## Democrat Primary Tomorrow, May 7

The Democratic Primary Election will be held on Saturday, May 7, here and all over the state. Offices to be voted on include that of governor, U.S. Senator on down to precinct officials.

### Returns To Be Posted in Front of News-Record Shop

Returns of the election are to be posted on a poster card board in front of the News-Record office that night, said Demo chairman Jack Douthit. In the past the office of the West Texas Utilities Company has been used, but the crowd sometimes double-parks on the highway at that point and creates a traffic hazard on the highway so the returns will be posted on the side street at the newspaper shop. Most usually all returns are in by 8:00 p.m., said chairman Douthit.

All election judges are asked to phone in their box results soon as possible after the closing of the polls at 7 p.m. Phone number of the News-Record is 8-3231. All state and district returns are phoned in to the Texas Election Bureau by the chairman for the compiling of state returns by that board.

Voting will take place at the regular voting boxes over the county. One move is the divide box to the W. H. Owens home from the Bill Ralph Bynum home. Mr. Owens is the judge of that box.

O. T. Jones will be in charge of the box at the courthouse again. H. A. Chapple will be named alternate at that box.

No. 2 box at Mulberry has Mrs. Bill Blair—Reynolds Foster in charge.

No. 3 box—China Valley—at the Humble ranch house.

No. 4—Owens home on divide The No. 5 box will be at the N. H. Reed ranch house with N. H. Reed—Perry Matthews presiding.

The absentee box will be counted by Roland Lowe, S. M. Bailey and Mrs. Martin C. Reed Saturday afternoon.

### Take Your Poll Tax Receipt To the Polls

The new law concerning primaries, both Democratic or Republican, says a voter shall take his poll tax receipt to the polls where he votes in a primary. Then the election officials shall rubber stamp the receipt as "Democrat" in a Democratic Primary. Then that voter is fully qualified to attend his party's precinct or county conventions. (Without such a stamped receipt, he would be barred from the party conventions.)

In case a person has an exemption (coverage) right to vote, he can get a certificate from the judge of election—or if a voter has mislaid his poll tax receipt, he can get a certificate stamped "Democrat." This will not prevent a person from changing over to a Republican later, such as in the General Election in November, because the higher courts have ruled that a voter can change his party affiliation at his own discretion—if he so desires.

But if you want to attend a party convention, you must get your receipt stamped.

### Snake Facts

Doc Daves, who won first prize in the snake killing contest, said his group killed 247 rattlers on the George McEntire ranch during the contest. He said 24 were killed on night toward the last of the contest on the highway around. This probably pertends that they will be out on highways at night as they were last year.

Doc Daves, O. K. Williams and Jack Weeks hunted as a team on lots of the hunts, said Dr. Swann.

ARTHUR BARLEMANN, JR. COUNTY AGENT

The grasshopper survey results for the fall of 1959 have just been released. This survey is made in the fall of the year by the Department of Agriculture's Agricultural Research Service and is an indication of trouble spots for the coming season.

According to the map the area around Sterling City and just north of town had a light infestation of grasshoppers when the survey was made. A light infestation is one where 3 to 7 hoppers per square yard are found.

Even though this was classified as a light infestation area, this does not mean that we will have trouble with the hoppers. It means only that a sufficient number of hoppers overwintered to be potentially a problem. The necessity for control will depend on a number of things, among them weather, condition of vegetation, and the species of hoppers present.

You will remember that last year on May 31, we had an invasion of the pests in town. Many gardens and flowers, including shrubs were damaged by the pests.

A few areas in the United States are classified as moderate with 8 to 14 hoppers per square yard; a very, very few as abundant with 15 to 28; less than a dozen small areas as very abundant with more than 28 hoppers.

The time for the appearance of the pecan nut casebearer is once again approaching. Ordinarily this pest which is damaging to the pecan crop in this area makes its appearance sometime during the month of May; some years they are not a problem.

The time for the appearance of the casebearer depends on the weather conditions, condition of growth of the tree

and the number of insects which overwintered.

Casebearers first appear as small greenish-white eggs on the tips of the small nuts. After these eggs hatch, the insect enters the nut and control is impossible then.

Recommendations for control remain the same as in the past. Sprays containing three pounds of wettable DDT per 100 gallons of water, or two pounds of wettable parathion, or 3 pounds of wettable malathion, or 5 pounds of wettable toxaphene are recommended. If DDT is used, six pounds of wettable sulphur should be added to control mites which may build up following the use of the DDT.

We will watch the trees around town and try to keep you advised as to the time the bearers hit. However, it is possible that they can move in between editions of the paper and get the majority of the crop damaged during that time. It would be well for each tree owner to keep an eye on his own trees.

There are quite a few sowbugs or pillbugs around. These little gray pests roll up and resemble a pill when they are inactive or when disturbed. They are injurious to tender young plants, usually cutting them off at the ground. Usually they will be found under pieces of wood or between the stones or bricks outlining a flower bed. They prefer dark wet areas when not working.

These creatures, which are not considered insects, can be easily controlled. Chlordane, DDT, or lindane dusts applied directly to the area where they feed usually eliminates them. Commercially prepared baits are available which work very well if you prefer to use this type control.

Sales for the first three months of 1960 were \$5,167.00 which represents 25.8 percent of the county 1960 goal. First quarter sales in Texas were \$45,480,326 or 27.5 percent of its 1960 goal of \$165,500,000.

"Savings Bonds are an investment in the future. For

years the Treasury Department sold bonds as a doorway to opportunity—a new home, college education, retirement, or some other dream of the future. But today the future itself is threatened. With the dawn of the missile age, the world is suddenly aware that one more war could be the last. The hope of the age is for peace—for some guarantee that there will be a future to look forward to. We must have PEACE POWER—the strength to keep the peace; the knowledge to make it lasting. Savings Bonds, in building economic stability, help strengthen America's peace power", said Brooks.

Farm Bureau representatives from a dozen counties who discussed with me many agricultural problems. Their views were helpful and appreciated.

In Kimble County—my old home and birthplace—where I operate a small ranch, things are looking up. Range conditions were never better. Livestock are in excellent shape, and I was told prices in general are holding up very well.

I spent a night in Lampasas where I met with a number of my friends at an early morning breakfast. That gave me a chance to discuss with them some of the current issues in Congress and the prospects for constructive legislation being enacted at this session of the Congress.

From Lampasas I went to Austin where I addressed a large gathering of Texans at a luncheon at the Driskill Hotel who were attending the annual meeting of the Texas Historical Association. My subject was "King Fisher", whose activities along the Rio Grande during the 70's was a part of the dramatic history of that turbulent period and area where he operated.

Fisher was killed (probably assassinated) with Ben Thompson in San Antonio on Mar. 11, 1884. People are still talking about that tragedy which rocked the entire state at the time. The subject provides an interesting bit of research in the border history of that period and the people who help make that history.

**Our WASHINGTON Letter**  
By Congressman **O. C. FISHER**

During the Easter recess I enjoyed a pleasant visit to the district. It gave me an opportunity to see and talk with many people and to see how the country looks following the winter rains. Even though people were pleased with range and crops, they were needing more rain. And since my return to Washington, I received good news of more rain in several areas.

In San Angelo I addressed the annual convention of the West Texas Chamber of Commerce. I met with a group of
