in the Muleshoe Church of Christ.

There will be four divisions in both the junior and senior categories: daytime tailored, daytime non-tailored, active sportswear and evening and specialty wear. Winners in each division will represent Bailey County at the District Fashion Revue to be held at the Lubbock Memorial Civic Center on July 14.

The 4-H clothing project helps 4-H members build self-confidence and poise by developing:

--appreciation of and skill in making the most of one's personal self.

--judgment and creativity in planning an attractive wardrobe that expresses the life-style of the individual.

--consumer skills in making and purchasing articles of clothing and accessories and in purchasing and using equipment related to clothing construction and care.

--appreciation of and skill in care of clothing.

--ability to evaluate and plan wardrobe needs and clothing skills.

--acquire knowledge of and develop skills in making articles of clothing for self and others.

The 4-H clothing project is supported by the Coats and Clark Company of Stamford, Connecticut.

home of Mrs. Gene Hamilton.

Guests were greeted by Carelean Hamilton and Frances Bland, mother of the honoree, and registered by Wendi Bland, sister of the honoree. A yellow candle in a crystal holder was placed on the registration table.

Denise Bland, sister in law of the honoree, served thumbprint cookies, mints, nuts, and pineapple punch from crystal appointments.

The serving table was covered with a white linen cloth, trimmed in lace, and accented with an arrangement of yellow daisies.

Special guests included Frances Bland, mother of the honoree, and Mrs. H. T. Totten, grandmother of the honoree.

The hostess gift was a walker. Carelean Hamilton was the hostess.

DRAWING-Sheila Wiseman drew the winning ticket at the cheerleaders shopping spree. Jim Shafer was the lucky winner.

Muleshoe Singing Group

The Muleshoe Singing Group met at 7:30 p.m. Saturday, June 19, in the fellowship hall of the Trinity Baptist Church, with 26 present including a group from Clovis, N.M.; Mr. and Mrs. Ralph Miller, Mrs. Opal Blackburn, Mrs. Hattie McGuire, Mrs. Winnie Brown, Mrs. Stella May and Mrs. Estelle Carlile. Also Mrs. Lucille Teal and Burford Hobbs of Portales, N.M.

Fred Wilbanks gave the invocation. Miller helped with the music by playing his guitar, Mrs. Blackburn and Mrs. McGuire played the piano.

Clara Coffman said "Everyone enjoyed the special arrangements and the congregational singing."

There's nothing like an increased income to make a man, or woman, feel like the world is better.

FATHERS HONORED-Fathers, who are residents of the Muleshoe Nursing Home, were honored with a Fathers Day party Friday afternoon, in the day room of the nursing home. The party was hosted by the ladies of the 16th and Ave. D Church of Christ. Ray Griffiths was honored as the "Oldest Father" attending the party. He was born January 22, 1895. Charles Long was honored as the "Youngest Father." He was born December 22, 1918. Back row (L-R) Lynn Bratcher, Charles Long, Harold Mardis, Front row, Alva Garcia, Ray Griffiths, Monica Reynolds (granddaughter of Griffiths) and Elma O. Baker.

The Creative Woman
BY SHERYL BORDEN

"The Creative Woman" show will feature information on machine monogramming, packed lunch safety and how to make fabric covered accessories. The show will air on KENW-TV on June 29 at 12:30 p.m. (MST) and on July 3 at 2:00 p.m.

Kaye McCown, Sales Manager for Ann Silva's Bernina Sewing Center in Albuquerque will demonstrate how easy it is to do monograms on the sewing machine. As Ms. McCown will point out, any zig-zag machine can be used for monogramming. She will explain how to set the machine, how to prepare the fabric and what accessories are needed for this simple procedure.

Another guest will be Jan Newquist, Home Economist and Dietician for the Associated Milk Producers, Inc. in Albuquerque, who will talk about ways to live up the ordinary sandwich routine. She will also talk about food safety and the nutritive value of different packed lunch variations.

To conclude the show, Mary Ellen Payne, Extension Home Economist from Carrizo will demonstrate how to cover many household furnishings with liquid starch and fabric. She'll have on display several picture frames and also a parson's table.

On July 1 at 12:30 p.m. "The Creative Woman" show will discuss general lawn care, tips for better time management in the home, pattern alteration techniques and a sewing tip from Stretch and Sew, Inc.

The first guest is Charles Guthals, owner of Guthals Nursery in Clovis and he'll talk about general lawn care for both cool and warm season lawns. He'll touch on fertilizing, dethatching the lawn, control of insects and watering requirements.

Have you ever asked yourself "Where does the time go?" A special guest on the show will be Sharon Gresham from Arch, N.M. and she will discuss time management as it relates to our everyday tasks. She'll cover such things as daily scheduling, housekeeping hints, home organization and other time management

Muleshoe Schools Show Increase In Annual TABS Test Scores

Harold Horne, superintendent of the Muleshoe Schools, states that the districtwide report on the Texas Assessment of Basic Skills test shows gains in math, reading and writing this year.

These tests were mandated by the 66th Texas Legislature for three levels—grade three, grade five, and grade nine and measure minimum competencies in math, reading and writing (composition).

Each member of the Board of Trustees was given a printed summary of the aggregate results by grade levels which showed specific objectives within the three subject areas at the board meeting Monday, June 14.

Superintendent Horne reports that at the third grade level the math score went from 62 to 64 this year; the reading score went from 76 last year to 78 this year; the writing score increased from 72 to 75.

At the fifth grade level the math score remained the same - 68; the reading score leaped to 76 from 67 the previous year; the writing score increased to 85 this year from 77 last year.

At the ninth grade level the math cumulative score went from 77 last year to 83 this year; the reading score jumped from 71 to 82 and the writing went from 74 last year to 85 this year.

Local Girls In State Competition

Freshman Stacy Sadler of the New Covenant Christian Academy earned a second place finish in flute solo competition at the West Texas Regional State Convention, held April 12-15 in Alpine. The runner-up performance qualified her to compete in the International Student Convention this past May in Denton, Texas.

Sadler, along with Jana Grumbles, who competed in the female vocal solo division, were the only NCAA students to travel to the State Convention this past year. The convention, which is held for Accelerated Christian Education schools in the region, was located at the Prude Ranch near Alpine, Texas.

NCAA music teacher Mona Kinder also made the trip to Alpine, where approximately 400 students competed in various academic and athletic events.

The International Convention was held on the North Texas State University campus and featured A.C.E. students from all over the United States as well as foreign countries.

Joel Bratcher On 1982 Dean's Honor Roll

The spring 1982 Dean's Honor Roll at Wayland Baptist University includes Joel Lynn Bratcher of Muleshoe.

Bratcher, a sophomore, posted a 3.63 grade point average (GPA) on a 4.0 scale for the recently completed term.

The Dean's Honor Roll is announced by Dr. Dan McLallen, academic vice president and dean of the university, at the end of each semester and lists the names of students who carried at least 12 semester hours during the term and whose GPA was 3.50 or above.

A total of 120 students from 13 states and one foreign country were named to the Honor Roll for the spring term.

Wayland Baptist University is a four-year coeducational institution of liberal arts and sciences which recently began its 74th year of operation. Last fall's enrollment of 1,509 students set an all-time record for the 12th consecutive year.

In the third grade the unusual strengths were in three objective areas. In the area of following written directions, over 97 percent of the students tested demonstrated mastery. In particular, over 94 percent

demonstrated mastery in recognizing words by sight and 98 percent of the students showed mastery in spelling. Weaknesses were apparent in four areas. Students had difficulty in ordering whole numbers, se-

lecting units of measure, identifying the main idea, and in punctuation.

At the fifth grade level the strengths were the use of context clues with 96 percent mastery; spelling with 98 percent mastery; capitalization with 96 percent mastery and commonly used forms with 93 percent mastery. Weaknesses in this grade level were geometric terms, figures; identifying equivalent fractions; distinguishing fact from non-fact; and punctuation.

At the ninth grade level the strengths were adding/subtracting whole numbers with 94 percent mastery; multiplying/dividing whole numbers with 90 percent mastery; spelling - 95 percent mastery; capitalization 94 percent mastery; and commonly used forms with 92 percent mastery. Ninth grade students had difficulty in two areas - solving personal finance problems and using ratio/proportion/percent.

Since Muleshoe ISD has already given priorities to increasing skills in language arts and math in the Five Year Priority Plan, special emphasis will be given to make improvement in the weaknesses revealed in the TABS results.

The State Board of Education has set 1983 as a target date to achieve 85 percent mastery of minimum reading and math skills for high school graduates and 1985 for the target date to achieve 85 percent mastery of minimum writing competencies for high school graduates.

RRC Adopts Amended Coverage

The Railroad Commission has adopted an amendment to its minimum liability insurance coverage for motor carriers.

With the change, motor carriers must have \$500,000 minimum in coverage for bodily injuries and deaths and for loss or damage to property in any accident. The property damage coverage does not include cargoes.

In recommending that the Commission adopt the rule change, Transportation Division Assistant Director Rory McGinty said insurance coverage needs to be increased to offset cost increases in recent years for medical care and for repairs to and replacement of damaged property.

He added that the expected increase in liability insurance premiums to motor carriers is "minimal in relation to increased protection afforded to the public."

The minimum amount of coverage required by the Commission for cargoes carried on a single motor vehicle will remain \$1,000. The minimum coverage for all cargoes in a single incident will remain \$2,000.

SCHOLAR, WILD BULL RIDER—Recently the *Journal* ran an article on a local high school bull rider who was preparing to enter the High School Rodeo finals. That young man, Lynn Moore by name, qualified in fourth place in the finals in Amarillo a week ago. He not only ended up in fourth place overall, but was named most deserving bull rider of the Tri State area. Another fringe benefit included in the offer of a full rodeo scholarship from the rodeo coach at Howard County Junior College in Big Springs, Texas. Prior to the finals, Lynn's plans included South Plains, but now, he has happily changed his mind.

City Sales Tax Rebate Check Increases 3 %

State Comptroller Bob Bullock Monday mailed checks totaling \$35.5 million to 966 Texas cities as their share of the one-percent city sales tax for June.

"These monthly rebates are keeping ahead of last year's payments," Bullock said. "With 1982 half over, they are nearly 14 percent higher than the amount we had paid by this time last year."

In the city of Muleshoe, the one percent sales tax share amount for June, 1982 reached \$8,108.90, an increase of \$1348.90 from the \$6760 payment at the same time last year. Total 1982 payments to date (6-6-82) are \$95,720.18, reflecting a 2.90 percent change over the 1981 total payment to date of \$93,011.66.

The city of Morton reflected a total payment for the current June period of \$1,642.68, up from the previous years' June figure of \$1560. Total 1982 payments to date for Morton show \$23,677.22, a 2.52 percent change over the 1981 payment of \$23,094.21.

Littlefield's share of the

one percent city sales tax for June, 1982 amounted to \$10,046.01, up some \$1200 over the \$8,840 of the previous year. Their 1982 payments to date total \$120,260.13, reflecting a minus figure of 5.95 percent change from the \$127,863.04 for the same period in 1981.

In Farwell, the June 1982 payment for city sales tax was \$1,045.20; almost double the \$590 from the same time last year. Total payments for 1982 to date in Farwell amount to \$11,315.88, which is \$977.23 over the \$10,338.65 of 1981. This reflects a 9.45 percent change over the year's period.

Net payments for Dimmitt in the June, 82 period amounted to \$7,569.16, up from the 1981 comparable June payment of \$7,020. Payments to date in Dimmitt, however, only reached \$68,702.34, reflecting a minus 0.91 percent change below the \$69,335.10 in June, 1981.

Houston received the biggest check, \$7.5 million, bringing the total that city has received during 1982 to \$75.2 million. up 17 per-

cent over 1981. The City of San Antonio received a check for \$1.8 million, up 13.5 percent from last June's payment.

The cities of Fort Worth and Austin each received \$1.2 million checks and El Paso received \$822,000.

The City of Amarillo received a check for \$406,000 up almost 13 percent from last June's payment.

Lubbock's \$517,000 payment is up more than 12 percent from June 1981 and the city's payments so far this year are nearly 10 percent higher than last year.

Bullock also forwarded June rebates to the state's two Metropolitan Transit Authorities. The Houston MTA received \$8.7 million, bringing the total received this year to \$83.4 million. The San Antonio MTA got a check for \$976,000, to bring the 1982 rebate total to \$10 million.

The city and MTA sales taxes are collected along with the state sales tax by merchants and rebated monthly to the cities in which they are collected by the Comptroller.

Sudan News By Evelyn Ritchie

Marge Nelson attended her family reunion during the weekend at Lake Texoma. Joy Logan accompanied her.

Mr. and Mrs. Gary Pickrell were in Abilene last week to visit their daughter, Shelley.

Virginia Rone has returned home following a visit with her brothers in Graham.

Mr. and Mrs. Bob Drake have returned home following an extended visit with her sister and family in Virginia.

Butch Hall has returned home from the clinic in Temple, Texas.

Mrs. Patti Miller, Stephanie and Misty were in Morton Thursday to visit her aunt, Dean McBee, and other family members for a get-together.

Needed: Local talent for the July 4th celebration that will be held on Saturday July 3. Entertainment is needed for different times throughout the day.

Brenna Eicke of Ruidoso, N.M. has been here visiting with Mr. and Mrs. Butch Hall and Debbie.

Mr. and Mrs. Dewey Coldiron have returned home from their cabin in the New Mexico mountains where they vacationed the past two weeks. Their son, Mr. and Mrs. Danny Rhoades, Courtney and Candace of Illinois, were here and accompanied them to the mountains.

Roy Engram of Midland visited during the weekend with his parents, Mr. and Mrs. Jack Engram.

Michael Ford, son of Mr. and Mrs. Billy John Ford of Lubbock, returned to his home Tuesday afternoon after visiting her with his grandparents, Mr. and Mrs. Byron Ford, for the past several days.

Visiting with Mrs. Muriel Crouch during the weekend were her daughter, Mr. and Mrs. Don Goodyear of Arlington, who have just returned from Russia where they spent several weeks. Also, her grandson and great-grandson, Dr. Gary Goodyear and Gary Don, also of Arlington.

Floydada Jr. Tennis Tourney Scheduled

The Floydada Junior Tennis Association has set its annual open tournament for July 14-18 at the Floydada High School Courts.

Junior play will begin on July 14 for those 14 years of age and under. Play for those 18 and under is scheduled for July 15. The open events in the tournament will start July 17.

Some of the events scheduled include: boys' and girls' singles and doubles for 14 and under and 18 and under; mixed doubles for 18 and under, and women's and men's singles, doubles and open mixed doubles.

Entry deadlines for junior events is 9 p.m. July 13 and for open events, July 16 at 9 p.m.

For more information or entries, contact Tommy Baxter, Floydada High School coach at 1112 South 3rd in Floydada or call 806/983-5395.

Dwayne & C.K. Castleberry

Because they don't like the hassle of cities, and because they like the people of the Muleshoe area, C. K. Castleberry and his son, Dwayne, chose Muleshoe to set up their muffler and exhaust system manufacturing operation.

They promise, "A Muffler to fit every vehicle, as they manufacture and supply exhaust systems to a wide area from their operation at 422 North First St.

Although 'Kit' Castleberry said they generally serve a trade area of some 400-500 miles, they also ship mufflers to Mississippi and some other states, as well as making overseas shipments to foreign customers.

Castleberry opened Muffler World in Muleshoe in 1980, moving from their Clovis, N.M. operation. He later sold the Clovis location. However, the Castleberrys still maintain a shop in Tucumcari, N.M.

C. K. Castleberry said he has been involved in exhaust system work for more than 30 years, and started manufacturing mufflers in 1981.

"We fabricate the entire exhaust system, and specialize in the manufacture of mufflers and custom exhaust systems," he commented.

Along with the exhaust system operation, Castleberry Muffler World also offers a complete line of pickup accessories.

There are two exhaust system trade publications, and the Muffler World operation has been written up in both publications, complete with pictures, and a history of the operation located in Muleshoe.

Charles Bratcher

"We generally try to have a complete line of auto parts in Muleshoe for our customers," says Charles Bratcher, owner of Bratcher Motor Supply.

According to Bratcher, who purchased the former Bovell Motor Supply in November, 1967, people are accustomed to coming to his location at 107 E. Avenue B as auto parts have been sold in the same building since 1945.

"We try to meet the needs of the community, and generally, we have just about anything in the automotive parts line people will need around here," he added.

Bratcher and his wife, Tommie, are the parents of two children, Joel, a junior at Wayland Baptist University at Plainview and Tami, a freshman at Wayland. Mrs. Bratcher is bookkeeper in the family business.

Bratcher has one other employee in the store, Edward Orozco. Charles Bratcher also wears another name, Mayor Charles Bratcher. In April, he started his second term as mayor of the City of Muleshoe. Bratcher says they handle well known and trusted brands, including Monroe Shocks, the TRW line of auto parts, Dayco belts and hoses, Walker tailpipes and Metro-Rebuilt line, which are rebuilt in Amarillo.

violating written promise to appear. Three dispositions were filed on charge of non valid MVI's and one each for the following offenses: operating unregistered vehicle, failure to display license plates, stopped on roadway, failure to stop at stop sign, defective equipment, expired drivers license and no registration in truck.

In Municipal Court, a total of 26 convictions were recorded the past week. Five of these convictions were for speeding, four for bad checks, three for stop signs, three for no liability insurance and two each for the following: expired license plates, expired sticker, defective headlights, public intoxication, and one for violation of drivers license restrictions. Also one conviction each was filed on the following charges: no drivers license, disorderly conduct and violation of drivers license restrictions.

Cases filed in Municipal Court for eleven speeding violations, two for no liability insurance and one each for expired sticker and disorderly conduct. Municipal court trials were scheduled for Wednesday in the City Hall.

Am...

Cont. From Page 1
daughter of Mr. and Mrs. Elray Rayson, Lori Harper, daughter of Mr. and Mrs. Raymond Harper and Raegan May, son of Mr. and Mrs. Ray May.

Roy Don Dudgeon, a senior from Sudan, has been named to the Dean's list for the spring of 1982 semester at McMurry College in Abilene.

Reports have indicated that Roy Tolk Station began producing electricity on Monday, June 21. Further details will follow as soon as they are obtained.

Rotarians had as their guest speaker Tuesday, Keith Madole, Bailey-Parmer County Juvenile Probation Officer who gave a short talk on his job and responsibilities.

Other guests included Pat and Louis Murphy of Lubbock, Bret and Lance King, A. B. Dozier and Willard Pitman of Valley Grain.

Rotarians are reminded that next Tuesday, June 29 will be installation of officers for the coming year.

Estimates of cotton crop damage in Bailey County indicate 5 to 10 acres of cotton remain, out of 160,000 acres planted, due to recent severe weather, wind and hail.

Ag Leaders Level Charges At Block

"The American Agriculture Movement, Inc. is very disappointed that once again, the agricultural producers have fallen prey to the political games of party line politics," said a AAM spokesman.

AAM members charge that Republican members of the Full House Agricultural Committee, with the exception of Mr. Strangeland of Minnesota, rather than address the serious problems in agriculture, followed the Administration and stopped the only legislation that could provide some assistance to producers. Much rhetoric has been given to cutting the budget. Now, with an opportunity to help agriculture and save one billion dollars in outlays, because of Administration pressure and corporate lobbying through the Farm Bureau, National Cotton Council and the Soybean Association, the Farm Crisis Act was blocked in Committee.

Marvin Meek, National Chairman of A.A.M., stated, "John Block will wear forever, the yoke of presiding over the final days of

TRAILER FIRE--Trailer house belonging to Noe Anzaldua, located at 12th and D in Muleshoe, was destroyed by fire early Saturday afternoon, as firemen worked to contain the blaze. Flames completely engulfed the structure.

Masa...

Cont. From Page 1

duct from Valley Grain's masa plant. Some of the companies which currently use the product are Old El Paso, Lawrey's, the McCormick Company which produces Tio Sancho products and Hains.

Smith products that the 35,000 square foot plant will boast at least twenty additional employees after construction is completed. He is hopeful that with an added work force and an additional outlet for area corn farmers, the plant will help to boost the area's economy in no small measure.

The first production of masa by Valley Grain Products occurred in 1964 in North Hollywood, California. This plant stayed in this location for six years, moving to Madeira, California in 1970 when it was expanded. Madeira is where Valley Grain Products first began in 1955 in the raw graded food corn business. The existing plant size was doubled and then doubled again in October, 1980, still using the same processing techniques.

Officials of Valley Grain consider its process and products unique. Only one other large U. S. based manufacturer of masa is in operation and that is Quaker Oats in Missouri.

Plans are to locate the new masa plant facility next to the graded food corn facility in Muleshoe, since good reliable corn sources are necessary to the production of quality masa. The Valley Grain

plant in Muleshoe has been in operation since 1978.

Dignitaries on hand for the ground breaking were Willard Pitman, president of Valley Grain Products, his wife, Annabell Pitman, and A. B. Dozier, California Plant Supervisor. Many area businessmen and well-wishers were also on hand for the occasion.

Aggies...

Cont. From Page 1
This time-honored tradition had its first origins in Muleshoe this past year and was met with much approval. "Since we are a young organization, we have not made a lot of long-range plans, but are looking forward to working with other members to make this a good organization," said a club spokesman.

Anyone wishing to send in their membership dues by mail can mail them to P. O. Box 190, Muleshoe, Texas, in care of the Texas A&M Club.

Law...

Cont. From Page 1

On June 21, Bruce Chapman of General Telephone reported a criminal mischief occurrence at the Allsup 7-11 Store. A pay phone cradle had been broken.

Over the weekend, Bailey County Sheriff's Office and the Department of Public Safety arrested three.

On June 20, DPS arrested Mark William Owen on a charge of driving while intoxicated. He was later released on a \$265 bond.

On June 19, Raul Quiroz was arrested and returned to Bailey County from Louisiana for revocation of probation. Also arrested for revocation of probation was Gerre Cunningham on June 18. She was arrested in Lovington, N.M.

family farm agriculture in America." He continued, "Farmers across this country will continue to vote their pocketbook, with Republicans losing at least 30 House seats in November."

David Senter, National Director, said, "We will try and revive the bill by making changes. Cotton may have to be removed along with other changes."

"The National Cotton Council, representing non-producer interests, was a big player in getting three Democratic cotton state Congressmen to oppose the bill. It benefits industry for farmers to over produce and keep farm prices low. The bill would have allowed farmers an opportunity to help decide on what their program would be and practice supply management as all other industries do," says Senter, in charges leveled at NCC.

Meek declared, "Farmers should get politically active, seek out those no votes, and bring them home to get a real taste of depression."

Sudan Planning Pioneer Independence Celebration

Sudan's Pioneer-Independence Celebration is scheduled for July 3, 1982, with pioneer registration to be held in the Sudan Hotel Heritage Center Display beginning at 9 a.m. on July 3. The Center will close at 4 p.m. Also scheduled to kick off the day is the "Coin Dig" to be held on the north side of the City Square at 9 a.m. Young pioneers in two age groups will participate in this event.

Beginning at 9:30 a.m. olympic game competition will be held for those from kindergarten age through senior citizens. This event will be held in the city park just west of the Community Center. Ribbons will be awarded to winners. An adult horseshoe pitching contest will also be held in conjunction with the olympic games. This section of the day is scheduled to conclude at 11:30 a.m.

At 11:30 a.m., an old fashioned "beard judging" contest will be featured with many local participants sporting their weeks of beard growth. Winners of this and the olympic games will be announced at this time. The

beard growing contest is sponsored by the Sudan Volunteer Fire Department.

Lunch will be from 12 to 12:30 and booths in the park will provide food and drinks from favorite organizations. At 12:30 p.m. recognition will be made of decorated store windows.

The afternoon festivities will get underway at 1 p.m. when parade participants begin lining up south of the school gym for the big parade at 2 p.m. Shortly after the parade, winners will be announced.

At 2:50 p.m., the local Lion's Club will offer "Bingo" in the Community Center. Then, at 3 p.m., the "Guinea Flight" will take place on the town square, with cash prizes being awarded to the winners.

An old fashioned pie and cake baking and judging contest and auction will be held at 3:30 p.m. Awards will be presented in three age groups - children, teenagers and adults. Judging will be held in the Scout Room of the Community Center. An auction will be held of the baked goods at the announcer's stand.

Beginning at 4:30 p.m. several drawings for prizes will be held. The first will be the pioneer - heritage drawing for those who have registered at the Heritage Center. You must be present to win. At 4:40, the Fireman's Auxiliary drawing for money dolls will be held.

At 5:30 p.m., a community barbecue will be held on the north side of the community center. Tickets for this "feed" may be purchased from a Lion's Club member or at the door.

At 6:30 p.m. a drawing sponsored by the 4-H Clubs will be held for a pair of western boots, followed by the Lions Club raffle with the grand prize being a ceiling fan.

Roll back the streets, cause at 8 p.m., an old fashioned street dance will take place in Sudan. A square dance caller will be on hand for the festivities.

Entertainment is promised throughout the day in Sudan and a reviewing stand for pioneer farmers and or their wives will be located in front of the Hotel-Heritage Center.

AG WEATHER ADVISORY

Scattered precipitation fell last week with Muleshoe receiving a total of 0.8 inch. Maximum and minimum temperatures were approximately 2-3 degrees below normal.

As skies clear, temperatures warm, and leaf area begins to increase, consumptive use will begin to go up drastically. For the past week, consumptive use in dryland cotton has averaged only approximately 0.15 inch per day, while in irrigated corn it has also been 0.25 inch per day.

At Muleshoe the heat unit accumulation to date is 284 and the normal is 270.

At Muleshoe in the next three weeks there is a 12, 58, and 84 percent chance of getting 3, 1, and 0.4 inches or more of precipitation, respectively. The mean for the next three weeks is 1.51 inches and the maximum ever is 6.23 inches.

Local Men's Probations Revoked

According to Bud Street, adult probation officer for Bailey County, probation for two Bailey County residents was revoked in district court last week.

In a hearing on June 16, probation for Lee Edward Murphy and James Louis Morgan was revoked by District Judge Jack Young.

Murphy was originally sentenced to three years probation on April 19, 1982 and was revoked for commission of a subsequent burglary. His original charge was burglary of a building.

On July 24, 1982, Morgan had been sentenced to four years probation on a charge of forgery. His probation was revoked on the commission of subsequent forgery.

We will have better law enforcement in this country when citizens generally are more willing to obey the law themselves.

Hance Levels Volley At Ag Secretary

U. S. Rep. Kent Hance, D-Texas, today accused Agriculture Secretary John Block of "robbing the family farmer of a chance to ease the Depression conditions driving many over the brink of bankruptcy."

Hance leveled his charge after the House Agriculture Committee, with strong urging from the Administration, failed to pass the Farm Crisis Act of 1982 which was sponsored by Hance and Tom Daschle, D-South Dakota.

After four days of hearings and debate, the bill was put to a vote today in the committee and failed to receive a majority. The final vote, 21-21, followed party lines with 20 Democrats and one Republican voting for the bill and 18 Republicans and 3 Democrats voting against the measure. One member of the 43-member Agriculture Committee did not vote.

The Farm Crisis Act would have called for: A White House Conference on Agriculture; a nationwide referendum to be held in July on whether farmers would lay aside 15 percent of their crop land for conservation purposes; establishment of an export credit

revolving fund; government guaranteed loans for on-farm storage facilities; the release of \$600 million in Economic Emergency Loan Program monies; and directs the Secretary of Agriculture to expedite bartering of U. S. agricultural commodities for strategic materials.

"I can't believe President Reagan was properly advised on this matter," said Hance. "The Congressional Budget Office had estimated that this bill would have saved taxpayers almost one billion dollars over the next four years and if the President and his advisors are serious about balancing the budget and helping the family farmer, this would have given them the means of doing both."

"Secretary Block lived up to his name," continued Hance. "He blocked the Farm Crisis Act. He blocked the hopes of America's family farmer. He blocked the President's road to economic recovery and in doing so, he is robbing the family farmer of a chance to ease the Depression conditions driving many farmers to the brink of bankruptcy."

Top O' Texas Rodeo In Pampa

Plans are complete for the 36th annual Top O' Texas Rodeo to be held in Pampa, July 8-10 with performances at 8 p.m.

Beuter Stock Producers of Elk City, Okla. are returning to Pampa to produce this year's rodeo. Clem McSpadden, former senator from Oklahoma, will be at the microphone once again this year to describe the action in the arena.

The 'Country Critters,' a Western Band from San Antonio will cue the Rodeo Events. The 'Critters' will also give a 30 minute concert at 7:30 p.m. before each rodeo performance and will also give concerts in various shopping areas in Pampa each afternoon on Rodeo Days.

Murder...

Cont. from Page 1
ce, where he remains in the intensive care unit, under 24-hour guard by Lamb County Sheriff's officers.

According to Lamb County District Attorney's office, a Bailey County JP denied bond for Olivas on Monday morning. Lamb County District Attorney Wilkinson stated that the next step would be to take Olivas back to Lamb County. Upon his recovery, he will be taken before a Lamb County magistrate, thereafter to be held in custody if bond is again denied until he can be taken before a grand jury on the alleged murder charge.

According to Lamb County Deputy Sheriff Jay Livingston, Olivas was an illegal alien. Witnesses are still being questioned in connection with the incident.

Coleman County Cowboys will play for the rodeo dances on Friday and Saturday nights, July 9 and 10. The dances will be held in the improved Clyde Carruth Pavilion and will begin at 9:00 p.m. each night.

Two of the nation's leading bullfighters and funny-men, Ted Kimzey and Bill Shaw, will once again be on hand for each performance, with some of their top specialty acts for your entertainment.

Entries for PRCA and GRA members will open on June 30 at 1:30 p.m. and close July 1 at 6:00 p.m. To enter, call the Central Entry office at 1-800-525-7157. Gray County entries will be taken at the Rodeo Office in the Chamber of Commerce from 9:00 a.m., June 30 until July 1, 5:00 p.m.

The rodeo parade will be held Saturday, July 10 at 10:30 a.m. featuring entries from all areas of the Panhandle.

Coaches Tournament Set Sunday

On Sunday, June 27 at 2 p.m., the Muleshoe Little League will sponsor a tournament of coaches to help raise funds for the league.

A spokesman for the league stated "We have had many expenses this year such as field maintenance and lights. Some of the lights cost \$65 to replace. We are in dire need of funding to assure the safest playing fields for the league players."

Ladies on the league will act as umpires for the tournament and Brock Sanders, Little League president will serve as scorekeeper or players agent.

The tournament will be slow pitch softball, played under league rules, with each player having to bat opposite of his regular batting procedure. A concession stand will also be open.

YOUR TELEPHONE SERVICE - A REAL BARGAIN

All things considered, talking is a real bargain. The chart below shows how your telephone costs compare against other goods and services you use daily.

(Figures based on data gathered from U.S. Bureau of Labor Statistics from October 1976 to October, 1981)

GASOLINE	125.2%
GAS & ELECTRICITY	85.5%
HOME OWNERSHIP	88.2%
ENTERTAINMENT COMMODITIES	41.0%
MEDICAL CARE	61.4%
FOOD*	56.5%
NEW CAR	38.4%
TELEPHONE**	22%
CONSUMER PRICE INDEX	61.5%

*Away from home
**Basic local service in GTSW's Texas exchanges

Frequently, the convenience of the telephone is taken for granted. For instance, a few things you use your phone for:

- Shop ahead, save gas.
- Make appointments (doctor, sales calls, lawyer, preacher)
- Emergencies (police, fire, ambulance)
- Talking with loved ones in other towns
- Conducting business via long-distance, save on travel cost
- Calling scout troop, civic club, little league team, etc.
- Visit with a friend across town.

Talk is cheap and also a real bargain. For a true picture, divide your basic local service rate by the days in the month. For just pennies a day, excluding long distance and special services, you have your town at your fingertips.

NEWS OF COMPUTERS

More and more business managers are managing their businesses more efficiently thanks to a small computer with ready-to-go programs. The new computer and its software programs can perform a wide variety of accounting functions for the small business office. It does payroll, inventory control, general ledger accounting, accounts payable, accounts receivable, executive office management and financial modeling and analysis.

Called the DECmate Work Processor, and developed by Digital Equipment Corporation, it offers special client accounting solutions for the law firm and dental practice. It also helps construction firms to manage job costing and does either accounting and data processing functions.

Among the biggest advantages of this new computer is that it does both word and data processing. It's not mainly a computer with word processing ability nor mainly a word processor that can do some data processing. Instead it does both and both functions are supported by one company.

A free brochure describing this versatile new computer is available by writing to: Digital Equipment Corporation, Dept. DB 2, Parker Street, Maynard, MA 01754.

The Scientists Tell Me . . . Scientists Seeking Switch To Insects' Defense System

By Robert L. Haney
TAES Science Writer

Insects, one of earth's most abundant life forms, have an immune system that helps them fight off diseases, according to Dr. Stewart Ratner, member of an entomology research team at Texas A&M University.

"If we can find out how the insect immune system works, we may be able to develop agents to turn it off so biological control is more effective," Ratner says.

"It might even be possible to persuade a pest's immune system that the pest's own tissues are an enemy to be attacked."

But before this can be done, the basic mechanisms of the insect immune system must be understood.

For example, how does the system recognize a foreign object? Once the object is recognized, what signal sets off the attack against it? How is the attack coordinated?

These questions, and many others, must be answered before the insect immune system can be manipulated to man's advantage and is the reason for our research for the Texas Agricultural Experiment Station, (TAES).

It would be very helpful if the immune reactions could be studied *in vitro*—that is, in a test-tube culture—where confusing factors can be eliminated and the reactions can be observed from start to finish. Ratner has been developing methods for performing such *in vitro* experiments, using the blood of the tobacco budworm, *Heliothis virescens*.

"We are particularly interested in an immune reaction called 'encapsulation'. This is the formation of a sheath, or 'capsule', of blood cells around relatively large foreign objects such as nematodes and the eggs of parasitoid wasps.

"The capsule often kills the offending organism, probably by suffocating or killing it. Researchers have not had much luck in studying encapsulation *in vitro*."

The TAES researcher's preliminary studies indicate that this may be because the reaction happens too quickly. When *H. virescens* blood cells find themselves in the foreign environment of the culture dish, they rapidly attempt to encapsulate the dish, and each other, and are soon unavailable for further experimentation.

This gives the researcher a choice: perform only those experiments which can be done very quickly or find a way to delay the encapsulation reaction. Ratner and Dr. Bradley Vinson, another TAES entomologist, have concentrated on the latter possibility.

"Our early attempts to delay encapsulation *in vitro* were frustrating," says Vinson.

"Keeping the blood on ice doesn't work. Several drugs were found to prevent encapsulation but they seemed to do so by permanently damaging the blood cells. The cells never formed capsules, even when washed free of the drugs.

"One strategy finally proved successful: the careful use of the enzyme trypsin, which breaks down protein. As soon as the blood is placed in culture it is exposed to a mild trypsin solution for just a few minutes.

"The gently trypsinized blood is unable to form capsules. The ability to encapsulate can be restored, however, by the addition of an extract of ruptured blood cells.

"Why does the system work this way? We are not certain, but can make an educated guess.

"It has long been suspected that encapsulation is triggered when one type of blood cell ruptures after encountering a foreign object. The material released from the ruptured cells seems to signal other blood cells to come in and encapsulate the object.

"In other words, the released material may contain an encapsulation-promoting factor. It could be that the brief trypsinization of cultured blood breaks down the released factor, preventing encapsulation. Adding ruptured blood cells to the culture would provide a fresh supply of the factor, allowing encapsulation to occur.

"The important thing is, we now have a system in which insect blood will remain unreactive in culture while being treated with viruses, hormones, and other agents of interest. Then, upon the experiment's command, encapsulation can occur.

"In this way, the effect of the experimental treatments upon capsule formation can be measured. One of our top priorities is to determine what

component of the ruptured blood cells is the actual encapsulation-promoting factor.

"The information we obtain from this system could one day enable us to apply chemicals which will trick a pest insect's immune system into accepting a parasite, make it susceptible to a disease, or cause it to reject its own tissue.

"This would be an economical non-polluting method to control destructive insects that threaten our supply of food and fiber," Vinson concluded.

FISHING Facts & Fancies

Choosing The Right Line

You may think you have the perfect excuse for when that big fish gets away during your next fishing outing. "The line broke." With all due respect to the fish, it's up to you to keep your line in A-1 condition . . . and that means knowing when to replace it.

In general, the lighter the line, the more often it needs replacement. Line in the four to eight pound test range should be changed daily when under heavy use; 17 to 20 pound test line needs to be changed only after eight or ten fishing trips. The key is to inspect it regularly.

It's easy to check your line by running a few yards of it between your thumb and forefinger every once in awhile as you fish. Fishing experts at the Du Pont Company, maker of "Stren" fishing line, America's leading selling brand, suggest this can be done easily when you're resting in. That way you can feel the nicks and abrasions that you can't see.

You should also avoid storing your line in prolonged sunlight such as on the seat or rear window deck of your car or pickup. Extended exposure to sunlight makes your line hard and brittle.

"Men tire themselves in pursuit of rest."
Laurence Sterne

Americans Spend Billions Keeping Homes in Shape

It's no wonder low-maintenance building products are much in favor when you consider the amounts of money Americans spend each year on home improvements and remodeling.

In the third quarter of last year, for example, expenditures for upkeep and improvements totaled a seasonally-adjusted \$47.4-billion, according to the U.S. Census Bureau. This was \$2.1-billion more than in the third quarter of 1980 and \$5.2-billion above such spending in the same period of 1979.

Re-Siding Popular
Though these outlays reflect, to a large extent, an effort to upgrade the nation's housing stock, they also show consumer desire to replace older products with up-to-date counterparts.

That's why re-siding has become and remains a popular home improvement project. Solid vinyl siding, in particular, has gained the overwhelming approval of consumers.

Not only does it eliminate the cost, time and bother of painting every few years, but vinyl siding will not dent, pit, rust, corrode or peel.

And scratches won't impair its appearance. About the only maintenance required, says the Vinyl Siding Institute, is an occasional washing to keep it new looking for a good many years.

Besides durability and easy-care, vinyl siding has other advantages. It comes in a wide range of colors to blend or contrast with the other color elements of a home and is available in various designs and textures that make it suitable for most architectural styles.

More information on the attributes of vinyl siding is available in a free booklet, "What Homeowners Want to Know About Solid Vinyl Siding."

To obtain a copy, write to the Vinyl Siding Institute, 355 Lexington Ave., New York, N.Y. 10017.

Just another wall in an ordinary house? Not quite. This is solid vinyl siding, which not only doesn't require painting, but won't dent, pit, rust or peel. All it takes to remain new looking for years is an occasional washing with mild detergent and water.

LATEST ARRIVALS

Joshua Lee Lunsford

Mr. and Mrs. Buddy Lunsford of Farwell are the proud parents of a son born at 12:15 p.m. June 18 in West Plains Medical Center.

The young man weighed six pounds and 12 ounces and has been named Joshua.

TOPS Club Chapter 34

TOPS Club Chapter 34 met Thursday, June 17, at 6:30 p.m. in the meeting room of Bailey County Electric. Clara Lou Jones, president, called the meeting to order.

The TOPS pledge was recited and the fellowship song sung. Twenty members answered roll call with the number of pounds they had lost or gained. A visitor, June Arnold, was welcomed. Ruth Clements gave a treasurers report.

Clara Crain and Mabel Wolfe were named best losers for the week. Named first runnerup was Wanda Kemp and second runnerup was a tie between Evelyne Harris and Clea Robinson.

Lauranette Mason, a former TOPS Club member, installed officers for the remainder of the year. Those installed included Clara Lou Jones, president; Clara Crain, vice president; Rose Sain, secretary; Ruth Clements, treasurer; Leavern James and Evelyne Harris, weight records.

The meeting was dismissed with the goodnight song.

 June 18-Frank Butler and Barbara Case.
 June 19-N. C. Moore and Gracelia Berrones.
 June 20-Jewell Glen, Elizabeth Armistead, Carl Evans, Leonard McCormick, and Laura Lunsford and baby boy.
 June 21-Janet Wagon, Ernest Martin, Rhonda Hodge and baby boy, Polly Birdsong and Ronnie Morris.

ua Lee. The couple has another child.

Grandparents are Mr. and Mrs. B. L. Lunsford of Farwell and Mr. and Mrs. Frank Doshier of Clovis, N. M.

Great grandparents are Mr. and Mrs. Frank Doshier Sr., H. T. Edwards and Mrs. Cora Lunsford.

Our own experience is that time, when allowed to work, will solve many problems.

TOPS Weekly Meeting

The new TOPS Club met Thursday, June 17, in the meeting room of Summit Savings and Loan. Edna Haynes, leader, called the meeting to order.

The TOPS song was sung and the pledge recited.

Fern Gregory called the roll with 10 members and one visitor. Sylvia Garcia, present.

Weekly best loser was Mary Garcia, first runner up was Jim Ella Clemmons and Linda Vinsor and Edna Haynes tied for second runner up.

Minutes of the previous meeting were read and approved. The meeting was dismissed with the singing of the goodnight song.

PAW pets are wonderful

Bill Cosby Headlines Paw Month

Actor/humorist Bill Cosby is a firm believer that pets are "everyone's best friend."

That's why he will be leading the country in a special salute to pets during Pets Are Wonderful (PAW) Month, April 4 to May 8.

PAW Month brings together humane societies, veterinary organizations, libraries and schools nationwide in an effort to create greater awareness of the important roles pets play in society.

Research being conducted around the world reveals that pets offer physical and psychological well-being to everyone. They aid in positive child development, strengthen family unity, provide companionship to the lonely and give the elderly a healthy, new outlook on life.

For more information on PAW Month activities in your community, contact your local shelter, veterinarian, animal hospital or library.

Some local residents never realize what a fine place they live in until they go away from home and try life in another place.

SAFETY RULES AND RECOVERY PROCEDURES AFTER A NATURAL DISASTER

PART 1

GENERAL PRECAUTIONS

1. See that your family is safe from possible further harm from flood crests, fire, falling buildings or other hazards.
2. Do not go into disaster areas unless you have real help to offer. If you have left your home for shelter, you naturally will be eager to return. Use caution and discretion. Do not take chances. Washed-out roads, downed power lines, scattered debris and other hazards can cause injuries and death.
3. Cooperate fully with local authorities, rescue squads and local Red Cross chapters.
4. Help locate shelter, food, clothing, transportation, medical supplies and medical help for victims.
5. Obey health regulations for personal and community protection against disease epidemics. Report any violations.
6. If there is any doubt about the safety of damaged or flooded buildings, do not enter them.
7. When entering damaged buildings, use flashlights only, not matches, torches or any open flame. Watch for nails, splinters, holes in walls or floors, wet or falling plaster, undermined foundations and gas leaks. Turn off the gas at the meter or tank. Do not turn on the electrical system until it has been checked by an electrician.
8. Guard against cuts from debris and unseen objects in contaminated water. Disease bacteria can cause serious infection.
9. Do not use food that has come in contact with contaminated water or debris. Some foods can be salvaged if properly packaged (see section, Contaminated Foods). Consult local health officials if in doubt.
10. Sanitize dishes, cooking utensils and food preparation areas before using them.
11. Boil or treat all drinking water until water authorities have tested it and certified it as being safe.
12. If premises have been flooded, flush plumbing drains with water to be sure they are open. Have health authorities inspect sanitary disposal systems.
13. Start clean-up as soon as possible, especially if flooding has occurred. Thoroughly dry and clean house before trying to live in it. Delay permanent repairs until buildings are thoroughly dry.
14. Control rodents and insects.
15. Remove sediment from heaters, fans and motors before using them. To speed drying, start stoves and furnaces as soon as they have been checked for safety.
16. Take all furniture and rugs outdoors to dry.
17. Dry air bedding, clothing and rugs as soon as possible to prevent mildew.
18. Set priorities. Accomplish most important tasks first. Avoid physical over-exertion.
19. Be sure children are safe and being cared for at all times. Never leave young children alone or allow them to play in damaged buildings or areas that might be unsafe.
20. Give special attention to cleaning children's toys, cribs, playpens and play equipment. Boil any items a toddler or baby might put in his mouth. Discard stuffed toys, water-logged toys and non-cleanable toys.
21. Keep chemicals used for disinfecting and poisons used for insect and rodent control out of the reach of children.
22. Wear protective clothing on legs, arms, feet and hands while cleaning up debris. Wear rubber gloves while scrubbing flood-damaged interiors and furniture.

SOURCES OF DRINKING WATER

One of the most crucial human needs is a supply of safe water. Every person in your family needs at least 2 quarts of water or other liquids daily (more in hot weather). You also need pure water for preparing food, brushing teeth and keeping clean.

Ice cubes and other water stored in your refrigerator are sources of safe water. Soft drinks and fruit juices are water substitutes. In addition, the water in water pipes and toilet flush tanks (not the bowls) is safe to drink. Close the valve on the main water line to the house before actual flooding occurs, or as soon as possible.

To use the water still in the pipes, turn on the faucet located in the highest point in the house. This lets air into the system. Then draw these water sources from the lowest faucet in the house.

Your hot water heater or water pressure tank could supply many gallons of safe water in an emergency. Before using water from the water heater, switch off the gas or electricity that heats the water. Leaving the heating part on while the heater is empty could cause an explosion or burn out the elements. After turning off the gas or electricity, open the drain valve at the bottom of the tank. Do not turn the water heater on again until the water system is back in normal service.

If there is any doubt about the purity of these water sources, use one of the following methods to purify the water.

PURIFYING WATER

Unless you are absolutely certain your home water supply is not contaminated, purify all water before using it for drinking, preparing food, brushing teeth or dishwashing. If the water contains sediment or floating material, strain it through a cloth before treating it. If the water is cloudy, muddy or discolored, filter the water through clean cloths or allow it to settle. Pour or draw off the clear water to be disinfected. Water can be purified by boiling or by chemical treatment.

Boiling
Boil water at a rolling boil for 10 minutes to kill any disease-causing bacteria in the water. Add a pinch of salt to each quart of boiled water or pour several times between clean containers to improve the taste.

Chemical Treatment
If water cannot be boiled, treat it chemically. Two chemicals usually found in the home will purify water.

1. Chlorine bleach. Household bleach is a good disinfectant for water. However, check the label to be sure that hypochlorite is the only active ingredient in the bleach. Do not use any bleach which contains soap.

Percent chlorine	Add per gallon of water
1	40 drops
4-6	8 drops
7-10	4 drops
Unknown	10 drops (double for cloudy water)

Mix the bleach thoroughly into the water. Let it stand for 30 minutes. The water should have a slight chlorine odor. If it does not, repeat the dose and let the water stand for an additional 15 minutes. The taste or smell of chlorine in the water is a sign of safety. If the taste or smell of chlorine is not detectable after these procedures, the water should not be used.

2. Iodine. Household iodine from the medicine chest or first aid kit will purify water. The iodine should be 2 percent United States Pharmacopeia (U.S.P.) strength. Add 20 drops per gallon of clear water, and 40 drops per gallon of cloudy water. Let stand 30 minutes.

Water purification tablets available at drug and sporting goods stores also will purify water. Follow manufacturer's directions.

SAFETY OF REFRIGERATED AND FROZEN FOODS AFTER A POWER FAILURE

If flood water has entered your freezer or refrigerator, throw away all food not sealed in metal cans.

If power has been interrupted or the refrigerator or freezer is not working properly, keep the door closed as much as possible to keep cold air inside. This will help prevent food from spoiling or thawing.

Foods in the Freezer
Thawing Rate
With the door closed, food in most freezers will stay frozen for 1 to 3 days, even in summer. Eat foods in the refrigerator and foods that thaw quickly first. Thawing rate depends on:

1. The amount of food in the freezer. A full freezer will stay cold longer than one partially full.
2. The kind of food. A freezer full of meat will stay cold longer than a freezer full of baked goods.
3. The temperature of the food. The colder the food, the longer it will stay frozen.
4. The freezer. A well-insulated freezer will keep food frozen longer than one with little insulation.

5. Size of freezer. The larger the freezer, the longer food will stay frozen.

Emergency Measures

1. Keep the door closed.
2. If possible, move food to a locker plant. To move food safely, wrap it in newspapers or blankets, or place it in insulated containers, such as camping coolers.
3. If you cannot take food to a locker plant, leave it in your freezer and cover freezer with blankets, quilts or crumpled newspapers.
4. If dry ice is available, allow 2 1/2 to 3 pounds per cubic foot of freezer space. Twenty-five pounds of dry ice should keep the food in a half-full 18-cubic-foot freezer frozen for 2 to 3 days. Wear gloves when handling dry ice to prevent burns. In a chest-type freezer, place boards or heavy cardboard on top of the packages and place the dry ice on top of the boards. Place the dry ice on each shelf of an upright freezer.

When Food has Thawed
You may safely refreeze foods if they still contain ice crystals or if they have been kept cold, and have been thawed no more than 1 or 2 days. Treat completely thawed foods as follows:

1. Fruits. Refreeze fruits if they taste and smell good. Fruit that is beginning to ferment is safe to eat, although it will have an off flavor. Such fruit could be used in cooking.
2. Vegetables. Do not refreeze thawed vegetables. Bacteria in these foods multiply rapidly. Spoilage may begin before bad odors develop. Refreeze vegetables only if ice crystals remain. If you question the condition of any vegetables, throw them out.
3. Meat and poultry. Thawed meat or poultry may be unsafe. Examine each package. If odor is poor or questionable, throw the food out. Discard commercially stuffed poultry. Cook immediately any thawed but unspiced meat or poultry. After thorough cooking, this meat can be refrozen.
4. Fish and shellfish. Extremely perishable. Do not refreeze unless ice crystals remain. This food may be spoiled even if it has no bad odor.
5. Ice cream. Do not use any melted ice cream.

Foods in the Refrigerator

1. Meat will keep much longer if it is thoroughly cooked as soon as it is taken out of refrigeration. You can extend your food supply by cooking all unspiced meat immediately and refrigerating it until you are ready to reheat and serve it.
2. Meats apt to spoil quickly are large, solid, unboned pieces of fresh beef or lamb such as round roasts or leg of lamb.
3. Chopped meats such as hamburger spoil quickly. Pork, fish and poultry spoil quickly. Throw them out if they have been out of refrigeration for several hours or more. Do not trust your sense of smell with these foods.
4. Cured meats such as ham or bacon will be safe to eat, even after several days without refrigeration.
5. Eggs can be kept several days in a cool place without refrigeration, depending on the freshness of the eggs.
6. Hard cheese will usually keep well at room temperature. Other cheeses, such as cream cheese, opened containers of cheese spreads and cottage cheese spoil quickly.
7. Milk spoils quickly without refrigeration. Do not use any milk with a sour smell or taste.
8. Custards, creamed foods or any foods containing mayonnaise spoil quickly and are likely growing places for organisms causing botulism poisoning. Throw out any of these foods if they have been warmed to room temperature. Spoilage often cannot be detected as there may be no bad odor or taste.
9. When in doubt about any food—throw it out.

Food to Discard
Do not attempt to save the following foods:

1. Opened containers and packages which have come in contact with flood waters.
2. Unopened jars and bottles with paper seals such as those containing mayonnaise or salad dressing.
3. Containers of spices, seasonings and flavorings.
4. Flour, sugar and coffee in canisters.
5. Paper, cloth, fiber or cardboard boxes, even if the contents seem dry. This includes salt, cereals, pasta products, rice and any "sealed" packages of crackers or cookies within a larger paper box.
6. Dented, bulging or leaking tin cans. Cans which have been tossed about and are found far from their normal storage spot. Seams on these cans may have been weakened or their seals broken, causing contamination or spoilage.
7. Jam or jelly sealed with paraffin.
8. Containers with non-sealed, fitted lids, such as cocoa or baking powder.
9. Commercially bottled carbonated beverages, if the cap is crusted with salt.
10. Foil or cellophane packages.
11. All fresh vegetables and fruits that do not have a peel, shell or coating that can be removed before use; leafy vegetables.
12. Fresh meat, fish and poultry that have been in contact with flood waters.
13. Home canned foods, even if the jar seems tightly sealed. (However, in some cases, tightly sealed home canned foods may be safe, depending on the flood conditions. If so, disinfect as described below.)

PREPARING FOOD DURING A POWER FAILURE

The following foods are safe if you wash and sanitize containers before use, or wash, sanitize and peel fruits or vegetables:

1. Undamaged tin cans. For added safety, boil food before using. Be sure to wash and sanitize container (see below) before opening the can.
2. Potatoes. Wash, sanitize, dry, peel and cook before using.
3. Citrus fruits. Wash well, sanitize and peel before using.
4. Apples and other fruits that can be sanitized, peeled and cooked before eating. Do not eat raw fruit, even if it has been sanitized.

To Disinfect Cans and Commercial Glass Jars
All cans and commercial glass jars must be washed and sanitized before they are opened.

1. Remove labels and wash in a strong detergent solution with a scrub brush. Remove all silt.
2. Boil for 10 minutes and air-dry or immerse scrubbed containers for 15 minutes in a chlorine solution. Household bleaches contained from 2 to 6 percent chlorine. The amount of bleach to add to water would depend on the percent chlorine it contains.

Conserve Water

1. Save liquids from canned vegetables. Substitute these for water in cooked dishes.
2. Drain and save juices from canned fruits. Substitute these for water in salads and beverages.

Percent chlorine in bleach	Volume of bleach to add to 1 quart water	Volume of bleach to add to 1 gallon water
2	3/4 tablespoon	2 tablespoons
4	1/2 teaspoon	1 tablespoon
6	1/3 teaspoon	3/4 tablespoon

Observe Health Precautions

1. Use only safe or purified water for cooking. Boil for 10 minutes.
2. If you are without refrigeration, open only enough food for one meal. Some foods can be kept a short time without refrigeration. Cooked vegetables, meat and meat dishes can be kept unrefrigerated from noon until the evening meal. Do not keep these dishes overnight without refrigeration.
3. Do not serve foods that spoil easily, such as ground meats, creamed foods, hash, custards, meat pies and any food containing mayonnaise. These are potential sources of botulism poisoning.
4. If necessary, substitute canned and powdered milk for fresh milk. Canned milk will keep safely for a few hours after you open the can. If you are using canned milk to feed a baby, however, open a fresh can for each bottle. Use only boiled or disinfected water to mix powdered milk. Use powdered milk immediately after it is mixed.

If safe water or water disinfecting material is not available, use canned or bottled fruit juices instead of water.

Prepare and eat foods in their original containers, if possible. This will help if dishwashing facilities are limited.

THE QUESTION OF CONTAMINATED FOODS

Contaminated food may be a problem following a storm involving flooding. Flood waters may carry silt, raw sewage, oil or chemical wastes. Filth and disease bacteria in flood water will contaminate food, making it unsafe to eat.

Inspect any food left in the house after a flood. Flood water may have covered it, dripped on it or seeped into it. Even though some foods (see below) are protected by their containers, if you are in doubt about the safety of a food, throw it out rather than risk disease.

Use the following guidelines when deciding which foods to discard and which to save.

- Food to Discard**
Do not attempt to save the following foods:
1. Opened containers and packages which have come in contact with flood waters.
 2. Unopened jars and bottles with paper seals such as those containing mayonnaise or salad dressing.
 3. Containers of spices, seasonings and flavorings.
 4. Flour, sugar and coffee in canisters.
 5. Paper, cloth, fiber or cardboard boxes, even if the contents seem dry. This includes salt, cereals, pasta products, rice and any "sealed" packages of crackers or cookies within a larger paper box.
 6. Dented, bulging or leaking tin cans. Cans which have been tossed about and are found far from their normal storage spot. Seams on these cans may have been weakened or their seals broken, causing contamination or spoilage.
 7. Jam or jelly sealed with paraffin.
 8. Containers with non-sealed, fitted lids, such as cocoa or baking powder.
 9. Commercially bottled carbonated beverages, if the cap is crusted with salt.
 10. Foil or cellophane packages.
 11. All fresh vegetables and fruits that do not have a peel, shell or coating that can be removed before use; leafy vegetables.
 12. Fresh meat, fish and poultry that have been in contact with flood waters.
 13. Home canned foods, even if the jar seems tightly sealed. (However, in some cases, tightly sealed home canned foods may be safe, depending on the flood conditions. If so, disinfect as described below.)

Food to Keep
The following foods are safe if you wash and sanitize containers before use, or wash, sanitize and peel fruits or vegetables:

1. Undamaged tin cans. For added safety, boil food before using. Be sure to wash and sanitize container (see below) before opening the can.
2. Potatoes. Wash, sanitize, dry, peel and cook before using.
3. Citrus fruits. Wash well, sanitize and peel before using.
4. Apples and other fruits that can be sanitized, peeled and cooked before eating. Do not eat raw fruit, even if it has been sanitized.

To Disinfect Cans and Commercial Glass Jars
All cans and commercial glass jars must be washed and sanitized before they are opened.

1. Remove labels and wash in a strong detergent solution with a scrub brush. Remove all silt.
2. Boil for 10 minutes and air-dry or immerse scrubbed containers for 15 minutes in a chlorine solution. Household bleaches contained from 2 to 6 percent chlorine. The amount of bleach to add to water would depend on the percent chlorine it contains.

Conserve Water

1. Save liquids from canned vegetables. Substitute these for water in cooked dishes.
2. Drain and save juices from canned fruits. Substitute these for water in salads and beverages.

Percent chlorine in bleach	Volume of bleach to add to 1 quart water	Volume of bleach to add to 1 gallon water
2	3/4 tablespoon	2 tablespoons
4	1/2 teaspoon	1 tablespoon
6	1/3 teaspoon	3/4 tablespoon

may rust. Store containers where they will not be recontaminated.

To Disinfect Fruits and Vegetables

1. Wash in a strong detergent solution with a scrub brush. Remove all silt.
 2. Soak in a chlorine solution for 15 to 20 minutes. (See table above for strength of chlorine.)
 3. Rinse thoroughly with safe drinking water.
 4. Peel if possible, and cook thoroughly before eating.
- Refer any specific questions to health authorities or your county Extension agent.

SANITIZING AND REMOVING ODORS FROM REFRIGERATOR AND FREEZER

If water has seeped into refrigerator or freezer, sanitize it before using it again. If insulation is wet, the appliance may have to be discarded eventually as it may run continuously, frost up on the outside or develop bad odors. Before cleaning and sanitizing a refrigerator or freezer, be sure motor and freezing unit are in safe working order.

1. Dispose of any spoiled or questionable food as described above.
2. Remove shelves, crisper and ice trays. Wash them thoroughly with hot water and detergent.
3. Rinse with a disinfectant solution (1 teaspoon chlorine bleach for each gallon of water).
4. Wash the interior of the refrigerator, including the door and door gasket, with hot water and baking soda, vinegar or household ammonia.
5. Rinse with disinfectant solution.
6. Leave the door open for about 15 minutes to allow free air circulation.
7. If odor remains, activated charcoal (available at drugstores) will soak up persistent odors. Spread about 3 ounces of the fine powdered charcoal on a sheet of aluminum foil or in a shallow pan and place on refrigerator or freezer shelf. Foods can be kept in the cleaned refrigerator with the charcoal. After 6 or 8 hours, heat the pan of charcoal in a moderate (350 F) oven to reactivate the charcoal so it can be reused. Repeat the process until the odor disappears.
8. Even if traces of the odor remain, securely wrapped frozen food will not be affected. When you take out a package, remove wrappings as soon as possible and dispose of them immediately.

SAFETY OF FLOODED GARDEN PRODUCE

If flood waters have covered a garden, some produce will be unsafe to eat. The safety of unharvested fruits and vegetables will depend on:

1. Kind of produce
2. Maturity of produce at the time of flooding
3. Time of year
4. Severity of flooding (depth of water and silt)
5. Duration of flooding
6. Bacterial content of floodwater
7. Likelihood of contamination from sewage or other bacterial contaminants

Immature Produce
In general, fruits and vegetables that were immature at the time of flooding should be safe to eat by the time they are ready for harvest. For additional safety, disinfect produce (see above) and cook it before eating.

Mature Produce
Unless flooding was light and there is no danger of bacterial contamination from floodwater, avoid using fruits and vegetables that were ready for harvest at the time of flooding unless they can be disinfected, peeled and thoroughly cooked. Some fruits and vegetables are more susceptible than others to bacterial contamination.

1. Leafy vegetables, such as lettuce, cabbage, mustard, kale, collards, spinach, Swiss chard and celery, and fleshy vegetables and berry fruits such as tomatoes, summer squash, strawberries and peppers would be highly susceptible to bacterial contamination. Silt and other contaminants might be imbedded in the leaves, petioles, stems or other natural openings of fleshy structures and could be difficult to remove.

2. Root, bulb and tuber crops such as beets, carrots, radishes, turnips, onions and potatoes would be less susceptible to bacterial contamination. Disinfect these vegetables, peel and cook them thoroughly before eating.
3. Produce with a protected fruit or impervious outer skin, such as peas, melons, eggplant, sweet corn or winter squash, should be washed and disinfected before the outer shell, skin or husk is removed. Then shell, peel, or husk the produce, and cook it if possible.

Disinfecting Measures

Thoroughly wash and disinfect any produce as directed above before eating.

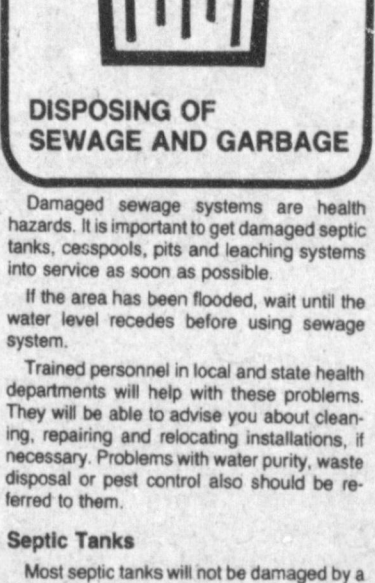

DISPOSING OF ANIMAL CARCASSES

Prompt and sanitary disposal of animal carcasses is necessary to protect the living animals in an area from disease.

Search all pastures for dead animals as soon as possible. Carcasses may have some commercial value, so send them to a rendering plant if possible. If rendering is impractical, dispose of the dead animals on the premises. Use the following procedures:

1. Immediately after finding a carcass, cover it with crude oil or kerosene to keep away dogs, buzzards and vermin.
2. Fat swine are the only animal carcass that will burn satisfactorily. Used railroad ties can be used as starters.
3. Bury other carcasses. Use power equipment if it is available. Choose a site where subsurface drainage will not reach water supplies. Bury the carcasses at least 3 to 4 feet deep so predatory animals will not be able to reach them. If quicklime is available, cover carcasses with it before backfilling. Quicklime will hasten decomposition.

DISPOSING OF SEWAGE AND GARBAGE

Damaged sewage systems are health hazards. It is important to get damaged septic tanks, cesspools, pits and leaching systems into service as soon as possible.

If the area has been flooded, wait until the water level recedes before using sewage system.

Trained personnel in local and state health departments will help with these problems. They will be able to advise you about cleaning, repairing and relocating installations, if necessary. Problems with water purity, waste disposal or pest control also should be referred to them.

Septic Tanks
Most septic tanks will not be damaged by a flood, since they are below ground and completely covered. However, if the tank has been damaged and is more than half full with silt and debris, it must be cleaned. Use a shovel or sewage pump to clean the tank.

Do not use the sewage system until flood water is well below the disposal field.

If tile lines in the disposal field are filled with silt from floodwater, install a new set of lateral tile or perforated pipe in new trenches. Dig the new trenches alongside the old tile lines. Install the tile or pipe according to septic tank system installation specifications. The recommended normal grade is from 2 to 4 inches per 100 feet. Do not use the sewage system until new tiles are laid.

It may be necessary to wait a few days before returning a septic tank system to normal use. It will take some time for water to evaporate from saturated soil so that the tile field will be able to function again. Septic tank starter materials such as yeast enzymes or horse manure will not be needed.

Temporary Sanitation
Until sewage disposal systems are back in normal working order, use any large container with a light-fitting lid for a temporary toilet. Line the container with a plastic bag. After each use, add chlorine bleach or disinfectant to stop odor and kill germs. Powdered lime is an excellent disinfectant as it avoids adding moisture to waste.

A chemical camper's toilet is useful in disaster situations.

Garbage
Try to remove garbage as soon as possible to prevent rat infestations and other health problems. Some garbage can be burned. Bury garbage that will not burn. Dig a hole 4 or 5 feet deep, and cover garbage with at least 18 inches of soil.

ENTERING AND CHECKING DAMAGED BUILDINGS

Safety Precautions in Entering Damaged Buildings

- Use extreme caution when entering any damaged building:
1. If gas lines are suspected to be open or broken, turn off gas at the meter or tank.
 2. Do not touch fallen wires or any metal parts of buildings, such as metal roofs or gutters, which may be in contact with fallen power lines. Get help from your power supplier.
 3. Disconnect the main electrical power switch and any other switches controlling outside equipment or other outbuildings. When touching any switches, stand on a dry board and use a dry stick or rubber gloves to pull handles. Do not use your electrical system until it has been checked and serviced, preferably by an electrician.
 4. Do not enter any building until foundations, exterior walls and other support structures have been inspected and you are sure they will not collapse.
 5. If you must enter at night, carry a flashlight or other light.
 6. Do not smoke or use any open flame.
 7. Wear gloves and heavy shoes. Watch for holes in floors, exposed nails, broken glass and sharp objects.
 8. Watch for loose plaster and ceiling material that could fall.
 9. Open as many doors and windows as possible to remove moisture, odors and flammable or toxic gases. If windows are stuck tight, take off side window strips and remove entire sash. If doors are stuck, drive out door hinge pins with a screwdriver and hammer and remove doors.

Foundations

If you are not qualified to judge the stability of a foundation, hire a contractor to inspect. A neighborhood might join together in hiring a contractor for this work.

1. Examine foundations and supports for undermining. If walls or foundations have settled or cracked, uncover footings and raise, reinforce or brace any settled sections. Be extremely careful when uncovering footings because of the possibility of cavernous washouts.
2. If underlying material has been washed away, fill spaces to within 12 inches of the footing with gravel or crushed rock. Fill the remaining space with concrete reinforced with steel rods.
3. Check piers for settling or shifting.
4. If the building has shifted or the floors have settled badly, it may be necessary to install temporary bracing until extensive work can be done.
5. Drain any crawl spaces that contain water.

Walls and Ceilings

1. Sweep or wash out mud, dirt and debris as soon as possible with a broom, hose, mop, cloth or sponge.
2. Start cleaning from the top floor or upper limit of damage and work downward.
3. Check walls with a level or plumb bob.
4. Brace walls where necessary.
5. Check connection of walls to foundation for material damage or separation.
6. To speed up drying of flooded studding and insulation, remove all siding strips or wall coverings from upper and lower parts of the walls. Do not repaint walls until they are completely dry. This may take several months. Flooded insulation may be ruined.
7. Remove loose or damaged materials. After house is completely dry, repair damaged walls and ceilings. Badly damaged walls can be resurfaced with new gypsum board or plywood.

Floors

Flooded wooden floors will dry out slowly. Do not apply spot heating to speed up drying as this could cause cracking or splitting from uneven drying. However, if the central heating system is operating, keep the temperature of the house at 60° to 70°F to hasten drying without causing additional problems.

1. To prevent further buckling and warping, drive nails where the floor tends to lift or bulge.
2. After floors are completely dry, plane or sand them level.
3. If floors are too badly damaged to be refinished, lay a new floor over the old, or cover with carpet, vinyl or linoleum.
4. If a concrete floor is badly damaged, break it up and install a new floor. If damage is minor, patch with a rich mixture of concrete containing no coarse gravel aggregate.

Roofs

1. Use plastic sheeting or roll roofing for temporary repair on solid deck roofs covered with asphalt shingles, wood shingles or roll roofing.
2. Use patching compounds to repair minor leaks.
3. You will probably have to replace damaged metal roofing on a spaced roof deck.

Presented In The Public Interest By:

Muleshoe State Bank

Medicare Supplement Policies Must Meet Requirements

AUSTIN—Medicare supplement policies sold in Texas will have to meet rigid marketing and coverage standards under State Board of Insurance rules that went into effect June 1, 1982.

The rules bring into compliance with 42 USCA, Section 1395 ss, commonly known as the Baucus Amendment to the U. S. Social Security Act.

Sometimes referred to as "Medigap" policies, Medicare supplement contracts are specifically designed to wrap-around the coverage provided by the federal Medicare program and reimburse recipients for hospital and medical expenses incurred by reason of deductibles, coinsurance or other limitations under Medicare.

The law applies only to supplement policies sold to individuals who qualify for Medicare by reason of age.

"With the new rules, Texans who buy these policies will be given more information about the coverage and limitations in the policy and the information will be in a more understandable form," said William P. Daves, Jr., SBI Chairman.

"Consumers will still have to take the time to educate themselves before making a purchase," he said. "However, with the disclosure now required by our agency comparison of contracts will be easier."

Key provisions of the new standards include requirements for minimum loss ratios, minimum benefit standards, a 'cooling off' period in which to reject the policy and still receive full premium refund, information in the form of a buyer's guide and outline of coverage and disclosure when replacement policies are purchased.

Loss ratios provide comparison of the aggregate benefits under a policy and the amount of premiums collected for that type of contract.

In the case of group policies the rules require the loss ratio to be at least 75 percent.

For individual policies the loss ratio is set at a minimum of 60 percent.

"In shorthand, this means that under the group policy, benefits paid to all policyholders collectively must be at least 75 cents of every dollar collected in premiums. For individual contracts the collective benefits must be no less than 60 cents on the dollar," Daves said.

Policies must also have a notice prominently printed on the first page of the policy or certificate stating, in substance, that the buyer has the right to return the policy within 10 days of delivery for a full refund if, after examination, the buyer is not satisfied with the policy.

A 30-day period is provided for policies issued through direct mail or direct response solicitation.

Two of the most important pieces of information

to be provided are the buyer's guide and the outline of coverage, Daves said.

The buyer's guide is a publication developed jointly by the National Association of Insurance Commissioners and the Health Care Financing Administration of the United States Department of Health, Education and Welfare.

The booklet, titled "A Guide to Health Insurance for People With Medicare" will be provided to each buyer along with an outline of coverage.

The outline highlights major coverage and limitations in the policy and shows those benefits that can be expected under Medicare and those being purchased through the private supplement policy.

There is also information on costs covered by neither Medicare nor the supplemental policy.

An effort is also being made to assist consumers who buy a policy with the intention of replacing an existing contract.

If the application form reveals the policy being considered will replace an existing policy, the consumer is warned to check carefully the effect of the replacement on pre-existing conditions and told to take care to include complete medical/health histories on applications to avoid future denial of claims.

More information about the new rules can be obtained by contacting Policy Approval Division, State Board of Insurance, 1110 San Jacinto, Austin, Texas 78786.

Cuba offers to aid Argentina.

Enochs News By: Mrs. J.D. Bayless

Kenneth Petree and family of Clovis, N.M., visited his parents, the Chester Petrees last Sunday. Their grandchildren, Beckie and Kerre, spent till Tuesday with them and they took them home.

Our area finally got rain from an inch to two and one half inches with strong winds and hail. A lot of the farmers got all of their cotton hauled out. It broke out windows, ruined trees, the roofs on houses, and the road close to Petrees has been closed.

Visiting at the Baptist Church Sunday morning were Mr. and Mrs. Ray Spencer and daughter from Friona. They were guests in the home of her dad, Mr. and Mrs. J. C. Snicker.

Mrs. Buford Peterson met her son, Morris, and picked up the grandchildren, Stephanie, Scott and Steven of Hillsboro for a visit with them. They also attended church with them.

Mr. and Mrs. Johny Cox returned home Tuesday after attending her family reunion at the home of Linda Moore at Weatherford.

Mr. and Mrs. E. N. McCall drove to Lubbock Sunday after Sunday and met his brother the H. G. McCalls and children of Harlingen at Lubbock for a visit.

Two Paycheck Families May Get Tax Relief

If you and your spouse both bring home a paycheck, you may be able to deduct up to \$1500 on next year's tax return. Differing rate schedules for single and married taxpayers gave rise to the so-called "marriage tax penalty" when two wage earners of relatively equal income are married.

The Economic Tax Reform Act of 1981 will bring some relief to working couples who have been subject to the marriage tax penalty. The deduction from gross income is five percent of the qualified earned income of the spouse with the lower qualified earned income, or \$1500, whichever is less.

For example, if you earn \$20,000 and your spouse earns \$8,000, you would be taxed on \$27,600 (\$8,000 X 5 percent subtracted from \$28,000) rather than the

\$28,000 combined income.

Although this new provision should provide some relief for many two-earner families, you should continue to keep track of your withholding to avoid owing additional taxes at tax time.

If you find that you are falling behind during the year, the two most common remedies for underwithholding are estimated tax payments or revised Forms W-4, "Employee's Withholding Allowance Certificate." Estimated taxes are paid directly to IRS in quarterly installments on vouchers that come with the Form 1040-ES, "Declaration of Estimated Tax For Individuals." The 1040-ES comes with instructions and a worksheet to help you determine how much additional tax you must pay to supplement the withholding from your wages.

TSTI Shows Enrollment Increase

The TSTI-Amarillo Admissions office reports a 14.1 percent increase in enrollment for summer quarter classes over comparable enrollment figures for the summer quarter of 1981. A 19.8 percent average total enrollment increase is reported for the 1981-82 school year over 1980-81 figures. A projected enrollment increase of 21.7 percent is expected for fall quarter classes at TSTI-Amarillo, according to Dr. James A. Bird, Executive Vice President for Texas State Technical Institute.

did you know?

At Southwestern Public Service Company, we keep our customers in mind when selecting the type of fuel to use in our electric generating stations. That is why we chose coal as the fuel for our newest power plants. Coal meets the tests of its availability, technical and economical feasibility, environmental standards, and is in line with national energy policies.

Morris Rantz, Fuel Administration Manager, Amarillo.

The economy affects utility companies just as it does all of us. Despite their utility status, utilities still face the problems of inflation, high interest rates, and soaring fuel costs. And regulation does not guarantee that a company will make a profit. Instead, regulators establish a "ceiling" or maximum amount of profit which a utility may make, a profit level which few utilities are able to reach because of the expenses involved in providing reliable electric service.

Jo Barnes, Chief Clerk, Levelland.

Using major electric appliances during "off-peak" hours can help keep down the cost of electric service. Certain times of day, usually between 5 p.m. and 7 p.m., are "peak" hours, when SPS' full generating capacity must be used to meet customer demands. Using your appliances during "off-peak" hours can help balance the load on these facilities and allow SPS to deliver your electricity in the most economical way.

Connie Moyers, Consumer Services Representative, Clovis.

Knowing what electricity is worth is worth knowing. For answers to your questions, call or write your SPS manager.

The Speaker Reports

by Bill Clayton

AUSTIN — The Adjutant General's Department is our state military agency which is composed of the Texas Army National Guard, the Texas Air National Guard, and the Texas State Guard.

There are many Texans who are familiar with this state agency because they or members of their families or their neighbors have served in the guards or are currently members. And, too, there are many Texans who remember the famous "T-Patchers", members of the highly decorated 36th Infantry Division, who served in World War I and World War II.

The Texas Army National Guard and the Texas Air National Guard serve our state and federal governments by providing organized, trained, and equipped air and ground units. State responsibilities require these guards to provide military support for civil defense, support for disaster relief, and law enforcement assistance. Federal responsibilities require the maintenance of units which can be deployed for mobilization programs with minimal postmobilization training.

The Texas Army National Guard was established by Congress but its beginnings can be traced back to the early days of the Texas Republic when militia troops were first organized. Today its size is determined by the Department of the Army based on the estimated need of reserve forces to support war contingency plans.

The Texas Army National Guard includes the 49th Armored Division and numbers 17,510 men and women with 22 battalions and ten separate companies. The main headquarters is Camp Mabry in Austin; additional units of this division are located throughout the state.

The Texas Air National Guard was established in 1947 when the United States Air Force became a separate

ate military service. Involved in daily active support missions for the United States Air Force, the 37 Air National Guard units must be prepared for immediate mobilization and worldwide deployment in national emergencies.

The Texas State Guard is a volunteer, reserve force with 2,100 members which could replace the Texas Army National Guard if it were called into federal service.

Since 1960, the Texas Army National Guard and the State Guard forces have participated in 72 rescue and disaster relief operations. In 1979 when Wichita Falls and Vernon were devastated by a tornado, 2,741 man-days were needed; and in 1980 when hurricane Allen ransacked our coastal areas, 2,188 man-days provided needed assistance.

Financing of our state

military forces is a joint state-federal effort. For the fiscal year 1981 the state supplied approximately \$4.4 million while the federal government contributed over \$100 million to the Adjutant General's Department.

Thankfully, Texas has not seen large scale mobilization to active duty of our National Guard since the Korean War. However, the 49th Division was mobilized during the Berlin Crisis and one company-sized unit was sent on active duty to Vietnam during the Vietnam War.

We pray that no events will necessitate mobilization in the future. Yet, given our turbulent times, we must stand ready to preserve and protect our state and nation. The Adjutant General's Department contributes countless hours of preparation necessary to maintain a state of readiness. We owe the dedicated men and women of our state armed forces a debt of gratitude.

What is more useless than two dandies on TV talking about why this film director did this or that. Who cares?

RIBBON CUTTING—Officials of GTE and local businessmen and women gathered at the newly opened office of General Telephone in Muleshoe Monday morning to welcome the new business to Muleshoe. Shown is Marcia Henry, Mayor Charles Bratcher and local manager, Bruce Chapman.

Consumer price rose 3 percent annual rate in April.

of interest to VETERANS

Eligibility for some veterans benefits depends on the period and duration of military service. An honorable or general discharge is a basic requirement.

Wartime veterans — men and women who served during conflicts specified by Congress — can get some benefits not available to peacetime vets. Totally disabled or elderly war veterans whose income falls below certain limits may qualify for a VA pension. Wartime vets also gain eligibility for a GI mortgage guarantee after 90 days of active duty, compared to 181 days required of peacetime vets who were not discharged for service-connected medical reasons.

At the close of fiscal year 1981 last September 30, 86 percent of all U.S. veterans in civilian life were wartime vets. Of these, 47 percent served in World War II, 18 percent during Korea and 33 percent in the Vietnam era ending May 7, 1975.

Veterans can get more information and assistance from any American Legion Post or Veterans Administration Office. — Jack Flynt, National Commander.

Policing Illegal Aliens--Whose Job?

If you run a small business, shop or office, or happen to know someone who does, this is the time of year you are likely to hear from friends who have a son or daughter looking for a summer job. Typically many high school and college students land their first jobs this way.

But this commonplace activity would become illegal and subject an employer to a \$500 fine if the hiring did not conform to certain government regulations that would be drawn up under new legislation being considered by Congress.

What is Congress up to anyway? Strange as it may sound, it is considering the Immigration Reform and Control Act of 1982. "According to sponsors of the legislation, the purpose is to prevent illegal aliens from entering this country," says Christopher Luis a labor law attorney for the U. S. Chamber of Commerce. "Their method apparently is to regulate the hiring practices of virtually all employers in the United States and to penalize those not following the procedures."

But in the process of attempting to weed out illegal aliens, all U. S. workers would be required to prove they are American citizens or legal alien residents and to establish their identity. The employer, in turn, would be required to verify this information by checking Social Security cards or birth certificates and a driver's license. Without the documents, a person could not be hired.

Within three years, a much more elaborate and costly new bureaucracy would be set up. Most likely, some form of national identification card would be issued and a federal computer bank would be established, probably in Washington. The employers would have to ask each

job applicant for their identification card, check by telephone with the computer to ascertain if the applicant may legally be employed, and register the job transaction. These requirements would cover all employers with more than three employees.

While condemning the hiring of illegal aliens, the U. S. Chamber opposes the regulation of hiring practices and the penalties, or sanctions, against employers. It also maintains the system is too costly, burdensome and unworkable. Everyone knows how easily Social Security cards, for example, can be forged. Not even the government can guarantee their authenticity. The cost, according to Chamber estimates, would run from \$860 million to \$2 billion for the nationwide I.D. card system and \$2.5 billion for the telephone and computer network.

With some 70 million job changes occurring each year in the United States, the gigantic proportions of the bureaucratic task are easy to visualize.

Penalties under the legislation (S. 2222 and H.R. 5872) are: for knowingly hiring an illegal alien, \$1,000 to \$2,000; hiring a job applicant -- even one who turns out to be a U.S. citizen -- without complying with the prescribed rules, \$500 and failure to maintain proper records, \$500.

Illegal immigration involves serious enforcement problems which the government has failed to meet head-on. For instance, it employs more police officers to guard the Congress than it does to patrol our national borders. Congress needs to re-examine its options.

Sudan News
By Evelyn Ritchie

Mrs. Mable Reed, Mrs. Edith Reed, Mrs. Henry Williams and Mrs. Loyd Gilreath recently visited in Colorado Springs, Colo. at the home of another sister, Mr. and Mrs. John Davieau. Their brother, Claud Damron of Hereford accompanied them. They also visited a sister of Henry and other relatives while gone.

The goal of \$1400 was set and has just about been reached for this year's Pioneer-Independence Celebration to be held downtown on Saturday, July 3.

If you haven't already given, why not send or give your donation to Cletis Holloman, Jonelle Bandy or Hoyt Robertson.

This money will be used to sponsor various events during the celebration. This money is in addition to prizes to be given away during the day which have a value of several hundred dollars. Most all merchants have given some form of prize or cash donations to make this a "Want to Attend" get-together.

WANTED LOCAL TALENT
Local talent is needed for the program of entertainment to be presented throughout the afternoon of July 3rd downtown when the Pioneer - Independence Celebration will be well underway. Play time will begin early Saturday morning with something for all ages to participate in. The talent is needed to be presented during the afternoon and evening following the parade. If you are interested or know of anyone who might be, contact any of the members of the committee for the celebration.

Many businesses will be closed on Saturday, July 3, during the celebration so that they and their employees may attend the festivities all day. Some will remain part of the day while others will remain open regular hours or closing early so make plans now to attend.

Mrs. Fred Annen and Mrs. Jerry Annen of Dimmitt visited Saturday with her sister, Mrs. Josephine Fisher and other family members and was here also to attend the bridal shower of their niece and cousin, Kathy Fisher, bride-elect of Ralph Granger, both of Hart.

Mrs. Winona Dudgeon has returned home from visiting her sons, Roy Don, in Abilene and with Ray in Killeen.

Mrs. Maureen Barnett returned to her home in Arlington following a visit here with her daughter, Mr. and Mrs. Joe Kent and also with Phil.

Mickey Stephens will be in Cloudcroft, N.M. for the next two weeks where she will hold a watercolor workshop.

Weekend visitors in the home of Mr. and Mrs. Billy Hanna were their daughter, Frances Grey and children of Vega; his sister, Mr. and Mrs. Clyde Garvin of Albany and a brother, Melton Hanna of Baltimore, Md. Also visiting with them Sunday were Pat and Patsy Kent.

Rev. Truman Johnson, pastor of the FBC was honored Sunday night with an ice cream supper held in the fellowship hall of the church in observance of his birthday. The group presented him a money tree.

Sudan High School cheer leaders will be attending camp Sunday, June 20 to Thursday afternoon. Good luck to these girls.

Vacation Bible School will be held at the FBC June 28 through July 2nd from 8:30 a.m. to 11:00 a.m. All school age children are welcome to attend.

R.A. Camp will be held July 5th through July 8.

Mr. and Mrs. Ervie L.

Kyser of Sunnymeade, California, have been here visiting his sister, Mrs. Polly Kent, Mrs. Mattie Benton, Mrs. Claudia Cooke and Mr. and Mrs. C. R. Brown of Littlefield. Also visiting were Kyser's daughter and grandchildren, Mrs. Ronald Odegard, Ronnie, Jennifer and Ryan of Aurora, Colo.

FBC plans to have their Vacation Bible School from June 28 through July 2.

James Beckett of Midland, and children, Deanna, Belinda, Bonnie and Clarke of Utah visited during the Memorial Day weekend with his parents, Mr. and Mrs. Arnold Beckett and sister, Mr. and Mrs. Dwayne Powell and family. They were all at the Pockets Sunday for dinner.

Mr. and Mrs. R. B. Knox returned home from spending the weekend in Seymour with relatives and friends.

Mr. and Mrs. J. C. Wells were in Brownfield Sunday afternoon to attend the Hartman family reunion at the Dutch Hartman home.

Mr. and Mrs. Jimmy Carpenter and family of Temple were Sudan visitors during the weekend. They finished moving their belongings to Temple, and have their house for sale.

Mr. and Mrs. Jimmy Knox and Wendy of Abernathy visited Saturday with his parents, Mr. and Mrs. R. B. Knox.

Mr. and Mrs. Bill Kuykendall visited in Dallas during the weekend and

Wilson were in San Antonio recently to visit their daughter, Mr. and Mrs. Kenny Wilson and family.

Mr. and Mrs. Bernard

Mr. and Mrs. Glen Cardwell were in Plains during the weekend to attend funeral services for her uncle.

G-623GBR

Look to the G for superior overall performance.

Many say G-623GBR is tops among sorghum hybrids. But now it offers even more.

Funk's G-623GBR is now available as HERBISHIELD seed. Which means you can use BICEP or MLOCEP herbicide to stop problem weeds and grasses without stopping your sorghum.

That's a nice advantage added to a hybrid that already offers an advantage in yieldability. This medium-late hybrid holds the dryland yield record. And growers find it also tops many leading hybrids under irrigation.

G-623GBR offers resistance to greenbugs. Plus excellent resistance to Strain A of Maize Dwarf Mosaic Virus (MDMV-A). And good tolerance to head smut and anthracnose.

G-623GBR stands tough, resists drought stress, and dries down fast, for on-time harvesting.

It all adds up to superior overall performance. Year after year.

G-623GBR, HERBISHIELD or regular. Setting a new pace in sorghum.
